New Injunction

Truman has given the green light to Robert N. Den-TROTSKYISTS ham, NLRB General Counsel, to invoke a Taft-Hartley injunction against the embattled coal miners, some 90,000 of whom last week decided not D-

to accept John L. Lewis's "sug-gestion" that they discontinue their "rolling" strike begun petitioned the Federal District District Jan. 9.

Although the United Mine Workers has not had a hearing from engaging in any action in support of their contract demands

for a hearing.

Dist. 31 Locals Do Own Deciding On Mine Walkout

MORGANTOWN, W. Va., Jan. 16 - By a narrow margin, a meeting of presidents and committeemen of United Mine Workers locals here in District 31 voted yesterday to accept John L. Lewis's suggestion that they go back to work today. This meeting was the outgrowth of a previous unauthorized and unprecedented meeting at which strong opposition to ending the strike, which began Jan. 9, was expressed.

The strike first hit the pits of the Consolidation Coal Company in an effort to put pressure or the leader of the Northern Coa' Operators who was giving strong opposition to the UMW's new contract demands. Other mines in the area struck in sympathy. On the third day came Lewis's "suggestion

Denham Seeks FBI Breaks Law 170 Times New Injunction Against Miners Every Day, Hoover Admits

Hot Wire

New Evidence of Perjury Disclosed in Coplon Case The FBI is breaking the law against wiretapping 170

times a day, according to an admission by Director J. Edgar Hoover. And its agents are not only committing per-

jury regarding these crimes but are destroying the evidence, according to new revelations at the pre-trial hearing in the Coplon-Gubitchev case.

Stung by the growing protests against the FBI's flouting of the laws it is supposed to uphold, and unable any longer to conceal the illegal practices which the FBI has been carrying on for some ten years, Hoover tried both to minimize their scope and to justify their continuation in a statement made on Jan. 13 to a House Appropriations Sub-committee. Fewer than 170 persons in the U.S and its possessions are having their phones tapped by the FBI today, he declared in an effort to make it seem like a trifling affair. The penalty for wiretapping, according to the provisions inserted by Congress into the Criminal Code, Section 2071, is a fine up to \$2,000 or imprisonment up to three years, or both.

NOTHING TRIVIAL

Gray

In other words, Hoover is admitting to daily violations of the law punishable by law with a total of \$340,000 in fines and 510 years in jail, or both. There is nothing trivial in that, even if you don't take into account the more important infringements of civil rights involved!

Still worse however, are Hoover's attempt to justify the breaking of the law and his promise to continue doing so "when the cir-

cumstances warrant it." It is necessary, he said, "to utilize this

FEPC and other civil rights | no time resulted in any organized

Yesterday Illegal, But "Legal" Today Today FBI Chief J. Edgar

PRICE: FIVE CENTS

Hoover says he has "no reason to doubt the conclusions of my superiors as to the legality of wiretapping as practiced by the FBI." But on Mar. 17, 1940, in a

oint statement with Attorney General Jackson, Hoover said that the "discredit and suspicion of the law-enforcing branch which arises from the occasional use of wiretapping more than offsets the good which is likely to come of it . . . it is the opinion of the present Attorney General as it was of Attorney General Mitchell (1929 - 33) that wiretapping should be authorized under some appropriate safeguard. Under the existing state of the law and decis ons, THIS CANNOT BE DONE unless Congress sees fit to modify the existing statutes."

pected of breaking the law or preparing to do so. According to Hoover, breaking the law is bad only when it's done by his opponents and never when it's done by

himself.

OMINOUS IMPLICATIONS The implications of Hoover's logic lead straight to the destruction of the democracy he pretends technique to protect our country to defend. If it is permissible for the FBI to break the law against

Atomic Energy and Capitalist Society

When we observe the material world about us, we are aware of the seemingly endless variety of objects and substances. There are the bricks, stones, steel girders and woodwork of which the homes we live in are constructed. There are the countless kinds of minerals, vegetables and animals which take on almost every imaginable form, ranging from tough metals and intangible gases to growing leaves and living flesh. They include the air we breathe, the water we drink and the food we eat.

Science tells us that this bewildering assortment of materials is in actuality composed of a limited and relatively small number of fundamental building substances which scientists call elements. These are the building blocks of the universe.

All the materials mentioned above change form and sometimes even seem to disappear: metals rust, gases burn, leaves and flesh decay. But though matter is changeable it cannot be destroyed for all its endless forms are made of chemically irreducible elements:

92 ELEMENTS

The total number of natural elements is 92. All of them have been classified and listed in numerical order in what is called the periodic table of elements. Some of the elements are widely and commonly distributed, others

are very rare. The first and simplest element is hydrogen; the scarce uranium is number 92. In between these numbers are found such elements as gold, silver, copper, nickel, iron, mercury, manganese, chromium, lead, etc.

Four out of the total number of 92 elements are the most profoundly involved in the chemistry of man and his planet. By themselves they produce a whole series of complex and essential substances. One or another, or all four, are compounded in almost every one of the things essential to human life. These four elements are hydrogen, carbon, nitrogen and oxygen, respectively numbered 1. 6. 7 and 8 in the table of elements. Oxygen is the most abundant of all the elements.

Elements are simple substances and an element is generally food, but also of cellulose which defined as the kind of matter becomes the source of clothing consisting of only one kind of fabrics and materials. atom. One element cannot be

CARBON COMPOUNDS Substances containing carbon as heir basic material come within the category of what are called rganic compounds. They make up their own family of gases, liquids and solids. Among them are such substances as hydrocarbons, carbohydrates and proe as. The first mentioned con-

tain also hydrogen, the others contain additional elements. Hydrocarbons form the raw materials of coal, oil and gas, all essential fuels, but all of them are also sources of numerous byproducts, such as industrial alcohols, dyes, drugs and paints, not to mention the innumerable industrial synthetics. The carbohydrates are sugars, starches, and fibers synthesized by plants. Not

Mobilization **Demands Speedy Action on FEPC** (Continued from page 1)

he American people are resolved to go to all lengths to defeat any force that stands in the way. But this is precisely what the NECRM could not do without noving away from faith in the

actions of the Trumanites. The fear of permitting the nasses to speak and act for themselves was largely responsible for the fact that only 4,000 delevates were present. If an appeal for independent action had been made, tens of thousands of delegates would have poured into Washington from all over the country. When it is remembered that 100,000 people were mobilized to march on Washington in 1941, the turnout of 4,000 persons is almost pitiful. But since the Mobilization from its inception stressed trust in the Truman government it is not suprising that the Negro people did not respond as they would have to a clear call for action on their own to 1 in favor.

account. The wholly inadequate arrange ments indicated, however, that the Mobilization leadership did not expect even 4,000 delegates. Ever more indicative of the character of the Mobilization - as significant as the lack of sucout the country in support of the Mobilization - was that the large ue of wiretapping. DENHAM AGAIN SWINGS **T-H CLUB AT MINERS**

(Cont. from page 1)

has had nothing to do with Denham's move and that the NLRB out Truman's approval. Senator Hubert Humphrey, Minnesota Democrat and darling of the ADA crowd, said, with conscious deception, "It appears to me that Mr. Denham has delusions of grandeur to the point where he thinks he is President" and "Frankly, what the country needs is an injunction against Mr. Denham."

TRUMAN APPROVES

What Humphrey well knows is that Truman himself can issue such an "injunction" any time he pleases, because Denham is a presidential appointee. He's holding on to his job because Truman wants him there. And Denham doesn't make any important move without Truman's sanction. The present case is no exception.

Brisk 'Militant' Sales developing inside the NAACP. The Mobilization has already Among Delegates at resulted in minor concessions of NAACP Rights Meet dubious value. Further concessions may be made. But it can

At the Civil Rights Mobilizabe guaranteed in advance that tion held in Washington, D. C.,

only radical newspaper widely circulated among the delegates. Four comrades from New York can be credited with this work.

Wherever the delegates assembled they were met by Militant salesmen carrying last week's US CIPETissue. Almost 70

Militants were sold Sunday evening at the All Souls Unitarian Church where the opening address was delivered.

The next morning the four comrades greeted the trains carrying the large New York, Maryland and Pennsylvania delegations with

bundles of Militants. Monday afternoon the paper was sold at the Library of Congress where the New York representatives convened, and at the large Interdepartmental Auditorium in the Department of Labor building.

After the evening meeting, Militants were also sold, making a total sale of more than 300 copies. In addition to these sales, 500 sample copies of the paper were distributed at the trains bearing the delegations home. The Daily Worker, official organ of the Stalinists, did not receive as wide a circulation as The Militant. At the beginning of the Mobil zation only a few copies of the Stalinist sheet were scattered on radiators and chairs. Toward the end of the proceedings the Stalinists, greatly disturbed at the circulation and good reception given The Militant. hast'ly organized a free distribution of about 200 copies of their paper. While these papers were being distributed, however, more than 100 copies of The Militant were sold.

The trip to Washington with a bundle of 1,000 Militants was a rousing success. People came out of the meeting rooms looking for "that socialist paper." Several delegates bought more than one

copy so they could give them to friends. Many Communist Party rank-and-filers took copies. The profits made on sales covered the cost of the whole bundle, including sample copies given delegates as they left Washington.

The only outspoken hostile response came from a few Stalinist backs who several times tried to provoke fist fights with Militant salesmen but without success. One Stalinist woman went - police informer style to the Superintendent of the Library of Congress to have him stop the Militant sales at the Library. Her efforts to prevent the four Trotskyists from exercising their democratic rights ended in failure.

The chagrin of the Stalinists was quite understandable. Copies of their Daily Worker were strewn on the sidewalks, while most of the 1.000 copies of The Militant were tucked away in the pockets of the delegates.

TROTSKY

ø

Vol. XIV - No. 4

"Imperialism is the epoch of finance capital and of monopolies which introduce everywhere the striving for domination, not for freedom. The result of these tendencies is reaction all along the line, whatever the political system, and extreme intensification of antagonisms in this domain also. Particularly acute also becomes national oppression and the striving for annexation, i.e., the violation of national independence (for annexation is nothing else than a violation of the right of nations to self-determination)."

- V. I. Lenin, Imperialism, p. 109. LENIN Remove Clark, McGrath and Hoover

Section 605 of the Federal Communications Act, upheld by U.S. Supreme Court rulings, makes it a crime, punishable by fine and prison, for anyone to intercept telephone conversations. The law doesn't say "except for U. S. Presidents, Attorneys General or FBI agents."

Today there sits in the country's highest court a man who, when he was Attorney General, secretly authorized wiretapping by the FBI. Tom Clark knew he was breaking the law - that's why he tried to get Congress to legalize wiretapping. But not even the reactionary 81st Congress would approve this invasion of the American people's privacy by a secret police.

Tom Clark's successor. Attorney General J. Howard McGrath, also admits he has authorized wiretapping and FBI Chief J. Edgar Hoover admits that some 170 private telephones are being tapped by the FBI right now. They also know they are breaking the law.

Witchhunter J. Parnell Thomas was sent to jail for robbing the American people of a few thousand dollars. Clark, Mc-Grath and Hoover are confessedly guilty of robbing the American people of something infinitely more precious, a basic democratic right supposedly ensured by the Bill of Rights of the U.S. Constitution - freedom and protection from illegal search and seizure. That's what wire tapping is considered under law. *

Clark, McGrath and Hoover are paid enforcers of the law. That makes their own lawbreaking a thousand times less pardonable and more dangerous.

They claim they have flouted the law in the interests of "national security." But who decides that? Why, the lawbreakers themselves. What is to stop them from tapping telephones any time they please simply by claiming their "suspicion" of "subversive activity" that allegedly "endangers national security"?

Since Clark, McGrath and Hoover have been caught red-handed as criminal lawbreakers, they have decided to brazen it out and, in fact, to capitalize on the exposure of their crimes. They are campaigning once more to have federal wiretapping legalized by Congress. But that will not make wiretapping any more legal today. It will not make these men any the less lawbreakers today.

These men are infinitely more dangerous than any Capones or Dillingers. They must be summarily removed from office and brought before the bar of criminal justice. An example must be made of them. For if they get away with their felonies, then one of the last bulwarks to democratic rights will have been destroyed. This country will have thrust upon it the principle of one law for the ordinary citizen and another law for the highly-placed. The Bill of Rights will be reduced to a scrap of paper, to be violated at will by those sworn to 'uphold the Constitution.

Let us see whether this really is, as claimed, a government of equality under the law or a government of special privilege and immunity for lawless rulers. Demand the removal of Clark, McGrath and Hoover!

Prof. Emerson Exposes Truman "Loyalty" Purge

This is the concluding part of the speech by Prof. Thomas I. Emerson of the Yale Law School at the New York City meeting of the Kutcher Civil Rights Committee on Dec. 15, the 158th anniversary of the Bill of Rights. The first section was published in last week's Militant.

If we analyze the loyalty program I think we will find in it nost of the characteristics, common to all phases of the campaign of suppression that is going on at the present time. Let me outline certain aspects of the program, very briefly, which illustrate my point. The loyalty program is not directed against acts. As has been pointed out, it is directed against ideas, views, personal habits, your innermost thoughts, not primarily against acts. It is not intended to solve the problem of espionage, or the problem of sabotage, or the problem of actual use of force and violence. There are already laws which cover those issues.

The loyalty program is designed to ferret out the political views and the opinions of government workers in the expectation that you might weed out those who might become disloyal in the future. As the President himself has said, it is intended to weed out the "potentially disloyal."

And so the questions they ask are of this sort: "What do. you think of the Italian situation? Have you ever attended any radical meetings at Madison Square Garden? Is your wife religious? What movies have you seen? What books have you read?" And let me say, if you have read any books on Russia, it doesn't make any difference whether they are the collected works of Joseph Stalin or Trotsky's History of the Russian Revolution. Both are equally bad. It's an attempt to find out who has unorthodox opinions, not to punish acts committed in violation of laws. That's a major characteristic of the loyalty program.

Secondly, it applies the principal of "guilt by association." We nave in our laws always adhered to the principle that guilt is a personal thing. It is not to be attributed to one by reason of the fact that he associates with others. But in the Kutcher case the issue is not one of Mr. Kutcher's personal loyalty. One would think he might have demonstrated his personal loyalty during the past war. That was not really the legal issue that was considered. The only issue before the Loyalty Board was that Mr. Kutcher is a member of the Socialist Workers Party and that is an application of "guilt by association."

Loyalty Purge Resembles Hitler's Thought Control

Third, the loyalty program is built on a structure of vague and incertain terms. You are disloyal if the Loyalty Board finds there is reasonable cause to believe you are sympathetically associated with a group that the Attorney General has declared to be subversive. One is reminded of the efforts of the Nazis in Hitler's Germany to control government employees by a similar standard. There the standard was whether or not they were acting in the interests of National Socialism. These broad phrases which attempt to cover un-American activities, subversive activities, matters as to which there is no specific agreement, are characteristic not only of the loyalty program but of other legislation and government action which affect the whole area of civil rights today.

Fourth, there is the question of procedure. The loyalty program ntroduces changes into our procedure for determining guilt or inocence which are unheard of in Anglo-Saxon law. In the first place, the charges that are made are usually very vague, very indefinite in terms. You cannot be sure what you are being charged with. Even more important, you do not know what the evidence against you is ecause the decision of the Loyalty Board is based almost entirely, in the normal case is based entirely, on the report of the FBI made in your case.

But in the interests of national security, the government emloyee may not see the FBI report. Usually he is not told anything that is in the FBI report. He has to make his defense without knowing what the evidence against him is and as a matter of fact, the Loyalty Board itself which decides the case very often does not know how to appraise the evidence because the FBI reports do not dicate who are the informants who gave the information. The FBI reports say "T1 reports so and so. T2 reports so and so." There is no way of knowing whether those persons are psychopathic personalities, personal enemies, sober at the time or what.

Truman's Labor Czar The union leaders have renewed their

oft-repeated demand for the ouster of Robert N. Denham, the banker and corporation lawyer whom Truman appointed in July 1947 as General Counsel of the

and louder than ever, for Denham's removal. But who put Denham in this post and keeps him there? Truman - the same V. I. LENIN

National Labor Relations Board under the Taft-Hartley Law and who has just asked for a strikebreaking injunction against the miners' union.

Their latest plea was issued after Denham's recent attack on the NLRB members themselves because in a few instances they had disagreed with his 100% pro-employer interpretation of the law. He said this showed the Board members were "saturated" with the "spirit of the Wagner Act" and he urged employers to appeal to the courts against any NLRB decision they don't like.

The union leaders expressed misgivings when Truman first appointed Denham. These misgivings soon grew into outright alarm as Denham began wielding the Taft-Hartley Law like an ax against the unions. Even before the 1948 election campaign was under way, Truman's labor supporters were demanding Denham's ouster. But both before and after the elections, Truman ignored labor's appeal for Denham's removal. Now Denham's latest blast has forced the Trumanite union leaders to call once again,

foremost "friend of labor." Truman is responsible for the fact that a Denham now exercises the powers of a virtual Labor Czar, able single-handedly to invoke strike-breaking injunctions and block the demands of even the most powerful unions.

man whom these union leaders hail as the

Union leaders like Murray and Green blame the Republicans and Dixiecrats exclusively for Truman's failure to fulfill his promise on Taft-Hartley repeal. But what excuse can they have for his appointment and retention of Denham? If Truman were really concerned about the injustices of the Taft-Hartley Act, the least he would have done long ago would have been to kick out Denham for his abuse of authority and partiality to the employers.

The truth is Truman knew what he was getting when he first picked Denham. He wanted a "tough" NLRB General Counsel to do the administration's dirty. work against the unions, while Truman could continue his own pious pose of "friend of labor."

Stalin Restores Death Penalty

There was universal expectation among the Soviet people during and shortly after the war that the regime of unbridled oppression would be at least slightly relaxed once the hostilities were over.

The one and only postwar domestic reform introduced by the Kremlin was the formal abolition of the death penalty in the Soviet Union. This was widely publicized at the time as still another great conquest of Soviet "democracy," "humanitarianism," "progress" and so on. The Kremlin's scribblers at home and abroad did not fail to point out in this connection how secure and firm Stalin's regime must be to be able to afford such a step.

Hard on the heels of the celebration of Stalin's seventieth birthday, amid the boasts of the overfulfillment of the last Five-Year-Plan and on the eve of the proclamation of the next one, comes the news that the death penalty has been again restored. In return for the incredible grovelling and fulsome exhibitions

staged at his birthday ceremonies, Stalin has presented the Soviet people with this grim reminder of the reality of his autocratic rule.

Officially the death penalty has been restored for cases of "treason, espionage and sabotage." Since any one who expresses discontent or criticism, or is even suspected of it, immediately falls in the Kremlin's eyes into the category of traitor or spy, the new decree is actually aimed at the Soviet masses themselves.

Bestial and murderous as Stalin's prewar regime was in the USSR, the postwar years have seen a systematic intensification and extension of his repressive rule. This has been accompanied by greater caution and secrecy, especially against public leaks of the true extent of persecutions and purges.

Apparently all the previous ruthless measures have been found inadequate, and the executioner's axe has now been raised openly again.

DAMNING CONFESSIONS

The abyss that separates Leninism from Stalinism is strikingly disclosed in the field of foreign policy where the Kremlin has for years conducted a counter-revolutionary policy. A brief account of Soviet-Chinese relations since 1917 will suffice to illustrate the unbridgeable difference between Soviet foreign policy under Lenin and under Stalin.

In 1919 the Soviet government addressed to the Chinese people the famous Karakhan proclamation (Karakhan was at the time an Under-Secretary of the People's Commissariat for foreign affairs). It solemnly and voluntarily renounced all the privileges extorted by the Czarist government in China. Renounced were the indemnities regularly paid by China since the "Boxer revolt' of 1900; the unequal treaties granting Russia extra-territorial rights and "concessions," including the right of Russian citizens to be tried before Russian consular courts.

The Soviet Union did not renounce the ownership of the Chinese-Eastern Railway, a vital link between Siberia and the Maritime Provinces and the Pacific port of Vladivostok without which the latter could hardly be defended. However, the Soviet government entered into a voluntary agreement that half of the railway personnel should be Chinese; that half of the profits shouid be handed over to the Chinese government and renounced all extra-territorial rights in connection with the stations and technical establishments of that railway. In practice, this meant sharing the railway with the Chinese. This agreement was carried out scrupulously. In 1922 Dr. Sun

There is no confrontation of the witnesses who have given the evidence against you. Of course that follows from the fact that you don't know who they are or what the evidence is. But there is no opportunity to cross-examine those who give the information. In the case of organizations that have been declared subversive by the Attorney General - association with which is evidence of disloyalty - there is not even any hearing given to such groups before they are put on the Attorney General's blacklist,

Building Up a Professional Secret Police

Now all of these procedures are unheard of in our law. Moreover, during the Nuremburg Trials of the Nazi leaders, one of the charges against certain of the Nazis - and the charges were sustained was that they had taken action against people without giving them opportunity for a hearing!

Finally, there is a fifth characteristic of the loyalty program; that is its administrative aspect. It takes a large staff to investigate two million federal employees as well as many in private industries and elsewhere. Not all were privately investigated. But to check whether there has to be an investigation, and then to actually investigate them, takes a large staff and that staff tends to become a professional staff. It is their job to go out and find subversive activities. Any enforcement staff inevitably gets into that frame of mind.

And so you build up what amounts to a political police and nothing could be more dangerous to a democratic society than a arge political professional staff recruited for the purpose of inestigating peoples' thoughts and opinions.

These I say are characteristics not only of the loyalty program but of other phases of the attack on civil liberties. They are characteristic, one or more of them, of the Mundt-Nixon Bill. They are devices which appear in the Feinberg Law. They are devices that. appear in the New Jersey Loyalty Oath. They are devices which have been developed in some respects by the Committee on Un-American Activities. They are the form and the method of suppression in modern dress.

We Cannot Solve Problems By Suppressing Ideas

I think that in this whole program and the other attacks upon civil liberties today we are upon the wrong track. We cannot solve our problems today, fearfully as we are trying to, by the suppression of ideas. We are missing the real issues if we attempt to do that, because our problems today are fundamentally problems not of loyalty but of building an expanding economy.

Loyalty is not really a problem in a healthy society. It is only a problem in a bankrupt society. Therefore I think we should turn our attention, our energies, our thoughts to problems such as the problems of full employment and full production, of housing, of health, of education, of social security, the development of our river valleys, the development of atomic energy for peaceful purposes. It is with these matters that I think we should be concerned if we are to preserve and develop the great tradition of civil liberties in America.

We must abandon our search for the false security of reaction. We must give up the delusive expedient of repression. We must strive to achieve maturity, tolerance and balance and we must learn that true security and true loyalty lies only in a dynamic and forward-moving society.

These, at least, are my convictions which I hold deeply and strongly. I regret that I cannot put them in more impressive language.

"Freedom of Religion"

By Joseph Keller

Along with its chief battlecry, "Down with Atheistic Communism!", the Vatican has recently inscribed on its banner the slogan of "Freedom of Religion." Just how much "freedom of religion" the Roman Catholic hierarchy would permit any but its own authoritarian institution is being vividly demonstrated in Italy.

Persecutions and jailings of Italian members of Protestant sects are commonplaces scarcely ever reported in the American press. But when American missionaries - and from Texas, no less - are stoned and molested and charged with everything from "heresy" to "communism," it's pretty hard to bury the facts altogether.

You may have read in the past two weeks small and obscure items in U. S. newspapers about the physical assaults and indignities visited on a group of American Church of Christ evangelists in Italy. Thirteen Protestant missionaries most of them from Texas - have protested to the U. S. Ambassador in Italy that they were stoned out of Castel Gandolfo, summer home of Pope Pius XII, after Catholic priests had "aroused the people against us."

The attack occurred when about a hundred men. women and children -- "nearly all from humble walks of life," reports an Associated Press dispatch - had gathered to hear a Bible reading by Evangelist Cline R. Paden of Texas.

There has been no denial about the facts of the assault by the Roman Catholic hierarchy or the Italian government, which is run by the Vaticancontrolled Christian Democratic Party. While claiming that it "doubted" the physical violence was inspired by priests, a Vatican source did admit that the priests had complained the Americans were "preaching heresy" - which is anything that denies the absolute truth of Catholic dogma and the hierarchy's monopoly on divine revelation.

What is worse, said the Vatican's newspaper, Osservatore Romano, the activities of the Church of Christ group "have become purely Communist." Their "methods of propaganda," claims the Vatican's organ, "show all the intent and character of anti-religious activity already char-

acteristic of communism" - namely, "discrediting the Catholic Church, the Pope and clergy; deriding the methods of teaching Catholic doctrine, its dogmas, its rites," etc. And what conhumble classes are the most abandoned by the Catholic Church."

In reply to this, several Protestant Churches in Naples have called upon the American people to enforce the religious freedom clause in the ties in Italy often aid communism," is intended to "justify ill treatment and discriminatory laws against evangelical ministers, missionaries and Protestant churches in Italy." Despite the religi-

ous freedom clause, the Catholic Church continues to enjoy the special privileges and state support accorded it by Mussolini's fascist dictatorship. to the heavens about the Mindszenty case in torney."

Hungary - has proceeded most cautiously with State Assemblyman Vernon respect to "freedom of religion" in Catholic bers in Texas have been holding mass meetings to force action from reluctant American diplomats. These Bible- reading folk are particularly resentful at being labeled "communist" by the Vatican.

ferocity.

The American press and politicians, who were screaming for the Army and Navy to "rescue" Angus Ward when he was jailed by the Chinese Stalinists for beating up a Chinese servant, are singularly unmoved by these attacks on American nationals who seek to exercise freedom of religion in the Vatican's Italian stronghold. And Cardinal Spellman, who blows his lungs out about freedom of religion for Catholics in Eastern Europe, is silent about the persecutions of Protestants in those Catholic-dominated countries, like Italy, which are usually designated "democratic," as contrasted with the "Catholic Kingdom" of fascist

Reading the "apartments for rent" columns in the papers has become my Sunday morning pastime. . . sort of a fanciful treasure-hunt, like the expeditions for pirate's gold people dream about to while away an idle hour. Today I saw the exciting phrase "sensibly priced" and read, with my pulse racing, all the way to the end of the sentence, "\$300-\$333 per month."

It all goes to prove, as a news despatch said on Jan. 12, that there ARE apartments to be had. Right here in New York City, 16,359 rental units were built last year by private enterprise, with not a little public assistance in the form of Federal Housing Administration loans. Since you and I pay taxes that furnish the funds for these low-cost loans handed out to rich and rugged individualists, we might expect to see a few apartments for ourselves in the deal. We might, if we were naive.

But the news item explained that "nearly 85 per cent" of these units are "intended to rent for more than \$90 a month." They didn't say how much more. . . but the ads do! As for the remaining 15 per cent, the breakdown is even more discouraging and enlightening.

"Only six-tenths of 1 per cent of the units

By Ruth Johnson would rent for less than \$70," the reporter said. Hines, was "prematurely" shot. That leaves 981/2 units for the hundreds of thousands of apartment-hungry families to scramble Spencer O. Amundsen last April.) the hearings, the Socialist Work- and in the courts for four months

for. . . if they can pay somewhere near that figure. But "less than \$70," I discovered on reading further, doesn't mean cheap! "None is intended to rent for less than \$60" - not one! Since half the families in the whole country

have an income of less than \$3,013 a year, and the wise budget-makers warn us not to spend more than \$51 a month of that for rent, there's only one conclusion: I hereby propose a city-wide half-a-unit so proudly included in the "under \$70" group. My own theory is that it will turn out to be a closet built on an airshaft by mistake.

I may be wrong. This may be the one great gift of the real estate moguls to the New York workers, generously provided to prove that free enterprise will furnish homes for us all in time. On second thought, and a second cup of breakfast coffee, I think we'd better put the papers and the dreams away and go back to fighting for ng his face. low-cost government housing. It's pretty hard to

The Truth Will Out

By Gordon Bailey

The lengths to which radio magnates will go in suppressing the truth was dramatically revealed at a recent meeting of the Chicago Conference to End Mob Violence. At the time of the Peoria Street riots, where Negroes and their friends were beaten by hoodlums, station WMOR broadcast an interview with the victims. This radio interview exposed the anti-Negro role of the police with such startling clarity that requests for rebroadcasts poured into the station.

Plans were made for a rebroadcast. Meanwhile a tape recording of the interview was played before the Conference to End Mob Violence and other bodies. The Conference was so impressed that members asked if records could be made and sold for their personal use. Orders for a hundred records were taken. A few days later a master record was made and 100 records were pressed from it.

At this point Big Business moved into action. WMOR had been started by a group of veterans who intended to run a station telling the truth. However, they needed financing and went to the source of money: the businessmen of Chicago. They got a response from Louis Toffenetti, successful restaurant man, who put up a good sum of money and was content to take his share of the profits, letting the veterans run the station.

When the interview with the riot victims was broadcast sleeping partner Toffenetti woke up. into the White Circle League, the He grabbed his shares, went down to the station. voted himself Chairman of the Board, and decreed that no rebroadcast of the interview and no further broadcasts of such "controversial" material should ever take place.

What of the recordings? They were in the you on a bus?" and "Can you studio waiting to be mailed out. Toffenetti went report any incident where a Neto the studio at 4 A.M., when only an engineer gro was impudent to you in pubwas on duty, took a hammer and smashed every lic?" record to smithereens.

There are several lessons in this incident. The questionaire, it was pointed out, bosses will stop at nothing to kill the truth. You is to arouse opposition to the can't run a liberal radio station with a reactionary's money.

But there is a lesson here for the Toffenettis too. He forgot about the tape recording. The pro- gained a dangerous number of gram director had it, and he has resigned. Another 100 records will be made, and a thousand more if needed. You can't stop the truth even held with over 300 people preswith a hammer. ent_

Jobs Are Scarcer

By Fred Hart

Secretary of Labor Maurice J. Tobin has set up a special "economic survey" room with a huge map of the United States showing the unemployment situation. This map is dotted with 32 big black-headed pins, each for an "emergency area" where the jobless now number 12% and more of the total labor force. Utica, N. Y. is listed but not New York City.

Although N. Y. upstate areas have been relatively harder hit than the city, the difference is only one of degree. December figures released by the N. Y. State Labor Department show "abnormally high" unemployment both in the city and upstate. The state officials express themselves as "puzzled" by this in view of reports that "the general economic situation is supposedly excel-

The number of applicants for unemployment compensation neared the half million mark, with 286,532 in New York City and 183,609 in upstate areas.

What makes the situation even worse is that the rate of those who have exhausted their unemployment benefits is currently running twice as high as last year. 85,800 workers have already drawn all their insurance payments since June 1949, when the new benefit year began. This is more than one-sixth of the nationally estimated total of 500,000 workers in this category.

Unlike last year when the older workers were the hardest hit, the average age of the unemployed this time is reported as "substantially lower." The worsening position of the New York jobless is reflected in the report of City Welfare Commissioner Hilliard who announced that December marked the 13th consecutive month in which the number of relief recipients has increased, rising to 328,469 persons, or an increase of 5,396 since the previous monthly report. Interviewed on the radio, Commissioner Hil-

liard admitted that there is a growing number of younger men among the homeless and utterly destitute on the Bowery. The number of those who have hit the skids has virtually doubled since last year, with one out of every five being between the ages of 20 and 39.

Hilliard admitted, moreover, that jobs in New York were becoming scarcer and harder to get despite the highly publicized "recent improvement in business conditions" for the "country as a whole.'

He has asked for permission to re-open work ingly in favor of merger with the relief projects "without in any way competing Social Democratic Federation. An- by the referendum to arrange a obstacle but in the past ran up with any regular employment," and at the same time appealed to local businessmen to employ the ferendum that has just been the SDF convention is held and discontinue independent electoral "labor lieutenants of the State relief recipients.
