"When Are We Getting **Out of Korea?" GIs Ask**

Whole World Outraged by **Atomic Threat**

By Art Preis

Horror and revulsion swept the world at Truman's cold-blooded threat that he is "actively considering" use of the atomic bomb in Korea and Manchuria "if necessary."

His announcement brought nome to everyone the terrible immediacy of the danger of world war and evoked a mass cry of outrage. The reaction in Western Europe and Asia was so spontaneous, prompt and overwhelming that for the moment Washington was thrown back on its heels.

In response to the huge popular outcry at the dread prospects of threat presented, the governments of England, France, Western Germany, Canada, the Netherlands and India - key allies of American imperialism — made sharp remonstrance and protest.

Within hours of his provocative statement made to reporters on Nov. 7, the protest abroad and the evident consternation among wide sectors of the people here at home forced Truman to a hasty further statement "to make it certain that there is no misinterpretation" of his first one. "Consideration of the use of any weapon is always implicit in the very possession of that weapon," Truman explained. "By (Continued on page 4)

"SAVE OUR BOYS IN KOREA" Wives and mothers of American troops caught in the

Korean military disaster are pleading tearfully with Truman and Congress to "save our boys."

Some 300 relatives of U.S. Marines trapped in the Chosin reservoir area of Korea held a mass meeting in Birmingham, Ala., on Dec. 6, sponsored by the local Marine Corps League Auxiliary.

The distressed families sent telegrams, drafted at the meeting, entreating Truman to "evacuate our troops immediately.'

Weeping wives and mothers made touching spontaneous speeches in which they blamed the plight of their husbands and sons on "bad leadership" and urged that "our boys" not be "left to the slaughter."

Speaking the sentiment of the meeting, G. R. Wilson, father of Cpl. James Wilson, stated: "It seems to me we've had some bad leadership from Washington. Let's tell our leaders we have no confidence in their dilly-dallying around."

Truman-Attlee Talks Offer outcry at the dread prospects of spreading war which Truman's Few Concessions to Peiping By John G. Wright

DEC. 7 - Although militarily and diplomatically the international position of American imperialism is at the lowest ebb in the entire postwar period, the Truman ad-

ministration continues trying to the Pentagon find retreats of strength" - especially with bitter pill indeed to swallow. Attlee, backed in his stand not regard to China and Asia as a only by Churchill's Tories but whole.

also by the French and the West The refusal to recognize China's new role, position and power in European bourgeoisie generally is pressing for a much broader Asia, and by this token in the compromise in Asia. In this whole world; the stubborn, almost diplomatic tug of war, India's purblind insistence on treating weight is on the side of the Euro-Mao's government as a mere

WIVES AND MOTHERS WEEP, Demand Grows Here to Bring **Troops Home**

BY THE EDITORS

The GIs facing annihilation in Truman's "police action" want to come home. The men who are doing the bleeding and dying are asking just one question: "When are we getting out of Korea?"

This news is contained in a United Press dispatch, relayed through Tokyo on Dec. 5, which reports:

"The withdrawal from Pyongyang. . . was grim and sullen but orderly. Troops seemed to have but one question of anyone who spoke to them:

"'When do you think we'll get out of Korea?'"

That's the biggest news in all this bloody mess. But you won't find it in the headlines. They tell only what Truman thinks and Attlee says and MacArthur's latest alibi for sending his troops into a trap.

These brief and buried lines telling us what the soldiers think are more important than all the millions of words pouring out of the White House, the UN and Mac-Arthur's headquarters. It is an appeal from American boys to us at home- their mothers, fathers, wives, brothers and sisters — to get them out of Korea before it is too late.

From many quarters in the land, there is a growing response to this desperate plea. We read of weeping wives and mothers of the trapped U.S. Marines meeting down in Alabama and wiring to Truman and Congress to "evacuate our boys immediately."

Groups of prominent citizens - all supporters of the Korean adventure at the start - have sent Washington urgent appeals for withdrawal of the troops. Among the signers of these appeals are such figures as the financier James P. Warburg, Erwin D. Canham, editor of the Chris-

CONCESSIONS NEEDED

To avoid plunging recklessly into a major war with China, the American imperialists must agree to make important concessions, diplomatically and militarily, to Mao Tse-tung's government.

It would drain America not only The extent and nature of these concessions have been the nub of of its wealth but of its manthe Truman-Attlee talks which power. Almost all men from 16 to 60 would have to be mobilized. have been neither so harmonious

tian Science Monitor and John Crider, editor of the Boston Herald.

But Truman and his associates are stalling. According to the reports at this writing, they are considering a scheme to keep the troops in Korea until they are actually driven into the sea. They are figuring out how to prolong the war and spread it as soon as they think their forces permit. They are calculating how to expend more lives, while the trapped boys in Korea face total disaster.

Let the voice of the GIs be heard. Let the agonized cries of their wives and mothers find a quick and overwhelming response from the American people. Millions are hoping and praying that our boys be saved. There is only one way:

Stop the war NOW! Withdraw the troops at once! **Recall MacArthur!**

The misconceptions about a war with China are due first of all to lack of knowledge about China's immense size, both in population and area. A Gallup Poll last week revealed there is widespread ignorance on this.

slav citizen, including state functionaries. Exceptions to that rule preneurs, writers and artists and foreigners, who are able to eat restaurants of the big towns. Another important gauge of the degree of social stratification is money income itself. Monthly wages vary from 2,500 dinars to 13,000 dinars — but it is very

rare that unskilled workers earn as little as 2,500 dinars for a streetsweepers, and charwomen are among these lowest paid categories. The average wage for skilled

workers is 4,000 dinars. This is a gest enterprises, like the Senica rough estimate, as there are great regional and occupational differentials. A white-collar worker, a government employee, etc., gets from 3.000 to 4.000 dinars

monthly. Factory managers and

high state functionaries get around 6,000 dinars-often less; and the biggest plant managers beginning of 1950, when several get up to 9,000 dinars. Skilled thousand automobiles were taken and highly skilled workers easily away from state functionaries make the same wage, if not more. | and managers of plants and were But very few individuals get more than 9,000 dinars; included in these groups are ministers, shockworkers and some writers and artists. The highest wages are in general those of a spectacular shockworker, who earns private pleasure. Another im-12,000 to 13,000 dinars a month. Of course, the income of individuals still engaged in private enterprise is much higher. But these people in the cities are very few: owners of some laboratories for drugs or cosmetics,

proprietors of power saws, or carters and draymen. Money income of small peasants and of people in cooperatives is on the whole equal to that of skilled workers. Rich peasants and speculators get the highest money income in the country, often tens of thousands of dinars. In a society in transition between capitalism and socialism, wages aren't everything. There are many other forms of money train fares. and social income. Managers in

disposal, as in Russia, a "managerial fund," which they could divide among the best shockworkers and reserve a big slice for themselves. The law of June 28, 1950 has changed this. The managerial fund has become a "factory fund," administered by

BLOWS TO PRIVILEGE

An important blow to bureaucratic privileges was dealt at the sent to the backward areas where they are necessary for vital transportation. The traffic of automobiles in and out of cities is carefully checked in order to prevent their being used for ortant change occurred when the government decided to halt construction of dozens of big administrative buildings in order to build workers' houses instead. Wherever a new factory is built, the houses for its workers are erected at the same time.

Travel by train is today difficult and expensive in Yugoslavia - if you are not a worker. Railway fares are very high, and in hotels, prices are preposterous. Workers, however, go on free vacations by the thousands, and to special rest homes owned by the plants, and thousands benefit from the small, overall price of 1,000 dinars per week for food and lodging at the hotels and a 75% reduction on

LENIN

TROTSKY

States and her irresistible expansion arising from it, that compels her to include the powder magazines of the whole world into the foundations of her structure, i.e., all the antagonisms between the East and the West, the class struggle in Old Europe, the uprisings of the colonial masses, and all wars and revolutions. On the one hand, this transforms North American capitalism into the basic counter-revolutionary force of the modern epoch, constantly more interested in the maintenance of 'order' in every corner of the terrestrial globe; and on the other hand, this prepares the ground for a gigantic revolutionary explosion in this already dominant and still expanding world imperialist power."

"... it is precisely the international strength of the United

- Leon Trotsky, Third International After Lenin, 1928.

What They Voted For

The election pay-off has come. Every unionist, every worker who voted for the capitalist party candidates at the bidding of the labor leaders now knows what he voted for.

One month after the votes were counted, the parties and politicians maintained in power in Washington have led this country to the brink of a war with China and a possible world war.

No matter what the workers thought they were voting for, no matter what the union leaders told them they were voting for, the events of just four weeks have proved they were voting for the imperialist war program.

They gave their votes to a \$50 billion military budget that will give us a "garrison economy" for as long as we can see ahead even if a full-scale war with China is averted.

They gave their votes to price inflation, scarcities, higher taxes, speed-up, job regimentation and all the other sacrifices and curtailments that go with fullspeed-ahead war preparations.

They gave their votes to throw their sons and brothers by the millions into uniform, to deny them any future but

None for Domestic Consumption

The highest government officials, holding dozens of conferences on the international crisis, appear to be concerned with every other matter these days except the domestic witch-hunt which they set loose in conjunction with the cold war. But it has been moving briskly along without any let-up. Just to mention a few of the witch-hunt highlights during the last week:

1. As the front page article of this issue reports, the Department of Justice intends to enforce the McCarran-Kilgore police-state law even more stringently than McCarran himself proposed to do; according to Seth W. Richardson, chairman of the Subversive Activities Control Board, preparations are being made to impose registration on all of the 130 groups now on the Attorney General's private "subversive" blacklist. 2. The New York Court of Appeals unanimously upheld the constitutionality of the Feinberg Act, which directs the State Board of Regents to draw up a list of so-called "subversive" organizations and to fire any teacher or other school employee who belongs to them. 3. Earl Browder, former secretary of the Communist Party, was jailed in Washington on charges of "contempt of Congress" when he lacked \$1,500 for bail. (The failure of the Stalinist-dominated Civil Rights Congress to offer the money for his bond is typical of their contempt-* ible disregard for civil rights of their

the barracks life and the prospect at the end of mutilation and death.

They gave their votes to enrich and strengthen the monopolists and war profiteers whose "abnormal profits." as one government official called them, will be tapped by the excess-profits bill passed by the House for only \$3.7 billion next year, while low-income earners will pay the overwhelming share of the new \$75 billion total federal budget.

All this is a terrible price to pay for a political lesson — but if it is learned, it will not have been paid in vain. This lesson - which The Militant has never tired of repeating — is that both the Democratic and Republican parties are instruments and tools of Big Business. There is no basic difference between them. Their program is the safeguarding of capitalist rule and profits. Their "solution" for the contradictions and crises of capitalism is war.

There is no way out unless the American working class builds its own party, takes the leadership of the nation and sets up a Workers and Farmers Government. To save America and the world from catastrophe, the people must rule in their own name and decide their own fate.

By George Breitman

Page Three

What are the relations between the Kremlin and the Mao Tsetung government of China? Do Stalin and Mao have the same interests and objectives in the present crisis? Can the Stalinist bureaucracy in the Soviet Union be depended on to give unconditional and full aid to the anti-imperialist struggle sweeping over the Far East? The answers are vital not only for the future of Asia but for American workers who want to help in the establishment of an Asia independent of both imperialism and Stalinism.

No help in finding the correct answers is afforded by Truman, Acheson, Austin or the other spokesmen of the imperialist propaganda machine. According to them, the Mao regime is little more han a puppet of the Kremlin, carrying out its orders obediently n line with Stalin's "world revolutionary" objectives. This view, which is designed to justify Washington's own drive for world domination, is false in every important respect.

To begin with, the Chinese Communist Party owes neither its The trend in Washington and especially among the Atlantic rise to power nor its prestige among the peoples of Asia to the Allies continues to be against the Kremlin; it won its victory by submitting to the pressure of the peasant masses, who were seizing the land, and by breaking off launching of full-scale war in the attempts to work out a deal with Chiang Kai-shek, a deal which immediate future. The advocates of "preventive war" may win out the Kremlin urged it to seek. It crushed the power of Chiang with ts own resources, and without help from Stalin - unlike most at a later date but right now of the regimes in Eastern Europe, which can truly be designated they are being restrained by cooler heads in Washington, who as satellites.

are holding the door open for In other words, the overwhelming evidence is that the Chinese government is an independent power, and not a mere vassal or Of course, whatever deals the puppet. Where it acts in concert with the Kremlin, it does so as partner and not in blind obedience. The chief bond holding this governments may make, includpartnership together is the Chinese CP's distrust and fear of U.S. ing those between the White imperialism, which it knows would like to restore the regime of House and the Kremlin, can serve Chiang and the corrupt landlord and capitalist classes he reprenot to avert but only to postpone sents. This is not the first time that the reactionary policies of the outbreak of a new world war. U.S. imperialism have driven insurgent governments and peoples They cannot eliminate the evils of capitalism or the antagonisms into the arms of the Kremlin.

While the present movements in Asia were not created by which provoked the present crisis. Stalin but by the collapse of capitalism and the insurgence of the Nor will they prove capable of colonial masses, Stalin knows how to exploit them to the hilt. He consents to or goes along with the anti-imperialist struggles of the Chinese CP and the Korean CP, and under certain circumstances extends them limited material aid. But their objectives are not the same. Generally speaking, Mao Tse-tung fights imperialism because he regards it as a deadly threat to the Chinese revolution. But Stalin's sole interest in the Chinese or Korean revolutions is how he can utilize them to promote his own foreign policy, which has a single aim - the preservation of the power and privileges

Utilizes Movements' for Own Purposes

One way in which Stalin is able to utilize anti-imperialist movements has already been demonstrated in Korea. Whether or not he initiated or welcomed the outbreak of the conflict in that country, he realized soon after the U.S. began to commit heavy forces there that Korea provided an excellent opportunity to "bleed" U.S. imperialism, keeping it engaged in a costly but indecisive campaign which has had extremely adverse effects on the positions of the U.S. throughout the world but which at the same time in no way impaired the military strength of the Soviet Union.

The Korean situation thus fitted neatly into the basic aim of the Kremlin's strategy, which was and still is to exert pressure on Washington for a deal to divide the world up into spheres of influence which each camp would respect. So far as Stalin is concerned, the involvement of Chinese troops in Korea serves the same purposes, although Mao's main consideration is to prevent the installation of a hostile power's military forces on China's border.

Because Stalin benefits from the extension of the anti-imperialist struggle in Asia up to a certain point, he is willing to grant it a certain amount of help - but only a certain amount. This was proved in the earlier stages of the Korean war, when the Koreans were able to battle their way near to Pusan but were unable to clinch the victory because Stalin adamantly withheld the necessary help, especially the means to create an air force. So much help, but no more - why?

One probable reason is that Stalin, while eager to employ bleeding" in order to promote the conditions for a deal with the U.S., evidently is hesitant about carrying the process to a point where it may provoke imperialism into unleashing the general world war which he is so anxious to postpone. An even more compelling reason is that Stalin does not want to have allies who are TOO

6. The U.S. Court of Appeals reversed the conviction of Judith Coplon on espionage charges on the ground that she has been illegally arrested. But of course the FBI, which violated the law in this case, gets off scot-free.

Each day, if not each hour, brings fresh additions to this endless list. Yet the very individuals, from Truman down, responsible for this destruction of civil liberties at home never cease 'talking of how precious freedom is, say, in Korea; of how the "dignity of man," etc. etc., must be protected all over the world. They are busy exporting democracy on such a wholesale basis that apparently little or none can be spared for domestic consumption.

If they are not stopped these hypocrites will destroy the very spirit of freedom and of free men in our land.

strong and, therefore, capable of being independent

He cannot, he dare not forget the example of Yugoslavia's break. While he knows that he cannot treat big China the way he treats Bulgaria or the way he tried to treat Yugoslavia, he knows that the trend to independence from the Kremlin, and antagonism toward it, is bound to develop in the Far East as it did in Eastern Europe. The Soviet bureaucracy, it cannot be repeated too often, fears the extension of the world revolution as much as the imperialists do. It exploits revolutionary movements and situations - as a caste trying to balance itself between the bourgeoisie and the proletariat, it has to do this - but it never forgets that these situations set into motion the mass forces that will spell the doom of the Soviet bureaucracy too.

Conflict of Basic Interests

The strategic interests of the Kremlin and the revolutionary interests of the Chinese and Korean masses seem to coincide at the present time, while he is able to extract some benefits from their struggles. But for the Soviet bureaucracy, the Chinese and Korean masses are expendable (like the masses all over the world, including the Soviet Union). When it suits the Kremlin's purposes, it will betray and subvert their struggles without a moment's notice as it has done so often in the past in the pursuit of its negotiations and deals with imperialism. In fact, the history of Stalinism, which has been replete with such betrayals for more than two decades, teaches us not to exclude the possibility that Stalin might join with the imperialists in arranging a deal at the expense of the Asian peoples if he felt it was necessary to preserve his own position in the Soviet Union.

A correct understanding of the situation in Asia must take as its starting point: 1. The profoundly progressive character of the colonial and anti-imperialist movements which, despite all the inadequacies of their leadership and program, hasten the collapse of capitalism as a world system and create the conditions for the victory of socialism in the industrially advanced countries. 2. The conflict of basic interests between the Kremlin and these anti-imperialist movements, even though the leaders of the latter may now consider themselves loyal Stalinists and be in alliance with Moscow.

Intervention by the American people to prevent the catastrophe toward which Washington is drifting will do more than avert the useless expenditure of millions of lives and billions of dollars. It will also pave the way for the masses of Asia to take their destiny into their own hands. Once the threat of imperialist attack is removed, the Chinese people will have no further need for an alliance with the Kremlin that is one-sided in the extreme because it yields all the benefits to the Soviet bureaucracy. They will be better able as "impotent" and "bankrupt." to assert their independence of ALL oppressors, including Stalin. This is correct only in the sense and to continue the development of their revolution which was only that its fraudulent role as "guarbegun by the overthrow of Chiang Kai-shek. Stopping the war dian of world peace" has been now will deal a blow not only to the imperialists but also to the completely exposed. Its real cynical exploiters of the Asian peoples' struggles.

MAIN FUNCTION

Who Threatens Whom?

By Joseph Keller

Truman, Acheson and MacArthur put on p completely innocent air about the conflict with China. They deny any provocation. According to them, the U.S. is the offended party. You would think that it is the Chinese army on the U.S. border across the St. Lawrence River that's at issue, instead of the other way around. Let's get the facts straight. It's the U.S. armies that drove to the Yalu River across from the Manchurian border of China and threatened the power installations essential to Manchuria's industry.

The only difference between China's reaction to a hostile army on its border and what U.S. reaction would be if a Chinese army were on the American border is that the U.S. would have started counteraction sooner. The whole of America's military might would have been thrown into battle the moment a Chinese soldier set foot anywhere on the soil of the Western Hemisphere.

In fact, since 1823, the year of the Monroe Doctrine, U.S. policy has forbid any nation outside the Western Hemisphere to invade or seek territory or in any way interfere in North and South America. The U.S. has assumed the right to defend the whole hemisphere from foreign encroachment. Can we then expect the 500 million people of China not to oppose foreign encroachment even on their border?

But, claim the U.S. spokesmen, we gave our assurance to China that we would not violate the Manchurian border and would "protect China's legitimate interests" with respect to the Yalu River power developments.

Why should the Chinese believe this, any more than the U.S. would believe such assurance from the Chinese if they were approaching the St. Lawrence through Canada and threatening to

Lure

MacArthur's strange passion for extending

"democracy" in Korea up to the Yalu seems all

genius as close to divinity as MacArthur?

The truth is that the Yalu is the gateway to

U.S. armies on the Yalu river?

seize power installations supplying New England and New York City?

Indeed, the Chinese have every reason not to believe it. At the very moment this U.S. assurance was being given, the U.S. fleet was surrounding and protecting the regime of Chiang Kai-shek on Formosa, where the hated despot had fled from the wrath of the Chinese people. This assurance came from those who had aided Chiang Kai-shek with billions of dollars in funds and arms in his attempt to smash the Chinese revolution. MacArthur, the very commander of the U.S.-UN forces which drove to the Manchurian border, is a bellicose advocate of the program of Asian conquest. Only a few weeks ago he proclaimed the policy of setting up Formosa as a permanent American military base from which Asia could be bombed "from Vladi-

vostok to Singapore." It was the U.S. that in the last century imposed by force the "open door" policy on China, which permitted all the imperialist powers to seize territories and loot China. It was the U.S., under President Theodore Roosevelt, that agreed to turn Korea over to Japan after the Russo-Japanese war. And it has been the U.S., since the end of World War II, that has supplied the arms and money to keep French. Dutch and British imperialism going in Indo-China, the East Indies and Malaya.

If experience is the best teacher, then every experience of the Chinese teaches them that they have not the slightest grounds for trusting the Trumans, Achesons and MacArthurs when they profess the intention to protect China's interests. Instead, China is doing exactly what the U.S. would do if any invading foreign army came as close to American soil.

Steel Profits To Rise Despite Wage Increases

Far to the rear of other CIO unions, Philip Murray's CIO Steelworkers union after months of stalling negotiations has at last wheedled wage increases from the profits-

swollen steel industry - but not until the steel barons had assured themselves of price increases which will mean bigger profits than ever.

U.S. Steel and Bethlehem Steel, the two largest corporations in the industry, on Nov. 30 granted wage raises ranging from 121% cents an hour in the lowest wage categories to 28 cents in the highest. The bulk of the steel workers will get raises of from 16 cents down to the 121/2-cent minimum.

Following the lead of the two giants, other big corporations fell quickly into line, including Jones & Laughlin, Republic and Youngstown Sheet & Tube. Approximately 1,000,000 steel workers are expected to get the increases by the beginning of next

Although negotiations were going on for months, the steel corporations were under no real pressure to make concessions before the termination of the contract at the end of this month. Murray had assured the industry in advance that the union would "respect" the contract and take no effective action to secure in-

creases before the contract dead-

loyalty cases, however, it is an other major industries secured prices \$5.50 to \$6 a ton. This aspect that cannot be overlooked. wage boosts months ago, largely more than compensates for the If you have reason to suspect that through strike actions in disa man is disloyal and you lack regard of "sacred" contracts, the the overt proof of it, yet you have steel workers had to subsist on incontrovertible evidence that he the wage rates of two years ago associates constantly, and from while the steel companies for the choice, with other people of known past five months raked in the disloyalty - well, you are just largest profits of their history. A year ago the steel workers

bound by all the laws of reason were induced by Murray to waive To which Stalin and Vishinsky any wage increases in return for could reply: "That's what we've a monthly hundred dollar pension, including social security, been saying all the time!"

Thurgood Marshall, chief counsel of the NAACP, will fly to Tokyo in order to aid Negro troops unjustly court-marannounced

after the age of 65 and 25 years' service in any one company. This latest wage rate increase is the first in two years.

On Dec. 9, U. S. Steel is scheduled to make the largest quarterly dividend disbursement in its history, with the exception Thus, while a million auto of the year 1917. At the same workers and as many more in time, the company is raising its

wage increase. With increased production anticipated on the basis of the expanded war program a large part of the increase will be absorbed in lowered unit costs based on higher productivity.

COSTS BOSSES NOTHING

A sizeable portion of the new wage increases was slashed in advance by the rapid rise in the cost of living during the period of protracted negotiations and the delay in raising the wage demands. Further rises in living costs with the increased war preparations are certain to reduce the real wage raise still more in the next months.

However, the new wage rates are frozen until Dec. 31, 1951, regardless of the extent of price

Why was MacArthur so insistent on putting bined with iron deposits that are among the world's best. The Tungpientao deposits flank-According to the official propaganda, MacArthur was only carrying out UN directives to ready been ascertained and the Tungpientao de punish "aggression" and "restore" democracy to posits alone may be about half as large as the Korea. This sounds like a laudable aim. But rich Labrador iron deposits now under American to accomplish this aim, why was it essential to development. They are much better located than send American forces clear up to the Yalu? And the Labrador beds. In fact, nowhere else in in winter! the

By Paul Abbott

easily-worked coal fields. And this is not all. There are big deposits of alumina shale which formed the basis of large aluminum plants built under Japanese domination.

ore been discovered in the very midst of huge,

On top of this, the Yalu area has valuable deposits of copper, lead, zinc, tungsten, wolfram and vanadium. And even this does not exhaust the inventory. MacArthur no doubt did not find the existence of lucrative gold mines incompatible with his hunger to bring the blessings of "democracy" to the Yalu river, or the beds of uranium, requisite for atomic energy, which were already being worked by Japan before the end of World War II.

Most of the known resources are on the Manchurian side of the Yalu river, but the whole area has not been fully prospected. Many of the discoveries were made only on the eve of World War II. Thus it can be seen that this region constitutes a unique raw material, fuel and power base for large-scale industrial development such as made possible the Ruhr in Europe and the Pittsburgh-Detroit complex in America.

This was the pot of gold that lured MacArthur into military disaster. As every business man on Wall Street can thoroughly appreciate, Macon Wall Street can thoroughly appreciate, Mac-Arthur's itch to follow the democratic rainbow Gov't Will Try to o the gateway to Manchuric Quixotic.

This abundant coal and electric power is com-

General MacArthur, long deified by the American press, has apparently lost the whole Korean war in one battle. Criticisms of the "military genius" are now being heard. This is very painful for MacArthur because he has always been a grandstand general, fighting his battles with one eye on the enemy and his good eye on the newspapers. Everyone knows his political ambitions - two tries for the presidential nomination. Smedley Butler, the ex-Marine general with a conscience, revealed that MacArthur, after he drove the bonus marchers out of Washington, was considered for the post of American Fuehrer by those circles who saw a fascist dictatorship as the answer to the social dangers of the depression of the Thirties.

It appears that. MacArthur's thirst for glory and his politics contributed to his staggering defeat in Korea. Not that he is responsible for the whole debacle in Korea; that was inherent in the whole American intervention. MacArthur simply hastened matters along.

The 1942 buildup of MacArthur gave him a headstart on all other World War II U.S. generals and rendered him semi-independent of the War Department and the president. His popular reputation made both Roosevelt and Truman handle him with kid gloves. That day is gone forever. MacArthur's conduct of the Korean campaign is being exposed. He is being revealed as a liar before the whole public.

Take, for example, his promise to the GIs that the Nov. 24 attack would get them home by Christmas. This promise, twice made, rated headlines throughout the country. When the attack failed MacArthur, instead of admitting an error, tried to maintain the fiction of his infallibility by claiming that he had merely made a jocular remark that the papers should never have printed.

Personally launching the offensive with great fanfare, he described it as a giant "vise" closing on the enemy in the final battle of the war. When the attack produced a smashing counter-attack that sent the U.S. army reeling, the story was revised. Instead of an attack, we learn from the communiques, merely a "probing movement" had been launched on Nov. 24. Moreover, it was not unsuccessful but really in a way a "fortunate move" because it forced the Chinese to reveal their strength. One can imagine, but not print, the reply of a GI doughfoot to this praise of the debacle as a "fortunate move."

The latest line is that MacArthur didn't want to attack, but was forced to move in order to beat the Chinese to the punch. Compare that with the dispatch which appeared in most papers on the day MacArthur's offensive started: "Tokyo observers said MacArthur's decision to launch his offensive now was a challenge to Chinese Com-

munist leaders either to commit this massive force (Chinese armies known to be then in Manchuria) to battle against the U.S. and UN or to get out of Korea."

Not even the official figures on the number of the enemy, now being issued by MacArthur, can be trusted. With each communique these figures have multiplied faster than the proverbial rabbits. Beginning with 200,000 they are now over a million. Hanson Baldwin, N. Y. Times military analyst, on Dec. 6 disregards the figure of over other organizations would be cova million and estimates that "no more than 200,-000 to 300,000 Chinese Communists are as yet in Korea," reinforced by North Korean troops numbering about 100,000. At the same time he that no trust could be put in such puts MacArthur's ground forces at "considerably promises because the law was so over 300,000."

The British government leaked out the information that as early as Oct. 12 - a few days after he crossed the 38th Parallel - MacArthur had

asked permission to bomb Manchuria. Similarly it has been revealed that the Indian government relayed a warning from Peiping that China would intervene if the 38th Parallel was crossed. The British and Dutch sought to have MacArthur stop short of the Manchurian border, establishing a sort of buffer zone. MacArthur rejected this out of hand. Claiming that such policies would endanger the victories he had won, He announced that he could not take responsibility for the safety of his troops - a military way of asking to be replaced or threatening to resign - if such policies were imposed on him.

Truman had no objection to MacArthur's big offensive of Nov. 24. The victory MacArthur had promised would coincide with the arrival of the Chinese Communist delegation at the UN and thus put the U. S. diplomats in a "strong position." That was the hope and expectation. In fact the only difference that has so far been revealed between Truman and his general was Truman's assuring the Chinese over MacArthur's objections that the Yalu hydro-electric dams would not be interfered with.

In a steady stream of "clarifications" Mac-Arthur has been denying everything. But the weight of evidence is too great. When the secret files of the foreign offices are opened the particulars of all his lies will be revealed. Many of his denials will be found to rest on shyster evasions such as not having formally asked for permission to bomb China, but doing it "off the record," or having one of his aides approach certain UN figures or using the stooge Syngman Rhee regime to float trial baloons.

This will be of interest to future historians; the public will vaguely remember him as just another reactionary general of the past. Page 4.)

Of 130 Groups (Continued from page 1) brought before his board - as directed, dominated, or controlled by the foreign government or He evidently thinks they should foreign organization controlling cooperate with the board and the the world Communist movement," administration in getting them and "communist-front organizations," defined as those "substantially directed, dominated, or

tialed and sentenced to long prison terms, last week.

"Appeals for aid from imprisoned Negro soldiers and reports from war correspondents, returned officers and enlisted men, indicate that many of the convicted GI's have been victims of racial discrimination and need our full support," said Walter White, NAACP executive secretary.

The NAACP, which made the defense of these soldiers the No. 1 item on its legal defense agenda, has received a constant stream of letters from the imprisoned men asking for assistance.

The most publicized case was that of Lt. Leon A. Gilbert, whose sentence to death by a drumhead court-martial was recently commuted to 20 years imprisonment by President Truman following nation-wide protests. Thurgood Marshall promised that the NAACP would continue its efforts on behalf of Gilbert. What is needed now is a continued demand by labor and Negro organizations for full freedom for this victim of Jim Crow prejudice.

rises in the meantime. The contracts do not include protective escalator clauses that provide during the life of the contracts for automatic wage increases periodically adjusted to the rises in living costs.

Under such clauses, the General Motors workers on Dec. 1 secured their second wage increase within three months of 3 cents an hour and hundreds of thousands of other workers who got basic wage increases last summer have just obtained additional raises.

Without such a clause, the steel workers are likely to see their wage gains eaten away completely before the next contract.
