CIO Defies **Political Ban** In Slave Law

Union-Financed Papers Back Federal Candidates

The Congress of Industrial Organizations (CIO) and the CIO United Automobile Workers this week directly defied and violated the section of the Taft-Hartley Slave Labor Law that bans use of union funds for campaign purposes in elections to federal office.

CIO President Philip Murray, date. I am convinced my interpre-in a front-page statement entitled tation of the law will be backed "Test of Political Freedom," pub- up by the experts and if I am inlished by the July 14 CIO News, correct, I am willing to amend the publicly endorsed a candidate in act to make it clear." the special Congressional election in In the very set of defying the

bill, under the guise of controll- regulations as are deemed necesing "foreign agencies," establishes a Gestapo stranglehold over anyone daring to think against the powersthat-be. "'Foreign agencies' means any group" serving even "indirectly the purposes . . . of a foreign power."

And what does not serve foreign power "indirectly?" Merely to speak against the drive toward war can come under this heading and result in five years in prison and a \$5,000 fine. The state's Attorney General has complete power to declare any organization a "foreign agency!'

Frovisions also make it illega' for groups serving the "objects" of a foreign power to "influence public opinion." "Objects" of a foreign power might be any statement opposing spcedup, wage cuts, or war. Moreover, any such group must reveal to the Attorney General all information demanded, thus exposing the names of union militants fighting speedup or war. Fines of \$5,000 and imprisonment of five years can be imposed. Any union might be smashed this way.

And anything printed by such an organization must carry on its masthead the statement: "Published in compliance with the law of the state of Michigan governing the operation of foreign agencies."

Then to make the cheese binding: "The Attorney General is auchoose union leaders. thorized at any time to make,

Cops-and-Robbers' Theory of Politics We the People

By Art Preis

Most of us, when we were kids, played a variety of games involving "good guys" and "bad guys." A favorite on our block was "cops and robbers," with the cops as good guys chasing the robbers as bad guys.

In the movies, we yelled: "Here come the good guvs!" when the hero and his pals came racing around the bend. "There go the bad guys!" we should as the villain and his mob • rode off in flight.

We could always tell who the good guys and the had guys were in the movies. There was no mistaking them. They looked and acted their parts.

But, as we grew up, we learned how hard it is in real life to tell a "good guy" from a "bad guy." In relations with real people, the good guy-bad guy formula doesn't work out so well.

Unfortunately, this child-like good guy-bad guy concept continues to pervade the most serious and vital sphere of adult American life-the sphere of politics. It is the stock-in-trade particularly of the trade union leaders. They are still in the adolescent stage of "good guy-bad guy" politics.

Take John L. Lewis's recent comment on the role of the Republicans in Congress. Speaking of those who voted for the Taft-Hartley Act, Lewis said: "Of course it is obvious that the Republican Party sold out to American industry for cash contributions to the Congressional campaign."

Now, the Republican Party didn't sell out to anybody. The Republican Party was organized by the industrialists of the North prior to the Civil War and in opposition to the Democratic Party which was then controlled by the Southern planters and slaveholders.

CAPITALISTS CONTROL BOTH PARTIES

chines will allow.

"tories sent around coffee wagons.

Now that the war is over, and there

is no more cost-plus, this cut out

because it takes the men away from

The Republican Party has always been financed by the capitalists. They own it. They don't have to bribe Republican politicians to vote for their measures. They control the Republican machine. The

The Instinctive and

Elemental Drive

This holds true for the Democratic Party as well. manipulates mass sentiment between the Republican classes. Did the industrialists buy the votes of, the majority Democrats in Congress who also voted for the of Slave Labor Law? Not exactly. The Democratic Party is also controlled by, the capitalist class. Big. money is poured into its campaigns. This money is invested not in an effort to buy the Democratic Party, but to support it as a tried and tested machine serving the interests of capitalism.

In 1936, Lewis had Roosevelt tagged as a "good guy." So he invested \$500,000 of union funds in Roosevelt's campaign. Four years later, Lewis invested in Willkie as a "good guy" in opposition to Roosevelt. In 1944 and 1946, Lewis found most of the "good guys" in the Republican camp. Now, he complains they have turned into "bad guys."

Lewis isn't much different on this score than the other union leaders. They, too, are always looking for the political "good guys." AFL President William Green tells the workers to "reward their friends and punish their enemies." Politics, according to him, is a game of lining up the "good guys" to chase the "bad guys." CIO President Philip Murray is always talking about kicking the "reactionaries" out of Congress and electing "progressives"-from the capitalist parties, of course.

The trouble is-after every election we find the "good guys" lining up with the "bad guys." And then the workers are sent off on a new search for "good guys"-in the same Democratic or Republican mob.

The fallacy of the good guy-bad guy idea of politics is that it is based on a myth. This is the myth that politics in America is not based on class interests, and that the two major parties are not based on class lines.

POLITICS INVOLVE CLASS RELATIONS

But politics in America, as in the rest of the world, is above all else the expression of class interests and class relations. This fact has been concealed by the

Republicans don't need to be bought; they're selected. mechanism of the two-party system, which skillfully' "outs" and the Democratic "ins," and vice versa. In this fashion, mass discontent is channelized into

one or another of two parties, both of which are owned and controlled by the ruling capitalist class. Labor will grow up politically only when it ceases to reduce politics to a childish game of seeking out the "good guys," the capitalist "friends of labor" who promise to protect labor's interests before elections and who line up with their party machines against habor after elections.

Labor will reach maturity politically when it understands politics in class terms. The struggle of two classes-the working class that produces all and owns nothing, and the capitalist class that owns, all and produces nothing-that is the starting point of all realistic politics today. And parties are the instru-

ments for political struggle between these

As yet, American labor has no such instrument It is urged by its leaders to use the instruments designed to keep its class enemies in political power. It is advised to try to find "good guys" in the enemy camp as the means to defeat the enemy.

This has already brought us to the era of the Taft-Hartley Slave Labor Act. Tomorrow it will lead to the era of American fascism, unless the workers force the union leadership to a different and opposite political policy-a class policy.

We must put an end to kindergarten politics based on "good guys" and "bad guys." We must for contributing to the delinquency adopt the program of grown-up politics in the real of her 14 year old son. The boy world. American labor must fight politically as a had been arrested, tried and convict- Ariz. The owner took the case to class in its own class interests. The solution of the tasks of proach the German problem. the bourgeois revolution made it The basic strategic task-to overpropriation of the capitalists. **BURNING NEED**

The situation in Germany in 1947 sets before the German working class, the burning necessity of the proletarian revolution. In no country in the world is the situation so Germany. No other class in society is capable of demanding the power. It is precisely because the Big Four are thoroughly aware that the only alternative to their own rule of Germany is a workers' Germany, that they are so dctermined to maintain their domination of the country right to the end.

The main force opposing the German proletarian revolution is the occupying powers. The German proletariat cannot put forth any economic or democratic demands. even the most elementary, without coming up against the necessity for struggle against the occupation. No form of struggle, not even the most elementary, can be launched without running headlong into the military and police apparatus of the occupying powers.

The solution of the tasks of the proletarian revolution in Germany requires a consistent struggle MAIN EMPHASIS against the occupation, in the course At the present stage the main of which struggle the German cmphasis remains, of course, on proletariat, like the Russian prole- propaganda. The possibility of tariat in 1917, can put itself at the forming hundreds of Bolshevik head of all the toiling masses of the cadres is certainly an immediate cities and the country.

Under the shadow of repression, the Bolshevik Leninist Party of In-

THE MILITANT

experience millions of German dia (Trotskyist) had its national convention in Bombay last month. This was the BLPI's second convention since 1944, the intervening years being marked by bitter struggles against imperialism. Even now, the outlawing of the several trade unions influenced by the slogans. As a matter of fact, the BLPI has very much aggravated the difficulties in the way of a

smooth development. The national convention of the party was attended by a full complement of delegates from all the different units in the mainland and Ceylon, and the political decisions which were thrashed out evoked an animation quite in keeping with

the tense atmosphere outside. Controversy centered around the question of the Constituent Assembly and the proposal for the Trotskyists to enter into the Socialist Party of India (formerly Congress Socialist Party). The adoption of the resolution on the Constituent Assembly in effect revised the 1942 party program and replaces the slogan of the Workers and Peasants Government as the central political slogan with that of the Constituent Assembly.

The proposal of entry into the SPI did not commend itself much exist in many major provinces of India and where it did exist, it lacked a trade union base. In such places as Madras and Bengal the trade union base of the BLPI is much stronger than that of the SPI.

The convention marked the prohealthy critical spirit in the face (To be concluded next week) | facing the Indian revolution.

Truman Doctrine on the reactionaries in Greece. They have cast TOLL OF CIVIL WAR aside all restraint. The terror they have unleashed is reaching into every hamlet in the land.

Of the 15,000 population which in prison, a minimum of 5,000 are behind bars because of their political opposition to the puppet monarchy. As of April 1 another 5,185 political prisoners were held in the notorious island concentration camps were shipped there in April, May and June. And on July 9, as reported in last week's Militant, a new witch hunt was unleashed by the government.

At least 3,000 victims were taken in the first day of this purge, bringing the total number of political prisoners in Greece to 15,000. And this, it must be emphasized, is a minimum figure.

The morale of Greek reaction is likewise reflected in the number of casualties inflicted on the population since last March when the monarchy launched an armed assault on the partisans in the north. Some Appointed as administrator of U.S. military aid to the Greek tyrants, 8.000 "guerrillas" have been killed

civil war has devastated northern Greece. In Macedonia and Thrace there are some 433,000 displaced perthe Greek government admits are sons. In the areas near Albania where the sharpest fighting is now going on, refugees are pouring from the villages, taking what few possessions they can carry.

Cattle and draft animals are requisitioned by the army. The comin the Aegean. Some 2,000 more bination of war and bad weather have affected the crops so seriously that in some places not even wheat for seed next year is expected. The army has even banned mountain grazing in its ruthless drive to smash all opposition to the mon-

archy. The government propagandists, nowever, attempting to unload the blame, claim that their army of some 100,000 has been attacked by

an "invasion" of 2,500 men from Albania. These "invaders," says the Foreign Ministry, are "parts of an international brigade."

The witch hunt was launched on he pretext a communist "plot" had been uncovered to seize some government buildings and assassinate some government officials. The 'evidence," however, was so flimsy that not even the capitalist correspondents have dared to give it full credence. To overcome the doubts of correspondents, ex-bandit Nupoleon Zervas, now Minister of Public Order, promised the press he would show them the evidence. But at his July 11 interview he showed them nothing. He claimed that he was "really breaking a law" in giving out any information and thus it would not be possible to proleged order for an uprising.

WITCH HUNT CONTINUES

Meanwhile, the witch hunt continues. Special committees set up by the government are empowered to pass sentences up to one year on "suspicion of endangering the state." But apparently even the formality of these drumhead hearings is being dispensed with and those arrested are shipped off to concentration camps the same day the police drag them out of their homes.

Two days after the mass arrests began, Dwight P. Griswold, administrator of the program for bolstering the Greek monarchy under the Truman Doctrine, announced that \$35,000,000 of military supplies were on their way for shipment to Greece.

"Only the world revolution can save the USSR for socialism. But the world revolution carries with it the inescapable blotting out of the Kremlin oligarchy."

Leon Trotsky

PAC'S Registration Drive

The Executive Board of the CIO Political Action Committee on July 10 announced its "answer" to the Taft-Hartley Slave Labor Law-a "nation-wide registration campaign to encourage all members of the CIO and their families and friends to qualify to vote in the 1918 elections."

Every worker who wants to advance the political interests of labor will agree that a reminder about registering in time is a good thing. But when the millions of trade unionists and their friends have complied with PAC's reminder to register, then the question comes up, what will their votes accomplish? that whit has 2 stores

If only the Democrats and Republicans appear on the ballot, voting either way means voting for labor's enemies. Should the Democrats and Republicans succeed in keeping their monopoly on the ballot in the next election, many workers will say, "Why go to the trouble of voting?" They will show their feelings by staying home on election day. Why waste time voting for Tweedledee or Tweedledum?

Thus the correct first step to take in answering the Taft-Hartley Law is a nation-wide campaign to put labor's own candidates on the ballot in 1948. The unions must put up their own candidates against the Democratic-Republican twins. Then voting will count because it can oust labor's enemies from office and put labor's political representatives in.

If the workers, their families and friends are given an opportunity to vote for candidates put up by labor itself, then getting everyone registered will prove no problem. Union members will be keenly interested in a big registration to make sure that labor's own, candidates get into office.

control atomic energy? -Under capitalism, atomic energy must remain a fiendish weapon in the hands of the monopoly capitalists. It will lead to the destruction of civilization. Under socialism, where private profit is abolished and planned economy prevails under the control of the whole people, atomic energy will lift humanity to undreamed of heights of plenty.

Open the Doors of America

an a nati 🔑 li cal tara lita i

More than two years after VE Day there are still some 1,000,000 displaced persons in Europe. Many of them, thrown into concentration camps by the Nazis, their homes confiscated and sold, now have no place to go. They have been completely uprosted. Others from Eastern Europe dare not return there for fear of the despotic Kremlin regime. These people want to leave Europe. But they are barred from finding homes in other lands by harsh immigration laws, particularly those of the United States. Consequently, the demand to ease these restrictions has reached great proportions. Even President Truman has been forced to acknowledge it periodically. On July 8 in a message to Congress he again declared that "The only civilized course is to enable these people to take new roots in friendly soil". by revising the immigration quotas. Lip service, however, is about as far as the Truman Administration and Congress go in following

"the only civilized course." The Stratton bill if passed would admit a maximum of only 400,000 displaced persons. And there is a big catch to this; the 400,000 would be spread over a period of four years. Presumably the lucky 400,000 would continue to be held in camps in wartorn Europe while they marked the days, weeks, months and years off the calendar. - In addition none of the other present restrictive admission requirements would be lifted. A liberalminded person can be barred as a "subversive." Arbitrary health standards must be met with no consideration for the years of famine and suffering. These victims have endured. Those "likely to become public charges" would be barred. In brief, the Stratton bill would admit only those immigrants able to meet Wall Street's brutal qualifications.

But even this grudging concession to the public demand for action has little likelihood of passing. After conferring with Truman July 14, Senator Wandenberg told the press that it seemed "all but impossible" to do anything about immigration restrictions this session of Congress.

Especially galling to the war victims in Europe is the fact that during the war the allowable quotas were far from filled. If they had been completely filled from 1940 to 1946 the total number of immigrants would have been 1,076,733. Because of the war only 161,971 could come, leaving a total of 914,762 unused quota numbers-almost enough to provide entry for all those in most need of emigrating from Europe. A truly civilized government would open its doors wide to all the oppressed. A half-civilized government would at least permit its unused quotas to be filled. Congress, however, is keeping the gates locked tight. Can we call this cruel indifference to the plight of the war victims anything but barbarism?

"We absolutely must put down the communists in Greece; that's where we get the very best olives for Martinis!'

Most Union Bureaucrats Opposed to Labor Party

A survey on the political affiliations and outlook of AFL and CIO leaders, made by C. Wright Mills and Helen Schneider in the July-August issue of the magazine Labor and Nation, indicates that workers who want to form a labor party must overcome the opposition of a majority of the top union leaders.

The poll was begun in May 1946 and completed in April of this year. Questions were addressed to the presidents and secretary-treasurers of the national AFL and CIO unions; the presidents and secretaries of state AFL and CIO bodies; and one-half of the heads of the AFL and CIO city councils. A total of 1,026 was polled, and 410 answers (or 40%) were received.

One question addressed to them was: "As far as national politics are concerned, would you during the next two or three years prefer to work for labor's viewpoint within one or both of the major parties, or would you prefer to set up a new labor party entirely separate from either of them?" The proportion favoring a labor party was as follows:

		AFL	CIO
National leaders .		8%	8%.
State leaders			18
City leaders			30
All leaders combin	ned	12	23

A similar question regarding the formation of local and state Labor Parties brought only a slightly higher percentage of favorable responses.

As Mills and Schneider point out: "... the CIO city leaders are the most interested; almost one-third of them are for a labor party. The CIO as a whole is, of course, more interested than the AFL. However, this difference does not appear at the top level. National leaders of the CIO are just like the national leaders of the AFL on this question."

Another question asked was: "Do you think that eventually (say, within the next ten years) gains for labor will be made by working within one or both of the major parties, or through a new labor party entirely separate from either of them?" The following proportion said they wanted a new labor party eventually:

AFL	CIO
National leaders	54%
State leaders14	32
City leaders	53
All leaders combined22	48 71
Thus there is a substantially greater	number of labor

leaders interested in a labor party sometime in the future than at present. These "waiters" of course cannot be relied on at all by the fighters for the labor party. Combining their tables, the investigators draw the following conclusions:

"About three-fourths of the AFL leadership are against a labor party now as well as in the future whereas less than half (47%) of the CIO leaders fall into this total opposition category. About one-fourth of the CIO go all out for a labor party; they want it now and they want it eventually; the remaining one-fourth are the political waiters: they don't see how you can do it now. but they strain towards it. In the AFL, apart from the three-fourths who are dead against the proposition, about 11% are political waiters, and 11% are all out for the labor party.'

The survey also throws light on the present political affiliations of these labor leaders, showing that over twothirds of them are now openly tied up with Wall Street's parties:

system are being eliminated.

and come out with similar proposals.

involved in the court-martial system.

Why did the PAC Executive Board decide on a registration campaign and remain silent about the need for a Labor Party? Are they planning once again to end up in the election with that old song and dance about voting for the falsely-labelled "friends" of labor in the Democratic and Republican parties?

If labor expects to reap any benefit from this registration drive, isn't it necessary to have labor's own candidates on the ballot? Doesn't that mean that the most pressing need right now is a nation-wide drive for a Labor Party?

Year Three of the Atom Age

Two years ago, on July 16, 1945, an epochal event took place near Los Alamos, New Mexico. There scientists, under military command, opened the Atomic Age with the successful test of the first atom bomb.

At that moment, mankind had reached a peak of scientific achievement. The key had at last been found to nature's greatest storehouse of energy, the atom.

This achievement-of the greatest world historical import-was not immediately announced. Indeed, it was shrouded in utmost secrecy. Only two months later, with the obliteration of Hiroshima and Nagasaki, was this titanic discovery made known.

All previous scientific advances have been heralded in the name of progress. But this-the greatest of all-has evoked only universal fear and horror. The third anniversary of the Atomic Era is met not with jubilation, but consternation and despair.

What awe-inspiring vistas of human advancement the peaceful utilization of atomic energy conjures up. Yet what actual immediate terror it evokes!

For peaceful uses of atomic energy have been strictly. proscribed by the capitalist rulers of America. They have converted this magnificent achievement of science into one exclusive use-as a military weapon. Through this weapon they command incalculable destructive power, a power they threaten to unloose on the world in their mad drive for global conquest.

Year Three of the Atomic Age finds American imperialism jealously guarding the secrets of atomic energy, while stockpiling atomic bombs at the fastest possible rate. It finds the scientists, under closest surveillance and iron supervision, slaving to produce bigger and better atom bombs and murder devices. The Atom Age puts mankind at the crossroads of annihilation or progress unlimited. Which road we travel will be determined by one decision: Who will

Chiang Kai-shek Yells for Help With Wall Street's drive to organize a reactionary Western Bloc of capitalist powers in Europe well under way, the spotlight may shift to the Far East. The dictatorial Chiang Kai-shek regime is yelling for more help from its imperialist patron.

When General Marshall left China, the armed forces under Chiang Kai-shek's command had been built to peak strength. They had American planes, American artillery, American arms, American ammunition, American military advisors and American ships to transport troops. And Chiang Kai-shek had gained valuable time thanks to the eagerness of Stalinist chieftains in China to make a deal with this butcher. Plans called for Washington to follow a hands off policy while Chiang Kai-shek's armies stamped out "communism" in a swift, ruthless and bloody campaign.

But the plans appear to have gone awry. The American military advisors are rumored to blame Chiang's failure to follow their advice for the military defeats he has suffered. The corruption of his regime contributed. But most important of all, the. mass hatred of Chiang and the longing for a new and better government have grown to such proportions that they corrode the dictator's armies as fast as they are built up. The civil war is obviously shaking the Chiang regime to its foundations.

Washington decided to relax its "hands off" policy. It recently turned over millions of rounds of ammunition to Chiang and gave the greenlight to American munition makers to start supplying him with additional war supplies.

But this was not enough. On July 6 Chiang made a red-baiting, racial speech that Hitler could not have improved on. He called for war to the death on "communism" to "prevent establishment of a proletarian dictatorship in China."

This speech was trimmed to fit the Truman Doctrine. It was a bid for more active intervention by Wall Street in China. It had the desired effect.

W. Walton Butterworth, American Minister to China departed for "consultations" in Washington. Truman on July 11 ordered General Albert C. Wedemeyer to fly to China to make "an appraisal." And it was intimated that Marshall may now "turn his attention to working out a more positive American program for China and the Far East." an and a

It thus appears that a Far Eastern version of the reactionary Marshall Plan will soon be served up. Wall Street's blueprint for world conquest is proceeding at break-neck speed.

Congressmen At Work -Millionaire Envoy to Argentina

On July 11 the Senate considered Truman's nomination of James Bruce to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Argentina. William Langer (R., N. Dak.) opposed the nomination. Not because Bruce is a millionaire who "has accumulated much of this world's goods-under our free enterprise system I think that is most commendable." But because Bruce built up his bank account as "the head of an organization which has raised the price of milk to little

of the United States." children." For the benefit of the voters on

North Dakota's farms, Langer thereupon proceeded to expose the National Dairy Products Corporation, of which Bruce is an officer. The Federal Trade Commission has been probing the operations of this giant octopus for violation of the anti-trust laws. Thus Langer had plenty of facts at his disposal.

He started with its operations on December 8, 1923, and followed them Chicago, Breakstone Brothers of through to November 15, 1938. Here is a sample of Langer's exposure: "On the 12th day of January 1924, this corporation, of which, as I said, Mr. Bruce is one of the lights, bought the Rieck-McJunkin Dairy Co., of Pittsburgh, Pa.... The Pitts-

burgh company dealt in milk, cream, ice cream and other milk products. On the same date, the 12th day of January 1924, this millionaire outthe Highland Park Creamery Co., fit bought the Pittsburgh Ice Cream Co....On the same date it bought the Rieck Certified Farm Co. of Detroit. Rootstown, Ohio. Some of these

concerns were bought in violation of the laws of this country. The company was thoroughly familiar with the fact that under the Anti-Trust Act it could not buy, in certain instances, the stock of a company, so it bought the assets and

Phenix and Pabst.

and Germany. In all they acquired 362 com-

tributor of milk and other dairy products in the United States.

thereby evaded the anti-trust laws during the war, Langer did not

panies, becoming the largest dis-

The names of the outfits it controls today reads like a Who's Who of the cheese, butter, milk," ice cream, evaporated and condensed milk industry. In 1937 the assets of this trust were listed at \$351,015,-643.84. Even in the depression years it paid huge dividends to the monopolists behind it.

bers of courts-martial bodies from officers in his command and subordinate to him. Since he has control over What kind of profits it rolled up their promotions, this virtually insures that they will choose to reveal. "I purposely did

hand down the verdict he wants-or find 'themselves in hot water. In effect, therefore, the commanding officer is both judge, jury, prosecutor, defense attorney and court of appeal. Now the House Committee proposes to have courtsmartial handled by a separate corps of specialists, whose

military future would depend not on the opinions, of the commanding officer of a particular unit but on the Judge Advocate General in Washington.

The brass hats, through Chief of Staff Eisenhower and Secretary of War Patterson, have raised a howl to the heavens against this proposal. They don't want a change of even secondary importance in the system of military punishment. And as a result of their protests, some reporters have described it in glowing terms as "a profound revision" and have cailed the proposed reforms "almost as novel in their way as was the civil grant of trial by jury."

Such statements are profound rubbish. Because first of all, the Judge Advocate General would himself, be a brass hat chosen by the Secretary of War and the top brass hats-and would therefore have no inclination to interfere with the brass hat conception of military justice. And because, secondly and more important, he too would be operating on the basis of the Articles of War which are the main source of injustice in the courtsmartial system. At most under this reform, the Judge Advocate General would be able to prevent some cases of rank favoritism; but he would not be able to guarantee anyone a fair trial by a jury of his peers.

What is needed is not some piddling reforms but the complete abolition of the present Articles of War and the adoption by Congress of a new military code recognizing the democratic rights of servicemen, including their right to a fair trial.

a traveler who has seen the interi-

ors of China and India."

By Art Preis Secretary of State Marshall, chief diplomatic spokesman of the

hole like Barbados, writes Green dominant Wall Street interests, recently assailed any assertion or im-'there is nothing like the unemplication "that the United States has imperialistic aims." ployment, misery and filth found in American-owned Puerto Rico, 'slum

On the other hand, Henry Wal-+lace, spokesman for that section

of American capitalism which seeks a deal with the Kremlin, denounces the policy embodied in the Truman Doctrine as imperialistic. He concluded his Madison Square Garden attack on this doctrine with: "No imperialist adventures!"

Wallace at the same time purports to see a vital difference between the Marshall Plan and the Truman Doctrine, although Marshall cluding the Baptist Convention, himself is co-author and co-spon-

In the July 14 issue of his New Republic. Wallace writes that "we endorsed in principle the program later developed by Secretary Marshall because in principle it offered economic aid to all nations willing to cooperate in world reconstruction In this sense, the Marshall program was a clear break with the Truman doctrine.'

Thus, Marshall, the co-author of the Truman-Marshall Doctrine of economic-military intervention against "communism" everywhere in the world, denies its imperialist intent; while Wallace, who calls this doctrine "imperialist," upholds one phase of its application, the Mar-

BOTH DECEPTIVE

Both are putting forth deceptive propaganda. American foreign policy, no matter how it expresses itself at any given stage of international developments, is inherently imperialistic. This is determined not by the expressed aims of Wall Street's spokesmen, nor their current attitude of "friendliness" or speakers said anything except Mr. hostility toward the Soviet Union, but by the nature of the American

by saying, "We must depend upon economic and social system. the UN to bring about peace." What the Joke Is

-By John G. Wright –

It's a rare joke indeed that doesn't lose its flavor in translation. The flying saucers' joke is apparently just such a rarity. It not only spreads rapidly

from coast to coast, but after passing to Canada, it leaped across the ocean to many European countries, bidding fair to circle the whole globe, adding to the gaiety of nations in transit.

A mere mention of flying saucers provides boundless merriment. Amateur and professional wits are everywhere stimulated to add some clever variation. Shrewd publicity promoters along with the garden variety of publicity seekers, from Catholic priests to local exhibitionists, have found

a new rich vein to tap.

The newspapers, from the most staid and conservative to the most lurid sensation mongers, open their columns indiscriminately to this liveliest topic of the day. Photographs of women wearing saucers for hats vie with solemn commentaries by psychologists, sociologists, scientists, columnists, editorial writers, military specialists and others too numerous to mention.

Far from detracting from the joke, all this only adds spice, variety and universal popularity. Flying saucers get funnier and funnier all the time. Very few seem to know why and fewer seem to care. Mankind loves laughter far too much to bother about the whys and wherefores. Besides, nine times out of nine to probe into a joke is to kill it.

One of the reasons for this is that many, many jokes center round subjects which are by themselves sources not of fun but rather of grief, if not PAGE SIX something more serious.

The ancients, including the highly cultured Greeks, used to find the antics of insane people very amusing. Very few of us still laugh at insanity. But many of the other afflictions, ailments, terrors and sorrows of mankind unfailingly tickle us as much as they did our ancestors.

What's so funny about a mother-in-law? Or about a cemetery? Or about sick-beds, marital infidelities, and other sources of conjugal friction? Yet these and other similar topics have provoked, as they still do, countless jokes and quips and gales of laughter through the ages.

But so far as I know, sudden death, especially death raining from the skies, has never yet served as a source of laughter for any people, ancient or modern. Unquestionably old as jokes and laughter are, ours is the distinction of having added this grisly topic, too, to the lexicon of wit and humor, under the general heading of "saucers."

To be more accurate, the credit for this achieve'ment belongs not so much to you or me, as to the gentlemen who now determine the destinies of mankind, and who are busy stock-piling all sorts of saucers of death, atomic, biological, gaseous and so on. They are probably laughing the loudest, like all people do who think they are enjoying themselves at somebody else's expense.

When these jokesmiths are finally told off for good; when the indignant and desperate peoples of the world show them just how unfunny they really are, then all of us will have something monumental to laugh at, for a change.

EIGHT NEGROES MURDERED IN GEORGIA PRISON-CAMP

Killed in Cold Blood

The bodies of four of eight Negroes killed at this Brunswick, Ga., prison camp are sprawled on the ground. The warden it is reported, shouted: "Let 'em have it," and the guards shot to kill. An inves-

tigation is under way; already it has been revealed that the warden was drunk.

range of Worthy's fire."

Fodcrated Picture

nunciation of the massacre was Glynn County Commissioner Sam A. Levine, who charged prison guards threw the body of one dead Negro on top of the barbed-wire fence to create "evidence" for their "shotwhile-attempting-to-escape" story. Levine stated: "This was deliberate and outright murder. Harvey Jones, 23 year old farmer and war veteran of Ahoskie, North Carolina, bought, \$1 lottery ticket for a \$3,200 Cadillac offered by the local Kiwanis Club at a festival "to help the underprivileged." Jones won the lottery but he didn't get the Cadillac because he was a Negro. Instead he was given back his dollar.

At 1:30 in the morning Jones vas awakened by Sheriff Charlie Parker, who told him his name had been drawn as winner of the Cadillac, but there had been some mistake. According to the sheriff Jones was not eligible to attend the Kiwanis festival dance so he should not have been sold the ticket in the first place.

The ticket stated: "You do not have to be present to win.' Another drawing was then held, and the big Cadillac sedan was given to a retired white doctor. Now, after a nation-wide storm of protest, the Kiwanis Club has, promised to give Jones another Cadillac.

The Negro Struggle Politics and the NAACP

By Albert Parker

Insurance for the Doctor

William Charles, who attended the NAACP convention in Washington last month, told us this: "Many of the delegates were plainly in favor of the Negro people helping the unions

to build a Labor Party. But at the same time most of these delegates were confused and did not know how to answer the arguments that the NAACP is non-partisan and cannot meddle in politics, and so on."

But how can anybody, or any organization, be really "non-partisan" in the fight between the masses on the one side and their plutocratic enemies on the other? Take the case of the NAACP. Here is an organization dedicated to the struggle to protect and extend the civil rights of the Negro people and other minorities. But in order to win this fight, it is necessary to get rid of the Republican and Democratic Parties and politicians who are responsible for maintaining Jim Crow. Isn't it something like shadow-boxing to fight against the laws passed by these parties and yet at the same time to be "non-partisan" and refuse to fight these parties themselves? Where is the rhyme or reason in refusing to fight the enemy in the place where he is most vulnerable?

Of course the NAACP adopted a resolution on 'rolitical action." But it was a pretty sorry substitute for what is actually needed. It consists of printing the records of the various candidates and telling each voter to decide for himself. But 99 times out of 100, the Democratic and Republican

candidates are equally unacceptable. What then? Real political action means helping to give the voter a real alternative-that is, providing a candidate and a program and a party which will represent his interests. Today that means helping to form an independent Labor Party.

But-it is objected-if the NAACP does that, it will lose influence and members. True, the NAACP by helping to build a Labor Party would lose some "influence" with the capitalist partieswho don't do anything to help the Negro struggle anyhow. True, it might lose the use of some of the big shot Republican and Democratic names that now adorn its letterheads. But in return it could now adorn its letterheads. But in return it could become 500% more effective in its work and win the enthusiastic support of millions of Negro toilers who would see that the NAACP really meant business when it talked about fighting Jim Crow wherever it existed. We recall the time, not too long ago, when self-

styled Negro leaders used to say the Negro organizations had to be "non-partisan" in the fight between the corporations and the unions or they would lose the donations of a few capitalist philanthropists. Well, experience has proved that Negroes could not be neutral in that fight and that they benefited greatly by joining labor's side.

In the same way, the Negro people and their organizations must decide which side they are on in the great political battle now impending between labor and capital. We have no doubt that again the Negro people will be found on the right side. The sooner they enter into that fight, the sooner the struggle for Negro equality will be won.

ed to "raise Cain with Cain."

For years, the American Medical Association opposed every kind of health insurance plan. Lately, organized medicine has begun to give public sup-

port to certain so-called voluntary health insurance programs. In some states, medical societies have even sponsored prepayment health insurance plans. Although these voluntary health insurance plans have been proposed primarily in order to prevent more adequate public health programs from being put through, the organized doctors have also come to realize that health insurance

is insurance for the doctor.

Chief emphasis of all health insurance plans has been placed upon paying the doctors' fees and the hosiptal bills. And the chief benefactors of these insurance plans have been the doctors and the hospital administrators-and the insurance companies!

It is true that the average worker feels that he has benefited tremendously when his health insurance pays off even a part of his colossal medical bills. For when serious illness strikes a worker's home, economic catastrophe results and any kind of financial help is welcomed. That is why so many trade unions have insisted on health and security provisions in their contracts. During the war years, when wages were frozen, it was sometimes possible for trade unions to obtain management-financed health insurance plans. Usually carried by commercial insurance companies, these health insurance plans vary greatly in the protection which they offer. Some provide for sick benefits, some for hospitalization, some for partial payment of doctor bills and others for a combination of these.

But as Dr. Richman, Director of the St. Louis

-By Grace Carlson Labor Health Institute, points out, none of these insurance plans provides for a complete program of health care for the workers. All such plans have strict limitations-age limits, no provision for cases of chronic illness, time limits on hospital care, etc.

Dr. Richman's words on the inadequacies of the Blue Cross medical care program deserve special attention because millions of trade unionists and their families have been enrolled in the Blue Cross. He says:

"At the present time, more than 18 million people throughout the nation are Blue Cross members-far more than the hospitals can possibly accommodate. This fast-growing movement, which bills itself as a non-profit organization, has reached the point where it now holds a virtual monopoly over hospital services and facilities. There is little consumer control or labor representation. There are the usual limitations in fine print. Labor Unions find out to their sorrow that their members are only half-way protected. When someone becomes ill, he discovers that Blue Cross does not guarantee bed-it guarantees only to pay for a bed-if the patient is lucky enough to find one.

"During 1945 it has been estimated that more than 90 million dollars was paid into Blue Cross either by the members themselves or by Management to cover the members. This membership and this money represents a tremendous responsibility and power which should be held accountable to the consumers . . .

"What proportion of the costs are being returned as benefits? And what about the amount being retained in reserve funds? Is the amount reasonable or should part of the reserve be used for increasing the benefits? . . . The Blue Cross, like so many plans is insurance, and frequently worthless insurance at that, rather than a plan for service."

(Fourth in a series on Health for the Workers.)
