## **Red Army Smashes Nazi Resistance In Ukraine**

Kiev Falls; German Retreat On Southern Front Verges On Rout; Soviet Columns Plunge Toward Rumanian and Polish Frontiers

### By John G. Wright

The victorious columns of the Red Army keep surging onward. Kiev is again in Soviet hands. The victory at Kiev has sealed the outcome of the battle for the Dnieper line, a line which the German General Staff had so confidently expected to hold only a brief few weeks ago and which has been so decisively and swiftly shattered. In the battle of the Dnieper the Red Army has emerged victorious from the greatest battle of the war.

The speed at which the Red armored columns are driving ahead in the Kiev area, where advances of 30 to 40 miles and more have been achieved in several places after the breakthrough, can readily turn the P-

Germán retreat into a rout. At the southern tip of the Labor-Endorsed Candidate

German lines, the Red Army preparing to mop up the trapped enemy regiments there. The borders of Rumania are now within striking distance, less than 150 miles away.

To drive the Germans out of the remaining territories of the Ukraine the Red Army needs to capture Krivoi Rog, where the Germans face entrapment by Soviet columns moving south from re-conquered Kiev.

On the central front the Red troops are also forging ahead. In the Nevel sector they have smashed through to within 35 miles of the old Polish border. The German occupation of Byelo-Russian can hardly survive the coming winter.

While the northern battlefront. especially around Leningrad, has remained relatively quiescent in along the front makes their posimeager wage increases which tions in the north less and less Jeffries had been forced to contenable. Sweeping as the victories ede. of the Red Army have been, the promise of even greater victories FLEETWOOD ABSTAINS

# In NLRB Balloting

**Buick Workers Strike** Against the Speedup

By JEFF THORNE

FLINT, Mich., November 8 smouldering discontent of Flint's 50,000 war workers exploded last week into a three-day strike and overwhelming pro - strike wo votes.

Terrific speedup and general preakdown of bargaining were the immediate causes of these spreadng repudiations of the no-strike policy. Strike talk spreads daily.

At every opportunity workers cheer the United Mine Workers and want to follow their example. On Monday, Chevrolet workers voted 4 to 1 (8099 to 2070) for strike action, in an NLRB-con ducted referendum under the Smith-Connally "slave labor' Act. On Thursday, 144 Buick Aluminum Foundry metal pourers struck against the speedup and the suspension of two workers On Friday, Fisher Body local 581 voted unanimously to demand an NLRB strike referendum.

PIECE WORK

The Buick foundry metal per hour that the miners pourers' job is the most miserable will receive, as it depends in part and strenuous in that plant. Work on the number of hours they will has been boosted 100% in a year work and how much overtime and now the company is ready they will earn. The actual money for another 33% hike, without increase per day may vary from more men or higher pay—unless less than \$1 per day to as high the union accepts the vicious in- as \$1.25 per day. The additional centive pay system that pits one increases will all accrue as a re- strike. Again they respected the worker against the next in a sult of increased hours of work. killing contest that only the Of course, this is a far cry orporation wins. Piece work, by from the original demand of \$2 work.

whatever fancy name, means at a day increase. But in view of pest a tiny bit more pay for a the present war situation and the with victory, increasingly arrohelluva lot more work. The metal pourers admit that against the miners and their power, then proceeded to turn less than half of them are in the demands, the present agreement down every single agreement that

## Flint UAW Defies Win Union Agreement After No-Strike Pledge Staging Fourth Coal Strike

Roosevelt Decides to Throw Sop to Unions In Attempt to Allay Growing Labor Crisis

### **By John Adamson**

The miners have won!

The miners have breached the Little Steel formula. They have repulsed the autocratic and arbitrary pretensions of the War Labor Board that no settlement would be approved while a strike is in progress. The miners have proven again that a determined mili-

tant fight is worth more than all the resolutions, all the cringing and whining of the Murrays and Greens.

The agreement that the United Mine Workers signed with Ickes is virtually the same as the last Illinois contract, previously rejected by the WLB, except that the lunch period is reduced from one-half hour to 15 minutes. The present agreement provides that the miners shall receive an \$8.50 base rate per day and allows for virtual.

ly the same portal to por- He used against them the vast tal pay as the last Illinois and of his own virtually unlimited war-time powers. He threatened mine agreement.

It is difficult to estimate draft, with jail. But the miners the exact money increase

the miners with troops, with the remained undismayed and they continued to hold their ground. They first struck to a man on

May 1. They ignored Roosevelt's order to call off the strike and demonstratively went back to work only under the instructions of their own union's policy committee. One month later, the miners began their second general instructions of their leaders and after a few days returned to

## Wartime Strike Struggles In Great Britain

#### By William F. Warde

In Britain the workers are beginning to move forward. Widespread discontent has led to the outbreak of strikes among dockers, miners, engineers, electricians. shipyard workers, transport workers and others. The number of strikes in September set a new high for the period of this war. There were 200 strikes in September compared to 10 in August.

As in the U.S., the British coal miners have been in the forefront, waging a determined and prolonged battle against the employers. For the first nine months of 1943 there were 577 mine strikes involving 200.200 miners. After a lull in October, the strike wave has again started to mount. New walkouts of miners, engineers and stevedores marked the first days of November.

#### **Barrows Strike**

iWO-

The victory gained after an 18-day strike by 9,500 engineering, electrical and allied trades workers of the Vickers-Armstrong plant at Barrows-in-Furness has been the most significant of these recent strike struggles. Wage rates in the Barrows plant of Vickers-Armstrong are among the lowest in the country. The basic rate for engineers has remained the same for 29 years!

national executives of the unions, the em-

ployers federations and the government, the National Arbitration Tribunal made'a general wage award known as "326" which is the British rough equivalent of the War Labor Board's Little Steel formula. Then followed six months of fruitless negotiations between the Barrows workers and the employers.

"While they continued to pursue their demands through the legal channels," reports the Socialist Appeal, a British Trotskyist paper, "the workers claim that the bosses laughed at them and blocked every move; the Government grunted and fobbed them off, and the leaders of the respective trade unions made the usual excuses."

Having exhausted all channels of negotiation, disgusted with the dilatory tactics of the top leaders, the Barrows engineers at a mass meeting on Sept. 16 unanimously voted to go out on strike. Their action was fully supported by the women engineers in the plant and by eight other local unions . that decided to come out with them.

#### **Strike Bulletin**

Almost every section of the community - white-collar workers, shop assistants, shop-keepers, soldiers and sailors - was in sympathy with the strikers. Collections were taken in restaurants and other public gathering places for the strike fund. Even

unions.

The Strike Committee issued regular bulletins effectively replying to all attacks against the strike and reporting support received from other parts of the country. These bulletins were pasted up in prominent places and also circulated from hand to hand. They featured a "Roll of Greatest Dishonor" which named the 7 or 8 who scabbed in the strike.

One scab was picketed by 2,000 workers who lined the streets from the shipyard to his home. He went home "ill" that afternoon.

Bitterest against the scabs and Stalinist strike-breakers were the women who played a part equal to the men in the struggle and repelled all attempts of the top union officials and bosses to split the men and women workers. According to the Socialist Appeal, the women strikers "revealed a solidarity and determination that would not have seemed possible two years ago." The Barrows workers were fighting against tremendous odds. A national issue was involved upon which the bosses would not easily retreat since a victory would disrupt the attempt to put a low ceiling on workers wages. The whole machinery of the government, with the aid of the capitalist press, the top union officials and the Stalinist strike-breakers, was brought into play against the Barrows workers in an

**Stalinist Strike-breakers** 

After waiting four days to see if the strike would fizzle out, the top union officials first tried to split the electricians from the engineers. When this maneuver failed, the National Executive Committee of the Amalgamated Engineers Union suspended the District Committee which was leading the "illegal" strike and had the full confidence of the local union members. The workers unanimously voted a strong protest against this union-busting action as did AEU members in other sections. Meanwhile letters of support from other local unions containing donations for the strike fund poured unceasingly into the Strike Committee's headquarters.

The Stalinists mobilized a herd of scabs to try and break the solidarity of the workers. Among them were P. Devine, Lancashire Communist Party organizer; S. Abbott, member of the CP central committee; J. Owen, member of the British Daily Worker editorial board; and several Stalinist AEU officials.

The CP sent Abbott to instruct Tom Rawlinson, secretary of the Strike Committee, who was formally a CP member, to resign from the Strike Committee and get the men back to work. Rawlinson, an honest working class militant; told the Stalinist

ported the conversation to the Strike Committee.

### **Attack on Trotskyists**

The Trotskyist Socialist Appeal distributed a special supplement calling upon all workers to give support to the Barrows strikers and pointing out that "a victory for the Barrows workers is a victory for the workers everywhere."

The most venomous attacks of the bosses, their government and press, the top union officials and the Stalinists were concentrated upon the Trotskyists.

Churchill's chief labor lieutenant, Ernest Bevin, breathed fire and thunder against the workers and against the Trotskyists. The London Daily Express of Oct. 1 reported in scare headlines that: "Ministry of Labor experts are devising legislation to punish Trotskyites and other anti-war agitators who have set up an organization to seek out grievances, and then send special emissaries to factories and mines for the purpose of urging strike action."

But the combined efforts of the bosses, the government, their labor stooges and the Stalinist scabs to smash the strike and raise a hue and cry against the Trotskyists were shattered by the unbreakable unity and solidarity of the workers. At a mass meeting of 8,000 workers held two weeks after

without a settlement. At this same meeting the strikers passed a resolution warning the bess class and top trade union leaders that any attempt to victimize the strike leaders would be met with renewed strike action.

#### Lessons of Struggle

Four days later the strikers returned victoriously to work, having won definite wage increases. Above all, they had gained confidence in their own independent power and fighting capacities. The unity in action exhibited by the Barrows workers has taught the armament kings a lesson they will not soon forget.

The successful struggle of the Barrows workers will also teach their fellow workers a number of important lessons. It has served to expose the cowardice and impotence of the top union leaders and the thoroughly reactionary scab policies of the Stalinists. It demonstrated that 18 days of strike action got results, while more than six and a half months of arbitration brought nothing. It disclosed the existence of a new militant leadership in the lower ranks of the unions.

Of the utmost significance is the fact that this victory was achieved by workers inspired by the program of the Trotskyists. As the strike wave spreads, more and more

### The FEPC—Is It Worth Saving?

Last week a hue and cry went | the FEPC claimed that the up from the liberal circles and segregation of Negroes Negro leaders against separate parts of the yards of a Comptroller General Lindsay C. shipyard and drydock company Warren's juling that government in Mobile, Alabama was not a contracts need not contain a non- form of discrimination. This has discrimination clause. The ruling set a pattern for segregation. was made after the Southwestern particularly in the South, which Bell Telephone Company had re- has been followed in other infused to sign a government con- stances.

tract forbidding discrimination against Negroes.

On Nov. 6 Roosevelt reversed that bar or Jim Crow Negroes. Warren's order, stating that the The FEPC publicity has tended to provisions in his Executive order create the impression that unions 9346 could only be interpreted as are mainly responsible for discrimination against Negroes. "mandatory."

The people who try to dress up Roosevelt as a a fighter for Negro rights and who appealed to the White House to reverse Warren's a militant Negro labor leader, decision, are now jubilant. War- Willard Townsend, president of ren's ruling, they said, had the Redcap union, and member deprived the FEPC of power to of the national executive board of punish the companies that Jim the CIO. At the national conven-Crow the Negroes. Roosevelt's reversal of Warren's ruling Townsend proposed that the conpresumably restores this power to the FEPC and makes it an effective weapon against Jim Crow in industry. This is what the liberals claim. Let us see just what the status of the FEPC really is.

The Fair Employment Practices Committee, it will be remembered, was set up in June 1941 to carry out the original executive order 8802 forbidding discrimination in government agencies and war industries. The executive order by calling for non-discrimination clauses in all government contracts was supposed to give the FEPC power to fight against discrimination in industry. The FEPC could, in theory, request the government to revoke contracts of companies violating the President's executive order.

\* \* \*

But the truth of the matter is a permanent FEPC. Instead he that in the two and a half years called for a federal law making

of its existence, the FEPC never discrimination a crime. Not only are the supporters of took steps to punish government contractors who violated the President's executive order. It is record of the FEPC but they must a matter of public record that the also hide how far the Roosevelt FEPC chairman who just resign- administration is willing to go

## The Imperishable Lessons Of October And Europe's Impending Socialist Revolution

### By Albert Goldman

[Extracts from speech on the twenty-sixth anniversary of the Russian Revolution delivered in New York City on Nov. 7, 1943.]

For the first time in many years we celebrate the anniversary of the October Revolution with the joyous feeling in our hearts that we now have certain evidence that another October is coming. For more than ten years our confidence in the coming of another October was based on our theory. But now we can point to concrete evidence. The Italian workers have struck out their fist and threatened to take their fate into their own hands. And this is the essence

of October-the masses coming out Lately, the FEPC has concenas an independent force and taking trated on cases involving unions their fate into their own hands. \* \* \*

### A Tribute To Albert Parker Editor:

\* \* \*

I am indeed sorry that Mr. Albert Parker, columnist, who writes "The Negro Struggle" weekly, is being inducted into the Army.

He will be missed by everyone who has ever read that column. It was the most informative column that had been written by anyone in a long time. He is a great loss to the paper and a greater loss to the Negro clientele. L. F. COLES New York City The Apparent Power

There is no doubt that at times the power of the ruling class appears too stupendous to be overthrown. How indestructible appeared the power of the Czarist monarchy just prior to the February Revolution! It had an army

police, and a church. The Russian workers were backward and the ALBERT GOLDMAN

rural population composed of ignorant peasants. The February Revolution came as a surprise to all except those who, accepting the method of Karl Marx, were able to penetrate beneath the surface of things and could therefore see the development of forces undermining the power of the autocracy.

And after a lapse of only eight months the masses who had placed the Menshevik and S. R. Compromisers in power threw them out and, under the leadership of the Bolshevik Party, took power, and struck the most powerful blow ever struck on behalf of freedom and equality.

The first lesson of the October Revolution is: Do not consider the apparent power of the ruling class to the exclusion of other factors; look deeper and see the might of the masses who, under the stress and pressure of circumstances, begin to see things in their true relationships; and who — once they unite and begin to act independently — reveal a power that is irresistible.

As we meet tonight, that lesson is driven home to us. The power of fascism is crumbling and when the masses of Europe will unite and act independently the capitalist masters will be helpless. If the Roosevelt forced to falsify the backward Russian workers could achieve their October the workers of Italy, Germany, France and England are surely capable of doing the very same thing.

> The October Revolution has stood the test of events under the most adverse conditions. Its enormous vitality has been proved by the terrible test to which it has been subjected in the present war. Where could the Soviet Union have found the power to defend itself against the greatest military machine in history if not for the October Revolution?

introduction of a planned economy that enabled the Soviet Union | masses as a whole have been influenced by a very simple and obthe capitalists' profits and produc- velt needs the votes of the South- to build a productive machine capable of equipping the Red Army vious fact. A great part of the democracy introduced by the Revolution, capitalism has not yet morale of an army depends upon the sufficiency of its equipment. been restored. It is therefore necessary to defend the Soviet Union The October Revolution gave the Red Army its equipment. against all capitalist powers.

Soviet Morale Has Its Roots in October

Where would the Russian masses have found the necessary spirit and stamina to go on fighting desperately after the terrible defeats of the first year if not for the October Revolution? By October 1942 the enemy had seized some of the richest sections of the country, had deprived the masses of huge quantities of food, had destroyed many of the finest industrial centers, had taken millions as prisoners and had killed about twelve million soldiers and civilians. But the army supported by the masses kept on fighting and has achieved victories beyond our fondest hopes. Never in history has such morale existed in a nation.

\* \* \*

THE MILITANT

#### What Stalinism Has Cost the USSR

And one must never forget that the state representing the Revolution is under the control of a bureaucracy to whom the spirit of October is completely alien. The Stalinist bureaucracy constitutes an enormously difficult obstacle in the path of the Soviet masses.

Some people see the victories of the Red Army but they do not see the terrific cost of these victories, a cost which is due solely to the policies of the Kremlin bureaucracy. What terrible damage resulted to the Soviet industries from the purge of the most capable executives! What resentment was aroused in the masses by the failure of the bureaucracy to consider the needs of the consumers! How much damage was actually done to industry is shown by the false charges of sabotage against those who were unflinchingly loyal to the Revolution. Great damage was done to the industrial machine not by sabotage on the part of those who devoted their lives to the Revolution, but by sheer incompetence on the part of the loyal members of the Stalinist bureaucracy.

The elimination of workers' democracy in the Soviet Union was the greatest single blow to Soviet industry. The serious problems confronting the workers' state after the revolution can be solved only by the active participation of the masses in their solution. There are enormous resources of initiative and skill in the masses and these can be utilized only if the workers feel free to criticize and to participate freely. The building of socialism without democracy is impossible.

If the Red Army achieved victories subsequent to the murder of Tukhachevsky and other great military leaders, the Stalinists and their fellow-travelers attribute the victories to the executions. But how about the terrible defeats of the first year of the war before a new leadership was developed in the midst of the conflict? The cost of the victories has been terribly high because of the policies of Stalinism.

What a handicap Stalin has placed on the defense of the Soviet Union by substituting the reactionary ideology of Russian nationalism and slavic racialism for the ideas of October! The men who achieved the October Revolution and fought in the Civil War were

animated by the ideas of socialist internationalism. They did not think of themselves as Russians fighting for Russia but as workers fighting for the world socialist revolution, for the ideas of Marx and Engels. Stalin has proclaimed the Soviet Union as a champion not of the working masses but of the Slavs.

If the Soviet masses have shown wonderful morale it is only because they have accepted the position of Trotsky on the Soviet Union and the Stalinist bureaucracy. I do not mean to imply that the Soviet masses have read Trotsky's explanation of the nature of the Soviet Union. Many of the more politically advanced elements

It is the Revolution with its nationalization of industry and the have perhaps reached the same theoretical conclusions. But the

The Soviet masses are fighting to the death because they want

TAREE

to prevent the factories from becoming the property of capitalists and the land from returning to the ownership of landlords.

### \* \* \*

### The Danger to the USSR Still Remains

The danger to the Soviet Union is far from over even if we assume, as it is safe to assume, that Hitler's defeat is not far off. Everyone saw how tense the relationship between the Allies and the Soviet Union became when the Red Army began to push the German forces out of the Soviet Union. To the capitalists of the world the Red Army represents a force that guards a state from which capitalism has been eliminated. We have never tired of saying that the fundamental antagonism between the capitalist world and the Soviet Union continues to exist even under the Stalinist regime. The fundamental proposition of Trotsky that so long as the capitalist world continues to exist, the Soviet Union is in danger, remains as true now as it has ever been.

No agreement can eliminate that danger because it is rooted in the fact that capitalism cannot tolerate the danger to it that is implicit in the very existence of a country where capitalism has been destroyed.

According to those who merely look on the surface of things, the Moscow agreement recently signed by Hull, Molotov and Eden assures peace and tranquility both to the Soviet Union and to the capitalist world.

But every school boy knows by this time that agreements between states are kept only so long as they coincide with the interests of the respective states. As Marxists we understand that agreements do not determine the relationship between states. Even an agreement between two capitalist states is not to be considered inviolate. How much more so an agreement between a capitalist state and the Soviet Union!

This is not to say that the Moscow agreement has no significance. Its significance lies not in the possibility that it will assure peace between the capitalist states and the Soviet Union but that it presents a serious danger to the Soviet Union. That may sound paradoxical but if one realizes that the agreement necessarily implies concerted action by Stalin, Roosevelt and Churchill against the coming European Revolution then it becomes clear that it is dangerous to the Soviet Union. For it is only the European Revolution than can save the Soviet Union and any threat to suppress that revolution is a danger to the Soviet Union.

In an article in the magazine section of the New York Times of Oct. 31, C. L. Sulzberger writes:

"Many Russians with whom the writer has talked frankly disussed the dangers of a communized Germany. They take the view that this would eventually turn in the direction of Trotskyism and might conceivably begin once again, therefore, to foment dangers for the Soviet Union - a possibility which will at all costs have to be avoided."

Who are the Russians with whom Sulzberger has discussed the matter? Not with revolutionary workers but with bureaucrats. And when a bureaucrat speaks of "danger" to the Soviet Union from a Trotskyist Germany, he means danger to the Stalinist bureaucracy.

\* \* \*

### The European October and Its Enemies

The danger which Stalin, Churchill and Roosevelt behold is not illusory. On the contrary it is very, very real. It strikes terror into their hearts. It is the October Revolution lifting up its head and shaking its fist.

What is the deepest significance of the awakening of the Italian masses? After twenty years of terrible oppression, after the murder of the best militants, the Italian masses begin to stir and the rulers are terrified. In the leadership stands American imperialism planning to control the destinies of the European continent, It depends primarily on military force but it will utilize reactionaries

gressmen. As for the current election, the workers demonstrated

liberal democrats, social democrats and Stalinists.

Especially the latter. For who is there more able to mislead the masses than the Stalinists? Roosevelt and Churchill, representatives of capitalism, cannot fool the European masses.

A very symbolic and revealing incident occurred only a short while ago. Badoglio had asked the Allies to help save Italy from war industry and never even tried tion to make such a ruling. to use the small police powers it Warren was appointed to the post formula a few hours before Ickes before Ickes the CIO campaign for wage in-business when they spoke about the assertion that the question of he announced that he was perfectly willing to permit a representative of the Communist Party of Italy in the government. I do not has nothing to do with the Communist Party and that to prevent communism he must take representatives of the Communist Party into the government. Whether Badoglio figured it out for himself or whether someone smarter than he is, explained it to him does not matter. The correctness of his position is not to be doubted.

The Revolution Is Invincible

Only they who look upon the surface of things will despair about the success of the European Revolution. The masses of Europe have power in numbers and they have powerful friends in the camp of their enemies.

They have a mighty friend in the British working class, the class that once stayed the hand of Churchill when he wanted to crush the Russian October. The British workers will once more stay Churchill's hand when he will attempt to crush the European October. The European masses have friends in the Soviet Union, the millions of workers who remember the traditions of October. The European masses have friends in this country.

For ourselves, on this day of celebration of the Russian October, we pledge to exert every effort in defense of the coming European October. We shall not be idle while the European masses are strug. gling. Ours is the task of awakening the American workers to the necessity of preventing American imperialism from destroying the workers' revolution in Europe.

We look forward eagerly and confidently for the moment when the European working class will step forward and proclaim its determination to drive out all exploiters and oppressors. We look forward eagerly and confidently to the moment when the masses following the banner of the Fourth International will proclaim their determination to destroy capitalism with its hates and prejudices. with its hunger and its wars, and build socialism with equality and freedom.

- 7. An Independent Labor Party based on the Trade Unions.
- 8. A Workers' and Farmers' Government.

or appear to be keeping, food prices from soaring, the organized workers will get out of hand and begin striking for higher wages.

That is why Roosevelt continues to insist upon the subsidy program. While its economic value is doubtful, Roosevelt feels he must have it as an indispensable political weapon to keep organized labor in line.

The same National City Bank Bulletin points out the workers will finally foot the bill in any case: "If the costs. . . are not borne by consumers through higher prices, they must be borne by them either through taxes or through further inflation . .Thus subsidies conceal a real price.'

The food profiteers however now see the chance to make a killing. They intend to brook no interference, feeble though it be. That is why Roosevelt's half-hearted attempts at governmental regulation of food prices through subsidies have run head on into the invincible sabotage of big capital.

Roosevelt will not and cannot succeed in halting the rise in prices. The past two years have proved that his policies are only a deception of the people and a cover for the profiteers.

Prices cannot be fixed except through democratic consumers' committees on prices, composed of representatives of the unions, cooperatives, farm organizations, housewives, small merchants, etc. Such committees could examine the books of the great food and processing corporations; expose their rapacious profiteering and black market operations; and demonstrate that the real cause of high prices is not high wages, as the capitalists hypocritically shout, but the superprofits of the capitalists.

The Italian liberals are complaining, cables Herbert Matthews from Naples (N. Y. Times, Nov. 7) that the King insists "nothing must or can be done" until some date in the unspecified future when the Senate and Chamber of Deputies convene. These two bodies were long ago transformed by Mussolini into the Chamber of Fasci and Corporations. New Senators and Deputies will have to be elected, unless of course a democratic label is simply pasted on the old fascist "electees."

"Too many links with fascism remained. Liberals found themselves arrested for exercising what they thought was their right to freedom of the press. The King has in his entourage such notorious former fascists as the Duke of Aquarone while Marshal Badoglio had generals like Mario Roatta and Vittorio Ambrosio. . ."

Of course, everybody knows that the real power in southern Italy'is the Allied military mission and that the King does not dare take a step without first receiving permission from the Anglo-American overlords.

Meanwhile reports come in from northern Italy that assassinations of Italian fascists and sabotage against German forces have increased to such an extent that the Fascist party secretary, Alessandro Pavolini, has ordered summary trials and executions of the "moral instigators" as well as those directly responsible. Italian guerrilla warfare is so widespread as to indicate "a well organized plan of civil war." There has been street fighting between civilians and fascists in Turin.

### Why the Stock Market Is So Jittery These Days

"Stock Market Plunges to 7 Month Low." "Armament Shares Lose 1 to 10 Points" "Early Peace Talk Is Blamed for Selling Pressure."

These headlines on the financial pages this week tell more about the realities of this war than all the speeches gushing forth from Washington about 'taking the profits out of war" and "equality of sacrifice." Big Business is piling up such enormous war profits that it fears the slightest slackening in the production of the instruments of death. The faintest rumor of peace sends shivers through the pocketbooks of the finance capitalists and starts the stock-market speculators unloading their shares.

Whenever something happens that threatens to bring closer the end of the imperialist conflict or to imperil the imperialist system itself, the stock-exchange, that most sensitive barometer of capitalist interests, gets depressed. When the Italian masses rose up last July and launched their revolutionary struggle for power and peace, the stock market went into a nose-dive. No sooner was the Italian revolution temporarily checked than stocks began to rise again. Despite the Moscow pact, the capitalists fear also the consequences of the Red Army victories.

Each time the Red Army beats back the Nazis, the stock market falls-and the faster and farther the Red Army travels toward the frontiers of capitalist Europe, the more tremors Wall Street feels.

Big Business evidently hasn't as much confidence in its future as is pretended in the advertisements of the big corporations about the "brave new world" ahead. The nervous behaviour of the stock market reflects its dread of all sharp changes in world conditions.

Above all, American Big Business fears every independent and revolutionary action of the working masses and every great victory of the workers. The capitalist masters know that the growing power of the working class means not only less profits to them but the prospective end of the entire profit system, its exploitation, its crises and its wars.

The war which has brought so much misery and death to the American people has given the greatest profits in history to American corporations. The National City Bank Bulletin for November contains the following table compiled from the latest Treasury Department figures showing what unprecedented profits Big Business has harvested.

	Year			Vet Income fore Taxes			ncome Taxes
	1929			9,277			084
	1941			14,107		6	,941
	1942e			19,850	1.1	8	.100
	1943e			.22,000		8	.550
1	figures	970	in	millions o	f dolle	re	

All figures are in millions of dollars. (e) Estimated.

Thus this year Big Business will make almost two and a half times as much profits as in the boom peace year of 1929 (22 billion dollars in 1943 as against 9.2 billion dollars in 1929). Moreover, a sizable portion of the taxes will be refunded to the corporations after the war, in accordance with the present tax arrange

capitalist world that still en- Trotsky been coupled at the out- World War is about to give birth.

9. The defense of the Soviet Union against imperialist attack.

### **Subsidies** And Profits

In his message to Congress on Nov. 1, Roosevelt once again announced that he intends to roll back food prices by means of a subsidy program. Subsidies have been in effect since last June on meats, coffee and butter and as everybody knows they have not appreciably cut down prices on these commodities.

But even these pitifully inadequate efforts of the administration to keep prices from rising too fast have encountered fierce resistance from the food profiteers and their Congressional servants. Why are the food monopolists so opposed to subsidies? Big Business as a general rule is not at all averse to demanding and accepting subsidies from the government. The mining corporations today get subsidies for copper production. The oil monopolists get theirs.

Indeed, the millionaire food interests based their. alliance with Roosevelt's administration in the 1930's upon a program of federal subsidies. The big corn, cotton, tobacco, hog and wheat growers all put their snouts in the Treasury trough. But at that time the market for their crops and products was restricted and only through government aid could they maintain their profits.

Foday however the situation is reversed. The demand for food products is unlimited, The food corporations are already raking in tremendous superprofits. But they remain unsatiable. They will tolerate no government regulations or subsidies which attempt to prevent them from squeezing still greater profits.

The National City Bank Bulletin, organ of, by and for the big money bags, explains in its June 1943 number why "businessmen do not like subsidies. . . . They do not want the question of profit . . .to be determined by the decision of a government official."

Roosevelt's war policies guarantee the monopolists huge super-profits. Since the Federal government however is the biggest buyer of foodstuffs, the administration must attempt to some degree to keep down the war costs of its food budget. More important, Roosevelt feels the growing pressure of the workers and middle classes in the cities for lower food prices. He knows that unless he can keep,

### Moscow Pac

Stalin's pact with Hitler in 1939 gave the Nazis the green light to go ahead with their invasion of Poland and unleashed the series of events that launched the present world conflagration. Stalin's pact today with Roosevelt and Churchill seals his partnership with the bandits of Anglo-American capitalism in their ultra-reactionary scheme to crush the European revolution and impose on its peoples, clerical and monarchical military dictatorships. This is the inescapable meaning of the published sections of the Moscow Pact, even if we completely disregard the secret clauses which unquestionably have been agreed to and incorporated as part of the agreement.

As Europe trembles on the verge of great events, Stalin openly proclaims that he is going to try to repeat his counter-revolutionary crimes against the European proletariat that he perpetrated against the Spanish' revolution. But there exists a yawning gap between Stalin's dark designs and his ability to perform. The European revolution, when it flares up in all of its majesty and might will not be harnessed or strangled either by the Stalinist bureaucracy or by imperialist interven-

The Moscow Pact is acclaimed by the reptile press of the big capitalists as "realistic" and "durable." That is exactly the way Hitler described the Stalin-Hitler Pact. The Moscow Pact will prove no more "realistic" and "durable" than did its predecessor.

The European revolution, once it erupts, will sweep across the borders and artificial boundary lines like a prairie fire. It will confound all the schemes and plans of the Anglo-American diplomats who intend to take over Hitler's hangman's work in Europe, and will reawaken the spirit of proletarian Internationalism amongst the embattled Soviet masses. The European revolution will confound all the superwise schemers and planners, all the statesmen and bureaucrats, all the generals and admirals, all the priests and tyrants.

The three "wise men" who foregathered in Moscow in 1943 will no more succeed in halting the onward surge of humanity toward the new socialist society than could Metternich and the reactionary crew of the Holy Alliance prevent ascending capitalism from spreading throughout the European continent a century and 'a quarter ago.

More than 10,000 Jews jammed Carnegie Hall in New York City on Nov. 1 to celebrate the 26th anniversary of the Balfour declaration promising the Jewry a homeland in Palestine. They "celebrated" by bitterly denouncing the 1939 British White Paper forbidding Jews to enter "their own" country.

This "celebration" glaringly reveals the bankruptcy of the Jewish leadership. The European Jews, victims of the fascist bestiality and capitalist decay, are faced with systematic extermination. But the sign "Jews forbidden" now adorns not only Hitler's Germany and most of the civilized countries on this globe, but the "Jewish homeland" itself.

The 1917 Balfour declaration was no humanitarian document, but British imperialism's deliberate bid during the last war for world Jewry's support. At the same time, Palestine was secretly promised to the Arabs. Since today the Jews are a minor factor in power politics, Britain sides with the Arabs.

The White Paper ordering the stoppage of Jewish immigration into Palestine and the cessation of all land purchases by 1944 was issued by Chamberlain in an attempt to appease the pro-fascist Arab leaders. Both the Labor Party and the Liberals in Britain repudiated it. Churchill labelled it "another Munich." But in 1943 the same Churchill, guiding the destinies of the British Empire, insists that this White Paper "will stand." The Roosevelt Administration gives tacit approval. The Jewish leaders call futile protest meetings, and all the while remain abjectly subservient to the Allies.

Dr. Nahum Goldmann, one of the leaders of world Jewry, expresses the "general line" when he states: "regardless of the attitude of democracies toward the Jewish and Zionist problem, we are bound to support the war. . ." (N. Y. Times, Oct. 28.) The Jewry is thus made to resemble a victim who passionately assures the executioner of his support while the axe is about to fall.

1

The only allies of the Jews in their struggle for national and even physical survival are the workers. The only struggle that will benefit the Jews is the struggle of the proletariat for the establishment of socialism.

It Is Time to Build An Independent Labor Party
