The combination of adventurism | bership of a fighter for German | from 446 in 1949 to 761 in 1950. and opportunism which char- unity is actually working against The Ruhr industrialists protested acterized the so-called "Third the National Front. . ." (Speech violently against the ban on steel Period" policy of the Communist on May 17, 1949.)

International [1929-34], found its clearest expression in Germany. The theory of social-fascism [that Social Democracy is the clearer: twin of fascism] was combined

there with the practice of "national - communism" (the search for an alliance with pettybourgeois nationalist elements) And once again today, the new third period of criminal Stalinist post-war policy in Western Europe is most clearly expressed in Germany.

The denunciation of the Social warmongers" - "Basically, it is Attlee or Mr. Churchill becomes prime minister in March." (Nordism. . . bayerische Volkszeitung, Feb. 25)

- is combined with a frenzied appeal for the constitution of a "National Front" embracing all "the patriotic forces of the nation.'

To whom are these siren calls of the German Stalinists adaressed? The central organ of the SED (the Stalinist party in Eastern Germany), Neues Deutschland, explains this very clearly in its issue of May 18, 1949. Under the heading, "From the worker to the factory owner," the paper writes as follows:

"The objective conditions exist for a vast National Front extending from the worker to the German owners of Western factories." And then, as if to eliminate for all time the fiction of the "democratic employers" so dear heretofore to all the Stalinist parties in their "People's Front' period, Walter Ulbricht, the real leader of the SED, says explicitly:

### ULBRICHT CLARIFIES

"It is erroneous to pose the question as if all the supporters of German unity are convinced democrats. The question of determining who was or was not a Nazi is in no way whatever on the agenda today. . . Whoever under present conditions raises the question of the previous mem-

And a political resolution of on Oct. 4, 1949 makes this still

"No one can be excluded from the National Front movement if he is ready to defend the justified national rights of the people, including among them, former functionaries, soldiers, officers and generals (!) of the German armed fonces. . . In addition to the working masses, the present situation

permits the mobilization, in the National Front of Democratic Democracy as an "agency of the Germany, of the section of the German bourgeoisie which is loyal the same thing whether Mr. to Germany (!) and which has not sold out to foreign imperial-

> In fact, these Stalinist efforts for the constitution of a National Front are addressed to two different circles: on the one side, to Nazi party; and on the other, tc

zone of Western Germany. The Stalinist propagandists do not use the same language or the same perspectives to these two circles, and it is interesting to examine these quite subtle differences. APPEAL TO NAZIS

To former Nazis, the Stalinists speak approximately along these lines: "You want the 'glory of the Fatherland' and so do we. You want to get rid of the Anglo-American occupation and so do we. Why not go down the road together?"

Hence the open attempts of the SED to enlist the support of the 'little Nazis" through the medium of the "National - Democratic Party." Hence the attempts of the

to form alliances with extreme-

of the German Party" (which recently expelled its general secretary for "national - Bolshevist reparations! leanings"). Hence the publication of appeals openly signed by

ers of the Hitler Youth. Hence the attempts to organize "circles under whose aegis Germany has workers are revolted by the naalways won its most brilliant tionalist phraseology, by the open

ormer military caste and the

deliveries by the Western High Commissioners a few months ago, the Central Committee of the SED as a counter-measure against the "little blockade of Berlin" by the Russians. And the more the

economy of Western Germany sinks into stagnation and decay, the more will the appeal of the vast market of Eastern Europe the USSR and China exercise an undeniable attraction for the capitalists of Western Germany

### GROWING MISTRUST

Does this mean that the "National Front" policy will enable German Stalinism to score some real political gains? Quite the contrary! Whatever favorable trade agreements emerge from the present international con-

juncture for the Stalinist government of Eastern Germany, the Western German capitalists will do business with them because of their need for markets and not the cadres of the army and the because they take the ultra-na tionalist phraseology of the Stalthe capitalists in the occupied inist bureaucrats seriously. In its reaction on public opinion, among the masses of workers, the impoverished middle classes, the refugees and other declassed elements, the Stalinist "National Front" policy clashes against an ever growing mistrust and

hostility. How could it be otherwise, when they know that the same Stalin ists who shout themselves hoars against the annexation of the Saar by France justify the annexation by Stalinist Poland of the German provinces beyond the

Oder-Neisse line? How could it be otherwise when the same German CP which today carries on a noisy agitation against the dismantling in the Western zones, yesterday justified these same dismantlings German CP in the Western zones, in the self-same zones, and today continues to justify dismantling right wing circles like the "Youth in the Eastern zones and to uphold the Potsdam agreement, that is the obligation to pay billions in

## The Militant

Special May Day edition will feature:

• A.manifesto by the Political Committee of the Socialist Workers Party on unemployment, the H-Bomb war danger, civil rights struggle and labor's tasks of the day.

• In commemoration of the Haymarket martyrs, a speech by Albert Parsons and an article "Red-baiting and Witchhunting --- Then and Now."

• "Germany and International Solidarity - May Day 1950" by Ernest Germain.

• "Why Capitalism Doesn't Work" and "Why Socialism Will." Hard facts in language anybody can understand.

• An exposure of the false theories and traitorous practices of the Stalinists and socialdemocrats.

• Leon Trotsky answers Dean Acheson. Latest arguments of the Secretary of State taken to pieces long ago by the founder of the Fourth International.

• Special treatment of the struggle for Negro equality, the issues looming in the 1950 election campaign and other topics of vital interest.

A real round-up of the situation facing the American workers on May Day 1950 and what to do about it!

third of the workers into paupers, or to call upon maniacs to be dictators. . . What is indispensable and urgent is to separate the means of production from their present parasitic owners and to organize society in accordance with a rational plan. Then it would at once be possible really to cure society of its ills. All those able to work would find a job. The work-day would gradually decrease. The wants of all members of society would secure increasing satisfaction. The words 'property,' 'crisis,' 'exploitation,' would drop out of circulation. Mankind would at last cross the threshold into true humanity." -Leon Trotsky, Marxism in the United States, 1939.

# 'Shooting Soldiers in the Back'

At the March 30 press conference where President Truman branded Republican Senators McCarthy, Wherry and Bridges as saboteurs of U.S. foreign policy and the Kremlin's greatest asset, he said something else that got less publicity but was much more revealing.

Denouncing the Senate Republican Policy Committee, he said that it was grasping for a political campaign issue through the inquiry of McCarthy's charges against the State Department, and that "such a partisan effort at this stage of the 'cold war' was like shooting American soldiers in the back in a hot war." (N. Y. Times, March 31.)

Shooting soldiers in the back at any time is a serious crime, punishable by death; in wartime it would be classified as treason at the very least. When Truman talks in such terms, what he is actually saying is that, if necessary, he will take drastic measures to silence all critics of his imperialist bipartisan foreign policy.

Is this contention — that you are in effect a traitor if you question the bipartisan policy — shocking to some people? It shouldn't be for it is not particularly new — either in full-fledged police states or here in the U.S. The same viewpoint is at the base of the whole "loyalty" purge program, which just as arbitrarily

proscribes working class organizations like the Socialist Workers Party, and victimizes government employees like the legless veteran, James Kutcher, solely because they refuse to endorse the predatory program of U.S. imperialism.

The only thing new about Truman's latest pronouncement is that it shows he would like to be able to extend this view to cover the Republicans as well, even though their differences with him are not over basic questions but over tactics and strategy.

Another significant aspect of the Mc-Carthy-Truman-State Department controversy is the similarity of the methods. employed on both sides. For the McCarthys, anyone who doesn't want to go to war to save Chiang Kai-shek is a Kremlin agent or spy; for the Trumans, anyone who won't go down the line with the State Department's cold war policy is a Kremlin asset. The similarity in the arguments is all the more striking because it is involuntary; the spokesmen of the two capitalist parties want above all to emphasize "differences," especially during an election year.

McCarthy is trying to prove that the Republicans would make more efficient witch-hunters and more thorough policestate administrators than the Democrats. But Truman is making it awfully hard for McCarthy to prove his point.

# Biddle' -- the ADA's 'New Voice'

In an ecstatic editorial entitled "ADA's New Voice," the N. Y. Post on April 3 hailed the election of Francis Biddle as national chairman of Americans for Democratic Action. "Perhaps more than anyone else, he [Biddle] resisted the pressure of the know-nothings and guarded our essential freedoms while the country fought a two-front war. His election to lead America's independent liberal forces for the coming year is a dramatic event in this era of McCarthyism. . . There is a 'Third Force' in America and it has spoken out again at a time when it needed. to be heard. Francis Biddle will give new fervor and integrity to that voice," so said the Post editors.

ordered and carried through the first prosecutions under the Smith Gag Law, railroading to jail 18 leaders of the Socialist Workers Party on the eve of this country's entry into the last war. It was Biddle's "victory" in 1941 that set the precedent for Foley Square and continues to play a prominent role in the unfolding assault on civil rights.

This by no means exhausts the reactionary record of Francis Biddle. Suffice

# WHAT BETHE WROTE **ABOUT THE H-BOMB**

**Page Three** 

Anyone who takes the trouble to read Dr. Hans Bethe's article For over a month an obscure purposes in capitalist politics. ment that can quickly overtake on "The Hydrogen Bomb" in the April Scientific American, even in its censored form, will see that the Atomic Energy Commission ordered the magazine burned for strictly political reasons.

The first part of the article explains the theoretical basis for the new super-bomb. It tells what makes the bomb possible and why its possibilities for annihilation have no foreseeable limits. It is this section of the article, almost half, that the AEC originally rdered struck out in toto.

Understanding the general nature of the H-Bomb, we can apreciate how truthfully Dr. Bethe then describes the effect of an H-Bomb. Even with a bomb limited to "1000 times as much energy as the Hiroshima bomb" - and Dr. Bethe makes clear there is no fixed limit to its potential size - "an H-Bomb would cause almost complete destruction of buildings up to a radius of 10 miles. By the blast effect alone a single bomb could obliterate almost all of Greater New York or Moscow or London or any of the largest cities of the world.'

But this is not all. Even worse, if possible, is the heat effect. At Hiroshima, fatal burns occurred up to 4,000 to 5,000 feet from the center of the A-bomb explosion. But the H-Bomb "would widen the range of fatal heat by a factor of 30; it would burn people to death over a radius of up to 20 miles or more. . . one must visualize what it would mean if, for instance, Chicago with all its suburbs and most of their inhabitants were wiped out in a single flash."

### Moral and Political Implications

In addition, there would be the even more prolonged and wider dispersion of "nuclear radiations" -- which penetrate the body and cause horrible illness and death. The radioactive particles "would be carried by the wind over a large area of the bombed country" and "would contaminate the center of the bombed area for some

The major emphasis of the article, however, is on the moral, soa postcard from a constituent terned with slight variations after cial and political implications of the use of the H-Bomb. Dr. Bethe shows that those who would justify bombing the Soviet Union "are sional election is coming up in the the Red rats out of the State down to Hitler: Make one accusa- adhering to the old fallacy that the ends justify the means" - the very accusation of the capitalist moralists against the Marxists.

"It is argued that it would be better for us to lose our lives than our liberty, and with this view I personally agree. But I bemulative effect of the accusa- lieve this is not the choice facing us here; I believe that in a war fought with hydrogen bombs we would lose not only many lives but

After such a war, presuming there was any human survival at Far East afford the best such is- And it is not an idle fear. For accusation is utilized to make the all, "nothing that resembled present civilization would remain. The fight for mere survival would dominate everything. The destrucand the USSR. . .

### **Political Conclusions Are Inadequate**

Dr. Bethe concludes with an exposition of his views on the prevention of an H-Bomb war. He assumes that if a war comes, it will be due entirely to the actions of the Soviet Union - "I refuse to believe that the U.S. would start a preventive war." He does not understand and ignores the real cause of modern war, the internal contradictions of capitalism and its struggle for world markets, spheres of influence and fields for capital investment.

Hence, he concludes that "the one purpose of our development of the bomb would be to prevent its use" by the Soviet Union, "not pledge not to use it first, which would place the moral onus, as he believes, on the "enemy." Besides, he explains, the U. S. could not be knocked out with one H-Bomb and could speedily retaliate not only with H-Bombs but with its superior stock of A-Bombs.

Dr. Bethe's is no solution at all. But he does give an authentic and reliable description of what H-Bomb war would mean. He does show that any claim that the next war will bring the American people security or more freedom is a myth. And his warning can help arouse the American people to a more urgent search for a fundamental solution to war.

If, as Dr. Bethe points out, the H-Bomb can mean nothing but the wiping out of civilization and the opening of an age darker than anything yet seen, then will not the people be ready to consider any other alternative, however radical? May they not even accept the one alternative to capitalist world-murder - that is, world socialism? That is why the powers-that-be in Washington want to discredit and silence Dr. Bethe, censor any publication that prints iews like his and intimidate the entire American

Who is Francis Biddle?

This "guardian of our essential freedoms" happens to be the same individual who, as wartime Attorney General, compiled the first secret "subversive" list which was to be later promulgated publicly by his successor Tom Clark. Thus during his tenure in office Biddle was instrumental not only in supplying the cover for the current witch-hunt but actually in helping lay the cornerstone for it.

This "voice of new fervor and integrity" happens to be the same individual who

The New Censorship Technique

There is an especially sinister side to the Atomic Energy Commission's censorship of the H-Bomb Article by Dr. Hans Bethe in the April Scientific American. That is the method used to force the magazine to comply with the AEC's demand for burning the uncensored copies.

Under a special law passed by Congress, the AEC has control over all technical data relating to atomic energy. The law provides harsh penalties, even death sentences in certain instances, for revealing AEC secrets and gives the AEC power to enjoin publication to prevent disclosure. These penalties, however, apply only to what is called "classified" information.

Dr. Bethe's article contained no such "classified" information. Aside from intimidation and threats of a "disloyalty" smear, how could the commission enforce its censorship of an article in a private publication that contained "unclassified" information already widely publicized?

I. F. Stone, columnist for the N. Y. Daily Compass, discloses the "hitherto unpublished story." The AEC formally and hastily declared the "unclassified" and already published material in Bethe's article "classified." When asked about this report, the press information office

it to add that early in the war years he demanded that Negroes in the South be restricted from moving into the Northern areas. That was his way of "solving" the racial tensions in cities like Detroit where the Ku Klux elements ran amok because the Negroes rebelled against segregation and discrimination. The most rabid Southern Bourbon would hardly find fault with such a "solution."

In brief, by his whole record and his deeds Biddle has an indisputable claim to recognition of having done more than any other single person, with the exception of Tom Clark, to pave the way for the current witch-hunt and onslaught on civil liberties, which the Post misleadingly label as "the era of McCarthyism."

What made McCarthy possible was Clark, and before him, none other than Biddle.

of the AEC, which admitted the censorship of the Scientific American, gave as its answer: "No comment."

As Stone observes, this "represents a new powerful technique for censorship." Any time Washington wants to suppress an article on the H-Bomb, it picks out a portion of the article and declares it "classified." It can thus censor any article without previously specifying what is "classified" and what is not.

From now on, those who write on this subject and those who publish such writings do so at their own risk. After an article is published, the AEC may slap a "classified" label on it and place author and publication in jeopardy. It will take a courageous publication indeed to write without fear of restraint on any aspect of the H-Bomb, however remote from any actual "secrets" involved in its production.

This is not a measure of "military security." It is aimed at political suppression. Its purpose is to halt any and all discussion of the politics of the H-Bomb, as well as its moral and social implications. In short, it is a move to muzzle any voice that may be raised against the production of the H-Bomb as such and against World War III.

last night at Webster Hall under the auspices of the Eugene V. Debs Society of Brooklyn College, attracted an audience of about 1.000. Many were undoubtedly drawn to this affair in the hope that they would witness on a public platform the clash of the ideas of Trotsky and Stalin on the vital question of the nature of the Soviet Union.

But the Browder - Shachtman debate was a sham. The speakers appeared as political ghosts, leaders of the past and imposters today, without workers parties behind them any longer. This could not fail to reveal itself in the course of their debate and was in fact pointed out in advance in the statement issued by the Socialist Workers Party. This read in part:

### BOTH REPUDIATED

# The Menace of Education

### By Ruth Johnson

William J. Wallin, Chancellor of the New York Board of Regents which establishes educational standards for the state's schools, spoke last week at a dinner in honor of Dwight Eisenhower, the man who graduated from 'the Army to the presidency of Columbia University. Eisenhower had announced that very day the momentous discovery that the United States, with its A-Bombs and H-Bomb production, is pitifully disarmed and helpless against foreign foes. Wallin devoted himself to protecting capitalism on the home front, against the deadly menace — of education.

"In the field of higher education," he warned, "there is a widespread belief and tenet that the government has a duty to provide everyone who desires it an opportunity for higher education, even in the professions.

It isn't just that Wallin is aghast at the prospect of some worker's son or daughter competing for his lush job. It isn't only that he believes the halls of learning should remain restricted to the children of the rich. Behind his contempt for the aspirations of the youth lies terrified recognition that capitalism is in a bad way.

Wallin is unimpressed by Truman's promises of jobs for all at \$12,000 in the year 2,000. He sees today's graduates tramping the streets in the vain search for jobs, and he expects future diploma-holders to face no better prospects.

"We are liable to educate, particularly in the post-graduate area, many more men and women than can earn a living in the field in which they have chosen to be educated, and too often anywhere else," he explains.

Joseph Clark is the new foreign editor of the

Daily Worker, more accurately he is their Tito-

baiting specialist. The grapevine has it that Clark

replaced Joseph Starobin because of the latter's

ineptitude or remissness in dealing with Yugo-

Since assuming his duties, Clark has pulled

point of view."

anti-Yugoslav propaganda.

You might expect him to propose more schools to use the new teachers, more hospitals to use the new doctors, more laboratories to employ the knowledge, training and genius of budding scientists. Not Wallin. He is perfectly content to see millions of jobless; all he wants is to keep them submissive.

"We shall find that, embittered with their frustration, these surplus graduates will turn upon society and the government." he says. What base ingratituude, to demand that they have a chance to use their education in the service of mankind!

Alas, even that is not the worst. The disinherited youth will do more than protest; they will use all their training and intelligence to seek a better way. The jobless graduates, Wallin fumes, "will be more effective and better armed in their destructive wrath by the education we have given them."

It's instructive to hear the eminent Chancellor admit that only an illiterate ignoramus will keep on supporting the system of wars and depressions. We might 'add that many a social ignoramus wears the collegiate cap and gown.

Wallin ought to know that tyrants throughout history have ranted against education for the masses, for more or less the same reasons he gives. He ought to know they failed. From the days of the slave revolts in the Roman Empire down to our own times, the people have given a fitting answer to rulers who were sure that ignorance is bliss.

bosom.'

**A Lie That Boomerangs** 

By Fred Hart

ite spies."

How the Kremlin exploits Rumania's industry and natural resources through the medium of "mixed companies" was exposed in a detailed article on March 19 by the Serbian periodical Glas.

The field of transportation is dominated by three "mixed commissions": Tars for air transport; Rata for the traction networks; and Sovroum for the Danubian shipping system. The manner in which these bodies are constituted is illustrated by the Sovroum where "the Rumanians have furnished all the ships and all the shipyards, so that no vessels whatever remain at their own disposal, while on the Soviet side all that was furnished were ships seized as war booty by the Soviet troops.' Analyzing the oil industry, the most important sector of Rumania's economy, Glas points out that the mixed company Sovroum-Petrole controls the entire oil output. In the hands of the Rumanians themselves are only two companies Muntenia and Petrol-export and these cannot export oil except by Moscow's authorization. The country's metallurgical industry is likewise under the Kremlin's thumb. Sovroum-Metal has taken over Rechitsa, the largest and most important metallurgical combine in the country. Prior to the war this combine was held jointly by the Rumanian government and a Jewish capitalist. During the war the Hitler regime seized the

stock held by the Jew and then Moscow confiscated it as "German property."

and that attacks on any segment "A whole number of other mixed companies for of the working class threaten the the exploitation of Rumania," writes Glas, "have been formed by the Soviet Union on the same the attainment of the socialist movement for human freedom and basis. There is the mixed company Sovroum-Tracteurs, to which the promised deliveries of Soviet goal.
