Preceding Mrs. Barclay on the stand for the defense was the noted criminal phychologist and author Dr. Frederic Wertham, who recently was psychiatric consultant for the Kefauver Committee. He explained to the jury the frame of mind of members of the oppressed Negro race in the hands of white police and how such prisoners could be broken to the point where they would "confess" to anything the police desired. Wertham noted that the race pattern continued in the courtroom itself: "All the jury members are white, all the defendants are colored."

People Must Not Trust Rumors of 'Cease, Fire'

Once more the rumors are flying of a pending "cease-fire" in Korea. Similar "peace" rumors have been spread every few weeks since the disaster of MacArthur's "home-by-Christmas" offensive last November. The latest batch have been given added weight by UN Secretary General Trygve Lie's bid for a "cease-fire" agreement.

But the slaughter in Korea continues with undiminished savagery. The casualties are piling up every day. The U.S. generals boast of their "killer operations" and U.S. bombs and shells continue their deadly rain upon the Korean people and what's left of their homes.

Are the rumors true or false? Whatever is happening, whatever negotiations may

THE WRITER AND THE PEOPLE

John Brooks' novel, The Big Wheel, tears aside a curtain to reveal the methods by which a big news magazine selects and slants the news, and phonies up its presentations of culture, with the prior aim of molding public opinion in favor of the social system which exploits the many for the profit of a few. And Present Day, the magazine of Mr. Brooks' story, is only one wheel in the gigantic mechanism of the American press, all parts of which are coordinated to the same purpose.

In the United States of America the press is absolutely free. That's what the Constitution says. But there's a catch to it. All the instruments and agencies for the dissemination of news and opinion — the big magazines and newspapers, the motion picture companies and radio and television stations - are owned and controlled by a small minority of the rich and privileged and used to serve their special in-

They differ in their methods and techniques. Some are crude and vulgar; others are slick and subtle. Sometimes they argue and quarrel over secondary issues. But on the main questions of social implication they all tell the same story and sing the same song. The world of capitalism is the best of all possible worlds, sacrosanct and unchangeable. Its true name is "Free Enterprise," the national poetic version of which is "The American Way of Life." This way of life has the unique distinction of being good for everybody, for the majority of the exploited as well as the minority of the exploit-

FACTS ABOUT FREEDOM OF THE PRESS

Of course, you are free to dissent if this contention violates your sense of logic and knowledge of the history and prehistory of man, or contradicts your personal interests as one of the exploited. You can even write an article to this effect if you want to. But you can't publish it in any of the monopolized publications which reach the millions. That's the gimmick in the formal, constitutional freedom of the press in the United States as of today. This kind of free press is 99% fraud. There is no honest, objective reporting of all the news. It is all one-sided. There is no real free play of opinion and controversy. No real freedom of choice.

In face of all the systematic misinformation and calculated demagogy with which the people are bombarded by the monopolized press, how will they ever learn the truth and find the means to act on it in their own interest?

The struggle between the truth and the lie appears to be an unequal one at this stage of the game, and to some it may appear to be a hopeless struggle. But that is not really so. The truth has great allies. The falsifiers and distorters of social reality overlook one small detail: The reality does not therefore cease to be. Sooner or later the contradiction between the misrepresentations and the reality must lead to an explosion.

Inexorable economic laws, stronger than any specious propaganda, are working to push the masses of the people on the road to struggle for a social transformation as the condition for their own survival. Moreover, the instinctive striving of the great majority for cooperation and equality, inherent in the nature of the human race, as demonstrated in tens of thousands of years of prehistoric society, is working powerfully to counteract, to negate and eventually to conquer the propaganda lie. The truth will break through. And the truth itself is revolutionary.

In their search for the truth and the road to emancipating action, the people will need the help of the writers who are to come from the younger generation of uncorrupted intellectuals. Let them serve the people and scorn all special privileges for themselves. Let them take for their own the affirmation of Whitman: "By God, I will not have anything for myself that others cannot have on even terms."

IN THE SERVICE OF HUMANITY

The writer, the artist and the scientist, the soldier and the revolutionist in this time they should all be of one order, dedicated to the service of humanity. What need have they of softening luxuries and burdensome impedi-

I read somewhere that a famous scientist -I think it was Einstein - early in his life decided to reduce his personal requirements to the essentials - clothing for utility, plain food, one room to work in and one bed to sleep in, no foolish extravagances — so that his time would not be devoured and his life cluttered up with things and the pursuit of things he didn't need, and which might distract him from his scientific work or tempt him to abandon it for a better-paying occupation. I think it was a good decision.

Ours is a time of wars and revolutions, and we should not be alien to our time. Soldiers and revolutionists must travel light. And so, too, must their brothers, the artists and writers, if they want to be free to employ their gifts to serve the people, and not to fool them and

The world must be transformed. It would be unrealistic to deny the immensity of the task and to discount the heavy odds against us at the moment. But it would be absurd to abandon the battle on that account, for the stakes are great. They are nothing less than the survival and further progress of the human race. That justifies and even necessitates the struggle.

A LIFE WITH A PURPOSE

The hazards and penalties for the pioneers can be heavy, but the end in view is worth whatever it may cost. And even under such conditions the compensations of the struggle are not to be despised. They are the satisfaction of devoting one's life to an honest purpose; of identifying one's personal fate with the fate of the whole human family. Those who avow the nobility of this ideal, and serve it - their lives shall not be lived in vain.

The world is in agony, and the great majority of the people everywhere live in poverty, insecurity and fear, because of an outlived social system propped up by lies. The overthrow of this bankrupt system of capitalism is historically necessary and even overdue, and therefore inevitable.

By our efforts we will hasten the day. With our help the truth will knock out the lie, and bring freedom and equality to all the people in the socialist society of the future. That's what we believe, and that's what we're fighting for. — J.P.C.

LED CAMPAIGN

When the London conference set up the Campaign Committee for the calling of an Emergency Conference of the Labor Party, Karl was appointed secretary. Under his lead, the campaign developed very well. No doubt, had he lived, he would have had to face heavy attacks from the right wing, but he was well equipped with natural talents to deal with these. His real strength lay in his workingclass approach to problems. He was a Marxist and therefore essentially internationalist. For him the slogan of "Workers of the World, Unite" was no idle one.

All his thoughts, works and deeds were based upon the facts that only the actions of the International Working Class can solve the problems posed by capitalism and insoluble under capitalism.

Many people accepted the logic of his arguments, but lacked the spirit to carry them out-the road to socialism is not an easy one and only the strongest hearts are capable of leading the workers along it.

Let us raise the banner of internationalism high in our movement-this will be the finest tribute we can pay to the memory of a gallant comrade, a staunch friend, a leader of men - Karl

Besides, the Twin Cities aren't exactly coasting in that second place. As a matter of fact they were just waiting for that comtle. Now with the home stretch opening up they'll show what they can do. But let Winifred of St. Paul take over: "We received the wonderful news of New York's success today, and we're very pleased with the wonderful spirit New York has shown. It's wonderful!! Not that we intend, here in the Twin Cities, to let you walk off with the honors there in New York. You can expect some heavy work here in the next week."

And P.S. of Minneapolis adds: "With only a few weeks left the comrades are really going all out, as you can see from the spurt the Twin Cities have put on this week. When we think that our score means that over 10,000 copies of The Militant will be in the hands of workers in this area, we know THE MILITANT IS THE WINNER!"

"The Jewish Question" **A Marxist Interpretation**

What They Thought of the Book in France:

"One of the most beautiful examples of history explained with the aid of historical materialism." - Repertoire de la Documentation Politique, Economique et Sociale.

"The truly historic importance of this work obliges us, in the interest of the discussion which is bound to be excited, to analyze it in detail." (In contrast to the ordinary approach) "one appreciates the immense contribution toward scientific clarification which the work of A. Leon represents."-Theo Bernard in Revue Internationale.

"A. Leon. . . . provides us with an altogether remarkable handling of the problem." — G. S. in Force Ouvriere.

"He left a book which proves his worth as a Marxist analyst. Rejecting any idealist explanation of the preservation of Judaism, he demonstrates that it survived because 'Above all the Jews constitute historically a social group with a specific economic function. They are a class, or more precisely, a peopleclass.' This affirmation is based on a documented study of the entire history of the Jews. . . . It is of such importance in our times that no militant can dispense with reading the book of A. Leon." - Jean Marcel in Front Ouvrier.

What Imperialists Fight For

Washington's biggest lie is its claim that this country is warring in Korea and preparing to fight everywhere else in order to halt "aggression" and "totalitarianism." There is but one reason for U.S. intervention in Korea and preparations for still greater war: To defend the capitalist private profit system.

What the rulers of America feared above all else when the civil war began in Korea was the North Korean threat to the capitalist-landlord rule represented by the Syngman Rhee regime and the North Korean program for the division of the land among the poor peasants and the nationalization of industries.

American imperialism is most sensitive to whatever threatens capitalist rule, profits and privileges anywhere, and particularly where foreign investments of the monopolists are concerned. It reacts like a man sitting on a hot stove whenever there is a move in any country to nationalize industries and property.

The real aims of American imperialism were revealed nakedly in the case of Iran when that country's capitalist government voted to nationalize the Iranian oil industry which British capitalists had managed to grab. This was not a matter of "communist aggression." It was simply an act by a sovereign government to retain possession of the valuable resources of its own country. But Washington has intervened with threats and pressure to halt the nationalization.

Now we have another illuminating example of what U. S. capitalist foreign policy is based upon. That is the reaction to the announcement of the new Indonesian Government that it intends to institute widespread nationalizations. On June 4, a few days after this announcement, the N.Y. Times published a scarcely-veiled threat to Indonesia not to carry out its plans.

These plans, says the Times, which speaks for the most powerful section of American Big Business, are "not reassuring" and "offer the possibility of further tension in the critical area of Southeast Asia." It warns that "it would be wise for the Indonesian Government to move

Their Lies About Formosa

The American people are being told by both the MacArthurites and the administration that Formosa is absolutely vital for "U. S. defense," that to safeguard peace it is necessary to safeguard Formosa, that under no circumstances can Formosa be "given up," etc. Not so long ago, for almost two years-from October 1948 to June 1950—the American people and the whole world were told just the reverse. This is proved irrefutably by an official state department document, a "policy information paper" on Formosa issued in Dec. 23, 1949 and read into the minutes of the Senate hearings on the MacArthur ouster over the bitter protest of Secretary of State Acheson.

This highly revealing and hitherto secret document sets down the previous official policy on Formosa. It denies that the U.S. has or will assume any "responsibilities or obligations, actual or moral" in connection with Formosa and brands as "false" that "the U.S. is responsible for or committed in any way to act to save Formosa." It flatly denies that Formosa has any "special military significance."

"Formosa, politically, geographically and strategically, is part of China in no way specially distinguished or important. ... Politically and militarily it is a strictly Chinese responsibility," emphasizes this document.

The only "insistent demand" that U.S. take "military action" in connection with Formosa, this document takes note, has come from "a few sources" but, it is hastily added "it has not assumed significant proportions."

Intervention was ruled out on several counts, among them because this would:

"B. Involve the U.S. in along-term venture producing at best a new area of bristling stalemate, and at worst possible involvement in open warfare;

"C. Subject the U.S.... to reaction against our 'militarism, imperialism and interference' even from friendly peoples, and particularly from Chinese, who would be turned against us anew."

The repeated theme of this document is that intervention in Formosa would only play into the hands of the Kremlin, helping "brand U. S. with the mark of aggressive imperialism, and also hoping to get us involved in a risky and unpromising venture.

Acheson sought to suppress this document on the grounds that it "could have a damaging effect" abroad. What he and his colleagues fear just as much is the "damaging effect" right here at home when the mass of the people awaken to the fact that on top of the Korean adventure they have been "involved in a risky and unpromising venture" in Formosa which had been previously barred by the Truman administration itself on all grounds, moral as well as political. geographic as well as military.

When the true history of our times is written it will be recorded, among the outstanding features, that never did so few lie deliberately so much to so many. Not all the big liars are in Moscow, there is a full quota in Washington. This has been established beyond doubt by the Senate hearings on the MacArthur

blame for the heavy blow struck at the rights of the American people by the Supreme Court decision in the case of the 11 Communist Party leaders convicted under the Smith "Gag" Act.

They hailed the prosecution, conviction and imprisonment of 18 leaders of the Socialist Workers Party and Minneapolis CIO truckdrivers under the very Smith Act of 1940 that the Stalinists later - and correctly - charged was a violation of the Bill of Rights when applied to them-

They aggressively opposed and tried actively to sabotage the campaign of the Civil Rights Defense Committee that won the support of unions representing five million members to the defense of the 18 Trotskyists imprisoned in 1944 under the Smith

By thus discouraging widespread popular support for their case, the Stainists made it that much easier for the government to prosecute them successfully under the Smith Act and for the Supreme Court to uphold the Act.

The attitude of the Stalinists oward the Smith Act imprisonment of the Trotskyists is represented by this typical sample from the Daily Worker, in a June 6, 1944, editorial attacking union eaders who supported the campaign for pardon of the Trotsky-

The Negro Struggle -

NAACP Parley And the Issue Of Political Action

A major problem for consideration of the delegates to the 42nd convention of the National Association for the Advancement of Colored People, when they meet in Atlanta the last week of this month, is what to do next in the struggle for fair employment

The basic question is political action. The record on FEPC since the last convention on both national and state levels is one of failure. Of the 17 or so states in which eral sentiment and provided a free of the domination of Dic- bills against discrimination in employment were introduced, only pretext for many to refuse to tator Daniel Tobin, head of the one, Colorado, is reported to have passed such a measure. In the important industrial states of Michigan, Illinois, Pennsylvania and helped to alienate many labor 11. Thus, the Stalinists helped secution of the 18 violated both Ohio the bills were killed — in most cases in committees that refused

even to report them out for consideration of the legislature. In California, typically, the bill was defeated in committee by 15 to 3 vote after vigorous opposition by spokesmen for the Los Angeles Merchants and Manufacturers Association and the San Francisco Employers Council.

On a national level the record of failure is better known. Despite conferences in Washington initiated by the NAACP, lobbying, visits to Truman and other administration heads by the most respectable Negro leaders, and innumerable letters to Congressmen, the record of the 82nd Congress on FEPC and civil rights legislation generally is such a complete zero that Walter White has labeled it a "wilful sit-down strike against civil rights." As for the President, the NAACP stated editorially in the

"To Negro voters it begins to appear that Mr. Truman is turning his back on his previous pleages. Nor escape responsibility for the failure of congressional Democrats to take the ball. Negro voters are going to hold Mr. Truman and Congress to strict accountability on this issue."

The question is: What will the NAACP convention do about it? Repeat the ineffective reprimands of the Boston convention of last year? Or take the defeatist line of the Pittsburgh Courier editorial of May 19 that since "favorable action can scarcely be expected" on job discrimination, it "might prove more fruitful" to concentrate on abolition of segregation and discrimination in interstate transportation, the national health program, education and

NAACP delegates who mean business in the fight for equal job opportunities for Negroes do not have to accept either of those alternatives. There is an effective way to fight for FEPC and for jobs, and that is through independent political action. Not the kind of "political action" the NAACR has been carrying on. Not a lot of fancy footwork between the Democrats and Republicans. Threatening the Democrats with the Republicans and vice versa gets the struggle nowhere. Tht capitalist parties are old hands at that game: They don't fall for bluffs by leaders without a real mass

There's just one thing that makes capitalist politicians sit up and take notice - a strong political force. The only partial gains made for Negro political representation this year were in a number of localities where a concentrated Negro population threw its weight behind Negro candidates. In municipal elections last month, for example, six Negroes won councilmanic seats: Charleston, W. Va., elected three; Nashville, Tenn., one, the first in 30 or 40 years; Greensboro, N.C., one, the first Negro ever elected there; and Fayetteville, N.C., re-elected one.

THE MILITANT

Only in a non-Catholic country like the U.S., where most workers have little knowledge of the Vatican's policies, could union leaders like Philip Murray and James Carey of the CIO get away with the public praise of the Papal encyclicals on labor.

The predominantly Catholic working-class of France, for instance, has rejected for 60 years the injunctions of Pope Leo XIII's "Rerum Novarum" to have nothing to do with socialist ideas and class struggle and to belong only to Catholic unions controlled by the priest-caste.

Most Italian workers, almost all born Catholics. would hoot at Murray's words, reprinted in the May 21 CIO News, that the workers of America and the world "owe a debt to the memory of the two great Popes" whose encyclicals on labor were celebrated last month. They would be incensed particularly at praise for Pope Pius XI's 'Quadragesimo Anno" which endorsed the program of Mussolini's "corporative units."

The noted British Catholic, Christopher Dawson, who was named one of the "forty contemporary immortals" in the Gallery of Living Catholic Authors, said of the encyclicals hailed by Murray and Carey:

. . . There seems to be no doubt that the Catholic social ideas set forth in the encyclicals of Leo XIII and Pius XI have far more affinity with those of fascism than with those of either liberalism or socialism. In the same way, it is clear that Catholicism is by no means hostile to the authoritarian ideal of the state. Against the liberal doctrines of the divine rights of majorities and the unrestricted freedom of opinion, the Church has always maintained the principles of authority and hierarchy and high conception of the prerogatives of the (Religion and the Modern State, p. 134, Sheed and Ward, 1935.)

Leo XIII, in his famous encyclical, decreed as "God's Truth" that "the inviolability of private property" must be "our first and most fundamental principle" and ordained that all existing classes must remain fixed like those of feudalism under the medieval church-state. "Let it be laid down. . . that humanity must remain as it is. . . There naturally exist among mankind numerous differences. . . and unequal fortune is a necessary result of inequality of condition." Such inequality "must accompany man so long as life lasts." Therefore, rich and poor do not form classes "intended by nature to live at war with one another. . .

The "non-class" propaganda of American capitalism would have us believe that "everyone" in this country has a chance to better himself and rise above the class into which he was born. The Catholic doctrine upholds the feudal concept of hereditary class position, that everyone is born to a fixed, "natural" class and must remain in his class. This is the doctrine that capitalism it-

self openly espouses when it institutes fascism. When people like Murray and Carey refer to Leo XIII's encyclical as "a bold demand for justice, charity and decency in economic affairs" (CIO News, May 21), they usually mean the section where the Pope conceded that workers are entitled to a "just wage." Leo XIII said further that "wages ought not to be insufficient to support a frugal and well-behaved wage-earner." Thus, "just" wage is only what is required to

keep a worker alive and fit enough to return to work the next day - provided he is "frugal" (doesn't spend a cent on recreation, education or

The "special syndical and corporative organizations" which the Pope put up as a model were, of course, the "corporations" set up by Mussolini; the "unions" were the government-controlled industry councils run by the Fascist labor bosses. The "advantage" was the defense of capitalist profits through the ruthless suppression of independent unionism.

When CIO Secretary-Treasurer Carey said that "I believe that the programs of our great labor organizations on this continent reflect the teachings of the papal encyclicals," including the one cited above, he slandered every genuine union, including the CIO, as fascist - or rather, he tried to equate the fascist program of the Vatican to the anti-fascist, pro-labor program of the CIO.

Union engineer Francis B. Yentzer, 61, gives his version of the wreck of the Pennsylvania Railroad corporation's Red Arrow passenger train to William J. Patterson of the Interstate Commerce Commission. Yentzer, shown here in his hospital bed in Bryn Mawr, Pa., was one of 62 injured in this latest murder-forprofit wreck on a Pennsy line. Eight were killed.

This is the fifth horrible accident involving Pennsy trains since Feb. 1950. Four previous wrecks, all due to lack of automatic safety devices and unsafe practices, took a toll of 248 passengers and crew members killed and more than a thousand seriously injured.

Macy's chief competitors, Gimbel's in Manshortages, there is the unexpected threat of glut sage of this measure would make country, you must then conclude hattan and Abraham & Straus in Brooklyn immediately followed suit. By the end of the week the "price war" had become citywide and from all indications is spreading to other parts of the country.

While the big city department stores have been catching the headlines, by far more serious general price cuts have also been announced by the mail order house of Sears & Roebuck,

The catch-phrase "price war" is new but the device is an old one. It is the moth-eaten "loss leader" dodge whereby customers are attracted by selling one item or more at cost and sometimes even at a loss. In the process merchandise which has piled up on the shelves and in the warehouses, is unloaded.

How much merchandise has piled up in the hands of the retailers, from the biggest to the small fry, no one really knows. Conservative estimates are that retail inventories are onethird and more above "normal." This is as large. if not larger, as they would be in expectation of boom sales, such as in the pre-Christmas season.

It now turns out that by far the biggest "panic buyers" since Korea have been the profitmad merchants, who loaded up in expectation of the kill, speculating on widespread shortages that would result from the stepped up militarization program and the Korean hostilities.

The retailers are not the only ones who are loaded. So are the wholesalers; so are the manufacturers. "Manufacturers' inventories are up, too - 29 percent more than a year ago. They're going to want to move goods, also," reports a Scripps-Howard survey.

The overall picture is that for every two items, a year ago, there are three items today clamorall along the line.

At the same time, the volume of sales has been disappointing. Since the beginning of the ed, the measure was supported which provides only mild powers year, retail trade has been running only slightly by Communist and subversive of supervision and enforcement ahead of last year's figures; and the first quarter of last year saw retail sales dip to danger levels. It took Korea to bring them up, and after a brief splurge, they then started sinking again. political capital by sponsoring discrimination, and have the police held no particular animus were still held incommunicado The whopping price increases coupled with the vast speculative buying of the manufacturers, wholesalers and retailers tended to obscure the actual drop in physical volume of goods sold over the counters.

But that drop has been steadily making itself felt. The abnormally swollen inventories tended to grow even larger. For in the meantime, mass purchasing power had been savagely slashed by lican platform. "But," he added, soaring prices and ruthless taxation. The switchover to war production, enormous as it has been, proved insufficient to bridge this gap between dwindling mass purchasing power and a flow of consumer goods at approximately the same levels as prior to the militarization program.

Having waited for a year for shortages to develop, the profiteers now see no prospect of shortages until, at the earliest, by fall. The existing top-heavy inventories - with supplies ample for several months ahead - make this almost a certainty.

To crown it all there is the "peace scare" which has been causing jitters in the stock and commodity markets in recent weeks. And so, finding themselves loaded to the rafters, one section of the monopoly profiteers have decided to play it safe and to unload as much as they can, at "bargain" prices, in most cases still appreciably above those before Korea.
