Isn't it time the voice of the people was heard in our land on the question of war and peace?

Everybody except the people has had his say. The Senate investigators have listened for hundreds of hours to the brass hat militarists, the boss politicians and the whole crew of capitalist lackeys who are merely the puppets of the war mongers. They have filled volumes with their testimony — and what have they said?

They all say the same thing — war! But the people, the workers like you and your shopmates, and your neighthe majority of the people are opposed to this war.

In the first place the war in Korea was ordered by Truman without any authorization. Who gave him the the Trenton Six case has conright to dispose of the lives of our youth? In the second demned two innocent young men place, the Congress in the most spineless and cowardly to imprisonment for life. Not bemanner permitted this brazen usurpation of authority. It's cause of any crime they comall too clear that the whole show is being run by that tiny percentage of the population, the big business imperialists.

A Fundamental Right

The Militant has been saying for a long time that if the people have any rights this is the fundamental one to decide the life and death question of war or peace. We suffering from malaria and a don't believe that the capitalist "statesmen" are wiser rheumatic heart, and Ralph than the people. On the contrary we think they are sold body and soul to the Wall St. money kings.

If you agree with us and you want to do something about it there is much that you can do. Join the fighting group of Miltant Builders, get this paper to your friends and shopmates, fight with us to:

- 1. Stop the war now. Don't let it spread!
- Withdraw all American troops from Korea!
- 3. Recognize the government of New China!
- 4. Let the American people vote on the issue of war and peace in a national referendum!

Militant Campaigner-

N.Y. Builds Lead In Sub Contest.

-By Joseph Hansen, Business Manager -

The New York Local of the Socialist Workers Party this week rolled up its highest weekly score so far in the Big League Militant Circulation and Sales Campaign. A total of 3,305 points put the New Yorkers well ahead of the Twin Cities, who were threatening last week to recover their earlier lead. (One point is scored for each paper sold; 26 points for a six-months subscription; 52 points for

Total subscriptions for the campaign now stand at 1,690; sales

Detroit, for the second week running, made an impressive showing, scoring 1,847 points and moving closer to the Twin Cities. Detroit started neck-and-neck with Los Angeles but at the present rate may double the Californians' score.

In the Konikow League, Boston moved into third place, pushing Philadelphia down to the fourth rung. Newark, scoring one of its best weeks, continued to hold second place.

In the Kujac League, Akron again forged ahead, cutting down Oakland's lead to a bare 16 points.

Among the national pace-setters, Ernie D. of Detroit moved up another notch to capture fourth position in the Coover League. And in the Konikow League, Belle of Boston challenged the lead of Emmett of Flint. As we observed last week, it's still anyboy's guess who will win the grand prize in each league of a trip to New York and week's vacation, expenses paid.

New York's excellent showing this week will, we hope, set the pace for the last days of the campaign which closes July 1. Let's put the throttle down to the floor boards!

(More about campaign in "Militant Army" on page 2.)

THE MILITANT

PUBLISHED WEEKLY IN THE INTERESTS OF THE WORKING PEOPLE

Workers of the World, Unite!

Vol. XV - No. 26

NEW YORK, N. Y., MONDAY, JUNE 25, 1951

PRICE: FIVE CENTS

'Pay As You Go' Makes Labor bors, the housewife who talks to the woman down the street while shopping, the students, the GI and his girl friend—they don't want this war. You know this without the conclusive evidence of the poll takers who admit that the majority of the people are opposed to this war.

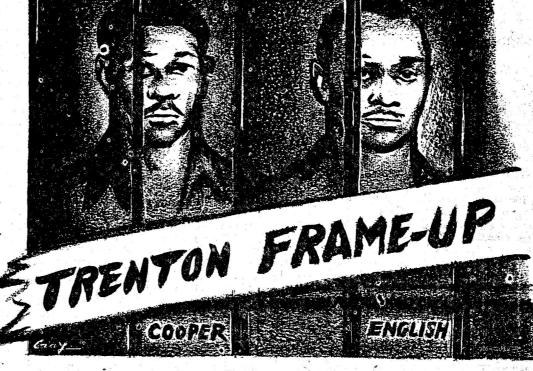

And who fights this war? Who dies on the battlefields? Who sweats in the factories? Who pays for the whole mess—if not the working people? Don't you think Free the Trenton Two I Truman Democrats, Douglas And Moody, Back Rent Steal;

mitted but because they happen to be Negroes who were subjected by a brutal police and a ruthless prosecution to a frameup as flagrant as any committed in the South. The two victims found "guilty" on June 14 are: Collis English, 25-year old navy veteran

Both have already spent three years in jail under the shadow of the electric chair along with the four others who were finally freed. Three times these six voung Negroes were brought up before the "bar of justice." The first time all six were found guilty and sentenced to die. This conviction was reversed by the State Supreme Court as a "judgment tainted with error" and "against the plainest principles of justice." The second trial ended in a mistrial. Now the third and longest trial in New the freeing of four and the sentencing of the two.

Labor Leaders Keep Silent

Congress is moving up its heavy legislative artillery for a two-pronged offensive on the American people's standard of living. Democratic and Republican legislators

have joined forces at the nod of ? Big Business in moves to demolish price controls and rent ceilings and to invade wage - earners' ncomes with the third income-tax boost since the start of the Korean war.

Truman's feeble and purely ritualistic appeal on June 14 for 'strengthened" price and rent controls was promptly met in Congress with moves to eliminate scheduled price roll-backs on meat, clothing and a host of other commodities and to boost residential rents at least 20 percent. At the same time, the new tax bill is being pushed through the mill to raise withholding taxes another 121/2 percent and to slap big sales (excise) taxes on hundreds of necessities.

HALT ROLL-BACKS

While the meat packers and big cattle ranchers were holding back beef supplies in an attempt to the so-called "fair deal" Demofor every one of the defendants. demands, the House and Senate drastic rent boost was supported The crying injustice of the case Banking and Currency Commit- by a majority of the Democrats of the original Trenton Six has tees have approved measures on the committee, while the now been compounded by the case prohibiting price roll-backs on Republicans opposed the rent hike beef which the price control ad- on the grounds that it was 17% ization and individual seriously ministration had ordered to take

WHAT GOES ON HERE?

Having nothing else to do one day last week, and being in need of diversion, I abstracted myself from reality and took an imaginative journey into the realm of fantasy. In a sort of a trance I played the part of a sucker who believes everything he hears from Washington about our cold war propaganda campaign for truth, as well as democracy, freedom and all that sort of thing. In the euphoria of delusion I was feeling as fine as any fool in love with his own ignorance and credulity until I started to read the testimony and cross-examination of Secretary of State Acheson before the Senate Committee. Then I suddenly woke up with a headache and a hang-over.

In my day dream I had been convinced - because I had been told — that our Seventh Fleet had occupied Formosa in order to defend it against any imperialistic aggression from the Chinese, who for some incomprehensible reason think the island belongs to them, and incidentally because its control is of decisive strategic importance to the defense of our homes and firesides. But the hearing brought out a previously secret document of the State Department, a policy guide sent out to 552 American representatives abroad - dated Dec. 23, 1949 which stated the exact opposite. Referring to Formosa, this 1949 memo deprecated "the mistaken popular conception of its strategic importance to United States defense in the Pacific," and denied that the U.S. was "committed in any way to act to save Formosa."

Now, what goes on here? And which is which? Has our policy changed in its objectives, or has Formosa changed its location, or what? The answer, as it came out in the testimony of Acheson, is that nothing is new. Our policy is just what it was in 1949, and Formosa is still there in the same place. The two different and opposite statements of policy were meant to serve two different purposes. One was a directive to the Navy for action to carry out U.S. policy. The other was an instruction to 552 foreign representatives for their guidance in talking about it in public statements and radio broadcasts. Just listen to the testimony, reported in the New York Times, June 4:

Senator Knowland, questioning Acheson, said, "This paper (the 1949 memo) clearly enunciated the policy which we were following in regard to Formosa." No, explained Acheson, ". . . this paper is a direction to people making broadcasts how they should deal with these problems in the event that Formosa falls."

Then Senator Sparkman intervened with a question right to the point: "And this paper was issued primarily for the purpose of direct, ing or giving direction to those of our people scattered all over the world who were in charge of what we might call propaganda?"

Acheson: "That is correct sir; yes." Sparkman: "And was limited to that?" Acheson: "That was the sole purpose."

Sparkman: "And at the very time that was issued, we were actually supplying arms aid to the Nationalists on Formosa?" Acheson: "Arms aid, yes, sir."

So! We now have it down in black and white in the sworn testimony of the Secretary of State that the United States Government was doing one thing in Formosa all the time and secretly instructing its representatives to say the opposite. Did you ever hear such two-faced hypocrites and brazen liars in all your life? For my part, I'll never believe another word they say even in my sleep.

There are two odd footnotes to this story. The Associated Press reports that Moscow propagandists, who can lie on their own account faster than Count Turf can run, have cited Acheson's testimony as proof that the U.S. Government is "playing a 'dirty game' in Asia" and "'pursuing a false and dishonest policy' toward Formosa, Communist China, and also in Korea." This time even the Moscow liars told

And the Social Democrats, those unofficial agents of the State Department, who in their own right rank in the order of liars as habituals, first class, also took the occasion to experiment with an honest statement of facts by remarking in the New Leader under the by-line of Washington correspondent Robert Dean:

"The Secretary of State had elaborated a necessary distinction between policy and propaganda, but had also put on the record the obvious fact that the U.S. was, at times, doing one thing and saying another - as all countries do. We were minimizing the strategic necessity of Formosa, and denying that we were holding it up, to guard against the possibility of the island's falling, at the same time that we were,

in fact, sending arms." The moralistic New Leader reports these unadorned facts with neither sorrow nor anger. "The U.S.," as it says, "was, at times, doing one thing and saying another." But that's O.K. with the New Leader. Why make a fuss about it? After all, we are only doing what "all other countries do." Can you think of any better reason for double-dealing? Hold steady, boys. We'll lie our way to peace and freedom yet.

The Power of the Asian Peoples

One fact of the Korean war overshadows all others: Armies of backward Asian peasants have withstood the military might of world imperialism for a solid year. This is a world-shaking development that no explanation of imperialist statesmen and militarists can minimize.

The peoples of Korea and China are just emerging from a century of imperialist domination and exploitation. They have scarcely been touched by the industrial age. Their productivity is less than five per cent of that of the United States. The average individual income in China is \$23 a year — in America more than \$1,700.

By all previous standards and experiences, the U.S. forces with their tremendous superiority of fire-power tanks, artillery, bombers — should have smashed the North Korean and Chinese armies within a few weeks or months. Instead, for most of a year of savage warfare, the forces of imperialism have been on the defensive and twice have stood on the brink of complete defeat.

What is the reason for the astounding resistance and fighting powers of the Chinese-North Korean forces?

The claim that these armies "overwhelmingly outnumber" the U.S.-UN-South Korean forces is strictly phony. Robert S. Allen, N. Y. Post columnist, revealed on June 14 that the imperialist

armies number 585,000, including 285,-000 U.S. troops, 250,000 South Koreans and 50,000 British and others; the combned Chinese-North Korean forces number 610,000 maximum. U.S. News and World Report of June 22 places the total of U.S. forces in Korea — ground, air and naval — at 675,000.

The "secret" of the amazing military struggle put up by Asian peasant armies can be reduced to two words - revolutionary fervor. They are waging a revolutionary war. They are imbued by great revolutionary aims - freedom from foreign domination, national independence, land reform, nationalization of industries. That is why they can sustain terrible losses and still fight on.

On the other hand, we have heard continuously of the low morale of the U.S. troops, their constant questions, "Why are we here?-What are we fighting for?" If the troops of imperialism were not backed by the most devastating array of war weapons ever mobilized, they would not be able to stand up for a week against the Chinese-North Korean revolutionary

The imperialists may pile such terrific fire-power into Korea that they will conquer that one small peninsula. But they will not conquer the Asian revolution. This revolution is so vast and deep and powerful that in the end imperialism must shatter itself against it.

U.S. Plans for Germany

In recent years, more than 34 billion dollars have been poured into Germany from the coffers of American imperialism. Everyone knows what this money is for. Every nickel of it is calculated to build a part of the vast international war machine of the Wall St. plutocracy.

The German workers know that these billions threaten to transform the German nation into a gigantic cemetery of the people. The American workers know that these billions, like the billions that are being spent in the ghastly Korean war, are being taken from their paychecks. Millions of young American workers, moreover, are earmarked for export along with these dollars to be "expended" on the battlefields of Europe and Asia.

And everyone knows that when capialists invest money, they fix it so that the same amount of money comes back to them plus a little offspring called profit. The American imperialists, who not so long ago were clamoring for the "punishment" of the German people by de-industrializing them, are not trying to reconstruct Germany for charitable reasons. They count every nickel of it as a major investment. And the business they are investing in is bloody imperialist war.

The question is, will this money get the results the imperialists hope?

Here there is a lot of room for doubt. We don't mean our doubts — because we are dead sure that their investment will come to grief. We mean doubts in the capitalist ruling class itself. During their "great debate" some influential capitalists have argued that the billions to Germany will go down the same rat-hole as the billions to Chiang Kai-shek. They've

got something there.

American imperialism has sought to reconstruct not only the war economy of Germany, but the old fascist-militarist ruling class as well. But fascist capitalists and generals don't work the factories, railroads and mines. As Wall St. reconstructs the German military plant, it also reconstructs a powerful German working class.

The German workers have shown numerous signs of regaining their pre-Hitler status as the most powerful sector of the European working class. The Berlin transport strike of 1948; the emergence of a powerful German labor movement in the mining and steel industries; the open hatred and opposition the German workers show for the designs of the "generous" American imperialists: all this points to the fact that the dollar imperialists will have to reckon with the dynamic power of a reconstituted and unified German labor movement.

All the billions the American imperialists can muster will not change this fact - the last word on the "German question," one of the items on the agenda of the "great debate," will be spoken by the German workers themselves.

German Labor Still Fighting For Equal Say

By Charles Hanley

From our European comrades we have received supplementary information on the issue of codetermination in West Germany They write us that the principle of co-determination (workers voice in management) had already been accepted by a conference of union and management representatives in Maria-Leach one year ago. But the question was now to carry it out in prac tice: The employers did not agree to an equal number of labor and management delegates in the new management councils of stee mills and coal mines.

Therefore a general strike wa repared by the German Trade Union Federation. More than 95 percent of the membership voted for this strike, as the slogan of co-determination had acquire tremendous popularity.

Chancellor Adenauer's minute offer (in January, 1951 granted equal representation to abor and management, at leas theoretically, but introduced an eleventh man into the new man agment councils: an "impartial" member who will indirectly represent the government in many cases. The union leaders agree to this, although it means that only five out of eleven members of the councils will be labor elegates. The workers resented their leaders' yielding disposition The labor bureaucrats had been scared by the strike threat as much as the capitalists, prefering suspicious compromise to the lreaded perspective of a genera

There are other negative side to the law on co-determination passed by the West German Bundestag (Federal Parliament) Labor delegates in the manage ment councils have to keep secret all the inside information they get. They are obliged to act "in the interest of the firm's prosperity." They are not controlled by the workers themselves; there exists no workers' assembly to which they are responsible. Thus the capitalists can try to corrupt labor delegates in the mixed councils.

Yet it would be foolish to reject co-determination as the Stalinists and ultra-leftist sectarians do. The workers instinctively feel that co-determination is a big conquest — if it is used in their own interest. But whether or not it is to be used according to labor's interest (instead of eventually being r handicap to its class struggle against capitalism) depends on development of a revolutionary left wing in the German unions, not on the actual text of the law. Co-determination will be what the workers make it.

In order to make it a step toward genuine workers' control, leftist union militants will have to explain to their fellow workers how co-determination could be used in a revolutionary way. It is necessary to wage a struggle against maintaining commercial secrets (which the labor delegates still have to respect under the present law) and for control by workers' organizations over their representatives' activity in the management counThe Stalinist Peace Program --- II

Jingoes Into Pacifists

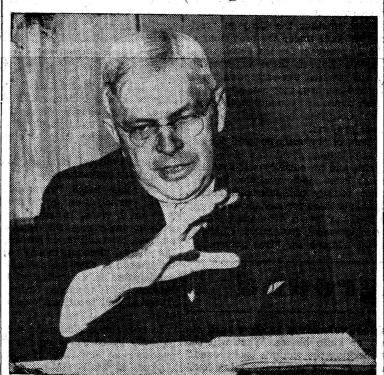

If your ears are still ringing from the boiler factory sound effects of the war shouts and screeches of the American Stalinists, which topped all others on the patriotic noise meter in World War II; if you don't hear so good anymore and can't pick up and distinguish new sounds as readily as you could before your ears got hurt — let me tip you off to something. That noise you hear, or think you hear, is not what it used to be. The Stalinists have changed to all who earnestly want peace, regardless of all other their slogan. They are not hollering for war anymore. Now they want peace. In fact, they demand it.

I know what I am talking about, for I have investigated the matter and am in a position to report not only that (1) the Stalinists now want peace, but also (2) why they want it and (3) how they say it can be had. I have at hand for use as source material the 252-page report of the proceedings of the "15th National Convention of the Communist Party, U.S.A."; plus the 80-page pamphlet containing the convention report of a character by the name of Gus Hall, who is advertised as National Secretary; also numerous collateral documents. They are all written with deadening uniformity in that graceless style which makes all Stalinist writing read the same, but I give you my word, I have read them all.

If you are incredulous and disposed to say, "he's pulling our leg, he wouldn't really plow through that dreary stuff" - let me explain. The job of checking up on the Stalinist Peace Campaign and filing a report was handed to me by the editorial board. I am a soldier of the revolution and I shirk no task assigned to me, however onerous and distateful it may be. The peace propaganda of the Stalinists has been running on for a long time now, and most people with good hearing have heard about it. But the printed official documents mentioned above sort of sum up and codify the aims, motivations and arguments of the whole campaign, and thus can serve best for reference. That's why I read them.

Peace is only one of the things the people of this world need, and the one they are least likely to get first, for peace means the status quo and that has to be changed. But the Stalinists, who always have an ax of their own to grind, now push all other questions aside and reduce everything to the one formula of peace, as previously they ruled out all other considerations and subordinated everything to the war. The interests of the exploited workers in the imperialist metropolises and the heaving masses in the colonial world; the burning issues which can be resolved only by struggle — they all get lost in the shuffle in either case, as far as Stalinist designs are concerned.

Rich and Getting Richer

Charles E. Wilson, Pres. of General Motors, is doing all right for himself. Truman's "Equality of Sacrifice" program did not prevent him from raking in an income of \$626,300 in 1950, largest salary for any U.S. executive.

Thus, in a prefatory note to his pamphlet, Gus Hall is introduced as "an outstanding champion of peace and democracy." That's all; nothing is said about Hall "championing" anything else. The prairie patriots and New York social-democrats can come out from under their beds; there is no immediate threat of revolution here. Hall's speech is recommended as "a challenge and a rallying call differences of political opinion or outlook." That is the keynote of the National Secretary, setting the line of the 15th Convention from beginning to end, as we shall see. Everything but peace, the wonder-working cure-all, is left out - including the class struggle and its unavoidable culmination in revolution, which is not always and not necessarily the concomitant of peace.

Getting into his speech, Hall lays down the line that "the struggle for peace in general" is "the central task of our Party." And that, according to Hall, doesn't mean stepping up the class struggle of the workers against the capitalists, and raising their militancy and class consciousness. It does not include any instruction in the Leninist doctrine that the struggle against war is not and cannot be a special task; that the only effective way to prepare the struggle against war is to carry on the struggle against capitalism in times of peace. Nothing of the sort. It means, says Hall, "working for a single major peace center," uniting "all groups" who want peace and nothing else.

He cites as the model the recent Warsaw Peace Conference of professional fellow travelers, congenital stooges and moon-struck clergymen steered, like all such gatherings, by hard-faced jockeys from the Stalinist riding stables. This Warsaw Conference, he says, "characterized itself as a peace movement — period. It has rejected all attempts to put on it the stamp of a pro-communist movement, an anti-fascist movement, an anti-imperialist movement - or a class-against-class movement." There you have it. If you are looking for "Workers of the World Unite," a slogan which is 100 years old but still good, you have wandered into the wrong convention by mistake. Hall's report has nothing to say about that. This bird flutters only for peace - period, and no question marks. And just so there may be no misunderstanding whatever, this projected "peace center," says Hall, is to include "sections of the capitalist class."

NATIONAL PEACE MOVEMENT

The campaign for "peace in general" is to lead up to electoral activities. Through the medium of an independent labor party perhaps? Just hold your horses. Hall calls for "peace tickets and peace candidates" on a local scale, 'which can become an important medium for new realignments in our country's political life" and culminate in "a national peace ticket for the 1952 elections" in which "sections of the capitalist class" will be invited to participate. Wallace and Taylor got away from them, but they are already on the prowl for replacements of the same kidney for 1952.

All this pacifistic horseplay is expected to put sufficient pressure on the ruling circles of the United States to convince them that peace is a good thing and that they can get along with the Soviet Union if they only want to. Let us have peace, they all say, peace is possible; all that's necessary is to want it and ask for it. Foster, who writes a letter to the Convention, lays down the line which is repeated like a ritual by all the reporters: "We do not consider war to be inevitable. . . We are also firmly convinced of the possibility of the peaceful co-existence of capitalism and Socialism in the world."

Claudia Jones, reporting on "Women in the Cause of Peace," chimes in with a denunciation of "the false idea of the inevitability of war." And Betty Gannett, reporting on "Some Ideological Tasks in the Struggle for Peace," warns all and sundry that all the work on this front "is determined by the central political task of the day the struggles for peace." All the other Convention reporters said the same.

From these salient quotations from the official documents of the 15th National Convention of the Communist Party of the United States, it is clearly established that the American Stalinists are in favor, of peace between this country and the Soviet Union. And they claim they know how to get it. Every time they say "peace" - and that is every time they open their mouths — they repeat the magic formula. The six slogans for practical action, outlined by Hall in his report, lead up to the final and decisive one - the demand for "negotiation and agreement with the Soviet Union to maintain peace." That's what they want. That's what all the tumult and the shouting is for.

In plainer words, this is Stalin talking to Washington through his American stooges and saying in effect: "Let's get together and make a deal." There is no doubt whatever that Stalin is willing to make such a deal with the imperialists and to pay a price for it. It should not be forgotten that they had a deal once before. A new one on a temporary basis is by no means excluded: That's what the projected meeting of the Big Four is about. Just what a possible new deal between Stalin and the imperialists would look like can be discovered in advance from an examination of basic Stalinist policy and a review of the way the old deal worked out in practice. That is the next point on our agenda.

And this certainly was an achievement for so small an organization which, moreover, sorely lacked a sufficient number

WERMACHT SOLDIERS

(Next Week: What Stalin Offers) Liege it hoped to set up under- gled to his comrades by a Gerground factory committees in the man soldier whose sympathy he

The man who ordered the first use of atomic bombs on crowded civilian centers has again demonstrated his moral idiocy. Truman last week belittled the appalling number of U.S. casualties in his Korean "police action" and complained because this frightful and steadily mounting toll is "on the mind and tongue of every citizen."

Addressing the fifth annual Highway Safety conference on June 13, Truman departed from his prepared speech to attack those who speak of the war casualties. "The total casualties for the whole operation (U.S. intervention in Korea - Ed.) have been less than 80,000 and that includes everything - sickness, death in jeeps by accidents, killed on the front, captured on the front and wounded," Truman said. "That is on the mind and tongue of every citizen, but right here at home we kill and permanentiy injure 1,-035,000 people (in highway accidents - Ed.) and there is no outcry by the sabotage press, no misstatement by columnists or the Congressional demagogues. And I wonder why?"

We will dwell but briefly on Truman's lie about there being only 80,000 casualties. It is sufficient to point out that Gen. Omar N. Bradley, chairman of the Joint Chiefs of Staff, testified May 24 before the Senate MacArthur Investigating Committee that U.S. casualties in Korea totaled 141.-955 — and these figures were about three weeks behind the actual toll. Senator Bridges has put the figure at 175,000 and no one has contradicted

But in comparing the war casualties to auto casualties Truman lightly skips over certain significant facts. Even he will concede that the law takes a different view if you run over a child on the highway who darts unexpectedly in front of your car than if you deliberately chase a child with your car and run her down. In the first case, it is unintentional, an accident. In the second, it is deliberate murder.

. Nobody is compelled by law to ride in automobiles. Everybody who drives or rides in a car or walks across a street - even Truman - takes

on himself the risk of accident. But the American boy who is forcibly drafted into the Army against his will, sent to the Korean front to fight a war he does not believe in and the American people don't believe in, is given no choice. His death is no accident. He is a victim of murder.

VOLUME XV

Moreover, as the saying goes, figures may not lie, but liars always figure. The rate of auto casualties in terms of the number of people riding cars or walking on highways is less than one per cent. The rate of casualties for the U.S. combat troops in Korea is around 40 per cent.

Truman neglected to speak about all the war casualtes in Korea - the three million civilian dead, the 200,000 casualties among the South Korean and other UN troops, the millions of Chinese and North Korean casualties. These he dismisses as so much dirt not worthy of mention. If he is so morally blind to the slaughter of the youth of his own country, why should he care about colonial peasants and workers of another race?

It is quite true that there is a horrisic toll in this country due to highway accidents. There are also hundreds of thousands who die each year of cancer, heart disease. TB and other killers who might be saved. And, in a way, all of them are victims of capitalist war.

With the hundreds of billions Truman is spending and preparing to spend to kill more millions in Korea and every place else in the world that U.S. imperialism aims to conquer, we could rebuild the whole highway system in America to relieve congestion and crowding and eliminate accidents. We could uncover the causes and cure of cancer, heart diseases and all the other maladies. We could eliminate bad housing and

Truman is no more indignant about traffic accidents than he is about the war casualties. He uses one to cover up the crime of the other. And if he has his way, we will have an atomic war in the not distant future which will make the

Paradise" "Self Sustaining

By Tom Conlan

We do not as a rule go out of our way to keep our readers informed about the latest capers of the ultra-snobbish social set. But we feel obliged to make an exception. It has to do with society's most popular hosts of the year - not merely in the Western hemisphere, mind you, but in the whole of the "Western world." This truly breathtaking item was made public the other day by the Scripps-Howard society editor whose business it is to record for posterity the doings and misdoings of the billionaire playboys and playgals.

The current rage, it turns out, is none other than Mr. and Mrs. John Astor Drayton. Up to last year Mr. Drayton's chief claim to fame, apart from his tidy bankroll, was his nickname -Satan. But last summer Satan Drayton became suddenly inspired "with the idea of creating a tropical, self-sustaining paradise at Andros, the most primitive island in the Bahamas," breathlessly reports the Scripps-Howard society editor, and immediately adds that "rich relatives and friends were almost unanimous in panning the

Last summer, you see, these carping "relatives and friends" did not take Korea in particular or the Hell-Bomb in general as seriously as Satan and his spouse. They kept guzzling cocktails, swapping gossip and paramours and otherwise leading their utterly useless and meaningless lives. But not Mr. and Mrs. Drayton. They saw a miraculous vision, and with this in mind they set out to accomplish miracles.

And lo! while the "pioneering" couple "lived on their yacht," the jungle was cleared for hundreds of acres by "machete-wielding natives," and there was erected on the beach "a dreamy guest house." The island has in addition been equipped

with fuel-oil tanks "for a fleet of yachts" and there is handy a refrigerated freighter and deep-freeze boat.

The plantation itself has "enormous potentialities for castor bean, copra and sisal hemp production." But this barely scratches the full potentialities of this "primitive paradise." The list of eager house-guests, headed by the one-time skeptics, has grown so large that the gracious hosts could not possibly accommodate "100th of the people who want to drop in."

The popular hosts have solved this ticklish problem with rare initiative and even more exemplary tact. To accomodate the snowballing demand they are now "building a resort hotel." The yacht trade who "can pay for the privilege of sharing the Bahamas paradise" will be all the serious process of law, and a feelmore appreciative. The hosts obviously know their ing of arrogant confidence that customers, and vice versa.

We do not know whether the Drayton "selfsustaining paradise" falls under the provisions of matter how slipshod or foolish, Truman's "Point 4" program for the development will be upheld in the courts. of backward areas. But if these enterprising "pioneers" are not granted tax-exemption under the above-mentioned heading, they can surely seek to amortize their current investments on the same 5-year basis as Congress has granted other 15 of these, simply allege that essential wartime projects.

In any case, there is obviously no need for any one to worry any longer about the Hell-Bomb lated," adding in some cases threat. A way out, and an entirely self-sufficient way at that, has been made available by this enterprising, not to say philanthropic, couple. The island paradise is there for anyone - anyone, that is, with a yacht or two, a little spare change and with the proper social credentials. Chalk up another thumping triumph for "free enterprise."

The Negro Struggle —

NAACP Program And the Gls

NUMBER 26

Delegates to the annual conference of the National Association for the Advancement of Colored People which meets the end of this month in Atlanta will undoubtedly agree that the most important single action of the organization this year was its defense of the Negro soldiers in Korea against the capitalist politicians and

The convention should recognize, first, the significance of the issue. The plight of the Negro soldiers is a broad popular issue which combines both opposition to the discriminatory frame-up courts-martial of Negro soldiers, and sympathy with the general distaste of soldiers and civilians alike for "operation slaughter" in Korea. The various charges of failure to obey orders, or refusal to advance in the face of the enemy were understood as descriptive of a widespread situation in Korea for which the Army chose to make Negroes the whipping boys. The courts-martial also focused attention on the complete lack of democracy in the Army which makes it possible for officers arbitrarily to single out those whom they wish to victimize, and to utilize all the totalitarian procedures of Army discipline to deprive them of even the formal democratic protection of civil rights of other American citizens.

The method employed by the NAACP in defense of the GI's was that of public investigation and exposure of the inhuman treatment of the soldiers and the injustice of the court martial procedure, the assigning of blame to the jim crow Army, and the public demand for redress.

The response to this method was an indication of the potential strength of the NAACP. Thousands packed public meetings to protest the condition, to express their support for the struggle against it, and to contribute to the campaign.

But as the Kansas City Call said when these meetings were at their height: "After the din of applause has died, then what?"

That question has to be answered by the NAACP convention.

MacARTHUR AND DISCRIMINATION

Several alternatives are presented. The first, unfortunately, is already indicated in the line of those Negro leaders and newspapers which are attemping to use the plight of the Negro soldiers as a basis for petty political maneuvers on behalf of the Democrats or Republicans in the coming election campaign.

Negro Democratic party hacks are already soft-pedalling the responsibility of the Truman administration for maintaining the jim crow Army and the imperialist war in Korea. They, and this includes some of the NAACP top leaders, attempt to place all the blame on MacArthur by implying that his actions were contrary to the wishes of the Administration.

The Republicans, on the other hand, like the Pittsburgh Courier, are apologizing for MacArthur, attempting to picture him as a poor, misunderstood general who wouldn't stand for such a situation in the Army for a minute if he knew about it, and was the victim of bad Administration policies. All that is necessary to correct the situation, from this point of view, is to change the Administration policies or to give the commanding officer in the Far East more

Actually, the Republicans are right when they blame the Democrats and the Democrats are right when they blame the Republicans. But both lie when they say either one would eliminate jim crow or make the Army more democratic, or stop the whole imperialist slaughter.

The danger is that either faction among the Negro leaders may derail the struggle in defense of the Negro soldiers into petty political bickering.

stitutional for the administration A PROGRAM OF ACTION

The real alternative for the NAACP convention is to reject both the Democrats and Republicans and to continue on the course that has put both on the defensive - a broad, mass campaign against Army jim crow. This means the following actions:

1. Place the blame where it properly belongs, on the capitalist ruling class and its political spokesmen both in the Army and in Washington and the several states.

2. Stop throttling the masses in their protest. Encourage the mass meetings, picketing and boycott of jim crow agencies of all kinds instead of limiting participation of the masses to donations for legal funds.

3. Broaden the campaign by appealing to every union for support on this issue. Labor is a natural and necessary ally in the struggle of the Negro people.

4. Solidarize with the colonial millions who want no American capitalist jim crow anywhere.

5. Make the NAACP the kind of democratic mass organization of struggle for complete equality for Negroes that can lead and inspire. The response to the organization's limited intervention on behalf of the Negro soldiers has already indicated, as it did in World Wars I and II, the possibilities of winning a mass base through proper issues and methods.

Both in the interest of the GI's and of the general advancement of the Negro people, the NAACP convention should stop the attempts to mislead the struggle into the old rat-race of Democratic-Republican politics. Anything else is a betrayal of those who look to the NAACP for leadership.

"THE JEWISH QUESTION" **A Marxist Interpretation**

By A. Leon

Leon died in the Auschwitz gas chambers at the age of 26, but the book he left behind is one of the finest products of the underground resistance movement against the Nazis.

"Leon's approach is that of the orthodox Marxist. . . . His analysis. . . . is refreshingly lucid and sensible, and it offers us the opportunity to examine a solid statement of the materialistic interpretation of the Jewish question." - Oscar Handlin in the magazine Commentary.

The Real Background why a man should voluntarily swallow such ob-

The N. Y. Daily Mirror reports the following dispatch under the headline: "7 Sparkplugs in Stomach, Going Gets Rough," "Raleigh, N. C., June 16 (UP) - Hospital

officials today reported they had removed seven sparkplugs, eight keys, a car wheel weight balance, an unfired .32 caliber bullet and part of a knife blade from the stomach of a 38-year-old Negro. Leon Burns was in critical condition at St. Agnes Hospital today following the operation. He told authorities he had been attacked two weeks ago by a mob in Georgia and forced to swallow the metal objects, but police doubted his story and were checking his background."

This dispatch is as much a commentary on the Mirror, one of Hearst's rags, as it is on "justice" in the deep South. The off-hand manner in which the Mirror headlines the story is revealing of its true attitude toward the Negro people. If a white man, say, a Southern gentleman, were involved, it would not take the same attitude. The story was printed on a back page sandwiched in between advertisements. The Mirror makes no comment beyond its flippant caption. Evidently, the story was worth the printing for a chuckle.

But why should one expect anything else from this large daily? Why should Hearst send one of his reporters down to the deep South to check the story, before printing it? We can hear the editor guffawing at the very thought.

ingly funny caption, must have had a real laugh when they read the last line - "but police doubted his story and were checking his background."
