# Millions Will Die, All Liberty Lost --**McMahon** Admits

#### By John G. Wright

There are few individuals in this country who are in a better position to speak on the subject of the Hell-Bomb arms race and its consequences than Senator Brien Mc-Mahon, chairman of the Con-

gressional Atomic Commission. That is why so much importance attaches to the speech he made to the Senate on Feb. 2.

•

The Democratic Senator from Connecticut, who can get his information at first hand, stated that the Hell-Bomb would offer this country no security whatever. least of all any "monopoly." Even if Washington wins the race to stockpile such bombs first, "it is only a matter of time - and possibly a short time - before the Kremlin achieves success

also." McMahon affirmed. There is no defense against the Hell-Bomb, any more than there

is against the now "outmoded" A-Bomb. The Hell-Bomb makes virtually certain the destruction of "the largest city on earth" and as many as fifty million Americans could be "incinerated in the space of minutes," he flatly stated.

The end result of this "truly terrible arms race," warned the Senator, must be "war - under today's conditions, hydrogen war.

Here you have in so many words a public admission that the capitalist rulers of this country have already placed in direct jeopardy the lives of all children and adults at home and abroad. McMahon then went on to admit that the mere production of the Hell - Bomb would involve in a direct and immediate sense the destruction of each and every democratic right and all elementary civil liberties.

#### "IMITATE TOTALITARIANS"

McMahon cited "the restrictions on freedom already brought about by the atomic bomb and by its pressures upon us to accept loyalty checks, espionage countermeasures, and widening areas of official secrecy." Under the Hell-Bomb, all these "pressures" will be multiplied one-thousand fold, McMahon insisted.

Speaking with rare frankness, he told his colleagues: "If you are candid and realistic, I believe you will find it is difficult indeed

.

¢

to see a dominant role for freedom in such a picture. To stay alive we will find ourselves more and more compelled to imitate the totalitarian rival."

than by first herding them into a vast and universal concentration camp, that is, instituting prior to the outbreak of war itself, a reign of repression that will make the methods and practices of fascism "humanitarian" by compar'son. That is the full meaning

of McMahon's words concerning.

the alleged need to "imitate the

totalitarian rival." -**ANOTHER WARNING** 

A few days after McMahon's speech, there came another warning about the Hell-Bomb regime at home. It was made on Feb. 6 by Hanson Baldwin, military expert of the N. Y. Times, who also cited "the danger to freedom and to all our past concepts of democracy" inherent in the "greater

and greater security restrictions" flowing from the atomic arms race.

vides is a cover for the arbitrary assumptions of power which, according to Baldwin, have already workers. brought this country "danger-ously close in several fields to ...

The reason is not hard to said one word against Truman for invoking the Slave ington.

# 'Miners Will Continue Struggle' Emergency Conference **Of Labor Needed Now** the coal miners.

United Mine Workers President John L. Lewis (left) tells reporters that "the miners will continue their struggle to achieve justice." He made this statement after the mine operators walked out of renewed negotiations in Washington within 48 hours of Truman's proposal for a 70-day "truce" and "fact-finding." The owners took this as their cue to stall once more in the hope since fulfilled - that Truman would intervene on their behalf with the Taft-Hartley Law.

On Feb. 6, Truman announced "national emergency" in the eight-month coal struggle and set up a Taft-Hartley "fact-finding" board to report the "facts" to forces openly with the parasitic him by Monday, Feb. 13. This is preliminary to seeking a federal court injunction to force the miners to work under the operagressional labor-baiters headed tors' dictates for 80 days.

TRUMAN AIDS OPERATORS |Big Business press.

The soft coal miners have answered this attempt to club to Truman's phony "fact-finding" them back into the pits without and to go back to work for 80 a contract with their characteristic independence and militancy They promptly shut down almost all bituminous mines, adding some 270,000 strikers to the 100,000 out prior to Truman's decree. By his action, Truman has com-

the hated Taft-Hartley Act against American workers. The president who before election promised repeal of this infamous law, is now using it for the third time against plied with the demands of the "Hate-Lewis" gang who have been clamoring for the government to crush the miners with the Slave Labor Law. He has joined coal operators, the steel corporations which own a large part of the coal industry, the Con-

by men like Senator Taft, the If the miners refuse to submit

days on the operators' onerous terms, they can be enjoined by a federal court, fined monstrous sums and even jailed for "contempt." The UMW treasury was robbed of \$1,420,000 in 1948 on 'contempt" charges following a Truman-invoked Taft-Hartley in-

unction. Truman's strikebreaking Taft-Hartley order has incited the apitalist offensive against the miners to a ferocious intensity. The combined power of the corporations and their government is being hurled against the miners.

The forces of predatory wealth are determined to "get" the miners because they are the very spearhead of militant labor in America.

#### CUNNING MOVES

Step by step, Truman has cun-

**Steel Union Sends** Aid to the Miners FEB. 8 - The CIO United Steel Workers today sent a check for a half million dollars to the striking United Mine Workers "to assist the needy miners and their families in their struggle against the coal operators."

**PRICE: FIVE CENTS** 

Philip Murray, the steel union's president, announced he had also called on his organization's 2,200 locals and million members to make further "substantial" contributions on their own. "The war which is being waged against their [the miners] union can be directed against your own and all other unions by the same combinations of wealth when they deem it expedient to do so,'

Murray said. He made no reference to Truman's role in invoking the Taft-Hartley Law against the UMW.

#### WHAT OTHER STRIKERS SAY

DETROIT - While the capitalist press and radio are filled with attacks on John L. Lewis and the miners, here is what the striking Chrysler workers in Detroit are saying:

'Labor ought to stick together. I don't agree with Lewis' politics but he's a man who always fought for the rights of the men. There should be solidarity.'

"I think we should stand behind them and get as good contracts as they got before," said another Chrysler picket, while a third added: "I think there should be united action. If we're going to be union men we should have united labor. If you're hurt, I'm hurt,"

Flying squadron members were bitter against Truman's anticipated use of Taft-Hartley. Among their comments were: "If miners are forced back to work it would be a blow

to all of labor."

"If they do, the whole U. S. labor should go out."

"Taft-Hartley is written so that any employer can do anything unfair, illegal, illegitimate - that's their idea of equality under the law."

"As far as I can see, the whole Taft-Hartley should be shoved in a furnace and burned."

"Lewis is right saying no three strangers should decide what we get. We're workers and can't do anything else but work, and we know what we need."

"I'm from Missouri myself and I know Truman's politics. I think he's only wooing labor - a political opportunist. He can't be trusted."

"I'm for everyone that's for labor. If he's not for labor, he's not for me. If Truman uses Taft-Hartley, I won't vote for him again."

Labor Law against the min- Kutcher's attorneys, M. J. Myer of the government. Both Kutcher ence of a clear and present ers. Murray is still unwilling of Chicago and Joseph L. occupy the premises.

On Monday, Jan. 9, the police ordered the officers of the Celere killed six young workers and to disperse an unarmed crowd in the city of Modena.

On Sunday, Jan. 15, several thousand de Gaullist hoodlums suddenly invaded Ivry, a working class suburb of Paris, with the aim of terrorizing the work ers. Many were injured in the sharp clashes that broke out.

These are not isolated incidents They involve two specific stages in the general offensive of the European bourgeoisie against the working class. This offensive un folds today on three differen' levels. In Italy and in France the employers are again systematic ally resorting to the weapon of the lockout and are preparing to smash the militancy of the work ers by means of unemployment At the same time a broad attacl is unfolding against trade unior rights; in the factories they are laying off first of all the most militant workers, the union delegates and the leaders of strike committees of years past. Finally legislation restricting the right te strike is being discussed simultaneously in the Italian and French parliaments.

#### ANTI-LABOR OFFENSIVE

To instill greater respect among the workers toward these parliamentary discussions, the systematic use of armed force to break up working class demonstrations is becoming more and more widespread. One after the other employers, ministers, police and judges are attacking the proletarian front, whose unity has been broken by its criminal leaders. FRENCH CONDITIONS And all this anti-labor machinery

rise to the incidents at Ivry were receives the enthusiastic blessing of the chief political power in Western Europe today, the Charles de Gaulle, the French bourgeoisie's candidate for Bona-Roman Catholic Church.

### "THAT LITTLE PAPER"

"We'll never forget the way that little paper defended us during the war when everyone else was against us." That's what one of the district officials of the United Mine Workers said recently about The Militant.

Behind these simple, affectionate words there's a big story. The miners took the lead during the war in labor's struggle for decent wages and conditions. They were hounded and persecuted by the big corporations and their government agents. The entire reactionary press from The Wall Street Journal to the Stalinist Daily Worker screamed at the striking miners. Only The Militant backed them up 100% in their progressive actions.

Like the miners on the economic front, the Trotskyist movement took the lead on labor's political front during the war. The Militant, as the weekly paper of the American Trotskyists, opposed the imperialist war and called for a socialist world of enduring peace, boundless plenty and the brotherhood of man.

The evil forces that attacked the miners also raised their clubs against the Trotskyists. Eighteen of our leaders were railroaded to federal prison during the war as the first victims of the infamous Smith "Gag" Act. The second-class mailing rights of The Militant were threatened. Harsh blows fell on us from all sides. But the cause of socialism is the kind that builds courage and stout hearts. Like the miners we did not give in.

Today The Militant is America's leading socialist weekly, the most respected and authoritative voice in the radical political wing of the labor movement. It has earned its solid reputation for telling the truth no matter what the consequences.

If you are interested in getting the facts under the surface of events, if you want to know the real score in politics, economics, foreign affairs and all the dynamic social struggles of our time, you need The Militant. And if you enjoy a paper that knows how to fight on the political front in the most effective way against Big Business and its agents, you'll wonder how you ever got along without this "little paper."

Vol. XIV - No. 7

"While the magnates of monopoly capitalism stand above the official organs of state power, controlling them from their heights, the opportunist trade union leaders scurry around the footstools of state power, creating support for it among the working masses. It is impossible to perform this filthy chore so long as workers' democracy within the trade unions is maintained. The regime in the unions, following the pattern of the regime of the bourgeois states, is becoming more and more. authoritarian. In war time the trade union bureaucracy definitely becomes the military police of the Army's General staff in the working class."

-Leon Trotsky, Manifesto of the Fourth International, 1940.

### The Bureaucratic Mentality

Louis Stark, the well-known labor correspondent of the N. Y. Times, sheds some light on the motives behind the AFL Executive Council's refusal to lend legal aid to the United Mine Workers against an impending Taft-Hartley injunction.

In the Feb. 3 Times, Stark reported that the AFL high moguls had refused to act on the word sent indirectly by John L. Lewis to the Council that he "would be pleased" if the AFL offered to join in the legal defense against the injunction proceedings brought by NLRB General Counsel Denham. CIO President Philip Murray had already made such an offer for his organization.

While the AFL officials gave no formal statement on their reasons for refusing legal aid. Stark learned that the members of the Council had engaged in considerable discussion on the question. All sorts of pretexts were raised by the Council members why they should not back the miners even to the limited extent of legal support.

But among the reasons given, there is one in particular that is most revealing of the mentality, methods and aims of the AFL bureaucracy. During the Council's discussion, reports Stark, emphasis was placed on the miners' "able and will-

#### Kutcher Case in the Courts

Since Truman instituted the "loyalty" program in March 1947, protests have been multiplying against this American imitation of totalitarian thought-control practises. Outstanding authorities on civil liberties, including eminent jurists, have condemned the provisions and procedures of the purge as unconstitutional, undemocratic and unprecedented in America.

Now with the filing of James Kutcher's suit for reinstatement at Washington this week, the federal courts are being called upon for their opinion. Kutcher's petition clearly poses the basic issues. Do public workers have the same right to their political ideas and activities as other citizens, or can they be persecuted and victimized for their beliefs? Have Truman and his Attorney General the power to proscribe working class parties and other organizations by decree and penalize their members, despite the Bill of Rights and our democratic traditions? Kutcher has had the benefit of exceptionally qualified counsel in preparing his appeal and it is the most cogent and rounded indictment of the "loyalty" purge submitted to the courts.

ing" clause, which the coal operators have refused to renew because they claim it gives the union full authority over coal production.

"The council members saw this clause in another light," Stark discloses. "It was said that the disciplinary authority of an international union over its affiliates would be completely nullified if local unions succeeded in writing 'able and willing' clauses in their contracts."

These AFL officials, ever alert to possible direct or indirect threats to their bureaucratic authority, read into the clause that the miners shall work only when they are "able and willing" a possible concession to rank and file control of the unions. To union bureaucrats, that is a greater "danger" than a Taft-Hartley Law.

Rather than appear to give even a breath of support to anything that might seem to weaken control from the top, the AFL leaders prefer to deny aid to the miners and to give tacit support to Denham and the coal operators who claim the "able and willing" clause is "illegal" under the Taft-Hartley Act. To these bureaucrats, the "main danger" is always union democracy, that is, control of the unions by their members.

terests and policies of the capitalist rulers are involved. Federal judges are political appointees responsive to the will of the Washington witch-hunters. Circuit Court decisions pertaining to the purge up to now have affirmed its legality.

However, the courts are not impervious to counterpressure from the people or totally heedless of their protests. In addition to purely legal considerations and arguments, they often take into account the state of mass sentiment in arriving at their decisions. That is one reason, among others, why the nation-wide movement behind the Kutcher case is so crucial. The support already developed around his defense is sizeable and impressive. But the greater the forces mobilized on his behalf, the more seriously will his appeal be considered. The case of the Legless Veteran has rightfully become the rallying center for the expanding opposition to thought-control. The campaign conducted by the Kutcher Civil Rights Committee has 'awakened and aroused people all over the country to the perils of the "loyalty" purge. These form the vanguard of millions more who can - and must - be enlisted in this historic struggle for civil rights and carry it forward to a successful conclusion.

### DID ROOSEVELT "APPEASE" STALIN? By George Breitman

A favorite theme of many reactionaries (like William C. Bullitt) and of the Social Democrats (the New Leader especially, but also the Call) is that Roosevelt, by "appeasing" Stalin at the Yalta Conference in February 1945, sacrificed important "American interests" and was responsible for Washington's subsequent difficulties in the cold war. Things would be different today, they say, if Roosevelt had not been sick or badly advised; if he had not placed o much reliance on personal diplomacy; if he had really understood that the Russians cannot be trusted; if only he had stood firm and refused to make any concessions! The lesson they draw is that there must be no more "appeasement" and no relaxation of the get-tough policy.

The Stalinists, on the other hand, never have anything but raise for the Roosevelt policy at Yalta. Things would indeed be lifferent today, they shout, if only Roosevelt had lived and been able to continue his "friendly" policy toward the Soviet Union, which Truman foully betrayed and abandoned. The lesson they draw is hat the Roosevelt policy must be revived by the election of "peaceloving" men like Henry Wallace.

Both these myths are thoroughly exploded in the book completed by Edward R. Stettinius just before his death (ROOSEVELT AND THE RUSSIANS: The Yalta Conference, Doubleday and Co., 1949, 367 pp., \$4). Stettinius, a prominent capitalist, Secretary of State and a participant at Yalta, in his book gives an informative account of the demands, counter-demands and bargains struck by Roosevelt, Churchill and Stalin at the first conference where they "reached fundamental agreements on postwar problems as distinct from mere statements of aims and purposes."

It is his contention that "The record of the conference shows clearly that the Soviet Union made greater concessions at Yalta to the United States and Great Britain than were made to the Soviets." The evidence he presents fully supports this contention.

Poland, one of the main points on the Yalta agenda, is a good example. Stalin had set up a puppet government in Lublin which he wanted recognized. Roosevelt and Churchill refused to do so, and insisted on an agreement to establish a new government of "national unity" which would include both the London and Lublin Poles and would hold free elections leading to a democratic regime. The final decision was substantially in line with the Roosevelt-Churchill demands.

#### **Concessions on the Polish Question**

Since then Roosevelt's critics complain that he was "taken in," because while the Lublin regime was broadened to include such London representatives as Mikolajczyk, the elections that took place were not free and eventually the London Poles were driven out of the country. But these critics overlook a vital fact: At Yalta Stalin already had complete control of Poland. As Stettinius puts it, "What did the Soviet Union [at the conference] gain in eastern Europe which she did not already have as the result of the smashing victories of the Red Army?" The answer is: Nothing. " . . . If we had made no agreements at Yalta, the Russians still would have been in full possession of the territory in Europe that President Roosevelt is alleged to have given them." Stalin had the power to set up a completely Stalinist regime in Poland instead of a People's Front government, and his allies could not have stopped him.

But, the critics continue, if Roosevelt and Churchill had refused o go along on the Polish agreement which Stalin later refused to honor, then the U.S. and British governments would have been in a better moral and propagandistic position for the cold war with the USSR. What good were the agreements in this sense?

Plenty good, Stettinius replies in the final lines of his book: 'Until agreements were made and [the good faith of the Soviet Union] tested, the world could not clearly know of the difficulties of securing Russian compliance with agreements. The Western nations could not follow their present policy toward the Soviet Union unless they had behind them the record of President Roosevelt and Prime Minister Churchill in their joint effort to deal with the Russian leaders in an honest and honorable manner at In other words, such agreements were very important weapons for the imperialists. "President Roosevelt did not 'surrender' anything significant at Yalta which it was within his power to withhold." But he got an agreement that Stalin broke. This helped to create the atmosphere in which it became relatively easy for the U.S. and British governments to put over their present get-tough policy toinformation and FBI reports | ward the USSR. Here is an enlightening example: On the second day of the conference, Stalin asked Roosevelt how long he thought the and historical doubletalk with plaintiff. At the hearing, no wit- U. S. would be willing to keep occupation forces in Germany. Roosevelt answered: "I can get the people and Congress to cooperate fully for peace but not to keep an army in Europe for a long time. wrongdoing. Kutcher had no right Two years would be the limit." Stettinius comments as follows: "Although this may now sound astonishing, it must be remembered that there was already a ground swell of public opinion demanding that our forces be returned home as soon as the war was over. Furthermore, it is reasonable to assume that, had Russian-American relations remained at the highwater mark reached at Yalta, public opinion would not have favored American troops being stationed in Europe for too long a time after the close of the war. It was the deterioration in Soviet-American relations after Yalta that rapidly changed American opinion on this question." And nothing helped the imperialists in Washington more in getting away with their present occupation and war preparation policies than the easily-proved charge that Stalin was not honoring agreements such as the one on Poland.

#### THE SAME PROBLEM

Their dilemma is not at all a Negro one. It affects the writing of history from one end of the world to another, and nowhere more sharply than in the history of revolutionary periods such ac

he English Civil War of the 17th century, the French revolution of the 18th century and the Russian revolution of this century. All these great historical events are in process of re-evaluation, like the Civil War in the U.S., with regard to the same problem. It his been estimated that in France there are more books on the great period of the French revolution, 1789-94, than on all the rest of French history. Yet when Daniel Guerin recently published his history of that

period, he was able to raise so fundamental questions, many lluminate so many obscure ones. and throw so much confusion into accepted theories that friends and nemies alike had to agree that new stage had been reached. Why? Because Guerin, a revoutionary socialist, for the first time posed unambiguously and in the most militant fashion the role

of the artisans, workers and peasants in the French revolu-How much longer can they perion, bringing them and their leadmit the critical decisions affecters like Varlet, Rous and Leclerc ing their lives and liberties to ge hitherto generally neglected for by default, or more correctly, to

#### A "Diplomatic Triumph" for the Imperialists

On this ground alone, it appears Stettinius is correct in his estimate that the Yalta agreements were, "on the whole, a diplomatic triumph" for Roosevelt and Churchill. But there are many other grounds as well. One of Roosevelt's major aims at the conference was to get Stalin to accept a number of propositions that would remove obstacles to the establishment of the United Nations. Roosevelt got what he sought, in return for virtually meaningless concessions such as three votes for the USSR in the UN, and thus laid the ground for the formation of the organization which has proved such an effective propaganda weapon against the USSR.

Another of Roosevelt's objectives at Yalta was to get Stalin to agree to enter the Japanese war within three months after the European was ended. (At that time it was not known if the atomic bomb would work and in government circles "there was the fear that heavy casualties in Japan or the possible lack of continuous victories vould have an unfortunate effect on the attitude of the American eople.")

Stalin consented if in return he would get certain territorial ncessions in the Far East, which Roosevelt and Churchill agreed and for which they have been criticized. But in the first place, as Stettinius asks: "What. . . with the possible exception of the Kuriles, lid the Soviet Union receive at Yalta which she might not have taken without any agreement? If there had been no agreement, he Soviet Union could have swept into North China, and the United States and the Chinese would have been in no real position to prevent it." In the second place, as Stettinius does not say, Stalin's agreement to declare war against Japan in return for territory discredits the Soviet Union in the eyes of the workers of the world and thereby undermines the mass support without which the Soviet Union will be destroyed in the next war.

The reactionaries and Social Democrats lie when they say Roosevelt failed to protect imperialist interests to the best of his ability at Yalta, just as the Stalinists lie when they say Roosevelt vas really a friend of the Soviet Union who might have followed policy different from the one pursued by his successor. Roosevelt remained loyal to his class; it was Stalin and the Stalinists who betrayed the interests of the class they claim to represent, and it is that disloyalty above all which the capitalists can thank for permitting their system to be preserved in most of the world.

### **Their Kind of 'Socialist'**

#### By Fred Hart

They threw a testimonial luncheon for Norman Thomas at the Commodore Hotel ballroom in New York City the other day. The leader of the Socialist Party attracted a goodly crowd at \$5 a plate. It was a fitting tribute to Norman Thomas' brand of "socialism." You couldn't toss a pie anywhere in that ballroom and not hit some reactionary capitalist politician, anti-socialist propagandist or malefactor of great wealth. They all had praise for Thomas, he's the kind of "socialist" they like. They meant it too.

That pride of Tammany Hall and two-time campaign manager for Franklin D. Roosevelt, James A. Farley, paid warm personal tribute to the man who once campaigned on the slogan, "Socialism in our time," but since has complained that even the Republicans have swiped some of his pet reforms.

Farley said of Thomas, "We would be better off with many more Americans like him." The old Democratic boss wasn't lying either, not from his standpoint. By "we," he meant the capitalist class and he was just saying that if there were more "socialists" like Thomas there would be less reason for the capitalists to worry about. socialism.

One of the sincerest tributes came from an oldtime Wall Street promoter who has twice shown American Big Business how to ante a first-class world war into super-billions of profits. Bernard Baruch, that "elder statesman" of American capitalism and "master strategist" of imperialist war planning, proclaimed his "very high regard for the integrity and courage of Mr. Thomas."

No doubt, Mr. Thomas was deeply touched by this tribute to that "integrity" and "courage"

which has just led to his proposal that his party ahandon independent electoral activity and confine itself to acting as an adjunct of the corrupt Democratic machine.

The sponsors and soup-lappers at the Thomas luncheon were as choice a collection of "free enterprisers" as you'll find anywhere outside an NAM convention. There were H.V. Kaltenborn, Republican Senators Wayne Morse and William Langer, and even a spokesman for the strike-In San Francisco bound Chrysler Corp., its vice president and general counsel, Nicholas Kelley. He sort of made the gathering complete.

And the labor fakers and bureaucrats - how they "love that man." David Dubinsky, of course, Supervisors buried in committee paid his respects. And even Daniel J. Tobin, head the proposed Fair Employment of the AFL Teamsters, found Thomas nothing Practices Ordinance. Recommendless than "a gentleman, a scholar and a great American in every sense of the word." Six years whereby the employers will un ago, Tobin's magazine had said Thomas "viewed the world through the same blood-smeared glass- to end discriminatory hiring praces as Hitler." Tobin was sued and apologized and now he's ready to admit that Thomas is the kind of "socialist" the pro-capitalists don't mind at all having around.

They say you can tell a man by the company he keeps. You can also tell a man's politics by lines and meetings, who packed those who praise him. In both senses, Thomas has affirmed Trotsky's appraisal of him, that he

### That Speech of Carey's

#### By Joseph Keller

The current CIO News, dated Feb. 6, contains not a word on the recent American Legion-sponsored, Hearst-promoted conference in New York to form a "united front against Communism." This silence is particularly noticeable because top CIO leaders, along with AFL and Railroad Brotherhood spokesmen, participated in and gave a "labor" cover to this "All-American Conference" run by rabid, fascist-minded enemies of organized labor.

Indeed, the capitalist press gave special prominence to the role of CIO Secretary James Carey and his assistant, Harry Read, at the conference. Read accepted the post of chairman of a continuations committee to set up a "permanent, pro-American, anti-Communist" organization. Carey told the assembled reactionaries, "In the last war we joined with the Communists to fight the Fascists; in another war we will join the Fascists to fight the Communists."

Naturally, there has been widespread revulsion in union ranks at the spectacle of labor officials like Carey and Read joining forces with elements like Senator Mundt, William Randolph Hearst Jr., State Senator Tenney of California, George Sokolsky, the Chamber of Commerce, National Association of Manufacturers and Merwin K. Hart's anti-Semitic, pro-fascist National Economics Council.

Progressive unionists want to know if Murray, Reuther and other CIO leaders knew and approved of Carey's and Read's participation, in the name of the CIO, in this gathering of the very elements who will constitute any substantial fas-
