

whole insurgent movement of labor to a new height and stirred the workers everywhere with its mighty sweep and militancy, has come to an inglorious end-defeated and shamefully betrayed by the leadership of the U.T.W. and the upper crust of the A. F. of L.

In the history of the American labor movement it would be difficult to find a more cruel example of the evil role of the "labor lieutenants of the capitalist class" and the heavy price the workers must pay for allowing them to hold the leadership of the unions. Incompetence, cowardice, and, at the crucial moment, outright treachery---these are the contributions which McMahon and Gorman, pushed from behind by Green and Co., made to the strike from the vantage point of the leading staff.

THE STRIKE SETTLEMENT

To call the ending of the strike a settlement is to rob the word of any meaning. The whole report of the Winant board, stripped to its essence, was nothing more than a promise to look into the grievances of the workers. And not even that was accepted by the bosses. Without that, without even an agreement to reinstate the strikers, the leaders called off the strike at the peak of its strength and abandoned the workers to the savage reprisals of the mill owners. Tens of thousands of workers, unionized for the first time and staking everything on the struggle, have been left in the lurch by their leaders and locked out of the mills by the bosses. A terrible introduction to the trade union movement for them; a terrible warning for all of what the present leading staff of the labor movement will be capable of in the greater tests to come if they are not thrown overboard in time.

The executive council of the A. F. of L. cold bloodedly isolated the textile workers, refused to move a finger to provide funds to feed them—millions could have been raised in the trade unions at the scratch of a pen by Green-and devoted themselves exclusively to machinations to get the strike ended at any cost. These scoundrels fear the mass struggles of the workers no less than the bosses fear them. A militant labor movement, drawing great masses into action, is incompatible with their rule. They aim to crush this movement and restore "peace" in the relations between labor and capital, even if it is the peace of the breadline and the graveyard for the workers.

RANK AND FILE L-SARMED

What is most remarkable and outstanding in this tragic situation is the proof on every side that the rank and file of the textile worker's were without any means of resistance to the perfidy of the leadership; that the millions of other trade unionists, who were inspired by the magnificent struggle and wished to aid, were powerless to make a move. Black reaction and cynical treachery are enthroned in the labor union machine. The mass discontent at the bottom, generating enough energy in these years of crisis to blow the bureaucratic machine to bits, and the whole system of exploitation along with it, remains without organization, without program, without leadership. The Greens and Gormans rule the movement and ruin the most heroic struggles because there are none to challenge them.

The fearful textile strike debacle follows the tragic experiences of the auto workers, the steel workers, the San Francisco general strike, and other movements of insurgent labor in 1934 which have been turned into bitter defeat. They all cry out the same warning: The insurgent movement must be organized; it must work out its program and find its authentic leadership. The heart of this program must be an unrelenting struggle against the labor agents of the masters who sit on top of the trade union movement. The insurgent leadership must be dedicated to this struggle as a part of the struggle against the bosses and the National Rund Around.

Forces for a mighty left wing and progressive movement in the trade unions are not lacking. The crisis years have created the conditions for its emergence on a wide scale. Every new treachery of the bureaucracy prepares new recruits. What is lacking is a conscious, unifying and guiding nucleus which alone can organize the movement and provide it with a program. What is lacking is a revolutionary party.

The Stalinists perform all the functions of a party in reverse order. Where organization of the vanguard is needed, they disorganize. Where clarity is required they sow confusion. Even the weapon of denunciation-the sword of Lenin against traitors-is blunted in their hands. They crack their voices in slandering honest opponents; when they try to screech against real betrayers their stock of epithets is exhausted and they are too hoarse to be heard. As for the socialist "Militants", they belie their name by their silence in the face of the black betrayal of the textile worker's. They have not yet learned to criticize the traitors. Will such people lead a fight against them?

A NEW VANGUARD IMMEDIATELY

No! The workers need a new revolutionary party. Even a vanguard organization of a few thousand, if it understands the trade union question and penetrates deeply into the mass movement, can become the crystallizing agent for a colossal progressive movement in a short time. The times are favorable for the launching of such a party. Its program has been worked out in the years of principled struggle against revisionism and reaction. Sufficient forces are at hand to make a beginning. As the two most important independent groups, the American Workers Party and the Communist League bear a heavy responsibility. It is their duty to get together and set the new movement into motion. The tragedy of the textile workers is another warning against delay.

at Washington.

FOR THE NEW PART

(Appeal of the National Committee, Communist League of America) A year ago, after the full force of the German debacle had been clearly registered, and the responsibility of the Second and Third Internationals for the triumph of Fascism no less clearly established, the Communist League proclaimed the need for a new revolutionary party and a new International.

All that has transpired since that time has only served to confirm the correctness of that position, and we repeat it today with firmer conviction. More, we have reason to hope that the idea of a year ago can become a reality in the near future. We are sure in any case that a beginning can be made to give organizational form to the idea of the new party in America, the first section of the Fourth International in an important capitalist country.

Our forces have grown. The **Militant** has doubled its circulation. We have added a monthly theoretical magazine, the New International, to our arsenal. The Spartacus Youth have acquired a national organization. We have taken part in strikes and mass activities and proved our mettle in them. Our circle of sympathizers and our influence in other movements have expanded. From every standpoint we are in a stronger position and surer of our future than we were a year ago.

In addition, while drawing the line dividing us from reformism and centrism more sharply, we have consistently sought to find a basis of cooperation and a common standpoint with other independent groups. In the case of the Gitlow group we met with failure due to the inability of this group to take a firm principled position. Discussions and negotiations and experiments in practical cooperation with the American Workers Party, on the other hand, were more fruitful. We hope that the negotiations now pending will result in an early fusion of the two organizations. This will make the formal organization of the new party possible.

It is our desire to contribute our full share to this historic enterprise. Not only ideas but material forces as well. The stronger the Communist League, the stronger the new party at its inception. We must devote the coming weeks to an intensive campaign of organization and agitation to prepare the way for the auspicious launching of the new party. By building the League we are building the foundations of the new party.

This present campaign has two parts:

First: Build up the organization. Systematically canvass all sympathizers and ask them to join the League now. Appeal for new members at every meeting. Organize the membership drive in every branch under the slogan: Recruit Every Sympathizer into the League! Second: Raise a new party fund. Provide the organization with the means to increase its activities, strengthen its press and send organizers into the field. Every member should make a special sacrifice. Affairs should be organized to raise funds. Sympathizers should be asked to contribute. "New Party Certificates" in the amounts of one dollar and five dollars are being printed. Buy them and sell them. Let us redouble our activities, strengthen and tighten up our organization in preparation for a leap forward.

We are going to call the roll in this campaign which, we hope, will be the prelude for the definite transformation of our organization from a propaganda circle into a political movement. Sign your name to the roll call with a contribution and send it to:

EVENTS The Credit System The contradictions inherent in capitalist society owing to the impossibility of reconciling the profit motive with the needs of society, are nowhere more manifest than in the banking system and its handling of credit. In modern society credit is a powerful instrument for converting into capital the savings and property of the non-capitalist classes, thereby aiding the more intensified exploitation of wage-earners. Credit accelerates the devel-

opment of the capitalist system of production. In normal times it makes available through the banks, the reservoirs of credits, the "dead" capital in the form of "free" funds

in the climination of the small producer for the benefit of the larger ones. But the extensive utilization of

credit by modern industry introduces the greatest uncertainty into the whole process of production. When times are booming the banks rapid tempo and the resulting expansion of the productive forces leads ultimately to a glut of the market and the inevitable crisis. The boom period is accompanied by bor and have broken these promis- feverish speculation; all business es. The rest have never even takes on the character of speculaship. Henry Jaeger, Socialist party bothered to promise. Political par- tion. But the moment the market member and intimate friend of the ties have been deaf alike to the can no longer absorb the vast quantities of commodities made available by free use of loans and credit which become converted into capital, the credit system collapses. The banks make trantic efforts to "call" all loans, to get rid of all securities and investments that are not liquid. With all banks attempting the same thing at the same time, credit disappears and noney itself becomes scarce. Since production no longer offers any profits, the banks refuse loans to business men when they are most in need of credit, the factories begin to shut down and production comes to a halt in many industries.

Attempt to Control Credit

THE MILITANT

CHINA'S "RED" GENERALS RECANT WORLD OF LABOR **QUESTION BOX**

GEORGE STANTON, Brooklyn-

Question: From Lenin's "The Third International and Its Place In History", Trotsky quotes as follows: ("The Permanent Revolution", p. 108) "... the contradictions between the backwardness of Russia and its 'leap' over bourgeois democracy to the highest form of democratism-to proletarian or Soviet democracy." In the edition published by the Stalinist International Publishers this is stated as "... this contradiction between the backwardness of Russia and its 'leap' to the highest form of democracy, through bourgeois democracy to Soviet or proletarian democracy, . . ." Since these two have different meanings, can you tell me which is correct?

Answer: Your Editor regrets that he has been unable to find an original edition of this work which would be sufficiently authoritative to decide whether the above noted difference is one of translation or of misquotation. On the face of it though there are contradictions in the Stalinist publication.

First of all Russia never went through bourgeois democracy as an independent stage in its history. One would therefore have to assume that Lenin did not know the history of the revolution if the Stalinist quotation were to be accepted.

Secondly, both quotations use the word "leap". If Russia went from Czarism to proletarian democracy through bourgeois democracy, where is the leap? And finally, how can you trust a Stalinist quotation?

ELLEN G., Bridgeport-

Question: How would you answer the accusation i kin in Kiangsi province! frequently thrown at me: Oh you radicals, if somebody gave you a lot of money you'd act just the same as the capitalists"?

Answer: How well do we recognize this nonsensiservice. Kung responded with equal cal accusation.

The attention of your accuser should first be called to the fact that by his very remark he recognizes that you are a propertyless person, since such a statement obviously could not be made to anyone. even of moderate wealth, who devoted himself to the revolutionary movement. The attempt should then be made to demonstrate that the existence of a capitalist society implies, on the one hand, the ownership of the means of production by one class, the capitalist class, and on the other hand a propertyless mass, the proletariat, which has no means of existence except by selling its labor power to the capital ists; that the existence of the latter is dependent upon exploiting the proletariat; that from his material fact springs the life and death struggle between the two classes; and that the Communist party is merely the vanguard of the proletariat in this struggle. Now it is obvious that an individual cannot be a member of both classes at the same time so that your accuser is merely telling you that if you were suddenly changed from a proletarian to a capitalist you would no longer be a proletarian.

G. ZEL., New York-

Question: Bela Kun, in the Daily Worker of Sept. 21, 1934 states that on July 20, 1932 the German Communist Party appealed to the leadership of the Social Democracy for a united front against fascist terror. 13 this true?

Answer: In a subsequent installment of his article (Daily Worker, Sept. 24, 1934) Bela Kun contradicts himself:

"A Social-Democratic worker, however, may raise such offers to the Social-Democratic parties before a lengthy speech at the generalissithe fascist danger in Germany was an immediate one? Why did you not make such proposals before?' "We answer as follows:

... To propose a united front at that time to the party leadership of Wels, Severing, Braun, Leipart and the rest would indeed have been purely a maneuver designed to unmask them; ... This would not only have been a maneuver; it would have been a stupid maneuver." You see therefore that the Stalinists are and were always right.

Actually, on the eve of July 20, 1932 the C. C. of the German Communist Party adopted the following resolution: "The Communist party, before the prole-

apparently going to exact for further demonstrating the falsity of BRITISH WORKERS OVERWHELM FASCISTS

Before us is a photograph of a sea of British workriat and peasantry"), the courage ers, over 100,000 strong, surrounding a tiny island of and tenacity which the peasants Oswald Mosley's Blackshirts, less than 3,000 in all display in defending their con-with about as many cops to protect them. And what quests (however hopelessly) will a reception the fascists received from the workers! be seized upon as evidence of Here is an item from the Daily Telegraph, British

> "The Black Shirts, hemmed in by long lines of police on either side and resembling so many prisoners, went through a long avenue of jeering spectators.'

This sea of angry workers gathered in Hyde Park seethed with hostility to Mosley's dupes and not a word of all their speeches could be heard above the shouts of derision from the proletarians. The workers assembled at this monster demonstration in defiance of the exhortations from the labor leaders and the Daily Herald, organ of the British Labor Party, for everyone "to stay away".

It seems to us from this distance that the miserable handful of Fascists should have been ducksoup for the workers who, from all reports. were raring to go, The I.L.P. and the C.P., however, put the damper on the demonstration with the order from each of the four platforms of the counter-demonstration: "No provocation from the workers—ignore provocation from others-show our strength and our discipline." While this admonition may be perfectly well under other circumstances, our opinion leans towards teaching the Fascists a lesson of direct proletarian geographic base in Kiangsi, it when the workers' sentiment is so unmistakable and their strength so omnipotent.

In this way, means would be pro- LEFT SOCIALIST THREATENED

Spaak, editor of Action Socialiste, has been threatened with expulsion from the Belgian Labor Party (S. P.), by the General Council for his criticism of their weak leadership of a recent textile strike. A at Juikin had been overthrown, sub-committee proposed that the general council recommend to the annual conference the expulsion of Spaak. But cunning Vandervelde, who knows that it is much better to keep a left wing leader bound hand and foot within the party than to create bad feeling by expelling him, made a shrewder proposal. Spaak would not be expelled if he agreed to cease publication of his paper and serve instead on a committee of three to edit a discussion organ. But in no case was he to write on trade union subjects. If Spaak acquiesces it means the ball-and-chain around strength. The reason why they in China and therefore had escaped especially those who wish to be de- his political activity in the party. There can be no had been able to hold up for so from the red ranks to join the gov- ceived. But it is to be doubted intra-party peace on the basis of the proposals of whether the Chinese proletariat, a king's footman like Vandervelde, except the peace of the grave.

BANANA WORKERS HOLD FIRM

The strength and solidarity of the banana workers strike in Costa Rica, is indicated in the fact that for pany, one of the company's ships, S. S. Peten, arrived Puerto Limon, Costa Rica.

On the other hand, the extent to which the United Fruit Company dominates the political situation in the Central American countries, is made quite clear

An agreement, settling the strike was signed at sentatives of the government and the planters respectively. Among the terms of the settlement, which was a great victory for the workers, were the following provisions: Common Labor-Wages inequal \$1 U.S. approx.), hours reduced from eight to six daily; Axe labor-Wages increased from 4.50 and cash and not in company scrip as heretofore; Company commissaries in the camps to post which must not be higher than the prices charged in stores of the nearest private commercial establishments; hospital privileges to be guaranteed by the employer at his expense; all tools excepting machetes to be furnished by the employers and not by the workrs as heretofore; hygienic housing conditions in all labor camps and plantations; official government recognition of the Workers' Union of the Atlantic; no discrimination against workers for strike activity; federal intervention to procure liberation of workers imprisoned or strike activities. In addition to the foregoing, the Executive, through the Ministry of Labor, promised to intervene with the United Fruit Company to secure the latter's adhesion to the conditions of the settlement. On the foregoing conditions, the workers agreed to call off the strike, but the company refused to acknowledge the settlement. Therefore the strike has been continued, and the government, which had sought a quick solution in order to reestablish trade showing their loyalty to the city and industry, upon which its own income and life depend, now sides openly with its master, the United Fruit Company. Repression and provocation are on the order of the appointment of a committee of the day. The United Fruit Co., the newly formed "Anti-Communist League" and the government itself front strike and advise the labor vie with each other in their efforts to provoke the At dawn on September 12 the national police made a savage raid on general strike headquarters at settlement, endangering the lives of the strikers, their wives and children, arrested everyone they could L.A. to control the hiring halls. catch and expelled them from the country without tant left wing enabled the bureau- ber of the C.C. of the C. P. and also of the general spite of the opposition of a handful izers, was wounded severely. The workers' homes prevent the general strike, it was committee is obliged to meet elsewhere. In the attempt to smash the strike, every method restoring to acts of terrorism, all the more difficult and the government. Evidently what the company At the Special Session of the Costa Rican Congress, opened last week, an attempt is being made to outlaw provoke an outbreak such as occurred in El Salvador a legal excuse to murder the militant working class leaders.

What we had here was merely a Stalinist zig-zag. forced on the latter by life itself, and by means of which they themselves condemned their whole policy. If the united front was correct on July 20, 1932, why was it counter-revolutionary on July 1, 1932 or on August 1, 1932? Why was it that except on July 20 the Social Democrats were "social fascists", and only lies or evasions because their whole policy was false of the proletariat but refused to take it.

It is of course impossible to repeat the entire history of the German events which occupied the major interest of the Militant for almost three years, and on which we published four pamphlets by Trotsky. Read created contradictions will bother you much. WILLIAM B., Dayton-

Question: What do you mean by the term "Centrist" which I have seen mentioned so often in the the communists was hurled daily Militant?

Answer: The following quotation from Trotsky's the question, is probably the best answer you could get within the limits of this column:

"Speaking formally and descriptively, Centrism is composed of all those trends within the proletariat of which would have been to preand on its periphery which are distributed between reformism and Marxism, and which most often rep- prior to the strike. resent various stages of evolution from reformism to Marxism-and vice-versa. French Bolshevik-Leninists Decide To Enter S.F.I.O. as Faction

At the recent conference of the French Section of the International Communist League (Bolshevik-Leninists) it was decided by a majority vote to enter the S.F.I.O. (French Socialist Party) as a faction and to work there for the same prnciples which our organization has upheld on an international scale, first as the Left Opposition of the Comintern and, after the German debacle, as an independent group. The tactical turn of the French League is motivated by the near approach of the decisive struggle with Fascism in France and the necessity of establishing closer contact with the mass of socialist workers who are experiencing a deep process of ferment and political differentiation. The tactical move of the League is designed to put it in a position to influence them for a revolutionary policy. The united front pact concluded by the Socialist and Stalinist party bureaucracies had excluded the League from participation, thus isolating it from the mass movement. With its small numerical forces the League, despite the power of its ideas, would have been condemned to ineffectiveness in such a situation. And since, in the estimation of the International Communists, the showdown with Fascism is near at hand-perhaps a matter of months-a swift tactical turn on the part of the League was deemed necessary. The French comrades did not wish to stand aside as sectarians in order to draw lessons after the victory of Fascism. They chose to force their way into the mass movement, through the only door open under present conditions, to influence the movement for revolutionary strug-

gle and victory. It goes without saying that the sharp turn in tactics decided upon by our French comrades does not in any way or in any degree signify a renunciation of any of the ideas which have bound the Bolshevik-Leninists of the world together-ideas which are all now compressed into the slogan of the Fourth International and the strugreconciliation with reformism or ties of the Second International, inist policy of revising Leninism any more than ten-years' existence which was characterized by the of the International Left Opposition anti-Trotskyist offensive in the

Declaration of French Bolshevik-Leninists

(Translated from La Verite) At the Third National Conference of the Communist League, the Bolshevik-Leninists of France after examining the French and international political situation and the situation in the workers' movement, reaffirmed their conviction that the program and methods of Leninism, the bases of their activities, are today more necessary than ever for the proletariat in order to resist Fascism, overthrow the capitalist system and march towards the socialist society.

The Bolshevik-Leninists maintain that, following the February events, the two great organizations of the working class have accepted the slogan of the united front for which we struggled for many years; however, they have not endowed it with the active content so necessary because of the threat of reaction. Nevertheless, a deepgoing and radical regrouping of the working class is taking place, political differentiation occurring through a process of unification. The Bolshevik-Leninists want to play the greatest role in this regrouping towards a single revolutionary party of the proletariat, which cannot take place except in action, in the elaboration and criticism of action.

Under present conditions, to continue as a small independent group would not permit us to play our role with the force demanded by the gravity of the situation. That is why we have decided to enter the Socialist party, as we are, with our program and ideas. In the ranks of the sections of the Socialist party, shoulder to shoulder with its revolutionary workers, with the working class of France, in the common struggle against the bourgeoisie, we want TO ELABORATE WITH THEM THE BEST MEANS, THE BEST METHODS TO EMANCIPATE OURSELVES FROM THE FET-TERS OF CAPITALISM.

In entering the ranks of the Socialist party, the Bolshevik-Leninists ask only the right to participate in its activities, to defend, equally with all other tendencies, those ideas which have been forged in years of struggle; we agree to be disciplined in revolutionary action.

The Bolshevik-Leninists call upon all their sympathizers to transform their sympathy into adherence, by associating themselves with us in this decisive step.

Comrades, join us in the ranks of the Socialist party for the revolutionary struggle of the proletariat!

Without renouncing our past and our ideas, but also without any mental reservations of sectarianism, we speak out what is; it is necessary to enter the Socialist party; not for the sake of exhibitions, nor of experiences, but for serious revolutionary work under the banner of Marxism.

Relief Endangered

(Continued from Page 1) The City of New York has financed this relief by obtaining one half of the sum needed from Federal relief, one fourth from the State and the remaining one fourth from the City.

An increased sumber of farsighted capitalists and their politicians realize that unemployment has become an integral part of the Socialist and Stalinist parties. party. "Americanism" and advocate a long term relief program. The Executive Committee of the United States Conference of Mayors, presented a plan to the President which calls for special emergencies to meet the winter's need, and advocate unemployment insurance.

The problem confronting the workers of New York is similar to the one in all other cities of the United States, if not worse. This calls for renewed action for the organization of the unemployed into city, county and state-wide organizations, and united action between the different unemployed organizations for our demands.
