Demand Rises: 'Bring Troops Back to U.S.!'

Mothers Petition

AKRON, Dec. 11 - More than 100 mothers of GI's in Korea have signed a petition to President Truman, pleading for him to withdraw all troops from Korea. The idea is reported to be spreading from Akron to other communities.

The petition was drawn up by Mrs. Richard Abicht, mother of two and sister-in-law of a 17year old Marine in the 1st Division. After the newspapers announced it, she was flooded with telephone calls of support from wives and relatives of men in the service. "We haven't had a single all of protest against the petishe added. tion,"

Mrs. Abicht's petition reminds Truman he was elected by people withdrawal from all of Korea, who thought he was the "right and not from just North Korea. man" but "all of us have been let down completely."

Karl Kuehn Dies; Was One **Of Minneapolis Trial Victims**

By Max Geldman

PHILADELPHIA, Nov. 11 -A brave, loyal and talented comrade is lost to the socialist movement. Karl Kuehn is dead. At the age of 56, he died Sunday night of a stroke in the hospital to which he had been rushed after collapsing on his job. The Social-

ist Workers Party, his family, and many, many friends throughout the country mourn his death. Karl's devotion to the working

Cont

class movement stemmed from his own bitter experiences with the social system in which he lived. He was born in St. Paul, Minn., in 1894. He came to socialism as a result of the depression that began in 1929. A skilled mechanic and an able salesman, he found his talents unwanted, and like millions of others was forced to depend upon public relief to maintain himself and his family.

ACTIVE, CREATIVE LIFE

He was not the type to close his eyes to the misery and poverty around him, and he was able to see that his own plight was but a part of the crisis of the capitalist system. Thus he was able to find the road to an active and creative life. He associated himself with the dynamic labor movement led by the Minneapolis Trotskyists. From then on, he make a bomb that will destroy is to bring on actual hunger for never wavered. He was a thorn in the side of all who sought to oppress the workers, a friend of all who were in need.

As secretary of the fighting Federal Workers Section of the the unemployed organization of ing to be wiped off the map to the area, Karl Kuehn distinguish- make way for the site of a secret ed himself by his efforts to improve the lot of his fellow workers. tion to Western Europe, especially preserve a semblance of harmony,

despite their differences. But just the opposite is true in relation to the Far East, particularly China. MAIN DISAGREEMENTS

Here the disagreements come to the fore. The two issues singled out are: Recognition of the Mao government and the disposition of Formosa. Washington continues to refuse to deal with Peiping as an "equal" (meaning, admit it to the UN) and states so flatly; and it is equally reluctant to return Formosa to China, covering this up by a "willingness" to have the matter "considered by the UN." On a third issue prominently before world public opinion the use of the A-Bomb - Attlee

nemains of "peacefully" clinging to Formosa except by clinging to the obscene fiction of Chiang What Imperialists Were **Really Unprepared For**

An Editorial

We're hearing a lot now, and we'll be hearing a lot more later on, about how "unprepared" this country was for the crisis in Korea.

The purpose of these complaints and recriminations is, of course, to justify the appropriation of additional tens of billions of dollars for armaments that will have to be paid for by the weat, toil and deprivation of American working people.

But those who are screaming "we were not prepared" are not telling the whole truth. That is, they are telling a lie.

Between V-J Day and the outbreak of hostilities in Korea, Washington spent almost 100 billion dollars arming itself, its European allies and the despots for whom it has a peculiar affinity in Asia. No other country in the world spent as much on war preparations in that period.

In the space of a few weeks the U.S. government was able to land a large-sized army, better equipped and supplied technologically than any other in the world, in a country 7,000 miles their way, everything will be from American shores. No other country in the world could equal that in the same period of time.

The really amazing thing about this operation was that militarily the U.S. government was able to do so much so fast in Korea, considering its their elders will be drafted at previous claims that the only policy it was pursuing was a "policy of peace."

It's just not true that Washington was "unprepared" unless by this term is meant the ineventually no one will be able to ability to take on half of the world and lick it; choose the kind of job he wants and in that sense it may never be "fully prepared," no matter how much it spends.

However, there was something that the political and military brass hats running this country really were not prepared for. And that was the consequences of the colonial and anti-imperialist revolution that has swept over Asia. The brass hats - and MacArthur was not alone in this - suffered from the delusion that all they had to do was act tough and the Asians would turn tail and run. But the Asians are not running; the colonial slaves of yesterday refuse to remain slaves any longer.

Fired with the conviction that the peoples of Asia have the right to determine their own fate, they have given convincing proof of their readiness and ability to fight bravely and well for freedom from Chiang Kai-shek and his imperialist masters.

It is the upsurge of these peoples rebelling against the exploitation and degradation of centuries that the brass hats were unprepared for. It is an upsurge that we firmly believe it is to the interests of the American people to meet with sympathy and not hostility.

But even if the politicians who are hostile to revolutionary China remain in power and continue their hostile policy toward it, there is good reason to doubt that they can marshall the resources to achieve a degree of "preparedness" that would enable them to subdue most of Asia.

If they try it, American youth will be slaughtered in countless numbers and the American economy will be bankrupted beyond repair. And for what? Win, lose or draw, the American people will have nothing to gain from the effort. That is why they should demand that U.S. troops be taken out of Korea, and kept out.

Kai-shek.

party for his underground relations with the Kremlin. Although Stalinist propagandists trying to convert him into a hero have announced his violent death many times, he is still living quietly in a Belgrade apartment, and can be seen by anyone who wishes.

The revolutionary implications of this wave of freedom sweeping ever more widely over all spheres of activity inside Yugoslavia wouldn't have been possible without a social transformation of the character of the intellingentsia. Whereas in the Soviet Union one of the important hallmarks of the victory of the bureaucracy was this, that first in practice and later by law, higher education was restricted to the sons of the "upper leaders of the CPY would like to layers," the Yugoslav university system is becoming more and more democratic, in structure as well as in substance. University education is completely free. Besides, at the Belgrade University 60% of the students receive scholarships in order not to become a burden on their working class families. 65% of all Yugoslav students receive scholarships and in Macedonia this per-

HIGHER EDUCATION

centage is as high as 80%.

Scholarships vary from 2,000 to 3,000 dinars, i.e., a little under the wage of an unskilled worker. Married students receive special supplements. Living at the special University City, a student pays only 1,300 dinars a month for food and lodging, leaving him a balance to buy whatever he likes. Books are very cheap, among the cheapest items in Yugoslavia and students get them even cheaper. This year 25% of all students were given special vacations, at a cost of only 1,000 dinars a month. And all those who went were chosen by student committees themselves, with the university authorities intervening little or not at all in these decisions.

"Our self-government is nearly complete," a Belgrade student leader told a foreign delegation. struggle had taken place inside Workers' sons and daughters are therefore flocking by the thoued to direct all cultural activities sands into the universities, while by "directives" and those who their parents are being trained were ready to allow more free- for the technical sides of mandom to intellectuals, writers, agement and of administrative functions. American Labor Leaders

If you are interested in improving the quality of leadership in the American labor movement, you will find the November-December issue of Fourth International of unusual value. Through absorbing case studies, the theoretical magazine of American Trotskyism puts the spotlight on four outstanding types of American labor leaders, explaining their origin, what they represent and how dangerous some of their policies are. From this, the editors draw general conclusions about the new type of leadership now needed to guide labor in the difficult times facing us.

1. John L. Lewis by Harry Frankel. "John L. Lewis occupies a unique position in the labor movement today," Harry Frankel begins. "Leader of a bare three percent of the numerical strength of the American unions, he is the unchallenged pioneer in new developments in the industrial struggle. Autocrat supreme, he sits at the top of a bureaucratic machine of the traditional repressive type, yet his words and actions more closely, represent the moods and interests of the mass of American workers than those of leaders in far more democratic unions. Isolated and scorned by the whole 'official' labor movement, he everywhere enjoys the highest esteem of the union ranks. Government, industrialists, newspapers, politicians of both major parties, and other 'labor leaders' conspire against him and his union, which nevertheless remains more powerful than ever before."

How explain these "mysteries"? Harry Frankel uses the Marxist method to find the correct solution.

2. Philip Murray by V. Grey. "I think I am a man, I think I have convictions. I think I have a soul, a heart and a mind." This opinion of himself was expressed by Philip Murray when he became candidate for the presidency of the CIO. V. Grey has a less laudatory opinion of the head of the CIO: "In an age when history chooses to place a mediocrity like Harry Truman at the head of the mightiest capitalist power in the world, who can quarrel with her for elevating an equally dull mediocrity to the leadership of the mightiest section of the working class"in America?'

How this colorless capitalist agent became entrenched at the head of the CIO "with the blessings of the priests" becomes a colorful, absorbing study in the hands of V. Grey. You'll enjoy it.

3. Walter Reuther by Art Preis. When commentators speculate on who is most likely to fall heir to Philip Murray's crown, the name of Walter Reuther often heads the list. "Smart" and "shrewd," they call him. But just how much does he really have on the ball?

"He has been shaped by powerful social forces, pressures and conflicts, particularly as these have affected and been reflected in the development of the UAW," says Art Preis. To understand Reuther "it is essential to understand the kind of union in which he grew up and on whose mighty shoulders he now stands."

A participant in the early decisive struggles that shaped the CIO United Automobile Workers, Art Preis is unusually well-equipped to paint an accurate portrait of the ambitious crown prince of the CIO.

4. Dave Beck by Dan Roberts. A sinister figure has arisen in the labor movement of the Northwest. "Unions are big business," says Dave Beck, and he means it. This ruthless. robber baron of labor dreams of becoming Czar of the entire American labor movement, mainly through "cannibal unionism." "In alliance with Lundeberg and Ryan and lesser lights he started raiding AFL, CIO and independents alike," Dan Roberts points out, "taking special advantage of strike situations in order to move in, in collusion with the employers behind the strikers' picket lines. As his raiding operations grow, so does his immediate dependence upon the employers. 'For every enemy I have made in the labor movement,' he recently declared, 'I have made a hundred friends in the Chamber of Commerce'."

How can labor meet this threat from the "king of the cannibals"? Roberts reports the growing concern over Beckism and suggests ways and means of converting this concern into an effective anti-Beck movement.

national groups and sections, the meaning of self-determination is the cancellation of the existing borders, and the dismemberment of present states. In particular, this democratic principle leads to the emancipation of the colonies. Yet the whole policy of imperialism, regardless of the national principle, aims at the extension of state borders, at the compulsory incorporation of weak states within the customs border, and the acquisition of new colonies. Imperialism is by its very nature both expansive and aggressive and it is this quality that characterizes imperialism, and not the changeable maneuvers of diplomacy."

- Leon Trotsky, "The Program of Peace." 1917.

Liberals in Action

As readers of The Militant must be aware, we don't hold a very high opinion of the liberals. There are a few and their numbers are growing fewer whose integrity we respect at the same time that we oppose their program. But on the whole the liberals are decidedly unworthy of the support they have among large sections of the American population. Workers who follow their advice go astray 99 times out of 99.

Our first specimen this week is Anna M. Rosenberg, an all-out New Dealer and Fair Dealer recently nominated at General Marshall's suggestion as Assistant Secretary of State, Being a woman, a Jew and a liberal, she was naturally subjected to redbaiting charges and grilled by the Senate Armed Services Committee. An ex-Stalinist stoolie claimed that he had seen her at "communist-front" meetings in the 1930's, a charge which she denied with great indignation.

"Mrs. Rosenberg was trembling and choking in apparent anger when she emerged from the room," the N.Y. Times reports. She said: "It was the hardest ordeal I have ever gone through in my life. I didn't believe that anyone who has lived the way I have, who has worked the way I have, could be accused in such a way by a man who admits he was a Communist."

D

Spoken like a true liberal! She never opened her mouth once to protest the witch-hunt against other people, but she is indignant at becoming a victim of the redbaiting she was willing to tolerate as long as it didn't hit her directly. She didn't believe that it could happen here - or at least not to her. It's true that her education has now been advanced a little — the hard way. But why should any worker pay any heed to her political advice when out of her own mouth she has convicted herself of blindness and ignorance on a political matter of the first magnitude?

Our second specimen is Arthur Schlesinger Jr., a leader of Americans for Democratic Action. Writing in the Dec. 10 N. Y. Post, this theoretician of the liberals notes: "To his credit, Robert A. Taft opposed the use of the atomic bomb in China. That made it all the more strange to find Sen. Paul Douglas of Illinois urging that it be used against 'the Chinese Communists." But Schlesinger doesn't explain this "strangeness" nor draw the conclusion that maybe he made a mistake in supporting the election of Douglas, also an ADA leader.

The reason becomes clear when we read further. "It seems to me," Schlesinger says, "that we cannot afford to take too intransigent a position on the use of the bomb. Our first obligation must be to assure the survival of the free world, and this must override our objections to particular weapons," etc., etc. So in the end it turns out that Schlesinger doesn't disagree in principle with Douglas' "strange" advocacy of using the A-Bomb against China; he just disagrees that the bomb should be dropped now - leaving open the question of whether or not he will be so "intransigent" in the future.

That is in keeping with the general role of the liberals too. When the bomb was used against the Japanese in 1945, they never voiced a mumbling protest. After the war, when the imperialists put on their atomic control-disarmament show, the liberals joined the chorus promising never to favor the dropping of the bomb first. And now, when the imperialists are softening up public opinion to accept use of the bomb, the liberals help along the process with their talk against "intransigence."

We leave aside entirely the question of whether the liberals act as judas-goats deliberately — the point we are driving at is that to follow them is to march to disaster.

'LIMITED WAR' ON CHINA--**AN UNLIMITED CALAMITY**

By George Lavan

The irresponsible capitalist class of the U.S., refusing to learn from the disaster in Korea, is now considering a move that could lead to a world catastrophe. That move is a "limited war" against China. One of the main points of disagreement in the Truman-Attlee conferences was exactly this point. Attlee and the European politicians, who from the beginning of "police action" in Korea have tried to restrain Washington's breakneck pace down the road to ruin, have thus far balked at the insistence of Truman, Acheson and the Pentagon on a "limited war." The N.Y. Times on Dec. 8 reports the reactions of European leaders as follows: "But now that they find Washington continuing to back a bold policy of 'limited war' against Communist China, they are worried and even slightly rebellious."

In face of this opposition an economic blockade of China was launched under Commerce Department orders. All American export licenses to China were "indefinitely suspended" on Dec. 9, along with the cancellation of all outstanding licenses to trade with the British port of Hong Kong and Portuguese-held Macao. "Not even a safety pin" will now get through the embargo, boasted a department spokesman. Economic "sanctions" have usually served as a prelude to military acts.

Hanson Baldwin, Times military expert with close connections in the Pentagon, ardently advocates "limited war." What is "limited war"? Its kernel is contained in Baldwin's Point 1 for such a war: "Bomb and blockade Red China. . . unsettling and wearing down the Red strength. . . " The strategic conception of these military men is that the U.S. can fight China without fighting the Chinese armies; that without fear of retaliation the navy and air force will be able to pound away at the Chinese coast and mainland.

A blockade of the coast could undoubtedly succeed, though there would be losses to the blockaders. The North Koreans originated the strategem of floating mines down rivers to the sea where they sank several U.S. naval vessels. This would undoubtedly be done on a much wider scale by the Chinese. Then the Chinese air force — which has not been committed in the Korean fighting would take a certain toll despite U.S. air superiority.

But a coastal blockade would not shut China off from land supply from the Soviet Union or India. Attempts to force India to embargo China might - given the reported sympathy of the Indian people for the North Koreans and Chinese - drive India into a closer alliance with China.

The heart of a "limited war" would be the bombing of Chinese cities. In the beginning this might possibly be confined to ordinary (i.e., non-atomic) bombings. U.S. bombers could unquestionably rain death and ruin on China. Hundreds of thousands of Chinese mostly civilians, women and children - would be blown apart or burned to death. But the Chinese armies would be left intact. All Chinese, even those not now supporting the Mao regime, would cherish an unquenchable hatred of those responsible for such mass murders. The Japanese imperialists followed such a policy of blasting and bombing for 15 years in their war on China, and reaped disaster.

Chinese industry is small scale and scattered. There is no concentration of industry, whose destruction would knock out Chinese production. A valuable lesson on the ineffectiveness of mass bombing was provided during the "Battle of Britain." The Germans failed to destroy either British industry or morale. And Britain covers a comparatively small area with heavy concentrations of industry.

While the U.S. tried to confine the war to air and naval actions, the Chinese would press for land battles. Hong Kong and Malaya would be quickly taken. Reinforcements sent to the Viet Minh fighters would help them drive the French imperialists from Indo-China. Nor is it excluded that just as military experts were stunned by Chinese successes in bringing up troops and supplies added reason for replacing these by primitive methods, so naval experts might even be surprised by Chinese invasions of Formosa (an overnight voyage from the mainland) and Japan (an overnight voyage from Korea) by thousands of motorized junks and other small craft. Started as a "limited war" the irretrievable course of the struggle would sooner or later bring land warfare and therefore all-out war.

After the failure of the "calculated risk" in Korea the rulers of the U.S. are calculating a far bigger risk. They assume either We don't have to depend on the that the Soviet Union would stand by idly while the U.S. waged air and naval war on its ally or that the Kremlin would not supply

War Aims of the Capitalists

Truman, Acheson and Co. cannot be expected to admit, as Woodrow Wilson did after World War I, that the wars of capitalist countries are fought for "commercial" interests. Whatever they may think about socialism, the overwhelming majority of the American people have no desire to sacrifice their youth and their money to protect the profits of Big Business, and they would never consent to militarization and ruinous taxation for a program with such an avowed aim.

But while Truman and Acheson go on spouting about "aggression" and "communist imperialism," the masters of industry are under no delusions and they speak frankly among themselves about their real objectives. An eye-opening example was the meeting of 300 financial executives at the Bankers Club on Dec. 7, where Philip D. Reed, chairman of the board of the General Electric Company, was the main speaker.

Reed voiced the belligerence of American capitalism when he said, "if we cannot achieve avoidance of war without appeasement of the Munich type, I am for taking the masks off those babies and having it out with them, whether we are ready or whether we are not." But that was not the most important part of his speech; the political representatives of capitalism in Washington are not anxious to embark on total war until they are ready and reasonably sure of winning.

Reed also "stressed, that beneath the surface of the present diplomatic crisis lies the physical fact of a world whose natural resources are unevenly divided and a community of nations with economic systems incompatible with the American free-enterprise system." He was quoted as saying, "The United States must persuade other nations to function under economic systems compatible with ours, otherwise, what we are doing will not pay off, and we will have to be spending an enormous fraction of our output in defending ourselves against have-nots." (N.Y. Times, Dec. 8.)

That's the program of Big Business - to "persuade other nations to function under economic systems compatible with ours" (by armed force, where necessary) because only in this way can American capitalism hope to survive itself and to continue squeezing the economic lifeblood out of other less powerful countries. The sooner the American working people understand this truth, the sooner they will recognize that the interests of Big Business are "incompatible" with their own aspirations of peace and brotherhood between nations, and the sooner they will equip themselves with a program and a party of their own, able and willing to put a stop to the economic system of haves and have-nots and the war that this system breeds.

Political Bluenoses

By John F. Petrone

We Americans are justly proud of our democratic traditions of resistance to tyranny, our revolutionary war for independence, the Bill of Rights, the civil war against slavery - yes, even of the way we flouted the Prohibition Act which sought to interfere with our drinking habits. Practically all the men and women Americans honor as national heroes were associated in one way or another with these struggles to obtain and maintain our civil liberties.

How much longer, then, are we going to submit to the witch-hunt, which undermines our political liberties, limits our rights to select union leaders of our own choice, deprives us of our jobs for "associating" with people whom bureaucrats in Washington don't like, sets Nazi-like standards to determine who can teach our children, and even tries to restrict the kind of movies we can see?

The bluenose became the object of universal derision and aversion because he set himself up as the arbiter of what we could drink. But he is no more hateful and no more dangerous than the political bluenoses, usually wearing veterans caps and always waving the American flag, who have the audacity to dictate what actress shall be barred from the radio and what comedian shall be kept off the TV screen. There is something incongruous about the way so many of us continue to revere the memory of Tom Paine and John Brown while tolerating, in the spirit of Caspar Milquetoast, the most brazen depredations of the self-appointed censors and jingoes now running wild in the apparent belief that it is their god-given right to apply the gag to the mouths, eyes, ears and minds of the rest of the American people.

These thoughts are prompted by the outrageous incident last week when a character named Joseph R. Fehrenback, commander of the Hudson County (N. J.) department of the fascist hoodlums known as the Catholic War Veterans and advertising production manager for the American Bankers Association, demanded that TV Station WPIX cancel a weekly series of Charlie Chaplin movie shorts produced in 1916-17. Fehrenback made the demand on the ground that the California Un-American Activities Committee had listed Chaplin

Scene: a factory during lunch time.

among people who allegedly "followed or appeased the Communist Party line program over a long period of time." Such a man, he insisted, should not be held up "as an idol to the American public." And, like Hitler and Stalin, he laid down the law that "Entertainment for art's sake just

does not exist when you talk about communism." Station WPIX is owned by the N. Y. Daily News, the paper with the country's largest circulation. We don't know what its managers thought; maybe, paraphrasing Cassius, they wondered, "Upon what meat doth this our Fehrenback feed, that he is grown so great?" (The answer to that, of course, is that the Fehrenbacks feed among other things on the redbaiting meat of the capitalist press, including the Daily News.) Anyhow, whatever they thought, they bent their knee at Fehrenback's command with a speed and an obsequiousness that no royal courtier could excel, and within a few hours the Chaplin program was cancelled. Anybody who thinks the lords of the capitalist press can be relied on to resist the drive toward a police state is advised

to ponder over this incident. How much longer, we repeat, are the American people going to put up with-this kind of thing? How much longer are they going to let themselves be pushed around by two-bit political fuehrers and cultural commissars acting in the interests of Big Business? Their chief target is not Charlie Chaplin and his 34-year old movie shorts, but the liberties of the American people. Permitting them to decide what we can see is rick, then planted an empty gun only a step away from permitting them to on his person in an attempt to decide what we can say and think. George Orwell's cover up the enormity of their essay on Gulliver's Travels reminds us that the author of that satire, referring to 17th Century England, said "the Bulk of the People consist, in a Manner, wholly of Discoverers, Witnesses, Informers; Accusers, Prosecutors, Evidences, Swearers, together with their several subservient and subaltern Instruments, all under the Colours, the Conduct, and Pay of Ministers of State." That's what the Fehrenbacks want to make of the United States. And that's what they will succeed in doing if the people don't organize their

resistance soon.

Harlem Roused By Police Murder Of Negro Veteran By J. Blake

NEW YORK, Dec. 12 - The brutal murder last Thursday of John Derrick, 24-year-old Negro veteran, by two trigger - happy cops has resulted in a widespread demand here for an investigation and action to stop police brutality by cleaning out and prosecuting guilty members of the notoriously racket - and graft - ridden Police Department.

The New York Branch of the National Association for the Advancement of Colored People, the New York Amsterdam News and other Harlem organizations have demanded a complete hearing on the charge that Patrolmen Louis Palumbo and Basil Minnakotis shot and killed the unarmed Dercrime.

The young veteran was released from the Army with a medical discharge last Wednesday after serving seven years. He had returned from overseas duty in Germany in August, and lost an eye as a result of an injury while on duty.

Last Wednesday morning, released at Fort Dix, he went to Harlem with Pvt. Oscar Farley to celebrate. They were joined in a local bar by a friend, Zack Milline.

COLD BLOODED KILLING Later, as they were walking

regain premium pay for Satur-NEED MASS PRESSURE days and Sundays. Overtime rates

The only pressure that will wring anything from the monopolists and their political agents in ministration and an umpire's Washington is mass pressure geared to a militant program. Such a program must call for trade union wages for all unemployed workers. The rank and file of the unions must demand of their officials that they organize giant mass demonstrations, backing these up with nation - wide publicity.

The government is underwriting all the expenses and losses of the corporations in their changeover to war production. Corporate develop" today than in the case produced these profits got a share of them in their hour of need. It Michigan workers are already is high time they demanded and Their first Christmas present is government.

Short Subjects

The 7th biennial convention of the CIO Transport Workers Union, headed by Michael Quill, condemned the \$62,000,000 loan to Franco Spain because "It will not be used to improve the conditions of the oppressed people of Spain; it will be used to reinforce a cruel dictatorship which has suppressed the labor unions as well as free speech, free thought, free press and free assembly." That's the plain truth. But don't Truman and the Democrats know that? Of course they do - that's why they made the loan available to Franco. Then why do Quill and the other CIO leaders continue to endorse the Democrats who "reinforce a cruel dictatorship"? Along with their other resolutions we'd like to see them adopt one on that question.

The NIAACP has asked the government to set up appropriate safeguards against segregation and discrimination at the proposed H-Bomb installations in South Carolina. It wants the government to act now, "while this matter is still in the blue print stage," to insure "that the racial patterns of the State of South Carolina will not be imposed in the territory which is used for the production of the H-Bomb." The NAACP made similar requests regarding all previous atomic installations, but at all of them - in the Southwest, in Tennesse and in the Northwest - it says "we have seen extensive discrimination based on race . . . disgusting segregation in housing, denial of job opportunities and a denial of the use of various facilities." Apparently it isn't enough to just ask the government to end Jim Crow practices.

Douglas M. Black, president of Doubleday and Co., the book publishers, reveals that his company "has recently been the subject of attack for having published three books" - Scottsboro Boy by Haywood Patterson, one of the victims in that infamous frame-up; The Year of the Oath by George R. Stewart, a report on the fight for academic freedom at the University of California; and Worlds in Collision by Immanuel Velikovsky. Black calls the attack on these books - "from organized pressure groups, from selfappointed censors, from sincere but confused in-dividuals who feel that their own point of view

* * *

is the only correct one" - an attack on freedom of the press, which must be "fought for continuously." He says "the strength of democracy in America will continue only so long as minority or the so-called 'unpopular' viewpoints are allowed a voice." * * *

Officials of the American Medical Association, meeting in Cleveland last week, made the astonishing claim that there is no real shortage of physicians in the U.S. today, that medical schools are training enough young men and that the only problem lies in "distribution" of available doctors. For sheer falsehood this certainly ranks with the lies of the medical bureaucrats about socialized medicine. An article in Collier's, published the same week, shows that in 1910 medical schools graduated 4,400 students - one new doctor for every 20,000 of the population; 5,097 students in 1940 - one new doctor for every 26,000 Americans; 5,553 students in 1950 - one new doctor for every 27,000 people. Today there is approximately one doctor for every 800 persons in the U.S. No matter how you'd distribute them, that's still a criminal shortage, due above all to the AMA's campaign to restrict the number of doctors. * * *

Goodbye to slum clearance and housing programs. They will be cut back "almost to elimination." And goodbye to most hospital, airport and highway construction. Federal grants to these will be "reduced drastically." That's what Elmer B. Staats, assistant director of the Federal Bureau imperialism. of the Budget, told a meeting of state government officials in Chicago last week. The budget Truman will submit to the new Congress will make this new policy official next month, but it his experiences in prison served is being carried out right now just the same. The only to reinforce the convictions reason, of course, is that the government can't he had gained in the labor moveafford both bombs and homes, both battleships ment, to strengthen his determinaand hospitals. How long will the American people tion to do his part in the strugbe able to afford such a government?
