# Labor Leaders' Retreat Will Not Resolve Dispute

The United Labor Policy Committee's participation in the new ly constituted National Advisory Mobilization Board does not change any of the grievances which brought about the withdrawal Myra Weiss of the labor leaders from government posts. None of the demands Wins Votes on of the labor movement have been met by Truman.

Only a few weeks ago the ULPC stated "Mr. Wilson. . . would now accept window dressing supplied by labor to cover the back room activities of the leaders of industry. . . He will get no such Anti-War Stand window dressing from the men and women of American labor."

LOS ANGELES, April 8 —
But today Philip Murray, William Green, George Meany and Walter

Myra Tanner Weiss received 18,-Reuther serve under Charles E. Wilson on the new board.

While this action constitutes a retreat, it cannot put an end to the labor crisis. It is only another stage in the struggle; the basically conservative bureaucracy seeks a compromise, but all the conditions which led to their split with the administration not only still exist but have become worse in recent weeks.

Three important reasons prompted the labor officials to withdraw from government agencies.

First, they feared the Big Business domination of government as a threat to their union base. They were given no guarantees that, 1950. in exchange for support to the militarization plans, they would be assured stable unions and a chance to organize the unorganized. On the contrary, the anti-labor drive was stepped up, with Truman campaign. The unexpectedly high acting as strikebreaker no. 1.

Second, the economic program of the administration was so flagrantly operating in the interests of the profiteers and against anti-war sentiment spreading the common people, that the union heads feared growing unrest throughout the country. among the workers against the consequences of the wage freeze while inflation raged uncontrolled. The discriminatory tax program which favored the rich at the expense of the poor, lack of genuine rent control, and the dumping of the whole "welfare state" program | cast for any of the six candidates promised in 1948, put the labor leaders in a position of sharing responsibility for policies which could not fail to arouse the angry resentment of the working class.

Third, since 1948 the union leaders considered themselves political powers, since they felt that Truman owed his re-election to them. Yet, they had been given no recognition or posts of power. On the contrary they were insulted, kicked around, and ignored on all important policy matters.

None of this has changed by their return.

The Big-Business dollar-a-year men remain in complete charge of every major board in Washington, and the policies are the same. The crevice through which the labor leaders have crawled back into the government set-up was provided by the fact that the new board is empowered to "advise" Truman directly. Under the new board the labor leaders will have no policy-making power; they are still advisors, whose advice can be studiously ignored as in the

Having broken with the administration and castigated its policies in sharpest terms, the ULPC had only two roads open. Either to retreat - or draw the logical conclusions about Big Business domination of Washington and take steps to launch an independent political party of labor. The labor officials have chosen to re-

But their act of protest against the anti-labor offensive of Wall Street and the government has set powerful forces in motion, has been widely publicized and The forceful publicity campaign which followed their withdrawal where Comrade Weiss has made from the government boards has aroused the American workers. Their demands that inflation be stopped, that wages be allowed to keep pace with living costs through nationwide escalator clauses, that Big Business domination of various boards be broken, that profiteering be stopped, etc., have developed a rising anger among the workers who back these demands to the hilt.

The same reasons which motivated the retreat of the leaders will not impel the rank and file to accept a rotten compromise.

The labor leadership is unable to fight against the war mobilization program effectively, and seeks a compromise, because it has enlisted in the imperialist war of U.S. capitalism. The workers will continue to protest bitterly the ever-increasing economic burdens of a war which they do not want.

The newly constituted mobilization board may make an attempt to reconcile the needs and consequences of imperialist war makers with the demands of the labor leaders. This cannot be done. The labor bureaucracy will be asked to accept a new version of the same Big Business program. Further capitulation on their part is bound to arouse loud and powerful opposition in the ranks of the union movement.

By making the new board responsible to him, Truman takes personal responsibility for the mobilization program from now on. It will not be so easy for the labor leaders, after they present their program through the board to Truman, to cover up his identification with the whole anti-labor character of the war plans.

Thus, the new board lays the groundwork, not for a durable "peace" between labor and Big Business in Washington, but for a renewal of their conflict. The rank and file must be on guard to see that this retreat by the union leaders is not converted into a more sweeping surrender of labor's demands.

The organized workers must press the leaders for a full and decisive break with the Truman administration. Such a complete political break necessitates an alternative political road. Unionists everywhere should rally to the proposal of a sizeable minority at the recent convention of the United Automobile Workers, which called for a National Congress of Labor to lay the foundations for Workers of the World, Unite!

It did this by tending to unite all communist tendencies inside the Soviet Union ehind the present government in order to defend Russia against imperialist attack.

Moving to the American scene Hansen referred to the Kefauver crime investigations. He said i has "only lifted one small corner of our graft and corruption. Who has the right to know about such unheard of dictatorial conduct as this General is unquestionably guilty of, if not the people of this country? Why aren't they being told? One reason is that if MacArthur is to be condemned, as he surely The White House has already deserves, then no less repre-

TRUMAN'S GUILT

But Truman's responsibility goes much beyond this. Truman usurped power by plunging into the Korean adventure without even bothering to consult Congress, let alone the people. Trunan ordered the seizure of Formosa, which is Chinese terriory and in no way connected with Korea. By whose authority can such seizure be possibly sanctioned? When his superior usurps powers, is it so surprising that one of his subordinates should feel free to act in the same dictatorial manner?

The Militant has repeatedly warned how arrogant and arbitrary the power-drunk military caste has become in this country. The MacArthur case is only the most glaring evidence of it.

MacArthur would have been allowed to continue in his own sweet way, if it were not for s h a r p tactical disagreements which now divide the ruling circles. They are divided over the timing and the choice of the place and the occasion for launching World War III.

BOSTON, April 8 - The terrible impact of the American war crisis on the daily life of the people was revealed in a pitiful murder and suicide. Mrs. Mary L. Niles, 29, deserted by her husband three years ago, killed her six-year-old son and herself by gas.

Mrs. Niles left a letter that sums up the agonized feelings of mothers living in this age of the atom bomb: "I have been pushed from pillar to post and can't take it any more. I know this is a coward's way out, so I guess I must be a coward as I am taking Robert Paul with me. I do not want him to grow up and be slaughtered in another war.

### Miners Speak Out on War

One voice among the official labor movement has finally responded to the feelings of the overwhelming majority of the American workers by demanding that the Truman administration stop the Korean war.

The United Mine Workers Journal has done this in an editorial entitled "Stalemate in Korea — And at Home" in its April 1 issue. Estimating Korea as a "Helpless and hopeless situation," in "the game of accomplishing nothing and getting nowhere," this editorial pins the blame on "our stupid diplomacy" for getting "us into the Korean conflict-which it is now evident cannot be settled on the battlefield." It then concludes that "it is up to the administration to find a way to end this unjustified bloody

To the everlasting shame of the union leadership, not one of them has dared to speak such plain and blunt words in the name of labor. On the contrary, they are covering up the Korean atrocity, and support the whole Truman war program. It is to the credit of the Mine Workers that their leadership is beginning to speak up, while the rest of the union officials provide labor "window dressing" for the Truman-Pentagon "Operation Slaughter." Not only the mine workers, but the steel workers, auto workers, along with the overwhelming majority of the American people in all walks of life, are against the bloody Korean "liberation."

What the Mine Workers Journal says is true enough as far as it goes. But its

position still remains inconsistent and inadequate. "The people just can't come to understand that our leaders were just plain dubs in the first place," explains John L. Lewis' periodical, and yet it itself goes on to leave the decision to these same "plain dubs." How can such a solution possibly teach the people about the real character of the administration in Washington? How can it help the people find a way out of this whole "unjustified bloody mess"?

It is false to the core to blame the people for the crimes of the capitalist rulers, whether these rulers happen to be "plain dubs" or fancy shysters. The way to expose and fight these capitalist leaders and politicians is to offer the people an alternative program and leadership. Otherwise to whom can the people turn? From whom can they learn?

To offer the people a real way out that is the imperative task of labor. And that is where the Mine Workers Journal fails. Instead of arousing the people, warning them not to place an ounce of confidence in the capitalist war-mongers - instead of summoning the mine workers to intervene by demanding a national referendum on Korea and all questions of war and peace, the Journal berates the people.

The people have already shown they know the Korean war is unjustified in every poll taken on the subject. Now it is necessary to fight for this majority opinion to express itself. Let the people decide! For a national referendum on war and peace!

### The Church and Franco

On March 11, 1951 the Pope made his speech to the Spanish workers "warning" them against the social revolution, just as he did on June 13, 1943 when he started making speeches to the Italian workers, "warning" them that they would only be enchained if they overthrew Mussolini.

Now comes news that "Roman Catholic leaders" in Spain are giving "powerful moral support to the workers in their demands for better living conditions."

What this "powerful support" amounts to thus far are two editorials, one published in March and the other unpublished in April. In March, an editorial against inflation appeared in Ecclesia, organ of the Catholic Action movement, intimately allied with the Falangists. The never published editorial "approving" the Barcelona general strike was to have appeared in Tu (Thou), a weekly published by the "Workers Brotherhood of Catholic Action," officially a part of Franco's "trade union" set-up.

The authorities refused to permit such "comment." So the hierarchy, instead of demonstratively challenging the ban, meekly suspended publication. These "opponents" of Franco are obviously concerned with something entirely different than the plight of the Spanish people.

The hierarchy, explains N. Y. Times' Madrid correspondent, has suddenly become "uneasy" and "anxious" over the

"close ties between church and the regime" and wants to make it clear "that the church does not accept responsibility for these shortcomings" of Franco's bestial rule.

This, too, is precisely what happened in Italy eight years ago when fearful of Mussolini's downfall, the hierarchy began criticizing the "shortcomings" — in order to salvage the Vatican's fabulous wealth in the country.

The same maneuver is today being applied in Spain. But with this difference: Mussolini's regime was never so closely identified with the Vatican as Franco's. Mussolini was never so deeply indebted to the hierarchy for his rise to power as is Franco, who had the Vatican's full support during the Civil War, and whose regime has been, as it is, exclusively Roman Catholic in character.

Moreover, the hierarchy, the biggest single landowner in Spain, holds far more wealth here than in Italy. Fearing Franco's downfall, the Vatican wants to safeguard its riches and get out from under as unscathed as possible.

Its conduct is an excellent gauge of how shaky Franco's regime really is, despite Truman and Wall Street working might and main to prop it up. Whatever happens, one thing is clear: The hypocrisy and venality of the Vatican is apparently directly proportional to the financial stake involved.

# Trends in UAW Convention

Observers in and outside the labor movement have been trying to write off the CIO United Automobile Workers as just another, if larger, union of the more conservative and bureaucratized type in the CIO and even the AFL. Since Walter Reuther took full control in 1947, introduced constitutional curbs on the membership and opposition elements in 1949 and tied the UAW to five-year contracts in 1950, it has become the fashion to describe the UAW as no longer the dynamic union it once was.

There is no gainsaying that Reuther has been a conservatizing and bureaucratizing force in the UAW. But that is not to say that the UAW, permeated with the tradition of militancy and union democracy, can no longer play the 10le of an aggressive spearhead of the American labor move-

#### NOT A PLIANT TOOL

The 13th Convention of the UAW, held in Cleveland from April 1 to 6, revealed that this largest and most powerful union in America is not the completely pliant tool of Walter Reuther and his faction. On the contrary there was evidence aplenty of an articulate and growing opposition, centered in the very heart of the union, which if organized on a basic program of progressive economic and political action, can successfully challenge the Reutherite leadership.

The Reuther machine itself in the most heated struggle of the convention, the debate over Reuther's proposed dues increase, in the regional elections for executive board members and his personal machine. in the significant full-scale discussion on the question of forming a labor party.

It is hard to imagine the leadership of any other union confronting so much opposition and having to put up such a battle in order to push through a dues increase of \$1 a month to bring the total to \$2.50. As Reuther, Mazey and other leaders almost tearfully pointed out, the UAW, which has won bigger gains for its members since 1946 than any other union except the United Mine Workers. has had the lowest dues of any CIO or AFL union. And it's no because the leadership hasn't plugged for more dues at every convention.

In order to put over the dues Reuther had to put on an all-out campaign for months in advance. to focus the entire convention on this issue, to use every form of argument and pressure on the delegates, and even to bring in lelegates, and even to bring i CIO President Philip Murray to plead for more money.

If the opposition to the dues increase was as strong as it was, that was not because the auto workers are "cheap-skates." Their generosity and spirit of sacrifice is noteworthy. But the floor discussion at the convention showed workers - particularly the larger, older, more experienced party resolution, which was also and militant locals — do not trust the Reuther leadership and have no real confidence in it, despite Reuther's big promises, "radical" talk and social demagogy.

Morris then spoke for the committee majority, laying out the line of argument that all the majority speakers were to follow. He claimed that for the UAW to go on record for a labor party would consultation" with them. He' added that "if we are going to better to do it together."

Bert Foster, speaking for the committee minority, charged that Morris had "not even read the minority report or is trying to mislead the people." He pointed attempt to launch a party on its own, but to urge "all labor to go out and do this job." He said: "We have heard a lot of talk in this convention about the rape of the Korean people and the Communists, but it's time to talk people by the Democrats and Republicans." #### YIELDS TO ANDERSON

The "unknown," a tall lanky fellow, came up to the mike and waited for silence. Then he said in a Southern drawl, "Charles Carmack, Local 15. I yield the floor to Brother Anderson." The convention roared with laughter more victories like that, and God at how Reuther had been "outfoxed." He turned red and grinmust face the facts. By the end of his talk, the applause was terrific and it appeared certain that if a vote were taken then, the minority resolution would carry. At this point, Reuther insisted on the last word from the chair to "explain the position of the officers and executive board." If there is anyone who needs proof that majority opinion does not prevail as far as government representatives are concerned, he should consider the recent attempt in New York City to block the passage of the three percent sales tax. Usually, the people are made to feel that lack of good government is all their fault because they don't use their voting privileges fully. They are berated by righteous lectures and articles telling them that if they weren't so lazy and indifferent they could make the politicians do what they wanted.

Well, this time there is no doubt about their protest being heard. Walter Hoving, the president of a large department store, threw a lot of energy into the campaign to put pressure on the Governor and the state legislature. Not that Hoving is thinking of the interests of the average citizen - but a high sales tax is bad for business.

Among other things, Hoving and his Anti-Sales Tax Committee took full page ads in the New York newspapers, pointing out that the increased tax wasn't necessary, and urging everyone to write and telegraph to Albany. The newspapers carried all of the arguments he advanced in prominent news stories. Civic organizations, trade unions, consumers' committees, and thousands of ordinary citizens were aroused into a telegram-sending, letter-writing campaign. Republican Governor Dewey of New York in a long speech which made the headlines, berated the city administration for its lack of economy, and then signed the enabling law. In doing so, he disregarded a flood of protests, and the whole thing points to a deal between him and the Democrats.

The Anti-Sales Tax Committee then concentrated on the public hearing before the N. Y. City Council held on April 6. Once again, full page ads appeared, giving name, address and telephone number of each and every Councilman. The public was urged to make itself heard. Thoroughly aroused citizens jammed the switchboards with telephone calls to the homes of the Councilmen; a shower of telegrams also rained down on these "representatives of the people." The committee had 1,000 posters printed per Councilman, and placed them in store windows

throughout his district. On the day of the hearring, 500 persons jammed into the small City Hall chamber (requests for a larger meeting place were ignored) while 4,000 pickets marched up and down outside. As usual, the police were up and down outside. As usual, the police were out in force, since any attempt at expression of public grievance always calls forth extra cops. The meeting was stormy and the opponents of Profs. Rehired public grievance always calls forth extra cops. the tax were overwhelmingly in the majority. Inspite of which, the "representatives of the people," that is to say, the Councilmen, after sitting through four hours of hearing what their constituents thought of the bill before them, announced that they were going to vote for the tax!

Furthermore, to show how much consideration they had for the intelligence of the voting public, these gentlemen had the nerve to tell quite frankly why they refused to have the proceedings televised. "The public in general wouldn't understand the figures," said Frederick Schick, Chairman of the Finance Committee. Other Councilmen said, "Television would make the same circus out of it as the Kefauver hearings.'

The average citizen is pretty dazed by now, if he really thought his opinion carried any weight. Hoving admits that the sales tax increase is sure to be passed. But he has some advice to give; he says that all the officials concerned will be defeated at the next election, and then the public will get its revenge. But there's one thing that isn't clear. What party is the average citizen going to vote for? If he replaces the Republicans in Albany with Democrats, and the Democrats in the N. Y. City Council with Re-special pledges from all profespublicans, will he be any better off? Should he send Democratic Mayor Impellitteri to the Gov- state, including doctors and ernor's Mansion in Albany and bring Republican Tom Dewey to the Mayor's Mansion in New York City?

Riding this Democratic-Republican merry-goround is not going to stop such measures as the three percent sales tax. But there is an alternative by which the average citizen can really exercise his voting rights.

The people of New York and all the rest of the country will have real representation at last when they form a labor party that will act in the interests of the overwhelming majority of

#### Unemployed Robbing the

New Deal, Fair Deal and Welfare State are now words of interest only to the students of history. By means of a few reforms, concessions and benefits the capitalist rulers of America were able to stagger through two terrible decades of depression and war. Today with the very existence of the profit system threatened on a world scale as never before, big business has launched a national offensive to beat down the living standards of the American workers, destroy hard-won reforms and undermine their or-

New York, where the air hangs heavy with the stench of newly uncovered graft, fixes and corruption, is a good spot from which to observe

The N. Y. legislature, with Dewey and Wall Street guidance, murdered rent control, raised phone and utility rates, tightened the loyalty purge of state and city employees. But the bill that sneaked through with the least publicity, one that will hurt thousands now but will scald millions of workers when the boom is over and the bust begins, is the Hughes-Brees unemployment insurance bill.

Standard Oil, General Motors, the utility, banking and huge insurance companies pushed through this bill. When Dewey signs it, they will legally steal \$600 million from the workers of New York. This money will be theirs out of the \$900 million now in the State Unemployment Insurance Reserve Fund.

Heretofore, this fund which belongs to the workers has been pooled in one big state-controlled trust fund. The bill destroys the fund and divides the major part of it among "selected" employers. The bulk of it will go to the largest

A checking system will be substituted for the fund whereby every benefit check a worker gets will be charged against his boss's individual account with the state. Each employer will be taxed according to how much unemployment

benefits are paid to his workers. The lower the benefits, the lower the employer's tax. Can you see how this is going to work? Every boss will be opposed to every single claim filed by his workers. Workers will now get hearings instead

An employers' victory is practically guaranteed in another provision of the bill. It states that before a worker gets any benefits he must have 20 weeks of employment in a base period and he must have "average weekly earnings" of \$15. Raising the benefits to a \$30 per week top, the one feature of this anti-labor bill publicized widely in the capitalist press, becomes meaningless. The above provision will drive thousands out of the unemployment insurance system, especially during economic decline. The use of an "average weekly earnings" formula is certain to lower benefits. An employer will try to call in a worker for a few hours work solely to drive down the workers' average and lower his benefit rate and in that way lower the tax.

The giant corporations haven't dared to kill unemployment insurance directly. They are slaughtering it piecemeal, making sure of its total ineffectiveness.

The New York State CIO Council and the State Federation of Labor have united to expose and fight the Hughes-Brees bill. The Wall Street offensive has driven labor together locally as well as nationally. Their program for leading the struggle against the bill must be sharply criticized however. Worker support limited to upholding the past unemployment insurance system will be at the most unenthusiastic. They are aware of the inadequacy of that system; the long hungry wait before payments begin, the pitiful low benefits during a raging inflation and the short period of payments. To rally labor in a counter-offensive this program must be replaced by the one proposed by the Socialist Workers Party: trade union wages for all workers for as long as unemployment lasts!

LOS ANGELES, April 8 Branding the anti-Communist loyalty oath demanded of University of California employees as a forerunner of tyranny and oppression," the State Appellate Court at Sacramento Friday unanimously declared the pledge

The court ordered the Board of Regents to rehire 18 professors who were fired for refusing to sign the special non-Communist statement.

This action raises doubt as to the fate of other "loyalty" laws now being enacted in California, particularly the Burns bill, a sweeping measure demanding sional people licensed by the nurses.

EXCEEDED AUTHORITY

The court found the regents had exceeded their authority in demanding any oath other than the 100-year-old one taken by all state officers.

The opinion stated: "We are seenly aware that equal to the danger of subversion from without by means of force and violence is the danger of subery pillars of our freedom...

The opinion brings to a climax the first court test of the loyalty cath issue as applied to the University. The dispute, which commenced a little over a year ago when the regents first demanded the pledge, has spread to academic circles throughout the country.

Last June the regents discharged 157 employees for failure to sign the oath. There has yet been no indication whether or not the regents will carry the case to the State Supreme Court.
