ILGWU Leaders Back Fight to Free.18

The imprisonment of 18 members of the Minneapolis Truckdrivers' Local 544-CIO and Socialist Workers Party leaders on December 31, 1943 is being protested by many prominent labor leaders, among them Julius Hochman, Israel Feinberg and Charles S., Zimmerman, all of the ILGWU, as a grave injustice against the labor movement, according to the Civil Rights Defense Committee.

The three-time refusal of the Supreme Court of the United States to review the Smith "Gag" Act under which these 18 have been convicted on account of opinions they hold, leaves this act, sponsored by Congressman Howard Smith who co-authored the Smith-Connally Act, untested for its constitutionalities.

The Civil Rights Defense Committee, authorized representative of the 18 prisoners, is conducting a campaign to secure 10,000 signatures asking reedom for those convicted and repeal of the Smith Act. The committee's headquarters is at 160 Fifth Avenue, New York 10, N. Y.

R. J. Thomas Statement Gives Aid To Anti-Labor Offensive

Big Business Press Jubilantly Hails Blast Against Workers Who Fight to Defend Union

By C. Thomas

In the midst of a ferocious anti-labor drive whipped up by Big Business, its political agents in Washington and its press, R. J. Thomas, president of the United Automobile Workers, CIO, comes forward to blast the membership of his own union with ammunition borrowed from the arsenal of the most rabid enemies of labor. In a statement issued last week, Thomas unloads sole responsibility for a number of work stoppages that have occurred in recent weeks, on those UAW members and locals who resisted the deliberate pro-

vocation of the auto ba-Ward strike "His warning," rons, who defended the gloated the Daily Worker, "was union contracts and who delivered at a time when certain liberal organs, notably PM and delivered at a time when certain fought to maintain union the Chicago Sun, were attacking rights and union condi- strike provocateurs.' tions in the industry. 'Within recent weeks,'' ation just a few days after the says Thomas, "There have the UAW by unanimous action, been too many wildcat had removed the officers of Local strikes. THE MILITANT

Norman Thomas -- His True Role And "Destiny"

(Continued from page 1) have been innundating the country with plans for a post-war world.

Thomas, too, is deeply disturbed that "America, freest of nations to play disinterestedly for lasting peace, has no peace policy." (Page 2.) This sentence of itself sheds illuminating light on the author of "Our Destiny." Whose America is he talking about? Whose destiny is he concerned with? There is on the one hand the America and the destiny of a proximately seventy million workers; and there is, on the other, the America and desliny of the Sixty Families, the hume monopolies controlling the immense productive machine of the country, who run the government. The leader of the Socialist Party draws no such distinction.

His book is like a jig-saw puzzle - without a design and without a color scheme to guide even the most conscientious effort to fit the various pieces together.

Reverence for Capitalist Institutions

In the 192 pages of the book, Thomas manages to comment on almost every topic under the sun. All his comments, disjointed and scrambled as they are, have one common feature: reverence for the capitalist institutions and for the magnificence of the persons in authority, along with a total disregard of the working class and its inherent power. Thomas even ignores both his own Socialist Party and its "destiny." The only reference to the party he leads is contained in a five and a quarter line footnote. The text follows verbatim:

"About half of the Socialist Party convention in Milwaukee in 1942 wanted to go on record for 'political non-support of the war' - notice, not political opposition

(Heaven, forbid! - N.D.), much less refusal of conscription. The other half favored 'critical support.' A compromise tacitly permitted both positions. The convention was united in its views on the rise of fascism and war in general." (Page 11). The sole reference that Thomas does make to his party is thus for the obvious purpose of proving that it has a "kosher" position on the war. This accomplished, he can go on placifly to ignore it. From then on his exclusive concern is with Churchill, Roosevelt, Hoover, Willkie - in short, generally those who "count."

Adulation of Churchill

A few passages chosen at random from the book will show us how reverently Thomas deals with capitalist politicians and institutions:

"In Winston Churchill, Britain has produced the outstanding leader of the war, the inspirer and organizer of his people, and the strategist who, more than Mr. Roosevelt, has directed our policies . . . He is the aristocrat who in great emergencies can supply democratic leadership." (Page 70.)

Again, "I have much to praise in the President's policy toward our neighbors in this hemisphere." (Page 16.)

And again: "I have been very critical of administrative blunders and arbitrary actions which could have been avoided if Mr. Roosevelt's abilities had included greater administrative talent." (Page 143.)

In his high praise of Churchill, as well as in his "critical" remarks about Roosevelt, our author does not see them as the representatives of the exploiting ruling class, he remains blind to the social forces that determine their policies. This is why he is able to speak as he does about the Department of Justice and the FBI, the capitalist institutions of repression, namely:

"Undoubtedly there has been an encouraging growth in the support of certain phases of civil liberty by the government and the people since World War I. At this point praise is due the Department of Justice, including the FBI." (Page 38.)

Another Typical Omission

Thomas forgets to mention the imprisonment of the 18 Trotskyists; persecutions of other labor leaders, De Lorenzo, for example; wholesale violations of the right of free speech and free press, and the Bill of Rights in general; Roosevelt's drive to enslave labor, through the victimization of union militants, anti-strike legislation, government strikebreaking, etc., etc. The only reference he does make to these glaring violations of civil liberties and workers rights is some 118 pages later when he files his objection to the Supreme Court's refusal to review the case of the 18.

In fairness to Mr. Thomas we take note that his praise is not confined to the institutions of capitalist repression. He has a good word also for the various and most poisonous means of deception. According to him:

"In England today one of the most popular and influential of the leaders for social righteousness is none other than the Archbishop of Canterbury, the primate of the established church. Church conferences like that at Malvern, in England, and at Delaver, Ohio, have made a real contribution to our thinking about peace and the post-war world. Definitely there is more and better to be hoped for from the leavening influence of churches in this crisis than there was in World War I."

Mr. Thomas abandoned the pulpit for the

ently anticipates this question. He says, "But when an occasional earnest churchman says, 'Secular agencies have failed; let the churches lead us to a lasting peace and a better democracy,' the answer must be that they are too divided and that they lack power for the task."

Today even without the benefit of the pulpit, Thomas manages to preach his sermons. The book contains a goodly number. There is a sermon on the text: "the fool's gold of imperialism;" another on "racial strife;" a third on "war's biological and psychological legacy to the post-war generation." And so forth and so on.

What is the answer to all the ills afflicting humanity? Throughout the pages of "Our Destiny"

Thomas scurries about in search of some magic formula which would turn the trick, which would succeed "in winning the earliest possible peace that will last." This is no easy task. One can almost see the beads of sweat rolling down his brow. For Mr. Thoma's, you see, is in addition in search of a formula that would curb the imperialist appetites and still be acceptable to the imperialists.

A Friend and a Formula

With the aid of a friend Norman Thomas has come upon a formula which he believes might do. He writes:

"Soon after Pearl Harbor a friend presented me with an idea which has haunted me by its excellence. It was that all colonial Africa be turned over to an international authority, pledged to enforce a solemn charter of native rights, to guide the people to full self-government, and to insure equality of opportunity to trade with Africa to all nations which would accept

Socialist Party. Why? The author appar- this international authority and its requirement that the beneficiaries abstain from aggressive armament."

> But no sooner does Thomas put this "solution" down on paper, than it dawns on him that, "It would be a miracle past hoping for that a victorious Winston Churchill would agree to such an arrangement for Britain's colonies in Africa or anywhere else, or, indeed, that Franklin Delano Roosevelt would ask it."

Nevertheless, Norman Thomas is undaunted. He is no doctrinaire. He has a solution to this, too. He immediately offers a compromise: "What might be possible," he continues, "would be that the Italian colonies and the territories formerly administered under the mandate of the League of Nations. . . should be administered under the authority of a world federation to which could also be committed certain territories recovered from Japan. The solemn purpose should be to help them to full self-government."

The Contradictions of Thomas

By the time he reached this point, Thomas had completely forgotten what he himself had said at the beginning of his book. Speaking of "the great failure of Versailles." he makes the profound observation: "The peace-makers were right in giving weight to the self-determination of nations; their mistake was in applying it mostly against their enemy and not within their own empires." Toward the conclusion of his book, Thomas picks up that same "mistake" of Versailles in order to - offer it as a formula for "the earliest possible peace that will last." In this Norman Thomas remains true to himself. Marx long ago characterized such individuals as follows:

'A petty-bourgeois of this type glorifies contradiction because contradiction is the basis of his existence. He is himself nothing but social contradiction in action."

"Our Destiny" is consistent only in one thing — its inconsistencies. It is a graphic example of the war-time role of a muddleheaded pacifist. Until Pearl Harbor he had been spreading the illusion that American monopoly capitalism could or would stay out of the war; "Pearl Harbor meant for me the defeat of the dearest single ambition of my life; that I might have been of service in keeping my country out of a second World War." This preacher who heads the Socialist Party never learned the socialist ABC that war cannot be prevented by pacifist sermons, that wars flow inevitably out of the profit system and that so long as capitalism exists there will be greater and more devastating wars.

Whom Thomas Really Serves

All that Thomas could do after Pearl Harbor was to offer prayers that this be a good war: "It is true that there have been very few good wars-God grant this may prove one of them-that have been relatively, but in an important sense. wars of liberation."

Thomas in his search for "the earliest possible peace that will last" serves the interests not of peace but of the propaganda of the warmakers. He continues to deceive himself and his followers by spreading the illusion that a non-imperialist peace can flow out of an imperialist war. At the same time, the head of the SP serves imperialist interests when, in violation of all socialist concepts, he tries to convey the impression that capitalist countries are capable of conducting wars of liberation.

wood-fuel shortages. The Washington State Director of Selective Service stated that strikers are to be considered as "not work-Wednesday of industry-wide in- ing" and "naturally will be reclassified 1-A." These threats son of the Northwestern Council have been followed by the further spread of the strike.

At this writing, all signs point to an even larger increase in the strikers' ranks. The lumber mills and camps are seething with resentment against the lumber kings and their WLB agents. Wages in this dangerous industry have remained virtually stationary despite price rises since the beginning of the war. Profits, however, have increased tremendously. Since 1940, the lumber barons have jacked up the price of a thousand feet of lumber from an average of \$21 to over \$38. The OPA has permitted one price boost after another, only a month ago authorizing an increase from \$1 to \$3 per thousand feet of No. 3 sawmill and camp-run Douglas Fir logs.

Bulletin

PORTLAND, Ore., May 28 - In defiance of the union's Stalinistdominated international leadership, the Columbia River District Council of the CIO International Woodworkers today issued a statement that it could not "conscientiously" order its membership to obey a WLB directive demanding that the CIO workers discontinue their participation in the Pacific Northwest lumber strike.

At the same time, the Northwest Council of the AFL Lumber and Sawmill Workers, the bulk of whose members are on strike, today adjourned a meeting without taking action on the WLB's strikebreaking ultimatum.

Wall Street's Scheme To Grab World-Wide Air Line Monopoly

By James Cowan

Inter-continent and transoceanic air transportation is one of the central links in the chain of plans of American monopoly Pan American monopoly to outcapital for domination of the post-war world. This link is represented by Pan American Airways, Inc., a monopolistic enterprise which ranks among the world's giant corporations.

In a period of about 15 years, during which aviation rose to its present stature, Pan American has grown from a small concern operating a single air route between Key West and Havana, to a giant enterprise whose skyliners girdle the earth along 98,000 route miles. Its gross revenues in 1942 amounted to \$109,000,000 and its personnel,

numbering 88,000, were spread Although it had accumulated over three-fourths of the earth's great profits and enhanced its

federal

purse.

the air," meaning freedom for the gerently - will build planes that will be able to fly past them to their destined goals. MONOPOLY ROOTS

Pan American is not an orphan unable to make its way in the world alone. It has become an integral part of the vast structture of American capital which is bent on world domination. It is a leading instrument of this policy. The stockholders' list of Pan American has included such names as Cornelius Vanderbilt Whitney, William H. Vanderbilt, W. Averell Harriman, John Hambleton, Robert Lehman, Edward Stettinius.

Its place in the family of American capitalism is depicted as follows by Matthew Josephson: "A man who was for many years a vice-president and foreign repres

entative of the company has described the impression produced upon him by attendance at one of

the first directors' meetings. He der the auspices of the Army and had been called to New York to give a report on problems of for-Pan American has opened an air eign promotion in various Latin American countries with whose commerce and politics he had had acquired rights to a spur line long experience. In The Militant

TOLEDO-The famous Auto-Lite strike which won the first stronghold for the auto unions of America, was brought to a victorious finish after a bitter six-day battle. This inspiring struggle paved the way for the organization of the auto workers first in Ohio and Michigan and then nationally. This was the second strike called by the union within five months, in the struggle for union recognition, better working conditions, a 20 percent increase in wages, and other demands. Under the militant leadership of the Toledo militants of the American Workers Party (which soon afterward fused with the Trotskyist Communist League), the workers for the first time defied a court injunction by mass action. 68 Toledo unions voted to call a general strike in support of the Auto-Lite workers, after thugs, special police, company guards, and National Guardsmen united in the assault on the workers. The militant Unemployed League joined the strikers on the picket line, playing a leading role in the struggle and demonstrating the importance to the labor movement of unity between the workers and the unemployed.

Expressions of solidarity came from other parts of the country, as the significance of the strike became known. In New York, a united front meeting called to protest the Toledo police reign of terror included delegates from the Communist League, the Socialist Party, the American Workers Party, the IWW and other tendencies within the working class movements with the exception of the traitorous Stalinists.

NNEAPOLIS-The General Drivers Strike, a landmark in the history of American labor, was settled with key gains for the union, including union recognition, unconditional reinstatement of all strikers, and an agreement to arbitrate the demands on wages and hours. At strike headquarters, the union leaders, including Carl Skoglund and Vincent R. Dunne, were cheered by the membership as they called for continued militancy and vigilance, to guard the union's conquests.

In the historic "Battle of Deputies' Run" at the Minneapolis City Market on Tuesday, May 22, 1934, the workers with splendid organization, and unforgettable courage, turned the police attack into a rout. Cops and deputies, armed with sawedoff shotguns and vomiting gas, dropped their weapons and ran for cover as the pickets, aided by reinforcements sent from strike headquarters, held the market place.

The dramatic battle which climaxed the strike, proved once more the value of organized leadership of the workers' struggles. The strike headquarters despatched flying squads of pickets at the very moment they were needed, kept skeleton crews of pickets at other points, rendered first aid to the injured, provided hot food for the strikers and their families, took care of every emergency as it arose, so that the morale of the workers and their wives remained at the same high point during the entire struggle. To break through the conspiracy of silence of the capitalist press, the women's auxiliary was assigned the task of leading a mass demonstration on the mayor's office; thousands of workers who followed them, were addressed from the steps of the city hall by a member of the auxiliary.

Out of the victorious struggle, came immediate gains for the union, paving the way for greater gains in the future. Tremendous prestige accrued to the Trotskyist leaders of the strike who worked with such untiring devotion and skill to entrench the union movement in the formerly open-shop town of Minneapolis.

With the revival of industry, put American Trotskyism to the workers gained new confi- crucial test.

dence in themselves and began a movement to wrest back some of those things which had been taken away from them in the depths of the depression. The ground for the mass activity of the Trotskyist movement in America was, of course, laid by the action of the masses themselves. In the Spring of 1934 the country had been electrified by the Auto-Lite strike in Toledo in which some new methods and new techniques of militant struggle had been introduced. A political, or at least semi-political grouping, represented by the Conference for Progressive Labor Action, which had set up the Provisional Committee for the formation of the American Workers Party, had led this tremendously significant strike in Toledo through the medium of their u n e m p l o y e d League.

There was shown for the first time what a great role can be played in the struggles of industrial workers by an unemployed organization led by militant elements. The unemployed organization in Toledo, which had been formed and was under the leadership of the Musteite group, practically took over the leadership of this Auto-Lite strike and raised it to a level of mass picketing and militancy far beyond the bounds ever contemplated by the old line craft union bureaucrats. The Minneapolis strikes raised too low and their hours too long. direction and the maximum exploitation of every possibility in- and the ground-down workers that the high point of the 1934

Minneapolis wasn't the easies nut to crack. In fact it was one of the hardest in the country; Minneapolis was a notorious open shop town. For fifteen or twenty years the Citizens Alliance, an organization of hard-boiled employers, had ruled Minneapolis with an iron hand. Not a single strike of any consequence had been successful in those years. Even the building trades, perhaps the most stable and effective of all the craft unions, were kept on the run in Minneapolis and driven off the most important construction jobs. It was a town of lost strikes, open shops, miserably low wages, murderous hours, and a weak and ineffectual craft-union movement. The coal strike . . . was a pre- ageously affirmed his Marxist liminary skirmish before the

One of the Disputes At Teheran

The Saturday Evening Post has published two articles on "What Really Happened at Teheran," written by Forrest Davis, the Washington editor, who frequently is used by the Roosevelt administration as a conveyor for tid-bits of news which cannot, for diplomatic or other reasons, be given out of-

Davis reveals the following interesting passage - at - arms between Roosevelt and Churchill which occurred in connection with a discussion of Caribbean bases leased from Britain by the U.S.

This discussion, says Davis, 'led to an entertaining disputation. Newfoundland was mentioned, the prime minister observing Britain never would relinquish Newfoundland willingly, it being the oldest crown colony. Mr. Roosevelt challenged the designation. Nettled, Mr. Churchill replied, 'I never heard a more preposterous statement; of course, Newfoundland is a crown colonly. I ought to know: it's part of my government.' Mr. Roosevelt declined to give ground. 'It's not a crown colony,' he countered: 'it's a crown colony in bankruptcy. There's a difference'." Having already become less-

ees of a base in "bankrupt" Newfoundland, the American monopolists now seem to aim at becoming the receivers in bankruptcy and—who knows? perhaps even the beneficiaries in receivership.

Of particular interest for those by the Trotskyists in Minneapolis, and draws their lessons; the necessity for integration of the revolutionary vanguard in the mass organizations of the workers; the importance of long, careful planning before strike action is taken: the role of the strikers' wives who fought shoulder-toshoulder with their husbands; the aid sent by other unions; the high morale maintained by the printing of a daily strike paper: above all, the importance of bringing to the economic struggles of the trade unions, the political experience and understanding of the revolutionists. The Review of the Month includes analyses of such significant recent developments as the Communist Party participation in the Badoglio cabinet, the Allied plans for control of Europe as the

invasion approaches, and the lessons American workers must draw from the Montgomery Ward case. Other features include the

esolution on War and Military Policy adopted by the Revolucionary Communist Party of England at its recent fusion conference, and a book review by Harry Frankel of Leon Trotsky's "The New Course," to which Shachtman has appended his revisionist essay.

The series of articles by Frotsky on military theoretical subjects, is concluded in this issue's Arsenal of Marxism with the publication of Trotsky's report and speeches delivered at the conference of military delegates to the Eleventh Congress of the Russian Communist Party on April 1, 1922.

Readers of The Militant who have not yet subscribed to the Fourth International, will find this issue an excellent introduction. Single copies are 20c; yearly subscription \$2. Order from Business Manager, 116 University Place, N. Y. 3, N. Y.

outbursts is that they will lead only to the victimization of the militants and their elimination from organized contact with the mass of union members. Instead of dissipating their strength and numbers in isolated forays, the militants must mobilize their forces for the impending showdown with the corporations and the labor bureaucrats."

The process of bureaucratic degeneration, of depriving the members of their democratic rights, is not peculiar to the UAW alone. In fact, Thomas and Co. are following a pattern previously established by Sherman Dalrymple, head of the United Rubber Workers. Dalrymple, also in the name of the no-strike pledge, engaged in wholesale expulsions of militants in the URW, removing elected local officers and appointing "administrators" to rule in the name of the executive board. The rubber workers have fought, and are fighting, to wrest their union from the Bureaucratic clutches of Dalrymple and his henchmen on the General Executive Board.

More recently the bureaucratic plague spread to the United Steel Workers when the International Executive Board suspended five officers and seven grievance committee members of Local 1519, Cleveland, Ohio, for violating the no-strike pledge. Philip Murray, following the precedent established by Dalrymple-and Thomas-appointed a receiver to take over the affairs of the local. Reporting this action, the Cleveland Plain Dealer approvingly observed: "The move was seen as part of the recent effort by CIO unions to take stronger measures to implement the no-strike pledge." The unconditional no-strike pledge is thus being used as a noose with which to strangle the internal democracy of the unions.

In the April 1 issue of The Militant we pointed out: "The danger exists throughout the CIO unions. If the militants in auto now take the initiative in. halting this fink drive of the top bureaucrats, they will find support and backing in the rubber union, the steel union and in numerous other sections of the CIO. The bureaucrats cannot be fought by isolated sporadic flareups and departmental strikes. These very often play into the hands of the corporations and labor fakers. What is necessary now is to organize the leading local unions in auto, rubber and steel behind a fighting program and then wage a fight for the program.'

The struggle for internal union democracy cannot be divorced from the fight against the nostrike pledge. By tradition and influence as well as by its commanding position in the CIO the UAW is best fitted to take the leadership in this struggle. A number of powerful UAW locals are already on record demanding the revocation of the no-strike pledge. The eyes of the entire labor movement will be on the coming UAW convention. The militants must mobilize their forces around a program that meets the needs of the membership. Such a program should include:

(1) The preservation, extension and safeguarding of the democratic rights of the membership. Uncompromising opposition to any union official combining with the bosses to victimize the workers. Against the system of bureaucratic expulsions of members or the arbitrary removal of elected local officials! (2) Rescind the unconditional no-strike pledge. Rearm the union with its most effective weapon for resisting the provocation of the employers, for enforcing the union contracts and for pre-

Three Birthdays

Carl Skoglund, Vincent R. Dunne and Max Geldnan, three of the 18 Trotskyist class-war prisoners, in recent weeks celebrated their birthdays n Roosevelt's "democratic" penitentiary at Sandstone. Minnesota. On this occasion The Militant extends felicitations expressing the respect, admiration and well-wishes of thousands of militant unionists and class-conscious workers. This, we are sure, will be among the most welcome gifts they might receive.

CARL SKOGLUND, that grand veteran proletarian warrior, was born 60 years ago in Sweden. In 1911 he came to America, where, as building tradesman, lumberman, fireman, janitor, railroad worker, coal driver, mechanic, he has never ceased to raise the rallying cry of labor, "Organize!" His qualities of leadership, courage, single-minded devotion to labor, have been recognized by his fellow workers, who many times elected him to union posts, the last being the presidency of Minneapolis Teamsters Local 544. When Roosevelt's Minneapolis prosecution began, he was arrested by the FBI and held for deportation. But he was told the action against him might be "reconsidered" if he would testify for the government. He rejected the offer with contempt and marched to prison with his fellow-workers and comrades.

VINCENT R. DUNNE, now 55 years old, is one of the great labor leaders to come out of the Northwest. His career goes back to the historic strikes and free-speech fights of the IWW in 1906-08. He gained national prominence in 1934 when together with his brothers, Grant and Miles, he became a leader of the historic drivers

strikes which made Minneapolis a union town. He

was one of the first to rally to the banner of

Bolshevism after the October Revolution, re-

CARL **GELDMAN** SKOGLUND DUNNE

ing member of the Trotskyist movement in America, he held the post of National Labor Secretary of the Socialist Workers Party when he went to prison

MAX GELDMAN was born in a Warsaw, Poland, ghetto in 1905. From his early youth in this country he was an active fighter for socialism in the ranks of the Communist Party. With the degeneration of that party, he joined the Trotskyist movement, and during the years of the depression became a leader of the unemployed struggles in Minnesota. Because of his militant leadership in the 1939 Minneapolis WPA strike, he was arrested on a frameup charge and imprisoned in Sandstone penitentiary, where he is now confined for the second time for his loyalty to labor.

Trying to Halt Cartel Menace With Mere Words

Proposed federal legislation to halt monopoly practices, particularly the international cartel connections of Big Business, resembles an attempt to sweep back the ocean tide with a broom.

Senator Joseph O'Mahoney, of Wyoming, who has been making a big hullabaloo about the evils of cartels, is now holding hearings through the Senate Judiciary Subcommittee, which he heads, on a bill requiring corporations to list with the Justice Department any foreign contracts they hold that may be in restraint of trade.

This bill does not envisage halting such "practices, but merely, in the words of O'Mahoney, would endeavor to "remove the veil of secrecy from international contracts for the restriction of production, the fixing of prices, the allocation of trade territory, or the manipulation of patents, trade marks, and corporate agreements, the existence of which in world trade has long been known."

The worthy Senator must himself undoubtedly appreciate the fantasy of a proposal to fight the allpowerful cartels by asking them to publicize practices which have "long been known."

O'Mahoney himself admits his bill "does not prohibit the organization of cartels, as many students of this problem might suggest. This is a very modest proposal. . . on the theory. . . that a requirement for the disclosure of commercial contracts which call for monopolistic practices would be an effective deterrent to the making of such contracts."

What a "deterrent" it would be is indicated by the fact that the first witness who will speak in favor of the bill is Ralph Gallagher of Standard Oil of New Jersey. This corporate giant has maintained for decades some of the most far-reaching cartel agreements ever devised, and is merely waiting for an end of military operations to resume in full its connections with the German, Japanese and British oil and chemical cartels.

Since the government has made a farce of enforcement of existing anti-trust laws, the monopolies have no fear that the proposed "very modest" bill would be any more effectively enforced.

Why Workers Cannot Buy **Needed Cheap Clothing**

Workers of the Dodge forge plant in Detroit were only narrowly prevented from striking when they were compelled to handle five-ton hammers with bare hands and flimsy improvised gloves. In the Delco battery plant at Muncie, Ind., a 30-minute shut down occurred recently when the workers were unable to secure the clothes necessary to protect them from battery acids.

These recent incidents highlight the scarcity of cheap work clothes resulting from the policies of the textile manufacturers aided by the War Production Board, who refuse to make low-cost consumers items in order to realize greater profits.

The Labor Policy Committee of the Office of Price Administration only recently complained that "deliberate curtailment of low-cost goods is the manufacturers equivalent of strikes. In every case the pattern is the same. Manufacturers of low-cost textiles that go into these garments reduce production and demand that price ceilings be raised. WPB obligingly submits to the holdup, in spite of the fact that textile manufacturers are making ten times their peacetime

ainst imperialist attack.

No-Strike Pledge

Three months have elapsed since the International Executive Board of the UAW adopted a resolution reaffirming its unconditional no-strike pledge and threatening drastic penalties against lo-, cal unions and members who engage in "unauthorized" strikes. Instead of allaying the evil of widespread contract violations, this policy of unconditional surrender unleashed a tempest of unbridled company provocation.

Despite the proven bankruptcy of their policy, the top UAW officials persisted in their false course to the point of uniting with the corporations in "disciplining" the victims of company provocation. Once embarked on that road the union bureaucrat's abandoned all restraint in applying punitive measures to those members and locals who fought to defend their rights against the insolent auto barons. The latest incident is the removal of the elected officials of Chrysler Local 490 and the appointment of Leo Lamott as "administrator" over the local. Adding insult to injury, Lamott, despised Stalinist stooge, hated by the Chrysler workers for denouncing their strike last year in the capitalist press, is arbitrarily imposed on Local 490 as dictator-receiver responsible only to his cronies on the executive board.

The demand for the unqualified adherence to the unconditional no-strike pledge has inescapably led to a series of steps in bureaucratizing the union. In tracing the evolution of the Thomas-Reuther-Addes-Frankensteen clique, The Militant, March. 25. 1944, said: "In their fight to preserve the UAW as a progressive organization that represents the interests of the auto workers, the rank and file militants must reckon with the fact that their top leadership stands on the side of the corporations and their political agents in Washington. No longer able to gain voluntary support for a policy that is false and fatal for the union, the labor skates seek to force adherence to their policies by collaborating with the corporations in purging those militants who resist."

We followed this analysis with a warning that is still valid: "These circumstances must determine the tactics to be followed by the union militants who constitute the active, conscious core of the UAW. Sporadic outbursts of indignation induced by the insolence of the employers and the bureaucratic action of the top officials, while understandable, are largely ineffective. The danger in such

serving the union against attack by its enemies. (3) For an Independent Labor Party. Put an end to company unionism on the political field by breaking decisively with the political parties controlled by the corporations.

3,149 New Readers

With characteristic devotion, discipline and energy, the members and sympathizers of the Socialist Workers Party have already topped the quota in the campaign for 3,000 new 'Militant' subscribers -since April 1 our paper has gained 3,149 new readers, with five more weeks to go before the actual close of the campaign.

In this splendid achievement, the Trotskyists once more demonstrate the meaning of a Bolshevik party in action. All the blows of the capitalist class enemy have failed to impair the morale, the vigor and growth of the Trotskyist movement.

All the reports from the SWP branches and distribution agents testify to the political awakening that has begun to manifest itself among the workers. They are not the dull clods and supine slaves the bosses and their agents would like to make them appear. No, these American workers who have fought giant union battles and built the mightiest union organizations in a brief ten years, will never return again to their old status-under a "post-war" order that Wall Street schemes.

The war has not failed to leave its marks and scars on the working class. But they are at the same time being shocked into a new awareness of the shabby pretenses of "democratic" profiteers and war lords. Their dissatisfaction has deep roots, and they are seeking fundamental answers. No other organization, no other program, can give a correct solution save that of Trotskyism.

Lenin once wrote that "wars, with all their horrors and miseries, have this more or less beneficial result, that they mercilessly reveal, unmask and destroy much that is rotten, obsolete and dead matter in human institutions." The war is now unveiling before greater and greater numbers the true meaning of capitalism. We feel confident that in the months to come many thousands more will swell the ranks of the 3,149 new readers of The Militant.

of International Settlement at Basle, Switzerland, on May 22 engaged in the pleasant chore of counting up the proxy votes from the leading banking corporations of America, Great Britain, Germany, Japan, Italy, France, Holland, Belgium, and Sweden and cut themselves another dividend melon.

What harmony reigns amidst the international financial vultures of capitalism as they divvy up their blood-coined profits drawn with icy impartiality from the wounded and dead of all the warring countries! As the United Press dispatch noted: "With last year's business closed, the American, French, German, Italian and Dutch executives of the bank now face another year of daily meetings. All the executives. . have a tacit agreement that politics and war will never be discussed while they carry on the bank activities. General Manager and President of the BIS is the American representative, Thomas H. McKittrick. His colleagues include a German, a Frenchman, an Italian and a Dutchman. . . Since the outbreak of the war in 1939, these men have been sitting side by side each morning, with discussions limited strictly to financial problems."

"Financial problems" make all capitalists kin! And what reassurances could come from Basle more pleasant to the men dying in the mud-holes, to the women and children of Europe as the bombs shriek

down, to the workers draining out their lives over the pounding machines, than the news that this amity which takes no note of battle lines or national boundaries will continue!

"It naturally needs a considerable amount of tact on behalf of every one of us, but up to now we've been getting along nicely and expect to do so in the future." McKittrick told the press. "The bank's annual meeting has dwindled during the past five years," McKittrick sadly observed, but "we keep the machine ticking, however, because when the armistice comes the formerly hostile powers will need an efficient instrument such as the BIS."

Above all, international capitalism must have an "efficient instrument" at all times, in war and in peace, so that profits unending will continue to pour into the coffers of the benevolent plutocratic fraternity whose representatives sit together in Switzerland,

profits.

But! "In every case, however, the WPB has proceeded to release manufacturers one by one from this production requirement after the price increase has een granted.

International Bankers Never Skip A Dividend
