Japanese Imperialists Press On Unite the Working Class Against the Capitalist War Plots

NT

There is no cessation of military activities between Japan and China on the Manchurian fields. On the contrary, Japan has increased her military forces and magnified her agressions in Manchuria. Hundreds fall dead and wounded in what the capitalist class merely calls "skirmishes" between Japan and General now more brazenly aims for domination penetration of Eastern Mongolia. Tsiti-

har may be taken and sacked any day by the Japanese, who thus deliberately aim at incitement of the Soviet Republic within whose sphere of influence and agreements with China, Tsitihar is located.

The League of Nations is now meeting in Paris to attempt to "settle" the Manchurian invasion. The Japanese flatly declined the League of Nations "demand" to evaculate Manchuria of all armed forces by November 16. The League of looks to the League for salvation. Nor has the United States been successful in her diplomatic approaches and nego tiations. On the war front against Japanese imperialism, apart from incidental resistance, China comes beseeching and groveling for peace. Japan, aggressive and certain of its powerful position sneers at the requests of the capitalist nations, and demands unconditional re cognition of her "five points" first. Only the prospect that the Soviet Union may

yet be compelled to defend herself against the systematic incitements, by Japan gives the latter pause.

The Japanese Demands

Japan's five demands upon China and the capitalist powers are summarized as conduct by China and Japan (hear! hear!); (2) respect of China's territor ial integrity (if Japan finds it not possible to slice a big chunk immediately) (3) suppression of all organized movements interfering with trade and stirring up of international hatreds (this refers to the economic boycott of Japanese goods by China, a thorn in the side of Japanese merchants and capitalists); (4) effective protection of Japanese subjects in Manchuria in their trade, etc.; (5) acceptance of the treaty rights of Japan in Manchuria (that is, the con-

press, it is said that the "compromise" plan of the League of Nations is as follows: To have direct negotiations be tween Japan and China on the first four points, but that the completion of evacuation shall not depend on these direct negotiations. Regarding the fifth point, involving the 21 points, negotiations theron shall begin after evacuation has been completed.

Situation Remains Critical

As The Militant goes to press, affairs remain at a standstill in respect to the cessation of war hostilities, as well as negotiations for peace. The situation remains critical and the danger of a conflict that would involve all nations in war has not been removed even for the immediate period. Japan has continuously and directly incited and provoked the Soviet Union; the other capitalist powers, led by the United States, have continued also to lie about and slander the Soviet Union, which has a ally powerless Chinese government still determined peace policy. All the imperialist powers have the ultimate object to unify their forces in a common front of the imperialist bandits against the Workers' Republic.

> As a matter of fact Japan's invasion of Manchuria has been given encouragement by some of the imperialist powers such as Great Britain, and, to an extent by the United States also. Each of them has a close eye to a prospective share in the plundering of Manchuria, Mongolia and China in the forthcoming period. It is not to be forgotten that the United States already has investments of great sums in Manchuria; and though hesitating at open warfare now fears the constant encroachments of Japan. It prefers at the present time : settlement short of war.

The United States has tremendous hopes, both in Manchuria and China, for wide commercial relations and capital investments. A unified National Gov ernment, sufficiently unqualified how ever to find it necessary to make con cessions of an economic and political character to the United States, is the more desirable to her, as against a completely disintegrated China, subject to plunder by all the imperialist powers

Japan Determined To Dominate Manchuria

Japan, no matter what the outcome of tinued acceptance of the infamous 21 the present embroglia, is determined to points forced upon China by Japan.) | intrench herself in Manchuria, having

According to reports in the capitalist in fact, eventual annexation in mind, as well as the further economic penetration of China proper.

Japan feels quite cocky abut it all and says she can do a better job of exploitation of the Manchurian masses than others. In Manchuria, for instance, Chinese war-lords have forced upon the population some seven billions of paper money, against which there is a reserve only of 60 million in silver yens (\$30,000,000). Of 200 million yens collected in taxes, 120,000,000 reached the viceroy's office and of the latter amount 80 million went into armaments expenditures. So as far as exploitation of the Chinese masses in Manchuria is concerned Japanese control would represent only a change of masters, and the Japanese feel they are more efficient at exploitation than the Chinese militarists. It is to be noted that of the 30 million population in Manchuria, over 29 and a half million of these are Chinese, and the remaining half million composed of Japanese, Koreans, etc.

The Capitalist Powers Want Their Booty The Foreign powers are apprehensive of Japan's Manchurian invasion, feeling that Japan is taking undue advantage of the situation to create monopolies, and that, they complain, would be "violation of the open door", that is, the infamous policy for common capitalist exploitation of the resources and population of Manchuria and China. The complaint of the capitalists is not at all at the exploitation engaged in by Japan, but at the fact that the Japanese "have their feet in every trough" and the others can't get in. The Japs, in short, result what may of the momentary struggle, are getting and expect to maintain a trade grip in Manchuria, despite the temporary stagnation of trade caused by the battles and the economic boycott of

Japanese goods by the Chinese. In Japan itself everything is being done to foster the jingo spirit. While clanging the fire-arms and beating the war drums, the Japanese bourgeoisie appeal to the narrow "national" interests of the Japanese people. They point out that Japan has already for decades been speeding up her industrial development. finding it necessary more and more to push into Chinese territory for essential raw materials, markets, and capital investment. To maintain her present social, economic and industrial life, they continue, it is necessary by all means to hold and to extend their influence and domination in Manchuria and China.

The Aims of the Chinese Bourgeoisie On the other hand, the comparatively young Chinese bourgeoisie, hoping to inflict a final or long-enduring defeat upon the Chinese workers and peasants, want and expect to develop China greatly on bourgeois economic and industrial lines. Hence they wish to exploit the Chinese masses for themselves. Here presents itself an immediate and out-This question every party comrade, The Militant immediately to help by is engineered by an organization called every revolutionary worker should ask standing contradiction of capitalist defrom the party leadership. Will Stalin velopment in the Far East; and, further, we must remember, both England and Trotsky and to provide for his return the United States, especially, are making to the Soviet Union? Will Stalin dare every effort to increase their footholds in China. These facts alone increase the to submit this question to the Russian revolutionary workers for them to deprospects of war on a world scale to the bursting point. The government at Tokyo constantly emphasizes its economic problem. The Japanese envoy to Francé and to the League of Nations Council, Kenkichi Yoshizawa points out that "beginning with the South Manchurian Railway we have made investments of a purely economic character . . . For the protection of this railway zone we have the right . . to station 15,000 troops therein. . . Our institutions, railway rights, mining exploitation, timber felling and the like are based upon treaties." Hence, Japan concludes, it is only exercising "self-defense" in Manchuria, even as does the United States in Nicaragua, Haiti, Cuba, Santa Domingo, etc.! In brief, Japan operates in Manpowers that have for decades pilfered to make secure their pillage, particularsemi-calonial countries. Japan is determined to rule in Manchuria. In addition to seizing Mukden and occupying additional territory, the Japanese are setting up a puppet Manchurian government, a so-called "independent, autonomous government", which simply means a government of Japanese tools easy to control. The "independence" movement in Manchuria is therefore but another screen to mask Japan's depredations. Only when the Chinese masses in Manchuria establish a Soviet Manchuria, will there be a genuine independent and autonomous Manchuria. Japan lays her base for any eventual-

Since then a campaign of terror. slander and villification, which has known no precedent in the history of the internal struggles inside the revolutionary movement, has been carried on there are four Jewish daily papers, read against the brave and sturdy fighters led bp Leon Trotsky. These would not falter in their principle convictions before the administrative whip.

The Role of the Press

It is not our task here to recount the details of the struggle. We wish only to point out the tremendous role that the press of the Soviet Union, as well as that of the whole International Communist movement, played in the attempt to silence the voices of the best revolutionary Marxists and the heirs of Lenin. The Stalinist apparatus wielded a whole net of newspapers, like so many parrots repeating at a given signal in almost every corner of the globe, the same slander, the same lies about the Left Opposition. Wherever the Stalinist press did not carry its "message", the capitalist newspapers did the job by re peating in unison the legend that Trotsky's program would lead the U.S.S R. to ruin, that Stalin is a realist, etc. But the schemes of the conspirators did not fully succeed. In almost every country where there is a Communist Party, little groups of the Communist vanguard were beginning to doubt the canned stories about the Opposition. Very soon, when the rays of truth were becoming discernible through the clouds these groups unfurled the banner of the Left Opposition and carried it forward

The Left Opposition was not silenced. In the United States we are now winding up the third year of the existence of the Communist League of America (Opposition). We have consolidated a group, which even though not as yet numerous, is nevertheless on the increase.

But what is more, we are strong in the conviction of the correctness of the ideas that inspire our struggle, and are

Next Step-A Jewish Paper

We must broaden our field of activity. It is in this spirit that we have decided very people who later had to stand trial to commence the publication of a paper in the Jewish language. This, following cided to amputate the proletarian Left closely upon the publication of the youth paper, Young Spartacus, is another progressive step for the Left Opposition. It is indontestable that there is tremendous field for an Opposition paper

in Jewish. In New York City alone primarily by workers, besides numerous weekly and monthly publcations. All of them, in one way or another, befog the issues confronting the workers. The

Needle Trades have been the arena of many courageous and bitter struggles. There we have in miniature a display of the profound problems that confront the working class.

Raise Funds

More than ever do these workers need a clear voice. More than ever they must be imbued with a knowledge of what is correct. Unfortunately not enough work ers could be reached solely through The Militant. We hope that a paper in the Jewish language will therefore prove of a great service.

THE NEED FOR A PAPER OF THE LEFT OPPOSITION IN THE JEWISH LANGUAGE IS CLEAR. We are ready to answer that need. But to get started, we NEED THREE HUNDRED DOL LARS. The next step therefore belongs to our comrades and sympathizers.

In its campaign of slander against the Left Opposition, the Stalinist Freiheit Friday November 20, 1931 outdoes even the Daily Worker. It realizes we had no Jewish medium to reply. Only recently it carried two articles by Larin who tried to deride comrade Trotsky's brilliant theses on the "Problems of the Development of the U.S.S.R." Bankrupt as Larin's argument were, still many workers are deceived thereby. Make it possible for us to bring out Jewish paper.

We must broaden the base of our work by reaching the masses on behalf of Mooney: to reach the masses we must penetrate every organization where workers are concerned, regradless of all hardships. Comrade Shechet concluded by saying that she hoped that this confernce will lay the

foundation for a sound, broad organization with the one objective in mind: the unconditional release of Tom Mooney.

What the Conference Did This sentiment undoubtedly expressed that of the 72 delegates. But the apparatus-man, Nat Kaplan, angry at the reception accorded comrade Shechet's replenum of the E. C. C. The Lawrence Strike

After the October 25 conference itself we went to what was supposed to be a mass meeting for the Lawrence Strikers. There were about thirty at this meeting. Listening to the reports of Cantor and Ballam which contradicted each other, one could almost laugh we**re** it not so tragic. Cantor reported that the workers in Lawrence are paying their own fines because they are not ready to give the sacrifice of staying in jail. Right after he finished, Ballam delivered one of his usual orations, saying that there is a great movement in Lawrence, that the masses of the 25,000 workers are revolutionary and at the end of the strike there will be shop nuclei of Communists! It takes a low politician to make such a discovery, and of such types of politicians, Ballam – gets picture of the strike, it's no wonder it mill workers into a Communist campaign, it can not be otherwise.

- A CONFERENCE DELEGATE.

(Since this was written we have heard from comrade Shechet, who with comrade Cooperstein were delegates to the I. L. D.-Mooney Conference. The letter, in part, fellows—Ed.)

"The 'leaders" of the I. L. D. have marked time for three weeks, which has not helped the Mooney movement, Proof of this was the attendance at the meeting last Friday night, November 13, when out of 46 delegates, only eight were present. Eight are sufficient, however, for the leadership of the I. L. D. to carry out its usual policy. When, in electing an executive committee, I was nominated for secretary and was the only one who accepted, Cantor at once saw to it that no "Trotskyite" be secretary of a united front Mooney committee, and called for more nominations! I assured comrade Cantor that the secretaryship was not uppermost in my mind, but only the opportunity to work on behalf of the Mooney movement, and, office or no office, nobody could prevent me from putting forward corect policies or carrying on my work.

After the setting up of part of the executive, the meeting proceeded with a report of the I. L. D. representative, followed by what was supposed to be, according to the agenda, a report on the Conference. Cantor elaborated on the Lawrence strike with the news that it came to an end on November 11; that the thousands of workers went back to work under a 10% cut, with the Pacific Mill shut down entirely. That during the strike 145 strikers and strike leaders were arrested and jailed, and that the I. L. D. needs funds to get these prisoners out. He concluded with entertaining Prager's motion to add the Lawrence cases to the Mooney campaign. under the general campaign for the release of all class war prisoners.

In the discussion I asked Cantor whether he reported for the I. L. D. in genforget that this is the duty primarily of the I. L. D. in its regular tasks.

He analyzed the philosophy of the Haymarket martyrs, showing its weak nesses in its anarchists trends. While they cannot be strictly identified with any group or party today, they stand closer to the Communists than to either the anarchists of the socialists. An in-

"The bureaucratic degeneration of the united front tactic through the the party apparatus, due to the antibureaucratic invention of a "united front Leninist leadership of Stalin and his from below" only. Fosters, Browders and Weinstones, have resulted, in a complete disappearnce of a real proletarian democracy based on Leninist understanding of centralized democracy, and therefore the bureau cratic regime has deprived the party of its Bolshevik-Leninist character."

This statement is fully affirmed by the C. meeting, Perila, who acted as the Stalway my case was handled and carried inist attorney, asked me if it is correct through at the hearing before the District Control Committee. At the section two membership meeting which took place on October 27, I spoke against Perila's report on party work among the unemployed; I stressed the fact that the "united front from below" as conceived by the party is simply another name for propaganda work, and not a united front as understood by Lenin. Perila then openly threatened to have me before the Control Committee. That called forth a protest from the fluor, and because of the protest against such tactics, Perila said that I would be given a chance to explain my position to the section membership.

At the Nucleus Meeting

Instead of that, the Section Committee issued an order to the nucleus unit organizer not to admit me to unit meetings until further notification. At the unit meeting I made a statement that this kind of persecution against a comrade who is involved on political matters, is open defiling of inner-party democracy, and a bureaucratic transgression of the political rights by the section committee.

Many comrades of the unit evidently also saw it in that light. When a motion was put to the unit that I leave the meeting in accordance with the edict from above, about half the members present abstained from voting. The hearing before the District Con-

trol Committee further bore out the Opposition contention that since the beginning of the campaign against "Trotskyism" in 1923, a systematic revision of Leninism was taking place under the leadership of Stalin and Bucharin. In my statement I also pointed out sale.

self a good deal with attacks upon the Left Opposition because of its united front ideas. The Left Opposition, correctly, demands a united front of all workers' organizations-from the Communists to the reformist and reactionary labor organizations, feeling confident that in the struggle for the release of Mooney and Billings, the fakers and insincere elements can be exposed most

easily to the workers for what they really are.

But perhaps Engdahl could not be ex pected to grasp this essential Leninist idea; instead he naively read from The Militant the latter's scathing condemnation of the labor fakers, and then, turning to the audience, inquired: "If that's their opinion of these leaders, why do such united front tactics as he himself they want a united front with them? used as a weapon to win the majority Thus always with ignorance.

But the Chairman, of course. ignored the comrade's demand and replied that it was the policy of the Workers' School not to grant the floor to the Left Opposition.

First let it be said that the recent Election was the most vicious of modern times. The Conservatives set out to "amash Socialism" and its supposed advocates, the Labour Party (rather puzzling this to our comrades who say that Labour is the same as the Conservatives and who call the Labour Party "Social-Fascist"!); to establish protection, to lower the workers' wages and to drive thousands off of unemployment benefit. Their petty-bourgeois servants, the Labour Party, were too weak, too vacillating to carry the program through effectively: so, as in 1924 when the first Labour Government was swept aside to give place to the Baldwin Government the Labour Party had to go in order to make room for more ruthless Govern ment.

The Conservative Attack On Labour

To this end a sweeping attack was an attack waged by newspapers, the wireless, the platform and the cinema. The reply of the Labour Party was timid, cowardly and confused. 'More and more they were driven into a position where their only effective reply could be a class reply, a Socialist reply. But how could they reply in this way? How could they who decry class war rally the working class against their masters? How could men who had previously agreed to "economies" protest effectively against "economies"? With a shameful record as a Government, with the whole basis for their reformist policy swept away, with the knowledge, behind their semi-apologetic protests, that if returned they could do nothing, how could they rally the workers against the employers?

(It is, after all, a conservative party and its dislike of innovations extends to names; e. g. witness its fidelity to the old 17th century designation, "Tory". What have the politics of the age of Charles II and Shaftesbury in common with those of the age of imperialism and finance capital?'.

The actual development of fascism depends therefore on the British bourgeoisie as that of Mussolini did on the Italian bourgeoisie; and, while the Itailan ruling class had no alternative to Mussolini, the British have always the Conservative party. As the crisis deepens, as protection fails to do aught but intensify the misery of the masses; as the Labour Party demonstrates more and more clearly that it is a reformist party with no possibility of giving any reforms; the British bourgeoisie will inevitably turn to fascism; and whether Moseley is the messiah or merely the forerunner; the result will be the same as far as the workers are concerned. The British ruling class has nothing to learn in ruthlessness from any bourgeoisie in the world and it is merely a matter of time before it learns to express itself with a clarity of which "Il Duce" himself would be proud.

In spite of its numerical insignificance the formation of the "New" Party is the most significant development of capital ism in Britain since the General Strike. But events prove to be moving at a terrific speed and nowhere more so than in Great Britain. Under these conditions it is safe to infer that the supers of today will occupy the centre of the stage tomorrow.

IN SPAIN

The Political Situation

The Socialist-Republicans Support the Church

The democratic bourgeois constitutions above all, by the anti-religious spirit by which they were guided and stimulated. When a monarch has been dethroned, the masses have always looked with sympathy on all revolutionary manifestations against the clergy, which undoubtedly is one of the most characteristic accompaniments of absolutism and tyranny.

In Spain, the republicans and socialists, for lack of a solid and consistent doctrine, have employed the bulk of their energies in combating the domination of religion, of that Catholicism which since before the Inquisition has inspired, and in practice exercised, the power of the monarchy.

The Church Remains A Power Under the Republic

Therefore, when the republic was in stalled in Spain, the people believed that, along with Alfonso de Bourbon, the clergy would have to get out. The republicans and socialists remained silent. Lerroux forgot his famous phrase, "Enter the convents, remove the veil from the nuns and raise them up to the honorable rank of mothers". And when the people of Madrid set fire to the government, have been thrown back the convents, the Government trembled as much as the clergy.

The power of the Church was being re-established, but the Government was while apparently sacrificing himself, and religious and reactionary spirit the en-As a contributing factor, Alcala Zamora I have only cursorily glanced through and Maura occupied the most responsi the anti-Soviet manifesto of the Leip- ble posts in the government of the repziger Volkszeitung, (lack of time) but ublic. Anyone who dares to denounce this evil can be included in the scope of the law and receive the punishment whic if provides. It is a gag which everyone is compelled to swallow who does not submit to the reactionary rep-

ublic, or suffer the consequences. This law was passed after the resignation of Zamora and Maura. This proves that the spirit of this law, and of the whole brand-new constitution which is being made, is inspired by the reactionary doctrine of Zamora-Maura, the two most able and determined men in the Provisional Government.

Azana's ideas are no different from those of Zamora. While he was Ministe of War he could save his repution and perform his work more or less cleverly. On becoming President of the Republic his first declaration was, "We must make the Republic respected, or if not respected, then feared".

The situation is clear. The working masses, lacking a Communist Party to guide them in imposing themselves on into second place by brutal repression. The reaction, on the contrary, has been gaining ground and imposing its wishes to the point of impregnating with reactionary wisdom the constitution which

the Cortes is working out. The Masses Demand Bread

But this will in no way resolve the social problem. The starving producing masses ask for bread, with more force each day. The governing classes are making a constitution, and creating laws to deny bread to the starving in the most "legal" manner possible. The coming winter threatens to be stormy. The Spanish Communist Party has a great mission to accomplish, but the correct policy is not that which if practices, of denying the importance of the religious problem and hiding itself at critical moments.

For us, Communists of the Left Opposition, the religious problem, the republic and the constitution have no importance in themselves, because they are made for the bourgeoisie, our class enemy. What has a great importance,

The Repressions In Spain

Despite all the calumnies of Stalin's disciples in Spain, we have the honor of being the first victims of the new Law for the Defense of the Republic.

On October 22, one day after the law was passed, the General Direction of Security (Police) sent several agents to our headquarters, to make a detailed inquiry and to confiscate whatever they released. For two days they went through our files without finding what they were looking for. At the time of the raid there was only one comrade there, the watchman, aged 71. They demanded of our old friend that he leave the place during the search. When arrived at the office, they had already carried on for more than half an hour. I protested in vain. Galazza's police wanted to carry off the magazines, the periodicals, the books, in short, everything that we had in the place. Some of the comrades who had arrived interfered and the police calmed down a bit. They gave up the idea of seizing the periodicals and magazines that appear legally. But they took all the documents, the letters, etc. from correspondents and subscribers of Comunismo and our Communist Publications.

It is clear that the new law authorizes the police to confiscate all they please, but we know that this authorization does not produce the desired results. Our protests, which were sent out to the press, will not be published, nor heard. But the fact that we, the Left Communists, are the first victims of the new law proves that the bourgeoisie do not seem to take much stock in Stalin's opinion on our "counter-revolutionary" attitude. For many workers, this will be very instructive.

Evidently, Germany would have to go through a few hard years. The workthe best attended and highest spirited ers, however, would at least understand why they made such sacrifices. But even in these most acute transition years, assuming that the rest of Europe

would remain capitalist, Germany would not be isolated from the world market. Once the proletariat has expropriated the landowners, the bankers and the industrialist, it will immediately be able to produce for the world market at cheaper prices than at present. Under such circumstances, an economic block-

ade is absolutely out of the question. Direct contact with Soviet Russia would immediately be re-established, for between a Soviet Germany and Soviet Russia, capitalist Poland would soon be crushed. However, it is quite improbable that European capitalism can remain firm for any considerable length

of time, after a revolution in Germany. It is really necesary to write a more lengthy work on this subject. The German comrades could perhaps divide the material among themselves, take up the work in the different fields, and in the first instance collect material to this end. Moreover, our "republican-socialists' ave passed a Law for the Defense of the Republic, to use the organized violence of the state power to repress all manifestations and prevent the people from saying what it thinks and what it wants.

what we must do, is to denounce laws, these problems, before the workers, to explain to them that these laws cannot solve our problems, nor can the constitution nor the most democratic bourgeois republic in the world.

The future of the Spanish Republic can be changed only by the working class, directed by a genuine Spanish Communist Party. The anarcho-syndicalist Federation is terrorized by the new law for the defense of the republic. Our task is enormous but full of great perspectives and possibilities.

A general attack against Dresier's with the mill owners to break the strike commanding position on the field literature is in the cards.

Bourgeois literary opinion never welcomed Dreiser. Rather it accepted him after he had bludgeoned his way to eminence by the truly colossal achievements of his pen. He never painted the social system of his day in rosy hues. On the contrary. The author of "Sister Carrie" and "the Financier" showed it up in all its hideous ugliness and injustice down to the most sordid detail. In exposure of capitalist society as it really is-not sparing the whited sepulchre of its "morality"-he blazed the trail for other writers. Among all the American writers who, following him, have taken the social milieu for their theme, he drew the truest, the most striking and revealing picture. "He stands alone", said Mencken, and in that he recorded not so much an opinion as an inescapable fact.

But it was not by virtue of these achievements alone that Dresier won the universal acclaim that has been his in the recent years. It was something in the quality, or rather something lacking in the quality, of his writings that made it possible for him to gain the "recognition" of all the literary critics, including the little word-jugglers who complained about his "style". Dreiser drew he wrote there hung a heavy fog of pessimism, futility, fate. Bourgeois opinion could tolerate that. Cynicism is its China. WORKERS! UNITE AGAINST BOSS TERROR

Once again, your interests as workers are threatened. This time in the State of Pennsylvania, the government strikebreaking law, the notorious Flynn Sedition Act, is being used to attack the living standards of the working class.

In Philadelphia, two workers, Communists, members of the Communist League of America (Opposition) have been made the subject of an attack by boss terror against the militant section of our class. Leon Goodman and Bernard Morgenstern, two young workers, are charged with sedition and face up to 20 years imprisonment for distributing leaflets presenting the Communist position on unemployment. They told the workers to struggle for unemployment insurance; the 6 hour day-5 day place in the enterprises and in the proweek without reduction in pay; for recess of production as a whole. The uncognition and extension of long term employed must unreservedly be drawn credits to the Soviet Union; and against in on the control of production. Its orwage cuts.
