Belgian Workers Rise, Kick Out **Fascist Monarch**

By Charles Hanley

Vol. XIV - No. 32 After two days and nights of hectic "negotiations" and mounting mass upsurge which brought Belgium into a state of civil war, King Leopold, who had twice reneged, was finally compelled to accept a face-saving compromise which removes him from the throne and "delegates his powers" to his younger son Baudouin.

Whether or not the revolutionary crisis in Belgium has thereby been fully resolved still remains to be seen. But it is unquestionable that the insurgent workers of Belgium have scored a great who they say provoked the "delayvictory and will be inclined to ed explosion." "The problem

will spread, even open clashes are not excluded. For Belgian labor knows what is at stake and will not sleep while its enemies take over." Events have more than confirmed this.

The workers were determined to force the abdication of the notoriously pro-fasc st Leopold III, the King of the big capitalists and of the Catholic Church. But this was not the only thing they demanded. Tied up indissolubly with the "royal question" are th workers' demands for improved living and working conditions.

AFL Top Leader Declares For Unconditional Surrender

The pro-imperialist union leaders are preparing to duplicate their surrender of labor's rights during the last war. That was again made plain when George Meany, Sec-

Meany told to the New York State Federation of Labor convention on July 31. He promptly ended all speculation on the matter. "I haven't any doubt at all,"

he said. "that labor will give a no-strike pledge when the time comes."

He added that such a pledge to surrender labor's most effective defensive weapon - the strike would be "unconditional."

1950 Election Platform of Socialist Workers Party

printed in full below, was adopted by unanimous vote by the delegates to the SWP National Legislative Convention held on July 14 at New York City:

A great fear haunts America — the fear that we may be plunged into another world war that can mean atomic annihilation. This is the direct result of Truman's intervention in Korea.

But this is not the only fear in America. The American people are afraid of insecurity; and they are afraid to speak their mind.

of the promised freedom of speech, freedom from want and freedom from fear, the American people got a savage drive against civil liberties, the threat of insecurity and an undeclared war on the mainland of Asia.

This is the reality of 1950.

American imperialism is playing for high stakes, nothing less than domination of the entire earth. Already the cold war has flared into a shooting war and American boys are again dying on foreign battlefields.

Never before have the American people felt so uneasy. Yet the free expression of their doubts and criticisms has been blocked by a monstrous drive against civil liberties. Under the guise of checking the "loyalty" of government employees, the Truman administration has imposed witch-hunts, red scares and purges that have gone far toward establishing in America the stifling political atmosphere of the police state. Now intervention in Korea has pro- more than 15,000,000 members do not have a single representative

They want no part of a deal leaving them in a totalilabor, in howling for more scalps in the "loyalty" purge, and in tarian straitjacket. shouting for deeper involvement in Korea and the rest of the Fan East.

These Democratic and Republican political twins of Big Business would already have been kicked out of office by the working men and women if it were not for the top union leaders. In 1948 these union officials apologized for the Democrats, backed their lying campaign promises, solicited votes for them, contributed union funds to their war chests and opposed formation of labor's own political party. in the "ideal welfare state" envisaged by the

and World Report.

This magazine of Big Busines describes the real motive force for war inherent in American capitalism: "America has the biggest production machine the world has ever known. That machine can produce more goods than the American people can consume, even allowing for an increase in population each year and increased demands for goods resulting therefrom. Even with an armament economy, there is a surplus of goods in producing countries like the United States."

America's capitalists, driven to mad desperation by the hopeless impasse of their system, can see no other way to their salvation but a war of world conquest. They hope to salvage their system by forcing the whole world into Wall Street's vassalage, destroying or subjugating all competitors and draining tribute from every part of the globe.

The function of Truman's "welfare state" is to prepare the American people for the war that conitalism plans because it cannot keep itself going "even with an armaments economy."

Truman revealed the ultimate perspective of his "welfare state" when he ordered the development of the H-Bomb - the Hell-Bomb a thousand times more powerful than the A-Bomb that wiped out Hiroshima in a single blast.

Even if American civilization could survive an H-Bomb war - which the leading atomic scientists say is unlikely -- "victory" would not usher

TROTSKY

"The coercive imperialism of advanced nations is able to exist only because backward nations, oppressed nationalities, colonial and semi-colonial countries remain on our planet. The struggle of the oppressed peoples for national unification and national independence is doubly progressive because, on the one side, this prepares more favorable conditions for their own development while, on the other side, this deals blows to imperialism. That, in particular, is the reason why in the struggle between a civilized, imperialist democratic republic and a backward, barbaric monarchy in a colonial country, the socialists are completely on the side of the oppressed country notwithstanding its monarchy and against the oppressor country notwithstanding its 'democracy.' LENIN

Franco and the Labor Leaders

By a vote of 65 to 15 the Senate last Tuesday voted a \$100,000,000 loan to Generalissimo Franco, the butcher of the Spanish workers and peasants who was lifted to power by Hitler and Mussolini.

The Truman Democrats, with a handful of exceptions, voted for the gift to the blood-soaked dictator in Madrid. It was a brazen action but it called forth few apologies because it is entirely consistent with the reactionary world policy of the ruling party on Capitol Hill. But an explanation is due from the Big Brass of the Labor movement who put these Truman Democrats in office as defenders of the "democratic way of life" and enemies of totalitarianism "both of the left and the right.'

Up to now the labor leaders have been able to escape the odium of Truman's backing of corrupt despots in the Orient like Syngman Rhee, Chiang Kai-shek and Bao Dai. Their records are not too well known among the American people who do not yet clearly comprehend the driving force behind the revolution in Asia.

But the American workers know Franco — and hate him. They were on the Loyalist side during the civil war in Spain in the Thirties. They saw how Franco crushed democracy, smashed the trade unions, murdered and jailed working class militants by the tens of thousands

Stop the Gangsters!

Physical assaults on union members in auto plants have already reached the stage where not only the auto workers but the entire organized labor movement must act to avert the grave threat inherent in this spreading campaign of terror and gangsterism.

The most recent attack occurred last week at the GM assembly plant at Linden. N. J., where two unionists were mauled in order to establish his totalitarian regime. After the defeat of the axis powers in the war, in the minds of American workers Franco's name replaced that of Hitler as the synonym for Fascism.

The Murrays, Greens, Reuthers and Dubinskys have much to answer and evasion won't do so well this time. Let them explain how at the very moment the socalled war against totalitarianism enters the shooting stage, the Truman Democrats are drawn like flies to the totalitarian cesspool in Madrid. If Fascism is worth \$100 million to the Truman Democrats in Spain why is it not worth five times that much in France or Italy and ten times that much in England? If "labor's friends" can help fasten police-state chains on Spanish workers, why should they worry about such trifles as the Taft-Hartley Law? Does "CIO Policy" now include support to the friends and benefactors of Franco on election day?

Labor has no business being in the same camp and the same party with the supporters of the international firm of strikebreakers, union-busters and open shoppers headed by Franco. It had better get out of the trap now — with or without the spineless leaders who led them there — before Franco's Democratic admirers begin to adapt the Spanish prison suit for American workers.

practice of gangsterism becomes intrenched. Corporation vigilante squads like the notorious Ford servicemen, hired sluggers and killers, and "security police" will then be able to cut the union to ribbons, pick off the union militants one by one at their leisure and bring back the vicious evils of the open shop days. The gangster attacks strike at the very existence of the trade union movement.

THE STIRRING TALE **OF WARSAW GHETTO**

By Paul Schapiro

THE WALL by John Hersey, Alfred A. Knopf, 1950.

The Wall, John Hersey's novel of the Nazi systematic extermination of the Warsaw Jews, is remarkable in more ways than one. With what must have been a tremendous amount of historical research and an artist's imagination, Hersey so entered into the life of the Warsaw Jews that he has been able to reconstruct in the pages of his book a civilization that has been wiped out.

But he has done more than this. He has not only depicted the ife of the ghetto with an authenticity that bears immediate conviction; he has depicted the human reactions of a trapped people being butchered off from day to day in such a manner that we exclaim, 'Yes, this is how it must have been."

The novel is presented as a diary kept for posterity by Noach Levinson, an intellectual whose passion was the observation of people. By using this fiction Hersey is able to give the effect of brilliant on-the-spot reporting by an observer with a keen eye for detail. At the same time Hersey shapes the fictitious jottings into artistic form.

We have not only a series of dramatic stories but a powerfully blocked-out novel which conveys the change in the atmosphere of living: from the deceptive tranquillity of the early April days, with their hope that things will not be too bad intermittently disturbed by fitful lightning flashes in the distance, to the terror in the midst of the steadily darkening storm, to the exalted heroism of the struggle in the very teeth of destruction.

Cross-Section of Those Who Perished

In addition to the general picture of the agony of a people, we have also a close-up view of a small group of persons — a view which is, however, restricted to the members of the upper middle class, the officials and the top leaders of the political organizations among whom Levinson lives and works - and the way the character of each takes form in the fiery crucible.

By using Levinson, with his tart humor and his determination not to let himself be carried away by emotion, Hersey is also enabled to keep a certain distance from his material and escape being overwhelmed by its horror. He can also show the course of events is they appeared to the eyes of one of the ghetto inhabitants, who shared the ignorance of the others concerning the plans of the Nazis.

For the reader, who knows in advance that the Jewish population of Warsaw is to be decimated, the blindness of the Jews who built the wall around the ghetto, not realizing that they were to be locked within its gates and slaughtered off, and who volunteered for resettlement in the East, not realizing that they were being in reality taken to the gas chambers to be killed, is bitterly ironic.

At first, after the coming of the Nazis, the Warsaw Jews convinced themselves that life would go on more or less as usual, with perhaps a few more restrictions. The restrictions come - piecemeal. Each restriction hits a different group, and when that group raises a cry, the rest exclaim, "Quiet! You are endangering the rest of us."

So too the wall which is to enclose them is constructed in sections until it is finally completed and the Jews are trapped within it as cattle within a corral. The first to leave for "resettlement in the East" are tricked, then the weakest and most defenceless are herded out and then a system of round-ups of those who are not exempted for one reason or another is instituted. As every one tries to get into the exempt groups, the number of exemptions is progressively lowered.

Degradation and Heroism

Under these conditions, people live from day to day, trying to snatch what morsel of life they can. A bench in the sun is rented out by the hour. A bony, old horse barely able to stand, bought on the black market and slaughtered secretly, furnishes a banquet. In the lin can only discredit those who struggle to survive, human beings become bestialized. Jews join the auxiliary police, getting special privileges in return for doing some fictions about Stalinism. The of the Nazis' dirty work. Young men ask their parents to volunteer workers, guided by a revolu- for "resettlement" in order that they and their wives may not have to go themselves.

> But if the worst in human nature is brought out by these horrible experiences, so is the best. Doleck Berson, the vague esthete and aimless drifter, and Rachel Apt, the daughter of the wealthy merchant, become disciplined and molded into leaders of the Jewish fighting organization. If there is the degradation of the auxiliary police, there is also the heroism of the fighters, which mitigates the

and beaten. Similar assaults had been previously reported in one auto plant in California and another in Wisconsin.

In each case the assaults have been staged under the cover of red-baiting and "patriotism." The victims turned out to be veteran unionists and in many instances were themselves war veterans. The perpetrators of the attacks have been described in press reports as "new workers.

Among the most sinister features of the assaults has been the identity of the instigators and organizers. The leader of the California outrage has been identified as a railroad detective. The ringleader of the New Jersey mob attack is a former plant policeman.

That such sinister anti-union elements come to the fore in these gangster attacks can hardly be regarded as a mere coincidence. Every experienced union militant knows what a field day there will be for the labor-hating corporations once the

The Real Role of the UN

The conflict over the seating of the Mao Tse-tung government of China in the United Nations further exposes the true nature and function of the UN as an instrument of American imperialism and a cover-up for its war aims and activities.

Can anyone doubt that the Mao regime, by all the standards of the UN itself, is the real government of China and that the Chiang Kai-shek clique is only a shadow without substance?

Whatever the motives and game of Stalin's representative Malik in the UN controversy, the fact remains that the Mao regime is a million times more entitled to seating than the gang which the Chinese people kicked out of their country and which survives in its island hole by virtue of American warships and bombers.

It is no secret that almost every other country was ready to seat the Mao government but that the opposition of Washington alone stopped it. But there are not a few countries whose present governments are military dictatorships founded by coup d'etats — including

Alarmed at the trend they themselves helped set into motion by redbaiting and purges, UAW leaders have issued public "rebukes" against the spread of mob violence in the plants. The UAW Assistant Director for GM is reported en route to Linden, N. J., for a special meeting "to warn the workers against taking violent action against those with whom they disagree."

Such "rebukes" and "warnings" will have no more effect on the union-wrecking mobsters and their inspirers higher up than a slap on the wrist. What is needed is the sharpest disciplinary measures the union can invoke, combined with economic action to force the corporations to stop victimizing and mutilating militant unionists. Those leaders who temporize with this alarming development for their own personal bureaucratic ends play directly into the hands of the bitterest enemies of labor and must be branded as their accomplices.

some in South America - whom Washington readily okayed and which were promptly seated in the UN.

These facts alone suffice to show that the UN is not some "impartial" agency for "peace." It never was and never will be. It is an agency for the diplomatic maneuvers of the great powers and dominated overwhelmingly by the greatest power of all, Wall Street imperialism. Washington cracks the whip to which all the other bankrupt and shaky capitalist regimes must jump.

One of the greatest crimes of Stalinism is to have represented — and to continue today to represent — the UN as a "peace" agency. The UN is what we have declared it to be from the beginning - a tool designed by U.S. imperialism to provide "international sanction" for its planned conquest and domination of the globe.

The UN did the exact job for which it. was set up when it rushed to unfurl its banner over Truman's undeclared war in Korea and to cloak American imperialist intervention with "international sanction."

The conclusion of the novel, in which the Jewish fighters are killed fighting valiantly and forty-two of them escape, is marred y a certain confusion. The forty-two are sitting with their knees lrawn up in a sewer-pipe underneath a man-hole to which they had vearily crawled through the filth and corpses of the long stretches of tunnel, waiting for the trucks that were to bring them to freedom which may never come. As they wait, doubled-over, chilled with dampness and dry-tongued with thirst, the sewer becomes a kind of limbo in which they are squatting outside of time.

A Colorful But Not Illuminating Summary

In this limbo they discuss their most intimate thoughts with Levinson. Each, indirectly answering the question what has made his life worth living, reveals that his view of life has somewhat changed as the result of what he has gone through. The sum total of what they have to say seems to be Hersey's own summation of the lessons to be learned from their purgatorial experience.

Zilberzweig, the Zionist leader, tells Levinson that he has come to see that extreme nationalism can be as frightful in a Jew as in a German but that he remains a Zionist. Rapaport, the leader of the Bund, the Jewish Socialist party, is portrayed by Hersey as a sectarian bound by formulas who had refused to join in a united front with other Jewish political parties. He declaims that he was relying on support from the Polish Socialist party, only to find that it was lacking in genuine internationalism, says that a political leader must learn to doubt his faith but to fight for it nevertheless and to bring human understanding into politics. Rachel Apt has come to believe that the killing of any one, even Nazis, is wrong under all circumstances.

The thinking of Zilberzweig and Rapaport is lacking in clarity. but it is not inconsistent with their characters. Rachel's words, however, are not only false in themselves but are given to her without explanation: the reader cannot imagine why this staunch commander has come to believe that the combat in which she was a participant was wrong. Nevertheless, while the muddled pacifist, pseudo-humanist conclusion is an important defect, The Wall remains a noble monument to the memory of an oppressed people and of its brave fighters, victims of the most hideous barbarism produced by dying capitalism.

Jim Crow Marches On

By Jean Blake

Commenting editorially last week on the first instalment of "Jim Crow Ends in Korea," an article in the Social-Democratic New Leader of July 22 by Lester Granger, The Militant called attention to the new evidence of the Jim Crow attitude and actions of the U.S. military forces toward the Koreans, whom they refer to as "gooks."

Granger's second article, in the July 29 New Leader, retains as its title the blatantly false statement, "Jim Crow Ends in Korea," but concludes on a much less confident note:

"...crass and hampering discrimination based upon race can be stopped, overnight, as soon as top authority makes up its mind and lets lower authority know it," Granger writes. "The fighting in Korea will tell us, if we can keep well enough informed, how that mind-set develops."

Information for Granger and others who express illusions, honestly or not, about "how that mind-set develops" came from the National Association for the Advancement of Colored People last week.

Roy Wilkins, NAACP administrator, in a letter addressed to Army Secretary Frank Pace, Jr., demanded an immediate investigation of "the manner in which Negro troops are treated in Tokyo and the elimination of the racial discrimination so persistently reported."

The Negro troops in Tokyo, incidentally, included the Jim-Crowed all-Negro 24th Infantry regiment which figured prominently in the news as the group responsible for the "first sizable American ground victory in the Korean war," as the Negro press reported.

Wilkins' request for an investigation included the following quotation from a letter received from an informant in Tokyo:

"The American public ought to know that racial discrimination here is as flagrant as it is in

Georgia. And if the occupation is doing anything | VOLUME XIV successfully in Japan, it is successfully indoctrinating the Japanese with the 'American way of life' which excludes full freedom of anything to many people, especially Negroes." .

Japanese clerks have been taught by the Army to give priority to "a white face." He also referred to a report that General Walter Leo Weible had issued an order restricting Negro personnel.in the Army units to one of four swimming pools controlled by the soccupation forces.

These may seem minor details to Granger, of The President's Committee on Equality of Teatment and Opportunity in the Armed Services, and to George S. Schuyler of the Pittsburgh Courier, who hails the Korean war as "the first war U.S. Negroes have entered on a non-segre gated basis since the War for Independence."

But to the millions of American Negroes who live under Jim Crow conditions, civilian and mili-tary, they are very important. No billion-dollar Proposed Pact "truth" propaganda campaign by American imperialism aimed at covering up the ugly facts about suppression of colored people is worth two large membership meeting cents so long as the dominant condition of existence for the mass of Negroes is as victims of discrimination and segregation.

Granger need not wait for information from Korea to find out whether Jim Crow has ended. He can look to news like the item from Wash ington, D.C., dated July 27:

"Fifteen young Negro and white persons who sought service in a Washington cafeteria were today sentenced by Judge Thomas D. Quinn to pay a fine of \$25 each or serve 10 days in jail the more than 1,000 workers who on a charge of disorderly conduct. In imposing attended rejected the combined this sentence, Judge Quinn accused the young people of taking the law into their own hands, which, he said, they had no right to do."

turn with every wind from Moscow - yet they always point away from socialism.

If the future depended on these parties it would indeed be dark. However, the forces working toward a better world are far more powerful than any of these political formations.

Capitalism has created not only the monstrous monopolies; it has also brought into being the working class, tens of millions of people with great technical skills, long traditions of democracy and social equality, and accustomed to expect a decent standard of living. This working class has already shown its tremendous capabilities by organizing the CIO and extending industrial unionism into the heart of American basic industries.

The workers are becoming increasingly aware of capitalist waste and plunder in the use of our resources. They are beginning to see through the warmongering and are alarmed over American intervention in Korea. They resent the capitalist cheating of the people through inflation. They find the witchhunt highly distasteful. Taft-Hartleyism has taught them that the 60 richest families of the United States, like their counterparts abroad, will abandon democracy for fascism at any serious challenge to their profits, privileges and power.

Far from seeing an end to segregation, the Negro people saw famy of a Jim Crow army to every quarter of the globe and today they watch Truman's cynical maneuvering with their demands for equality.
