Yugoslav Chiefs Deepen Exposure of Stalin Crimes

The Soviet Union is now in the throes of an internal Vol. XIV - No. 13 crisis, stated Milovan Djilas, member of the Yugoslav Communist Party Politburo, in one of the sharpest and clearest

revisionism of the philosophic

BUREAUCRACY'S METHODS

basis of Marxism. -

tries."

•

According to the N. Y. Times Suppression of initiative and dispatch, Djilas stated that a "crisis of socialism" in the Soviet Union resulted from the "contradictions between the development of the means of production and the social fabric" of that country. The following conditions, he stated, indicate what is occurring:

1. The non-Marxist treatment of the role of the leader (presumably Stalin) which often took the form of vulgar idolatry similar to that in absolute monarchies. 2. Differences in salaries that were greater than in bourgeois democracies, varying from 400 to

Propaganda Move to Justify **Continuation of "Cold War"** By Art Preis

Peace is the one thing we can be sure will not be achieved by Secretary of State Acheson's 7-point "peace" program, proclaimed in his March 16 speech at the Uni-

versity of California. Peace was not his object. His purpose was to build a firmer propaganda basis to justify, before a world fearful of Truman's H-Bomb threat, the continuation of U.S. imperialism's "cold war" and war preparations

For this purpose, he laid down seven conditions which he said the Soviet Union must accept and carry_out before there could be the possibility of "the establishment of peace" even "in its narrowest, most limited sense" that is, a mere truce in the present "cold war."

Each and all of these terms are, on the face of it, inacceptable to the Kremlin. If peace depended on Stalin's acceptance of them, the world would hurtle without pause into the abyss of H-Bomb annihilation. ' Acheson knows he

responsibility for making all con-

Vol. XIV - No. 13

"The trade union bureaucrats, like the bureaucrats of false Communism, live in an atmosphere of aristocratic prejudices of the upper strata of the workers. It will be a tragedy if the Oppositionists are infected even in the slightest degree with these qualities. We must not only reject and condemn these prejudices; we must burn them out of our consciences to the last trace. We must find the road to the most deprived, to the darkest strata of the proletariat, beginning with the Negro, whom capitalist society has converted into a pariah, and who must learn to see in us his revolutionary brothers. And this depends wholly upon our energy and devotion to the cause." - Leon Trotsky, A Letter to American Comrades, 1929.

TROTSKY

Shame and A Disgrace

The administration is expressing strong indignation at the smear of State Department officials and employees by Senator McCarthy, who charges there are 57 "communists" in that department.

John E. Peurifoy, Deputy Under-Secretary of State, speaking for the administration on March 16, lashed out at Mc-Carthy's use of the "guilt by association" technique. Other defenders of the administration complain that he is taking advantage of his position to publicly stigmatize and destroy the reputations of numerous people before they have even had a chance to learn the charges against them.

All this is true. But the Truman administration is hardly in the position to adopt a "holier-than-thou" attitude to McCarthy. For most of the witch-hunt techniques he is now employing against the administration have become standard operating procedure in the administration's own witch-hunt.

The victims of McCarthy's smears at least have the privilege of defending themselves and answering the charges at a public hearing. But the organizations proscribed by Truman's "subversive" list are denied not only the right to a public hearing before or after their names are placed on the blacklist — they are denied the right to know even the precise nature of the charges against them, or the "evi-

Union's Duty to the Jobless

In a letter printed on Page 2 of this issue, N.J.S., a jobless worker in the Los Angeles area, poses a question that must be in the minds of millions of other unemployed today. Like N.J.S., they had looked to their unions for a solution of the unemployment problem and found instead that the unions are doing little or nothing about it.

The unemployed have every reason to expect the backing and guidance of the owerful organized labor movement. But instead of getting an effective program and a fighting leadership, the unemployed find themselves thrown completely on their own pitiful resources. Who is responsible for this shameful and intolerable state of affairs? The responsibility must be placed squarely on the shoulders of the top official union leaders. They are reluctant to grapple with the problem of unemployment. The reason is political. A genuine struggle in the interests of the jobless is incompatible with the political support of capitalism. But the union leaders are staunch supporters of capitalism and of one of its main pillars, the Democratic Party of Truman.

dence" on which these charges are allegedly based.

We agree with Peurifoy that it is "a shame and a disgrace" when State Department employee John S. Service is subjected, purely on the basis of the guiltby-association doctrine, to "humiliation. embarrassment and inconvenience." But isn't it equally a shame and a disgrace that the legless veteran, James Kutcher, was fired out of his VA job solely because of his membership in the Socialist Workers Party? And wasn't it the Truman administration that was responsible for this guilt-by-association victimization?

When the Republicans see that the Democrats can successfully persecute Trotskyists and other dissidents because of their political views, it is only natural that the Republicans should try to do the same to the Democrats. That is the logic of the "loyalty" purge, which tends to spread and widen until even the mildest liberal views are outlawed and complete. political conformity (the police state) is achieved.

Meanwhile, the Trumanite denunciations of Republican-sponsored witchhunts in the U.S. and Stalinist purges in Eastern Europe would undoubtedly sound more convincing and less hypocritical if they didn't come from the lips of such ardent-witch-hunters and purgers.

hoping for the best while jobs grow scarcer and scarcer and more and more workers are thrown onto the scrap heap.

We have consistently criticized the inexcusable conduct of the official union leaders. They have failed even to fight for the demand for a 30-hour week with no reduction in take-home pay - a demand that has been an official plank in the programs of many unions both CIO and AFL, from the most advanced to the

By Joseph Keller

The March 13 Militant discussed John L. Lewis' opposition to formation of American labor's own party, as expressed in his March 3 N: Y. Times interview with Arthur Krock. We pointed out that Lewis believes in capitalism and offers no real solution to the miners' fundamental problem of unemployment and insecurity. There-UAW that its new plants will not Detroit community. Such line of fore, he sees no need for labor to build its own party.

Together with his belief in capitalism, there is another decisive reason why Lewis is opposed to freeing labor from its political ties for the union in NLRB elections. business leaders invariably line with capitalism and its parties, Democratic and Republican. He has no faith in the ability or fitness of the working class to rule society. He believes that the capitalist class alone is fit to rule and run so-The secondary union leaders ciety — with the aid, naturally, of a few elite labor leaders.

Lewis does not say this, of course. But this attitude is clearly implied in his answer to another question posed by Krock - the question of the ability of the rank and file miners to make the right kind of decisions inside their own union, their capacity to rule the union properly. Lewis does not think the workers can be trusted with democratic control of their own union, so he certainly would not entrust the control of all society to them.

Krock asked Lewis why, in some mine districts, the miners are have the production standards der those conditions will obvious- not permitted to elect their own district officers. Lewis replied:

> "In perhaps a dozen districts the miners do not choose their district president and secretary. That is because these districts showed a tendency to make poor choices and the national organization decided its interest required that these officers be selected for that so vitally affect the Detroit them until their choices could be more relied on."

totally silent. The Detroit auto Trouble with 'Benevolent Despots' workers will not forget this

> Presumably, a "poor choice" is one who does not support everything that Lewis does or proposes, while a choice who can be "relied on" is one who never criticizes or opposes Lewis. And if in "perhaps a dozen districts" the miners can be deprived of the lemocratic right to elect their own leaders, every other district can also be denied this right if, in Lewis' opinion, they make a "poor choice." In short, Lewis is here arguing against union democracy and rank and file control of the union.

> What he upholds, in effect, is the concept of the "benevolent despot." And like all such "benevolent despots" he justifies himself on the grounds that the people themselves — in this case, the miners — don't know what's good for them or how to get it. If self-designated superior individuals don't rule them "for their own good," they will easily fall prey to "bad" leaders

> One trouble with "benevolent despots" is that they are irremovable when they turn out to be more despotic than benevolent. They are beyond control. If they prove to be less infallible than they set themselves up to be, they cannot be replaced by better leaders.

> Let us assume — which is not the case — that Lewis himself is an ideal leader for the miners, infallible in his judgment and decisions. Will he live forever? What kind of "benevolent despots" will follow him? Will they all also be infallible? They will claim so. But if the miners cannot be trusted to make "good choices," how will they ever free themselves from bad leadership, if such arise?

> In view of the miners' advances in the economic struggle for vages and better working conditions under the leadership of Lewis, it is more difficult to show the disadvantages of "benevolent dictatorship" in the case of the UMW than in other leading unions. But Lewis himself would be the first to admit that the "benevolent despotism" of Philip Murray in the CIO and of types like William Green in the AFL is a calamity. We have a first-class example of this in their rejection of Lewis' proposal for a common defense pact of the big unions in strikes. Would such a pact be brushed aside if the CIO and AFL ranks had anything to say about it?

Lewis himself, however, has not always proved to be the infallible leader which his concept of union rule presupposes. There was nothing in the defeats and decline of the United Mine Workers from the first World War until the rise of the CIO in the middle Thirties to prove his superiority over the collective judgment of the miners. Even the latest mine struggle shows that when it comes to fighting for their own interests not even a John L. Lewis is superior in judgment to the miners themselves.

most reactionary.

With unemployment already beyond the six-million mark, the need is obviously urgent for the adoption of a broad social program to cope with joblessness. Coupled with the demand for the 30-hour week, an indicated part of such a program is the launching of large-scale public works and housing projects under the control of workers' committees and with the payment of full union wage scales. Such a program can be carried out only by mass action.

In view of the entire past record of the union leadership, it would be the height of folly to expect any initiative from them in this connection. The initiative must come from the ranks. It is the militant unionists in their respective locals who must raise the issue and prepare the ground for necessary actions.

When the news of the new Buf- 681,000 wage and salary dispersed throughout the Rouge plant, and the Aluminum Foundry falo and Cleveland plants became ers. The drop in employment from which involved a smaller number public, it caused a furor among December to January was 20,400.

with the complaint that the Shachtmanites had not taken a election.

Now he has taken up residence with the New Leader confraternity of full-time Stalinophobes. His article on "The Communists and Civil Liberties" in

the March 11 issue of that paper proves that he really belongs there, as we pointed out a long

question: Why were the 18 Trotkyists sent to prison? Goldman had answered this question more than once in the columns of The Militant. He had explained, just as we did, that fundamentally the

The final outcome of this strug- imprisonment of the 18 was an gle will also have some influence effort by the capitalist class to opposition to imperialist war and

reaction

They displayed the initiative, independence and discipline which brought the victory. It was they who took the lead and forced the fight. Had they yielded to Lewis' request to halt their spontaneous walkout after Jan. 9 or followed his instructions to return to work when Truman invoked the Taft-Hartley injunction, the miners might have lost or faced a more prolonged struggle with smaller gains.

It is not because of Lewis' "benevolent despotism" but in spite of it that the miners have made their gains. And these gains are limited because the miners, so long as they lack real control over

their union, cannot fully discuss and come to grips with the basic problems of capitalism. This requires the utmost freedom of thought, complete understanding and self-initiative. For the great and urgent task of reorganizing society so that the workers won't have to spend so much of their time and energy fighting for small wage gains, it is necessary to mobilize the whole working class. Here, even the most "benevolent despotism" is a towering obstacle to labor's advance

Within the framework of economic struggles for small and insecure gains, Lewis appears as a great and brilliant union general, compared with such labor officials as Philip Murray, Walter Reuther or William Green. But he does not differ essentially from them in his fear of the democratic rule of the workers. Like them, he does not really believe in the power of the working class.

And that is why a Lewis, in the end, can not offer the kind of leadership and program that will fully emancipate the miners along with the rest of labor. That is why a Lewis cannot rise to the stature of a Eugene Debs, who was distinguished above all by his profound confidence in the abilities and capacity for self-leadership of the rank and file.

It is this confidence in the working class that must be the starting point for any leadership that hopes to rise above the limited aims of the day-to-day labor struggle within the capitalist framework and rally the workers to the vision and the achievement of the better, the classless socialist, society.

Morals Make the Headlines Today

Truman OK's the Hell-Bomb and sees salvation in the "moral" regeneration of mankind.

Acheson preaches "total diplomacy" and extols the "morals" of U. S. capitalism, preparing atomic annihilation.

Preachers and politicians, liberals and Jim Crowers, reporters and professors vie with one another in raising aloft the banner of "morality."

Nothing to Worry About

By Ruth Johnson

Hell-Bomb warfare may end all life on earth, warn the scientists who know. "You haven't a thing to worry about," reply the militarists and the doctors in their hire. There is a fighting chance that Wall Street'may win a war one bomb short of world annihilation; maybe you, having worked in a lead-lined cave, will survive the H-Bomb. What then?

The reassuring words spoken before the Joint Congressional Committee on Atomic Energy by Dr. Shields Warren on March 17 are something to console you as you crawl from your shelter. Survivors of atomic bombings, he assured, may expect to have "a reasonably normal life," assuming they find some more survivors. "There was no ground for fears that an atomic blast would cause widespread sterility or other debilities," he says. True, in addition to burns, you can expect "eye cataracts, infections, anemia and a tendency to bleed" — but why should that disturb you?

You will even, be able to tell when to claw through the ruins of your city to forage for food - provided you haven't lost your portable geigercounter. If it shows a green light, you're safe; if the light is yellow, you made a mistake; if the light is red, the air is heavily radioactive and your mistake is fatal.

Lucky you, the light was yellow, and you just have a burn; nothing at all! As another man-inthe-know has explained, "We are going to have a terrific amount of skin burns" - a kind that never heal. That was Rear Admiral Clifford A. Swanson, top Navy doctor, who told the House Appropriations Committee how the Navy is preparing for such things:

"We can take off skin, keep the skin for a period of two weeks, and we have been able to graft it back. Incidentally, we have learned that the skin does not die for several hours after the death of the individual. . . A bone bank is another recent development. Bones can be kept indefinitely." And finally, there's "A blood vessel bank, for the preservation of blood vessel segments."

If these skin, bone and blood banks still stand, and a doctor has lived through the raid, he will be able to patch you up. At least you now know that capitalist warmakers are NOT wasteful; taking a lesson from the meat-packing plants they will use "everything but the squeal" from the corpses of World War III. The bitter poem beginning "The unknown soldier, here I lie. . One man's elbow, another man's thigh," will become a living reality; the mutilated will become a living patchwork of the dead.

Incidentally, the Atomic Energy Commission has developed a small and simple Geiger counter, which could be sold for as little as \$10 or \$15 if put into commercial production. A real bargain at half the price.

I would have liked to end up on this note of comfort, but it's not the last word in steps being taken to improve our welfare. While Dr. Warren and Dr. Swanson were uttering their words of cheer in Washington, Secretary of Defense Loui Johnson was in an optimistic mood in Chicago

Addressing the Irish Fellowship Club, Johnson boasted that American scientists are "developin brand new, unprecedented devices that challeng the existence of all known weapons." If you thin' the H-Bomb is fearful - well! "The President' decision to proceed with the production of th hydrogen bomb is but the most dramatic example of "technological advances," said Johnson.

"I assure you that we are equally alert to possibilities inherent in the biological and chemical fields as well as in the radiological." So don't worry about the H-Bomb; Truman's

"welfare state" is hard at work to provide bigger and better plagues or chemically produced disintegration as alternative farewells from this

Yugoslav Leaders Deepen Exposure Of Kremlin Crimes

(Cont. from page 1)

of the Soviet workers and of the bureaucracy, which Djilas cited The parasitic position of this bureaucracy, as Trotsky explained since 1923, led to the nationalist degeneration of the dominant Stalinist leadership which, after usurping power, destroyed the great political and social achievements of the October revolution and instituted the most savage dictatorship against the Soviet masses. It led also to the policy of collaboration with world imperialism in which the workers movement was converted from a vehicle of social revolution into pawn of Stalinist diplomacy.

PIYADE'S SPEECH

Additional evidence of this was brought forward last week in the of another Yugoslav peech Moshe Piyade, who releader, vealed that Stalin, far from aiding the partisan struggle during the war, actually refused them assistance in their most perialism. Said Piyade:

"We know now that it was not technically impossible to send us assistance. but the Soviet gov-

ernment did not want to cause

DETROIT, March 19 — The tension of Detroit's race relations reached an explosive point yesterday afternoon when a 60-year old Negro, George Jones, was shot to death

by a white street car motorman, inter-racial committee whose Ray Sandefer from Kentucky. The Negro, a DSR passenger, chairman, George Schermer, was shot in the back several stated that Detroit's racial tentimes. Witnesses testify that sion had reached the riot level. Sandefer deliberately emptied Recent incidents point to the his gun into the body of the aged housing situation as one of the Negro as he lay prone on the basic causes of the race situation in Detroit.

This cold-blooded murder took BASIC CAUSES

In the last few months one populated Negro section of East home has been burned down, others stoned, and crosses burned individuals who have been aroused fire through the community. on lawns of Negroes. All this is

John Crown's Legacy By David Weiss

John Crown, a World War II veteran and paraplegic at Halloran Hospital, died a few weeks ago. A few days later Howard A. Rusk, M.D., reprinted in his column in the Mar. 5 N. Y. Times a letter which the young veteran had written in 1946 and which Rusk had printed at that time.

It was a truly moving document. "My physical wounds are very small in comparison with my spiritual wounds," he wrote. "I have come back from death to a world I no longer care for." After engaging in a struggle he thought would save the world from tyranny, he now could "find no peace in the world or in my country.

"Having lived close to death for two years, the reasons why there is no peace seem infinitesimally flimsy. Russia wants the Dardanelles, Yugoslavia wants Trieste, the Moslems want India, labor wants more wages, capital wants more profit, Smith wants to pass the car in front of him, Junior wants more spending money. To these, I say, is it necessary to kill and cripple human beings for these petty gains?

"Anyone who thinks a human body is so cheap that it can be traded for a tract of land, a piece of silver, or a few minutes of time should be forced to listen to the moans of the dying night and day for the rest of his life.

"All the troubles of the world originate in the common man. The selfish and greedy ways of nations are just the ways of each individual man multiplied a hundredfold. When the morals of the common man drop, so do the morals of the nation and of the world.

As long as our individual morals remain at a

The common man is like John Crown was. John Crown did not share in the decision of nations. He did not wish to kill and maim, nor be maimed, nor die so soon. What did he want? A peaceful and fruitful life. Enough of food and clothing. A decent home. To marry. To raise his children well. To do the work he liked. To learn and play. These things only does the common man desire in every land. The world today has wealth enough to provide these things for every man.

But the world and its wealth belong to the few, the rich, the big industrialists and financiers who withhold the good things of life from the common man and rule over him with their wealth. It is the capitalists who pit man against man in the struggle for the little that they leave for the common man to live on. It is they who, in their greed for more wealth and power, launch wars and force the common man to do the killing and the dying.

Our nation consists of the rulers and the ruled. But the rulers taught John Crown that a nation s merely the individual man multiplied many times and he believed them. The N. Y. Times, which speaks for the rich, liked that in his letter. He placed labor's fight for wages, which is the fight of the common man for the better life, on the same level with capital's fight for profit, which leads to the misery of the common man. The Times liked that too. He attributed the greed and selfishness of the lords of wealth to all men, including the most downtrodden and oppressed.

bad relations with King Peter Karageorgeovitch [supported by British and American imperialism at the time] and others because the Russians had agreements with him. . . We received material assistance from them only in October 1944 . . . but in that same October they agreed with Churchill on a 50-50 division of Yugoslavia into two spheres of in-

when a mob stoned a house where St. house themselves! He alleged

low ebb, so will be the world. . . If man wishes peace again, he must return to the great Commandment, 'Love thy neighbor as thyself for the love of God'."

This-letter expressed the bitterness of the many that cry out for a world of peace. Dr. Rusk uses it to sanctimoniously recommend John Crown's plea for religion as the panacea for the ills of the world. But the letter deserved a different response. John Crown deserved to know the truth about the war that killed him. It's a pity he didn't get to know it. But since many anguished millions still alive think and feel as he did, it is important that we spread the truth that he did not learn.

He was able to see that human bodies are traded for tracts of land and pieces of silver in a society where labor is pitted against capital and nation against nation. But he was tragically mistaken when he traced the world's problems to the evil in the common man. Because the world today does not belong to the common man. It is not run by the common man. It is not plunged into bestial wars at his command.

he asked that all men love one another. That, always demand the love of their slaves, the ers. warmakers always seek the love of the victims of their wars.

The Times printed his letter twice because it was useful to the capitalist class. For it can continue to rule over the common man only so long as it can deceive him. John Crown was one of the deceived. Of all the wounds he suffered in body and in spirit the deadliest were the lies they imbedded in his brain. And now the deceivers employ the words of the deceived dead to continue to deceive the living.

If we are to save the world from the most hellish war ever envisioned, we must tear through these lies. The common man must know the truth. The great moral regeneration of the world for which John Crown yearned will not come until the hundreds of millions of common men, armed gains have been largely main- remain. From the Yugoslav Press

The Belgrade daily Borba, newspaper of the Yugoslav government, sharply challenged on Feb. 26 the extravagant claims of the Cominform and Soviet press on the beneficent and magnanimous nature of the Kremlin's recent treaty with China. This treaty, far from being a "gift from heaven to the Chinese people," Borba points out, differs actually "very little from the treaty signed by the USSR in 1945 with Chiang Kai-shek."

To the boast of Stalin's Pravda that the Kremlin had played a "decisive role" in assuring victory to the Mao Tse-tung regime, Borba correctly counterposes the whole treacherous record since 1944 of Stalin's support to Chiang Kai-shek, along the lines agreed upon with Washington and London.

The South Manchurian railway never belonged to Soviet Russia. The hullaballoo about the "generosity" in returning it to China denotes therefore, says Borba pointedly, "that in the USSR it is not considered a normal state of affairs to restore to others what does not belong to the Soviet Union anyway."

Commenting on the agreement to return Port Arthur, Borba cites the fact that Moscow has demanded and will receive indemnity for port installations and other Soviet investments there. whereas the treaty with Chiang provided for the return of the port, after 30 years, without any indemnities whatever. The Kremlin, it turns out, treated Chiang in some respects even more "generously" than Mao.

In conclusion Borba salutes the heroic struggle and victory of the Chinese people and asserts that they are entitled to get not "symbolic aid" but "important and substantial aid, from all of progressive and democratic humanity."

On Feb. 16 Borba, in a leading article, points out that the real aim of the January Plenum of the Central Committee of the Bulgarian Party which condemned the policies pursued at the time Dimitrov was alive was "to place Bulgaria in an even greater economic and political dependence on the USSR."

The titular head of the Bulgarian government, Chervenkov, underscores Borba, admitted himself that the principal task of the Bulgar CP was to "adjust the Bulgarian economy to the needs of the USSR" and not at all to the needs of industrialization, electrification and the welfare of the people as a whole.

Chervenkov insisted that there must be "at all costs an increase of agricultural production and the output of minerals and non-ferrous metals

for export." All these items are the ones exported to the USSR. But Chervenkov "did not utter a single word on the basic question, namely, the policy of industrializing and electrifying the country, the policy of building up the national economy adopted by the Fifth Congress of Bulgarian CP. In fact, this policy has been shelved."

"All the deposits of iron, lead, zinc, uranium and the rich coal mines are being exploited for and what the government may export to the USSR. And it is done under the supervision of Soviet technicians. Certain mines,

like the uranium pits near Sofia, are kept under Soviet guard. The bulk of the coal production is placed at the disposal of Soviet foreign export. Bulgaria is merely the titular owner of the mineral wealth of the country." In agriculture, the situation is going from bad

to worse. "Between June and December of last year only 12 peasant cooperatives were formed an hour. Chrysler would readily arbitrating disputed questions. GM, it is an open secret, is lines at Chrysler, virtually no in Bulgaria."
