## Stalin's «New Economic Policy»

by Stalin at a meeting of industrial dir- iets at Work, page 42.) ectors on June 23, and made public only two weeks later, has brought him paeans of praise from the bourgeois press. in working conditions," writes the New York Times on July 7, "is scarcely shorter than the restoration of private property rights and liberties would be." Fortunately, the elation of the Times contains more wish than reality. There is no doubt that the Times and other to have the Soviet Union restore those "private property rights and liberties" which have demonstrated their "superfority" over the socialist system by the "not a single factory manager can remisery and want that have accompanied the workers or the particular trade unit. There is equally no doubt, however, ion. It must be observed also that in that the whole spirit of Stalin's "new policy", the formal and official adoption factory council elected by the workers. of which is naturally a foregone conclusion, marks a step backward from the

#### How the New Policy Is Made

The manner in which the new turn is made is in itself characteristic of the state of affairs in the Soviet Union today. In the days before the bureaucracy had fastened its talons upon the party. questions of this sort were subjected to a thorough discussion by all the Communists, and the non-party workers as well. Every phase of the problem was treated in so adequate and clear a manner that it had the guarantee of the collective wisdom of the party. What is more, its promulgation was assured of an understanding and a popularity among the workers. The best instance of this mode of procedure-the only one proper for a workers' state-was the manner in which Lenin first introduced, had adopted and applied the New Economic Policy. In the present case, the new turn was first made public upon the sole responsibility of the infallible General Secretary. The party-much less the working class as a whole-was never consulted. The speech was deliberately withheld until the day when the Central Committee session opened. In this way, Stalin insured himself against any discussion at all. The Central Committee, a purely "advisory" body to the General Secretary, will adopt the measures proposed by him without a word.

What is the essence and the spirit of quieting continuation of the course which the sole hands of the administration. the Stalinist bureaucracy has pursued Pre-revolutionary relations between mas-

The "new economic policy" enunciated | the wild grass of bureaucratism". (Sov-The "forms and means of mass control" have been reduced to a minimum under the Stalinist regime. The Besse-"This latest step back toward the normal dovskys and Agabekovs can rise to the top in the party because the workers do not control them from below. The Ramzins, the Ossatchis, together with the Menshevik conspirators, can go on for years with their criminal work because collective leadership has not only

"developed into individual responsibility" bourgeois commentators would prefer but because there is no control of the workers over this "responsibility". In 1927, Stalin told the American trade union delegation to Russia that planetary crisis of capitalism and the main at his post contrary to the will of every factory and workshop there is a which control the activities of the management of the particular enterprise," revolutionary policies of Lenin's time. etc, etc. Since then, the decree was is

sued abolishing all these guarantees, which were exaggerated by Stalin even then. "Members of the Communist party, union representatives and shop committees." said the decree, "are instructed not to interfere in questions of management." (Freiheit, September 9, 1929.) Socialism cannot be built up by bourgeois specialists. Not even the foundations for a socialist economy can be laid by them. They can be of great aid, but the main task requires the wholehearted, enthusiastic, collective, initiative, self-activity and participation of the proletarian masses. They must not merely "descend into practical world", they must also guide, manage, control, check the plans by the results; they must feel in the most intimate sense of the word that they, the working class, are the rulers of society, the masters of their destiny. Without the stubborn maintenance and deepening of this feelamong the workers, industries may grow to fabulous proportions, all the efficiency systems in the world may be introduced, but a socialist society will not be erected. Four years ago, the Left Opposition issued the warning in its Platform:

#### The Opposition's Warning

"The regime within the shops has deteriorated. The administrative organs are striving more and more to establish for execution. The Negro masses have

their unlimited authority. The hiring been tried and sentenced in the lynching the new measures proposed? It is a dis- and discharge of workers is actually in atmosphere of the court.

The day draws near when eight in nocent Negro boys will be taken one by one to the electric chair to have their lives burned out by the fatal current. The sadistic bourgeoisie of the South, thirsting for blood, is determined to add ist justice.

The day of the execution which was in this manner that the murderers of Massachusetts kept Sacco and Vanzetti and taken off its guard. Only the revolutionists pointed out then as they are pointing out today: What will save these victims from the savages who plan their

death is an iron-willed mass movement of the workers. The courts and their justice are a cruel illusion. They exist only as the instruments of our enemies To expect justice for the oppressed from the hands of their masters is to expect water from stones. Rely upon your own action, upon the power of your united efforts!

The stay of execution must now be utilized to the maximum. The workers and the Negro masses as a whole who have rightly made the cause of the Scottsbore boys their own cause, have no interest at all in "saving the fair name of Alabama" or in "vindicating the jusleave these aims to the whining liberals -black and white-who have played such a shameful role in the whole case. Let them continue their chosen task of saving the face of the decadent institutions of a barbaric ruling class. We want to save the lives of the Eight. # IN THE INTERNATIONAL OF LABOR **Reviews and News of the Working Class and Revolutionary Movements**

## The Spanish Masses in Motion -- Where Is the Communist Party?

#### The Strikes

In the Communist Party

In our notes of the preceding week, we said, in speaking of the failure of the Organization has met. It was decided Pasajes (Guipuzcoa) strike that the to propose to the E. C. of the official movement failed, due to the Civil Guard party the formation of a united front and the massacre brought about by the of the Communists for the approaching government troops, but that the Pasajes electoral struggle. Contrary to the good strike was the point of departure for will of the comrades of the Madrid or a strike movement around economic de- ganization, we witness the provocation mands, involving the entire Spanish working class.

A week has passed, and the strike move ment has taken on genuinely broad and deep proportions. In Coronia, the match workers are on strike. At Gijon, there is a strike of the street car workers. At Lugo, the painters are striking. In Morocco (at Mellila) there is an electricians' strike, and small economie strikes are spreading everywhere. Yesterday, however, the biggest and the most serious strike since the coming of the Republic, broke out. The mine workers of the Asturias have gone on strike with the demand of a two peseta wage increase and a seven hour day. The Republican government, refusing to grant the seven-hour day, has taken the side of the mine operators. The reformist and social democratic leaders also ordered the workers not to go out on strike at the same time organizing groups of strike breakers. On the very first day, the miners were already confronted by the reformist scabs. The first day of the strike brought about a bloody conflict, in which several workers fell, badly wounded.

At the time this is being written, the strike is still solid. More than 60 per cent of the Asturian miners are out, although the reformist leaders claim that only 20 percent of the workers responded to the strike call. But even Maura. the minister of the Interior, is forced to admit that more than nine thousand of the twenty-five thousand workers are on strike. And at that, the figures of the minister are far from accurate. The strikers are determined to hold out against the aggression of the mine owners' agents. It is a very difficult situation for the social democrats, and the workers are beginning to distrust the promises of the socialist ministers.

#### The Partial Election of May 31

Sunday, Maye31, was the day set for the election of the municipal councillors, still contested after the elections of April 12. As was predicted, the elections were a success for the socialist republican coalition. The monarchists were victorious only in a few smaller villages. Only one candidate of the C. P. was elected, at Seville.

But it must be established that in the

At Madrid, the Autonomus Communist

of the partisans of the irresponsible and adventuristic E. C. Some of their followers came to provoke the meeting but the two hundred workers assembled en-

ergetically repudiated them. We must note the almost childish faith that the comrades of the organization still have, in their hope to make a united front with the E. C. and their belief in a reaction against the bureau crats of the E. C. C. I. Fortunately many of the comrades are beginning to realize that the crisis in the C. P. of Spain is only one manifestation of the crisis in the Comintern and that in order to bring about the unity of the Spanish Communist movement it is necessary to bring about Communist unity internationally and at the same time to change the political course of the C. I.

But the comrades must be convinced by their own experiences that the Left Opposition alone has a genuine Communist line. That is what the Spanish Communist Opposition and its monthly, Communismo which was acclaimed by the comrades in Madrid, Bilbao, the Asturias etc., are actually doing.

events of the First of May and their part in them. It is sufficient merely to we decided to demonstrate with the party publish it to refute all the calumnies at the places designated by them, alcirculated against these valiant com- though we were certain that these derades.-Ed.

On the occasion of the First of May, our organization, in an open letter published in the Pali ton Takseon No. 20 proposed a united front to the party in the demonstrations at the different places where the workers have been accustomed to assemble each year (since 1918), at Renti, between Athens and Piraeus. We motivated our proposals on the fact that although our proletariat is very militant in its economic struggles, it has not yet reached the point of fighting for political aims and of rising against the state, which prohibited all meetings in our city. In our opinion, it was our duty to go where the workers are to be found at present, in order to lead them much further.

In their paper, they called us social de mocrats and splitters, who with this action want to pull the workers out of the town and therby play the game of the bourgeoisie. (We must not forge last year: while the party dissipated itself in militant demonstrations of 5 and 10 people, our organization organized a meeting at Renti, which was attacked by the police, who after a battle lasting

The First of May, 1931: already emphasized this weakness of the which it took place, were entirely differ-Communist movement, resulting from the ent than during the previous sessions of the social democracy, marking above all Stalinist regime, which has made of this party too a bureaucratic appendage to the influence of the world economic crisis and the role of the U.S.S.R. on the the Centrist International. The P. C. P. in the past had virile cadres, a well-Polish proletariat. Never since the war have words so "filled with revolutionary rooted influence among the mine workers, the metal workers, etc.--today ardor" been pronounced, never has a there is nothing or almost nothing left more severe condemnation of the capitalist regime fallen from the lips of of it. One of the last strongholds, the shop councils of Upper Silesia, where the P. P. S. leaders. For the first time since the resurrection of independent the influence of German Communism Poland has a congress of the Socialist moreover, should play a positive role, was lost in the last elections to the party expressed itself resolutely against benefit of the P. P. S. Only the dea war with the U.S.S.R. and even generation and the decline in influence for the defense of the U.S.S.R. (!).

**Reasons for "Radicalization"** 

of Communism permits the P. P. S. to consolidate itself and to play at "radi-One asks what it is that could "radi colization".

The Opposition at the Congress had almost half the votes, and yet no split took place, which proves once more that Communism is far from being a menace to the P. P. S. In Lenin's time, so profound a discussion in the ranks of the social democracy would have led to the passage of whole organizations to Communism.

#### **Results of "Social Fascism" Theory**

Today there is nothing of the kindthe masses disillusioned by the policy of eral observation that with the develop- the bloc of the social democracy with ment of the crisis and the ever growing the bourgeois and peasant Left demand action against Fascism but at the same time retain their confidence in the P. P. S. and let themselves be lulled by the Left leaders. Can more disastrous examples be found of the Stalinist tactic toward "social Fascism", a tactic which admirably serves the social democracy at the time when the crisis is undermining all its foundations?

The question of the U.S.S.R. was raised a number of times at the con-To be sure, they take good care not to gress. The deputy ('zapinski, who delivpoint out the concrete roads for attain- ered the report on the world situation, ing it, but the mere fact that the social made the following demagogic proposals in connection with the dangers of war: democracy which has remained the most "Manuilsky said at the last Plenum of loyal servitor of the bourgeoisie, permits the C. A representative of the Soviet Telegraphic Agency is present. Let him write to Moscow that the P. P. S. these demonstrations, which frequently is not only not preparing a war, but that it will oppose with all its strength nothing. A few weeks ago, four mine an agression against the U.S.S.R." workers were killed in a strike and a These words were warmly applauded by the delegates and those present on the platform.

It must be avowed that the change is profound. The P. P. S. which, as re-We did all in our power to assure the cently as the First of May, condemned been accepted and special joint commis- bourgeoisie itself-an orientation inau-

petty bourgeois population. This is further evidence of the decline in the influence of the socialist party. The workers are more for the radicals, who, in the question of the reprisals against the Communists, are developing a more de magogic and seemingly more radical activity than the socialist strike breakers and butchers of the revolutionary workers.

Suprises are expected from the elec tions for the Constituent Assembly. A change of sentiment in the electorate is bound to benefit greatly the radical-socialists, who are the most radical wing of the bourgeoisie. It would mean a break in the hold of the socialist party as a workers' party, as it still styles itself.

It is regrettable that the C. P. has not yet been born. But for the leaders of the official C. P. without a following, "the party exists and works".

#### Financial Panic

Yesterday, the peseta fell in a most alarming fashion. Several banks and financial concerns ceased functioning. At Madrid, the panic is enormous. There is the talk of the resignation of Indalacio Prieto, the minister of finance. The population is very restless because, due of some violent interruptions, both of to the depreciation of the peseta. there is an increase in the cost of living and the most frightful starvation and misery for the working class. Due to the suspension of financial operations, a few but to cite a few in demonstration will industries, particularly in the building trades, working on a credit basis have been forced to foreclose. Thereby, the fall of the peseta has caused a direct increase in unemployment. We shall deal more thoroughly with this question in our notes for the coming weeks.

This fact cannot remain unknown to the Polish workers and unemployed, among whom is being manifested a strong current of sympathy for

The leaders of the P. P. S., who know very well the currents agitating the working class, did not hesitate to make a turn and to proclaim themselves defenders of the U.S.S.R., which will hardly prevent them tomorrow, in a different situation, from being the most agressive enemies of the U.S.S.R.

Where Is the Communist Party?

But where is the Polish C. P. in all this? Here again is a consequence of Centrism which by its policy of adventurism or else of opportunism, lets go by the best opportunities for winning the proletariat and weakening the social democracy.

When the Left Opposition, two years ago, advanced the slogan of "economic collaboration with the U.S.S.R." with the aim of strengthening Communism and unmasking the social democracy, the leaders of the P. P. C. should about opportunism and did everything to sabotage the realization of this slogan. Toized between the U.S.S.R. and the capitalist states, but Communism is incapable of drawing any profit from it for its propaganda and of unmasking the social democracy.

The congress of the P. P. S. threw a light upon two things: (1) the working class is in a state of effervescence and on the lookout for new roads; (2) the which can bring about deep changes in the social democratic mass. Only the mistakes of Centrism, only the incapacity to which the Stalinist leadership has reduced Communism prevents the Polish proletariat from turning away from the olutionary road. -FELIX.

#### THE MILITANT

THE WORKERS' FRON'

## Rank and File Struggle in the New York Auto Workers Carpenters' Union

With Greater New York having 32 local them, adopted a ruling that only three unions, of the carpenters' organization, it is looked upon as a sort of barometer of that organization, and therefore, be- anyone of the T. U. U. L. had come in sides its own problems, is often confronted with problems concerning the or- tion then was eight members. The memganization as a whole. By this I mean that measures aimed to come up for about three times but did not attend very adoption will usually be tried out in the regularly. In the meantime our resolu-New York District before they are known | tion on the 6-hour day was in the press of in other vicinities. And so it hap- and, at their re-appearance, we were pened on Oct. 8 1930. The N. Y. Dist. asked by them to withdraw the resolu-Council, on a roll call vote, adopted a tion and have it substituted by a 7-hour motion which if enforced would compel day! This we could not do because we every member in the Metropolitan Dist. are of the opinion that the 7-hour day to have his photograph on his working would not bring much relief, with so card. This was bolstered up with the pretense of making it impossible for any asked to increase the representation from member to loan his card to non-union three to ten. This we also could not do men.

#### **A Reactionary Proposal**

Hereupon L. U. 2090 got busy and elected a committee which went before photo would have on members participating on picket-lines or belonging to any political organization; that it would furnish the police, the Immigration Bureau as well as the Dept. of Justice, with direct and immediate identification, that it would postively lead to having many of our best members thrown into jail, if not deported etc. Thus our organization with its foolish rulings would unconsciously play in the hands of the police and the bosses. It further pointed out that the action by the D. C. was illegal, for the fact that such steps are a permanent rule necessitates the amending of the D. C. by-laws; this must be done through a referendum vote in order to comply with the laws of the general constitution of our organization. Proceeding from that, the result was that many locals appealed to the First Vice-President of the organization, who found himself compelled to disapprove the action of the D. C.

But what was most important of all was that out of this the Committee itself has learned its power, by the use of united action, and on Jan. 3, 1931 was reorganized as the Emergency Committee. It was first officially represented by two and is now officially represented by five locals. It issued over five thousand leaflets. Its demands are 6-hours a day, 5-day week, division of work. shop and job control by locals, etc. (With these demands the Emergency Committee appeared on the floor of twelve locals , in some cases twice or three times, in order to achieve its point. On Feb. 2, a visit was made to Local 608. When the loyal supporters of the D. C. denied the committee the floor to speak the committee decided to revisit that local.

the meantime, contact was made with few of their members in the day-room id on Feb. 9, when the committee repeared before Local 608 the chairman as compelled by vote of the membernip to grant the floor to Holtkamp, a ember of the committee. Two weeks

members from any L. U. are allowed to vote. This was already in effect before contact with us. The official representabers of the T. U. U. L. had met with us many men out of work. Then we were

because out of the three locals represented, two were not able at that time to increase their representation on account of such representation being made various Locals in N. Y. and drew their up of voluntary members. So they withattention to the dangerous effect this drew. Their next step was to put up something in opposition to us, so they organized a Open Formu, which was held on March 1, at 143 E. 103rd St. with Morris Rosen as speaker, and in spite of their bragging of 1500 members in the B. S. W. I. L. they were not able to mobilize more than forty of whom about one third were adherents of the Emergency Committee.

#### Lessons for the T. U. U. L.

Our last election in L. U. 2090 should have taught them a lesson if they are still in a position to do their own thinking. Last year the T.U.U.L. had seven candidates elected in Local 2090. Six months later, five of them left the T. U. U. L. At this June election they got on the platform and denounced the whole organization which did not exclude the rank and file, by whom, ten minutes later, they expected to be elected. The result was that they elected two this year, against seven twelve months ago. In analyzing the activity and policy of the T. U. U. L. they are bound to drift into ocmplete sectarianism if not a complete collapse, begause of their total isolation from the workers. For instance, along in March it was disclosed that in certain shops under he jurisdiction of Local 2090 and Local 1164 there were over forty men working at the rate of from five to eleven dollars per day. The complaint was made to the D. C The council took action and recovered two weeks, for each man the difference between \$5-\$11 and \$13.20 back wages.

The council failed o penalize by not removing these men and replace them with new men. The question came up before all their work, the demonstration of the above two locals, which voted to organize a joint protest demonstration be- not bring great results but considering and the manufacturers were satisfactory fore the office of the D. C., but since this the facts, it was the only body ever heard to all concerned and law and order re demonstration was not started by the of to raise a voice of protest against igned supreme? In whose interest was T. U. U. L. or any of its members (who the action of the bureaucrats in the B. it to bring in this plague that is "ruining

Hillman's New Racket - The «Campaign» Against Racketeering

(Continued from page 1) the union? Who is the enemy that, in ers? Why does Hillman evade mention the words of Hillman, has in the last of the causes of this phenomenon in the seven years undermined the peaceful re- New York market? Why does Hillman lations between the union and the manufacturers, taken hold in our industry and challenged that they "will share in the fight against this evil? union government or will do away with the union officers"?

The Daily News Record, official organ of the clothing manufacturers, gives an answer to this question in a series of talks on the situation in the industry It points to the racketeers in the A.C.W. whom Hillman has in mind but is not ready for strategical reasons to mention openly. These racketeers are the officials of the Cutters' Union, Local 4, under the leadership of Ph. Orlofsky who have always defied and interfered in the plans of the organization to unionize the market, and engaged in racketeering. These officials are the ones whom Hillman is determined to clean out of the union, and this campaign is a continuation of the one launched by Hillman a couple of years ago and which was suspended by him for strategical reasons

because Orlofsky's position was - tO(

The challenge made by cutters' officials Communist party members of the union racketeers in the union. Hillman refused man their support in his house-cleaning him in his campaign.

#### Who Are the Racketeers?

Who then are the racketeers and what connection is there between Hillman's campaign and the contemplated "general strike" in the New York market? After a careful examination of all this mess of statements and declarations in the trade, union and general press by all parties involved, one cannot but draw the only logical conclusion in regard to the campaign launched by Hillman against racketeering and his program of a general strike: Hillman is performing one of his usual publicity stunts and is maneuvering a new betraval of the A. C. W. membership in the coming renew-

al of the agreement with the clothing manufacturers, distracting their attention from their real problems and preventing a real house-cleaning of racketeering in the union by the members themselves. How did racketeering find its way into the industry when, according to Hill--W.H. H. | the industry" and causing unemploy

Hillman traces the beginning of racketeering in the industry back to the year 1924. Is it a mere coincidence that in that year Hillman's campaign against the Left wing in the A. C. W. and Beckerman's underworld rule in the New York organization was inaugurated by

Hillman? How does Hillman read his own history? Was not Hillman the one the "house-cleaning" of the Amalgamthat enthroned the underworld chief- ated. They both have one objective: to tains in the Joint Board and gave his promote the manufacture of men's clothblessings to the terror and gangster ing in New York through establishing methods in the cutters' local which have reigned up till recently when the mem- of the clothing workers. Hillman is the bership has finally risen in protest spokesman of the manufacturers in this against them? Was not Hillman's aim as in every other campaign of the A. C. at that time to enforce "law and order" W. The talk of a general strike and a and piece-work for the tailors and low fight against racketeering is only a smoke costs of production for the manufactur-iscreen to blind the union membership to

Hillman is squaring not expected to do.

his own accounts with his competitors in the racketeering game in which they are all engaged as officers of the A. C. W. concern and agents of the clothing manufacturers...Hillman, in this campaign, is pursuing the aims of the clothing manufacturers. It is sufficient to glance through the articles in the Daily News Record written on the situation and the statements made by C. D. Jaffe, president of the Clothiers Exchange to reach this conclusion.

#### **Bosses with Hillman**

The Daily News Record definitely sides with Hillman in his campaign against the officials of the cutters local, net because of the racketeering practises of those officials but because it wishes to see the "aristocratic" cutters whipped in line by Hillman with the rest of clothing workers who are the majority in the industry and have submitted to lower standards and worse conditions in the shops. The manufacturers' organ is working hand in glove with Hillman in their common aim to efficiency-unionize" the industry.

C. D. Jaffe had this to say on the situa

tion: "No one need regret joining the union in any constructive effort to build up this market and clease it of its underworld element. We need a strong, not a weak union, and I do not believe in vacillating on this point. The collective bargaining agreements have conclusively proven to the retailer throughout that they need have no fears of strikes or polonis, or excessive costs in the mar-

The remarkable unity of aims and identity of language between Hillman and the clothing manufacturers are revealed in the above quotation from the manufacturers' monthpieces. But these are shown still more clearly in their concerted actions. At the conferences with

Mayor Walker and his committee Hillman and the representatives of the Clothiers' Exchange appeared together as one body and pleaded for protection of their common interests in the coming strike. Both parties are then engaged in the campaign launched by Hillman to "improve" the conditions of the underpaid tailors and both are concerned in low costs of production at the expense the work of betrayal Hillman is out to at their meetings. They will also pre-

As far as the evil of racketeering and gangsterism is concerned, the A. C. W. over the organization, and this he is

#### A Real Challenge

The real challenge to racketeering must come from the rank and file of the union membership. A real general strike for the improvement of conditions can only be undertaken by the membership, not on the initiative of the manufacturers and their agent, Sidney Hillman, against whom it should be directed. Hillman has not launched his campaign for these aims. He is in the A. C. W. to serve the bosses and his own interests. This campaign for the so-called general strike and against racketeering have once more proved it. The A. C. W. membership will benefit by this experience added to the many gone through by them in the past. Their struggle against their betrayers will be so much more intense and will bring victory so much nearer.

-ALBERT ORLAND.

In this time of economic depression and widespread surrender on the part of the workers to the bosses' campaign of wage-cutting, it is encouraging to find a labor union still militant enough to refuse to allow its members to accept such a cut. At the last meeting of the Automobile and Vehicle Workers' Union here in New York, the chairman of a committee representing the workers in the largest auto body shop in New York (said chairman, by the way, being

a member of the Communist League of America) announced that the men in his shop had been asked by their employer to take a 15 percent reduction in their wages. The immediate reaction of the mem-

bership was to denounce the proposal and a number of members took the floor and expressed bitter resentment against it. When the vote was finally taken, it proved to be 100 percent against accepting the cut.

This organization, once a powerful Left wing union, the leadership of which was in the hands of the Communist party, has for the last three or four years been steadily losing in membership, and its strong at that time. prestige as a fighting union has suffered a decline. When, in 1928, the either to refute or confirm prevalent union affiliated with the A. F. of L. the rumors and references in regard to the adopted the policy of the party leaders to answer. To a rank and file commitand dropped out of the organization- tee of the cutters' local who offered Hillnot with the intention of forming a new union, but solely because of the childish of their local. Hillman declined to disattitude, "if we can't have things our close the names of the officials involved way, we won't play." Without, appar- in the racketeering practises and rejected ently any doubts on the wisdom of their with contempt their cooperation offered action, they thus left to the labor fakers the leadership of several hundred work-

ers. In the whole organization only one Communist—a member of the Communist League—was left to carry on the fight for a militant union. He succeeded in convincing two other members of the union that the policy of the Communist League was correct, and with their help set to work to win back the ground that had been lost by the action of the Communist party deserters. Slowly but surely his efforts began to tell. The union will shortly start a determined organization drive, and due to the general dissatisfaction among auto workers in the city, there is every reason to expect that the union will regain its former strength. -GADFLY.

Stalinists to the Hoover moratorium was a shocking revelation of the theoretical degeneration which has been brought in- | is an echo of the fear of the ruling class to the Communist movement under the and not an expression of the interests of flag of "socialism in one country." The their exploited victims. Russian Opposition attacked this theory from the very start as the cover for a fundamental revision of the Marxist doc-| say it and he does fear them. In that trine of revolutionary internationalism tending to turn the attention of the national Communist parties away from the | be deprived of its function if bourgeoisproblems of the international revolution to the pacifist office of "frontier guards" who would "defend" the Soviet Union while a complete socialist society was being constructed there. The first com- tion is not without importance to the ment of the Daily Worker on the new American intervention in Europe is another demonstration of the fact that comrade Trotsky and his Marxist fellowthinkers did not overstate the case.

Reducing all complexities to one common formula, the Daily Worker had no est base of support in the social-demodifficulty in explaining the moratorium proposal to its readers. The issue of June 22, following the publication of to the capitalists to rely on this support Hoover's statement devoted a leading editorial to the subject. From this liable. statement of Hoover, says the editorial, "there can be no further doubt of the position of the United States as organizer and leader of the international anti-Soviet front." Hoover's statement, continues the editorial, "should alarm every worker as an immediate war threat against the first workers' Republic." On this single theme the entire editorial is developed. As to the direct and immediate aim of the American proposal-to head off the proletarian revolution in Germany-and as to the connection of the proletarian revolution in Europe with the defense of the Soviet Union and the consolidation of its victory -on these questions the editorial of the Daily Worker had not a word to say. And that was not a mere "oversight". The theory of socialism in one country began by overlooking the international revolution and removing it from the REVIVING "THE APPEAL agenda of practical tasks of the day and could not do otherwise, for the two conceptions are incompatible. The American students are faithful to their Russian teachers-and paymasters.

Yesterday the oncoming proletarian revolution in Spain was viewed with uneasiness in Pravda because it threatened to upset the European equilibrium and endanger the Five Year Pian. Today the German revolution is overlooked in the Daily Worker necessity of popular agitation sheets which sees only "defense" of the Soviet Union-as though there could be far out beyond the boundaries of the any real and permanent defense except the revolution in other countries. The whole sequence of blunders and crimes alleled effectiveness. It reached hunwhich has flowed from the Stalin lead- dreds of thousands, at times even milership-in Russia and on a world scale -- | lions but nothing came of the movement have proceeded from a theory that is fundamentally false.

# Manuilsky Makes an Unintentional Admission

the Communist International has held, the Eleventh Pleum which recently met without announcement of its sessions or attention to its deliberations or results, undoubtedly occupies the lowest rung in the ladder of the Comintern's history. The whole impression gained from the Plenum is that it met in a vacuum. Yet there are one or two spots of interest and instruction in its proceedings. Ma-

terial points of interest in a vacuum? There is no contradiction here. As in natural science, there is no absolutely perfect vacuum. The same holds true of the Eleventh Plenum. The instructive point in this case is furnished-again the contradiction is only apparent-by an unwitting admission from Manuilsky, the main reporter.

"In what way," he asks "does the higher stage of the present revolutionary upsurge as compared with preceding ists "in China" or the "Communists in years express itself? In the fact that in a number of capitalist countries, and in a number of separate actions, the Communists are beginning to assume the independent leadership in the class bat-

"The Communists in China are not now carrying on a victorious Northern Expedition, occupying Shanghai and the other industrial centers, nor is Chiang Kai-Shek striking them in the flank at the moment of victory. The Communists are now independently, as a party directing the Chinese Red Army of peasants and workers against Chiang Kai-Shek, against all the counter-revolutionary generals and the united forces of the whole imperialist front. In the matter of winning the hegemony of the proletariat in the national-revolutionary movement they have made since 1926 a to a new height as a result of its class differentiation.

"The Communists in Europe are not that every great revolution is a people's at this moment leading general strikes or a national revolution, in the sense that on the scale of the English strike of it unites around the revolutionary class able to reconstruct itself around a new 1926, which was betrayed at the decisive all the virile and creative forces of the class core, it must be reconstructed ideomoment by the Purcells, Citrines and nation and reconstructs the nation around logically and this can be achieved only other leaders of the General Council a new core. But this is not a slogan, . "SAVING-GERMANY" FOR WHOM?

If the Hoover proposal for the suspension of war debts and reparations fails to hold back the proletarian revolution in Germany it will not be for lack of support in the capitalist camp. [test of events rendered a different ver-In the chorus of praise which has greeted the new intervention in Europe from all the bourgeois parties and factions there is not a note of discord to be heard. Everything is in close harmony, as though all the parts had been assigned and rehearsed in advance in readiness for the signal of the maestro. The unison is even superior to that of a practised orchestra and more firmly based. They are all united behind the scheme by the compulsion of common interest in the existing social order which is directly menaced by the situation in Germany. That is the real secret of the marvelous unanimity.

From this standpoint one of the applauding voices deserves a special mention. On July 1 Norman Thomas hailed the moratorium policy as a step to save Germany and Europe from "collapse". Speaking before the Union Theological Seminary as quoted by the Times of the following day, he said: "The collapse of Germany under the Hitlerites or Communists threatens the collapse of all Europe, or even all of Western civilization. Although Hoover's plan does not go far enough, it is good as far as it goes." To Hoover and his Wall Street backers this point of view is irreproachable. Support from the Left is necessary for the politicians of reaction, and highly valued by them. But how should the workers many of whom imagine Thomas speaks in their interest regard this utterance?

Thomas is fearful of a "collapse of all Europe, even of all of Western civilization", regardless of whether this collapse occurs under the Communists or the fascists. It would be in place to ask first of all what such a "collapse" under the Communists would consist of, and who stands to lose and who position adds an amendment to make the could answer that question without a moment's hesitation. They thought of it

with a great temporary success. It "reached the masses"—with sound and fury signifying nothing except poverty of

thought and ignorance of Marxian fundamentals. Theory was drowned out by the noise of empty agitation in those halcyon days before the war. But the dict. The Appeal To Reason became a vulgar war-monger. Marxian theory stood its ground and became the foundation of a new proletarian movement. Because of that experience and to the extent that the present-day movement of the militant proletariat has assimilated the lesson, it stands on nigher ground and cannot be dragged back again to the swamps of yesterday. Agitation in itself possesses no revolutionary virtue. Only to the extent that it proceeds from revolutionary theory, and is constantly tested and regulated by it, does agitation serve as an impetus to the development of a class movement. The first and

foremost task is to advance this idea and struggle for its hegemony.

At bottom this is what the struggle of the Oppositon signifies. It derives its historic importance not only from its implacable antagonism to the old reformist agitation under the old and discredited trade-marks. The inadequacy of the old movement on this basis has been sufficiently demonstrated, at least in the eyes of the workers' vanguard. A more acute and immediate danger is the attempt to smuggle in the outworn methods and conceptions under the flag of Communism. The blustering agitation of the Centrists, debasing all the theoretical traditions of the movement borrows more than a little on this account. The ignorant ballyhoq about "mass work" Opposition is at bottom nothing more

than this. So you will give up the slogan, "Go Reasonism, open and disguised-the Oprevolutionary policy!

## Economic Crisis -- What Next

(Contined from last issue)

which has been developed rapidly may age fast. Aviation may be considered

to be in the first stage; electric refrigeration, whose sales increased over 10 percent in 1930 over 1929 in the face of depression, in the second: radio set

manufacture has quickly reached the third stage; and such old industries as textiles or coal, which have a sort of private permanent depression of their own are in the last stage of capitalist decay. The change from one stage to another is clearly illustrated by the automobile industry. In 1908, the industry was still young, from an economic standpoint and registrations at the end of that depression year were 38 percent higher than at the beginning, and in

1921 there was an increase in registration of 13 percent. In 1930, however, registrations increased less than 1 percent, in other words, only a few more cars were made than were scrapped last year.

Applying the foregoing to the situation even in the socalled "prosperous" times ending in 1929, we find a number of industries which were sharply depressed and were unable to make satisfactory profits: textiles, coal sugar, lumber, meat packing, agriculture in general, fertilizers, furniture manufacture, paper rubber, shipping, and leather. To these may be added a group of industries which is able to make a profit in good times, but whose profits rawhich is heard on the fringes of the Left pidly shrink in depression times: automobiles, clothing, building materials, iron and steel, machinery, mining, railways, etc. The relatively "young" in-

pensating markets (China, India) volves the perspective of deep revolu tionary crises and the resperate alternative of war. 3. There remain two typical reformist illusions-increasing the real wages of American labor at the expense of "national savings" (in reality profits), and the peaceful, voluntary coordination of industry and labor

ica's competitors. The forcible acqui

tion of such colonies or of other co

to minimize or eliminate the "pro motive" in favor of a planned syste of national economy. We shall not i sult the patient comrades who have fol lowed us this far by an elaborate exposure of the futility of such expectations.

#### **Political Perspectives**

We come back, therefore, to the probability of a prolonged period of wagecutting as the last expedient to maintain a dwindling profit margin. Thi must result in acute wage struggles; and as the workers come to realize the hopelessness of the situation. these wage struggles will be transformed into poli tical struggles. The great drawback to stuffs, such as wheat, cotton, copper, and the development of political class consciousness in America hitherto has been the possibility for the worker to solve place in world economy was as a sup- his problems individually, by escaping into the growing and prosperous bourly industrialized nations of Europe. Am- | geoisie, instead of on a basis of class solidarity.

A proof of the close connection betweer "economic old age" and increasing acute ness of wage struggles which gradually asume a political tinge, is found in the history of the labor movement in two of the oldest and least profitable American limited class in foreign countries; in this industries, coal and textiles.

If the above analysis is correct, these ing picture films, fountain pens, and opportunities will diminish rapidly, and similar "Yankee notions". Our exports the working class will be impelled intr trade is not built, like that of Great increasingly revolutionary activitie Britain on basic economic necessities- with a minimum of wasted time ar steel rails, ships, and the like. To destruggle in the "socialist" reformis order to make its meaning clearer-to in depression times, are few: moving selves symptoms of the growing disin- velop such a trade would imply a great lberal, or other blind alleys.
