Richardson is a Republican and a former assistant attorney general in the Hoover administration. More recently he has served as chairman of the Loyalty Review Board, in charge of the Truman

"loyalty" purge of government employees which set the pattern and paved the way for the Mc-Carran-Kilgore law. In that post Richardson repeatedly refused to uphold challenges by any of the purge victims of the Attorney General's arbitrary "subversive" list, which he accepted as gospel.

Brown is a lawyer, a special assistant to Attorney General Mc-Grath, and a Democrat. Coddaire is a lawyer too, a former member of the Maritime Commission and a Republican. Under the government "loyalty" purge, the Attorney General could and did put organizations on his "subversive" list without even notifying them beforehand, let alone give them the opportunity to know what the specific charges were and to answer them.

Under the new law, the Attorney General is supposed to prove his contentions at an open hearing, and the accused organizations will have a chance to answer him before the board formally hands down its decision. The capitalist politicians have big schemes on tap for tightening the screws on American labor, slashing living standards, hiking taxes, boosting the arms budget, regimenting the nation. Only one thing gives them pause. They are fearful how the people will take it.

Arrogant and disdainful of the people's will as they are, they district court ruling of Oct. 21 still do not dare to go too far and too fast. And that's why they barring her name from the attach such importance to the coming elections.

While both Big Business parties, Democratic and Republican, claim they will be victorious, privately their spokesmen admit that they really don't know what the voters think and how they will act on election day.

They are watching this election for a sign of the people's reaction particularly to the Korean "police action" and the measures passed by Congress since June — the immense expansion of the military program that has sent prices soaring; the drastic increase in income taxes; the restrictions on credit; the crippling of the housing program; the McCarran-Kilgore police-state law to suppress political opposition.

If the results on Nov. 7 indicate that the people will passively submit to these measures against their living standards and liberties, then the capitalists and their political agents will be emboldened to speed up the tempo of their war mobilization program. If the vote indicates apathy, docility or support of the war program, they will feel safe in taking the next steps - still heavier taxes, wage-freezing, curbing of strikes, etc.

But if the vote demonstrates growing opposition, resistance to Prussianization of the country's economic and political life, antagonism toward the war drive, then the capitalist politicians will be under pressure to adopt a slower, more cautious policy.

There is no mass anti-capitalist and anti-war party through which the people can express this opposition. But the ballot is not closed to them. In a number of states throughout the country they can make their voices heard by voting the ticket of the Socialist Workers Party.

No one will mistake a large vote for the SWP candidates as

THE BURNS CASE

Under direction of President Buchanan, federal authorities in Boston tried and sent Anthony Burns back to slavery. To do this the city had to be placed almost in a state of siege. Federal troops, marines and 22 companies of the state militia were needed to move the prisoner from the courthouse te a government vessel. He had to be returned by sea, since moving him overland was impossible against an aroused public. Troops held back 50,000 onlookers as Burns - surrounded by a guard with drawn sabers --- was marched to the pier. "In so far as the proletariat proves incapable at a given stage of conquering power, imperialism begins regulating economic life with its own methods; the fascist party which becomes the state power is the political mechanism. The productive forces are in irreconcilable contradiction not only with private property but also with national state boundaries. Imperialism is the very expression of this contradiction. Imperialist capitalism seeks to solve this contradiction through an extension of boundaries, seizure of new territories, and so on. The totalitarian state, subjecting all aspects of economic, political and cultural life to finance capital, is the instrument for creating a super-nationalist state, an imperialist empire; the rule over continents, the rule over the whole

## The War in Indo-China

Amid celebrations of military victory in Korea, the capitalist press has started playing up another "crisis" in Asia this time in Indo-China.

world.

For more than four years the French overlords have waged with little success a major war to keep the Indo-Chinese people as their colonial slaves. Financially the war has been so costly that Paris could never have carried it on without the Marshall aid funds. On top of the large-scale military aid already extended to the French colonial despots, the Truman administration now proposes to add additional hundreds of millions of dollars.

The Indo-Chinese military forces are today actually stronger than they were at the outset of the hostilities. They have grown so powerful that they have been able to rout the strong French garrisons along a 200 mile front, in one case wiping out an entire column of 3,500.

The French who had only a short while ago confidently expected to mount an offensive in this same area are continuing their withdrawals, according to the latest dispatches.

In Indo-China there is no mass support whatever either for the French or their puppet, the former Emperor Bao Dai.

## FEPC and "Moral Positions"

Senator Lehman (D, N.Y.) has asked President Truman to issue an executive order, similar to Roosevelt's FEPC order of 1941, providing that "all defense contracts must contain a clause barring discrimination in employment under such contracts.'

"Such action would, of course, be no substitute for the enactment of federal legislation. . . requiring fair employment practices in all employment" but would be taken "while we continue to work for this legislation," Lehman wrote Truman.

An executive order applying to some industries would certainly not be the same as a federal law covering all industries, but despite Lehman's pious promise about "continuing" to work for such a law, it would in fact be a "substitute" ---the Democratic Party's substitute for the FEPC law they promised to enact if elected. Lehman and Truman won't admit it publicly, especially on the eve of an election, but they know, just as millions of Americans have found out in practice, that neither their party nor the Republican Party nor both of them together is able to get Congress to enact a bill outlawing discrimination in employment. To

Ironically enough, the French are hated even by some of their own puppets. This was strikingly revealed two weeks ago when Tran Van Huur, Premier of the Bao Dai cabinet, bitterly criticized the "French attitude" and demanded "independence for Vietnam and equality in its relations with France."

So tenuous has the French position become in Indo-China that reports have emanated even from Paris of trying to unload the whole mess into Washington's hands. Needless to say, this is intended primarily to get more military supplies and even American troops. But it nevertheless underscores the fact that left to their own resources, the French would unquestionably be thrown out of Indo-China, as, indeed, they should be.

The Indo-Chinese have every right to be free and independent and to live under a government of their own choosing. The Truman administration is determined to deny them this right.

No subterfuges, no demagogic pretenses can obscure either the issues or the ruthless role of American imperialism in the case of Indo-China. Here it stands nakedly as the backer of colonial slavery.

do so would require a genuine struggle with the Southern ruling class, and not the kind of mock battles they wage pe-India? riodically in Congress — and neither capitalist party is willing to engage in such a struggle, especially in "times of crisis" like the present.

Viewed properly, Lehman's plea is an admission to the Negro people and all other opponents of job discrimination: The best you can expect from capitalism is a temporary executive order, which will apply only to part of industry, and which you can expect to be hastily withdrawn as soon as the "crisis" is over, 1 of high - explosive and jellied of opinion." ust as was done with Roosevelt's FEPC

## Clothes Make Man Stalin Perpetrates Another Betrayal Picks Town Rulers Of a National Independence Struggle

#### By Paul G. Stevens

To the black role of Stalin's betrayals of the world's workers and peasants must now be added the tragic case qualify are those who wear the of Korea. The independence fighters of that Asian peninsula share the fate of the heroic

This alone is sufficient to show that behind the push of exploitation with their eyes the North Korean armies was the enthusiasm of the people for the revolutionary social aims and their desire to win independence

from all foreign imperialism. What finally subdued these independence armies was a combination of a frontal assault by the full force of U. S. militarism under the camouflage of the United Nations and a stab in the back by the treacherous bureaucracy in Moscow. How else is it possible to account for the failure of Moscow to supply the North Korean regime, which it allegedly backed, with the most elementary essential of modern warfare, ar air force? The imperialists and cheir press are at a loss to explain this in all their speculations. For their whole propaganda was attuned to spreading the lie that the struggle of the Korean people was being purely and simply manipulated by Moscow.

#### DELIBERATE POLICY

It may be claimed that the Kremlin did not want to risk a full-scale "hot war" by sending in its own air force. But how explain the fact that, while the Russians supplied hundreds of tanks to be manned by the Koreans they did not supply enough aircraft to give the Koreans "a squadron or two" --- sufficient. according to the experts, to win the war? It hardly makes sense to claim that Russian planes manned by Koreans would provoke a world war while Russian tanks used in the same way would not - or that Koreans could not be trained to operate planes but

only tanks, as some speculate. No, the failure to supply the Koreans with any kind of an air arm was deliberate policy on the part of the Kremlin, and it was motivated not by fear of how Washington might react, but by fear of an independent victory of the Koreans over imperialism, such as attained by the Yugo-

slavs in Europe and by the Chinese in Asia previously. It is no secret that Stalin hates revolutionary Yugoslavia more fiercely and attacks it more viciously than any capitalist country. It is no secret that Stalin is uneasy over his future relations with Mao's China. The very force of the initial sweep of the Koreans under Kim Il Sung now universally acknowledged as undertaken exclusively by Korean troops and under Korean ·ommanders - showed that Stalin had cause to fear an independent, revolutionary force there too. a force rooted in social upheaval, as is evident from all reports. Rather than aid an independent Korea 10 vietery ever imperialism the Statuist bureaveracy in Moscow looked on while the B-29s systematically destroyed the industrial potential of the country, while Allied battleships wiped out the coastal defenses, while Mac-Arthur's jet - propelled fighter planes. "the last word in combat aircraft," blasted the oxcarts used by the Koreans for transport finally, while the flower of Korea's young revolutionary manhood was cut to pieces. To be sure, Stalin wanted a victorious Korea — but one in which he would control the air bases, in which his secret police would hold the political life of the country in its grip. A victory achieved by an independent Korean people was as much anathema policy is to follow a more cautious to him as to the imperialists. That is why the Koreans got no air force.

In explaining his request, Lehman added: "In addition, such action would certainly strengthen our moral positions among all the peoples of the world." That, along with the desire for re-election, is a motive for the request, but we doubt that it would have the result intended. Why should the peoples of the world have any higher regard for the morals of American imperialism when they learn that it is willing to take limited measures against discrimination in employment only during periods of "crisis" but refuses to do so in "normal" times?

## 'Phone, Don't Write'

#### By Larissa Reed

The stink-bomb exploded by Lt. Governor Hanley's letter, revealing how Governor Dewey bribed him to check out as a competitor in the New York election, has fouled up not only the Republican Party's campaign, but the editorial offices of the paid press. True, a vellow journal like the Mirror isn't as embarrassed as the "highclass" papers. It simply doubles in brass behind the brazen deal in buying and selling public office contending that all the "purloined letter" proves is that poor old Joe Hanley is really an "honest" man at heart, who only made the mistake of spilling his guts on paper. He's "old enough to know better," the Mirror rebukes him, and W. Kingsland Macy (to whom the letter was sent) "is old enough not to chirp." In gangster-like words, the Mirror reproaches the political conspirators for a clumsy job of concealment, not to speak of the fact that there was insufficient honor among thieves.

But the scandal is very embarrassing for the N. Y. Times, which poses as a defender of truth, justice, and good clean government. Like the yellow journalists, the Times editors, too, say in essence that it isn't the crime against the public that is so bad, but that the public was let in on the crime. "The writing of the letter was a ghastly mistake," it states, emphasizing its rebuke to the conspirators that "politicians should telephone and not write." Then the "independent" Times, like the die - hard Republican Herald-Tribune, makes 'a tear-jerking apology about the personal "tragedy" of poor old honest Hanley, who was only trying to provide for himself and his family and pay his debts.

In case this pill isn't swallowed by the mass of underpaid workers who have to provide for their families and pay their debts the hard way, both of these "high-class" papers make a "high-class" political appeal. The Herald-Tribune enjoins its readers to regard this public outrage as only "an incident in a race run for large ends." The Times adds that it will "have to be weighed on the realistic scale of practical politics." "Large ends" and "practical politics" is the double-talk of capitalist newspapers to cover up the crimes of capitalist politicians.

But the Times, understanding that a major scandal of this type can be injurious to both capitalist parties, warns its "Democratic friends"

to refrain from showing too much "political glee." It states correctly, "The Democrats, now firing shots from a glass house, have always taken care of 'Joe' under an endless variety of names and circumstances."

the dilemma of the unhappy liberal N. Y. Post. 'Where are the voices of civic virtue?" it grieves. The press is supposed to be "the conscience of the country." Yet in this awful scandal "the cover-up has begun," with even the lofty Times Democratic. The "impeccable Mr. Dewey has been caught buying off a man" - and yet the Times' 'devotion to Dewey is unaltered."

But the real pitch of this paper is revealed in Dr. Frank Kingdon's column. Kingdon wails in the name of "civic virtue" that "even the most dire politician on the other side" cannot "be happy about this debacle. . . It smears our whole public life. . . encourages public cynicism." His own contribution against such cynicism is an appeal to his readers to "renew" their "faith" - in the same parties pointing their filth-smeared fingers at each other.

This pre-election Republican Party scandal is competing for headlines with a Democratic Party scandal. It's generally at election time that the capitalist political thieves have a falling out, and the voting public gets a peek behind the scenes. But in the Democratic Party scandal, which reveals the close links and millions of dollars in bribetransactions between capitalist office-holders and the gangster underworld, Mayor O'Dwyer had the good sense to take it on the lam before it broke. He didn't write any incriminating letters, or receive any, or reveal, or have revealed, any of the crooked deals of his party. O'Dwyer knew how to telephone. So while "poor old Hanley" is in the doghouse and broke, O'Dwyer has cashed in on a big-paying job far removed from the New York electoral hotseat.

The reproaches of the capitalist newspapers against their politicians are fully deserved. There should be more honor among thieves - not to speak of more caution. If only to spare these press hirelings such acute embarrassment.

## **Prices and Personnel** By Fred Hart

Truman denied at his Oct. 19 press conference that political considerations were responsible for his failure to impose wage and price controls. The reason, he said, was the government's inability to get "qualified men to take necessary posts" because they do not want "to submit themselves to character assassination and to allow their private lives to be hung on a clothesline."

Spokesmen at the National Security Resources Board amplified his statement. They said that "the industrial and business woods had been combed time and again since the passage of the National Defense Production Act, but no man of standing had indicated a willingness to take the unpopular post of Price Administrator." (N. Y. Times, Oct. 20.)

Despite Truman's explanation, it is hard to believe that political considerations are not involved. To impose a wage freeze now, when most workers have not yet received raises to compensate for the price rises since June, would unquestionably antagonize the labor movement and cost votes on Nov. 7.

Price control, on the other hand, while in great

administrator must come from the same circles to be considered as "qualified." When union leaders tell their members to vote

Democratic on Nov. 7, the members ought to ask them to explain why, if the Democratic administration really is the "friend of labor" that the union leaders claim it to be, it doesn't seem to think of finding a union man to take the job of price administrator.

Actually, of course, it doesn't matter much one way or another who gets the post of price administrator - it will still be run, as Truman's explanation indicated, along lines acceptable to the capitalist class, that is, more or less like the wartime OPA.

That kind of price control the workers and consumers could well dispense with. It may formally keep prices within certain restraints but it dccsn't protect the housewife against the black market or deteriorat on in quality of commodities false. I am running as a worker ing an anti-noise ordinance when and it doesn't stop profiteering. In short, it doesn't safeguard living standards against price rises.

In fact, as the experience during World War II proved, for a capitalist government price control is primarily a pretext for wage controls.

Nevertheless, there are some important conclusions to be drawn from Truman's explanation. One is that the administration, characteristically enough, turns first of all, if not exclusively, to the circles of "industry and business" to staff the key jobs in its war mobilization program.

W. Stuart Symington, head of the NSRB, is a corporation executive. So is William H. Harrison, head of the National Production Authority.
