# A Tribute to Eloise Booth

assume.

period.

DECISION TO EXPAND

#### By C. Thomas

(An Eloise Booth Memorial Meeting was held by the New York Local of the Socialist Workers Party on Saturday, April 26. Comrade Booth died suddenly after a heart attack on Monday April 21. She was born March 27, 1912 and was 40 years of age when she died. We publish below excerpts from the Memorial Address given by comrade C. Thomas.)

When I first met Eloise Booth, in San Francisco 18 years ago, she was already a veteran of the class struggle. It was in 1934, the year of the great Pacific Coast waterfront strikes which culminated in the San Francisco general strike and El had been arrested and jailed several times for her activity in support of the striking maritime workers.

While still a young girl in her teens, Eloise Booth was widely known in the San Francisco labór movement as a courageous working class fighter. She had been active for a number of years in the Young Communist League from which she was expelled for her opposition to the stifling Stalinist bureaucracy which revolted her proletarian instincts. She joined our Party in 1934.

#### TURNING POINT

The year 1934 was a great turning point in her life as it was in the lives of many of Comrade Booth's Service to Labor of the great upsurge of the American labor movement, Won Respect of Pittsburgh Unionists highlighted by tremendous class battles which have become part of the history and tradition of our movement: the Pacific Coast maritime strug. age of 37. She had been ailing for two years and under a gle, the Toledo Auto-Lite doctor's care. strike and the historic strikes

of the Minneapolis Teamsters. Comrade Booth was molded ers were drawing their first union. She played a major role in and tempered in the fires of breath as established union men. the class struggle. As a very By her tireless zeal for the cause forces for a showdown struggle, young girl she was a migratory of labor's emancipation she won which led to the first victorious agricultural worker who, to- great respect for the integrity of public utility strike in Pittsburgh, gether with her father, mother the ideas of Trotskyism among in defiance of an injunction. and sister, followed the crop the workers here. She was especifrom Washington to California. ally highly regarded among the smear the successful strike and It was a hard school. Through workers at the huge Westingher father who was a Marxist house Electric plant in East student she was able to Pittsburgh. Some of them, under generalize her experience and Stalinist influence, who were first hunt committee. She boldly decame to loathe, with a deep hostile to her, came in time to fended the strike of the power and abiding hatred, the rotten trust her and turned to her for workers as the result of the tivity comrade Booth was social system which was the advice and guidance after they greed for super-profits of the cause of so much misery and had become victims of Stalinist pain. betrayal.

During the wartime coal strike As the attacks on the workers Eloise was a tireless agitator, an indefatigable party she distributed the Militant far worker, completely devoted to and wide among the miners, bringthe workers cause. She was ing them an inspiring message of revolutionary workers, she rethe workers cause. She was ing them an inspiring message of so attuned to the mood of the workers that she responded, like a sensitive instrument, to the ebb and flow of the labor who was the first victim jailed in the past and flow of the labor who was the first victim jailed in the past and described: movement. The Bedrock Issue

Whatever the outcome of the immediate steel wage struggle, it is very likely that the Wage Stabilization Board and its procedures, as now constituted, are going to be heaved out of the window. To this end Congress has tossed answer all the lies (many coninto the legislative hopper a flock of new bills to ensure that henceforth the wage board will be unable to yield even appeared since April 9, when the the smallest concession to labor.

Similarly, Congress began to move last week on the matter of government seizures of plants and industries. All political wings of Congress rushed to propose new measures to restrict the powers of the President to seize industries. None would prohibit seizures in "national emergencies." But they would permit seizures only to break strikes, while forbidding the government to put wage increases on April 22 expressed their prepare the way for the ultimate or improved labor conditions into effect.

These developments in the legislative field point up tionary Nationalist Movement has, for example, led the Trotthe basic and more permanent issues that flow from the (MNR) which it called a "fas- skylte deputy (Guillermo) Lora steel struggle. These issues are, above all, political. They are being decided in Washington, D.C., in the halls of Congress. There, laws are now in process of enactment which are designed to forge heavier and stronger chains for labor.

In reality, this but continues the process that has been under way particularly since the end of World War II. The great irresistible strike wave of 1945-46 demonstrated that the giant corporations, powerful as they are, are no match for organized labor in direct frontal combat. The bosses had to seek more and more the intervention of their government. That was the purpose for the Taft-Hartlev Act.

The Taft-Hartley Act has been able to impede, hamper and harass labor, but not to render it helpless. The labor movement has proved too powerful; it has broken through Paz, the capital, is 12,000 feet the Taft-Hartley restraints or circumvented them. Hence. the determination of the Congressional agents of Big Business, impelled by the steel struggle, to tighten the anti-labor laws, to make them "fool-proof."

What answer do the union leaders have on this bedrock issue - the political issue of the Congress which is the Western Hemisphere, ala mere pawn of the corporations and bankers and which though its mineral resources began to lose its large following has but one slogan: "Cripple, smash, destroy labor!"?

On the one hand, we have the view, as expressed by Emil Rieve, CIO Textile Workers Union president, that infancy to death." (Wall Street strike "both at the right and the there is no chance that a Congress friendly to labor would Journal, June 11, 1951) And the left, at reactionary elements and be elected this year and, presumably, that labor must be in the country. Over half of them seizing the land." This was what prepared to bow before new blows. On the other hand, we have tuberculosis, and their life "brought down the 1943-1946 have the note of phoney optimism in remedies already expectancy is 35 years. Their MNR regime and cost its leader proved worthless and dangerous as sounded by the AFL leaders in the April 23 AFL News-Reporter editorial, "1952 Can Be Another 1948."

political prospects for labor. They would have us remember to buy food from abroad. But the U.S., despite the pro-Nazi label" the "victory" that labor won in 1948 "when the ballots foreign capital. # The Negro Struggle Labor Solidarity

#### - By Jean Blake

The origin of May Day as the international working class holiday associated with the traditions of labor solidarity should be of particular interest to Negro workers because it demonstrates how inseparably their fate is tied to that of the working class as a whole.

May Day originated in the struggle for a shorter working day. With the introduction of the factory system in one country after another throughout the world, the struggle against capitalist exploitation took the form of a struggle to limit the working day. In England, France and elsewhere, the early part of the nineteenth century saw the passage of a number of Factory Acts limiting the hours of labor.

The early history of the regulation of the working day and the struggle to enforce that regulation is told in considerable detail in Volume I of Capital, by Karl Marx, who concluded that this history proves "that the isolated worker . . . is hopelessly unable to offer any resistance to the encroachments of capital when capitalist production has reached a certain state of maturity. The establishment of a normal working day is, therefore, the outcome of a protracted civil war, more or less veiled, between the capitalist class and the working class."

This struggle began in England, the birthplace of modern industry, and followed, slowly, in France.

"In the United States," wrote Marx, "any sort of independent labor movement was paralyzed so long as slavery disfigured a part of the republic. Labor with a white skin cannot emancipate itself were labor with a black skin is branded. But out of the death of slavery a new and vigorous life sprang. The first fruit of the Civil War was an agitation for the 8-hour day - a movement which ran with express speed from the Atlantic to the Pacific, from New England to California. "At the general convention of the National Labor Union held at Baltimore, it was declared on August 16, 1866: 'The first and great necessity of the present, to free the labor of this country from capitalistic slavery, is the passing of a law by which 8 hours shall be the normal working day in all States of the American Union. We are resolved to put forth all our strength until this glorious result is attained.'

"At the same time, the Geneva congress of the International Workingmen's Association, in conformity with a proposal made by the General Council resolved that 'a limitation of the working day is a preliminary condition without which all further attempts at improvement or emancipation must prove abortive. . . The congress proposes eight hours as the legal limit of the working day.'

In 1884 the Federation of Organized Trades and Labor Unions of the United States and Canada which later became the AFL, passed a resolution which later became the AFL, passed a resolution declaring that after May 1, 1886, "eight hours shall constitute a legal day's labor." That gave

two years to prepare for the gigantic strike to in the demand. On the first May Day, in 1886, about 350,000 Unite in Fight win the demand. workers went on strike. About 150,000 won the eight-hour day immediately. Others continued on strike in New York, Philadelphia, Chicago, Louis- On Smith Act ville, St. Louis, Milwaukee, Baltimore and many smaller cities and towns.

The American holiday became an international occasion when the first congress of the Second International voted to grant the request of the American Federation of Labor for support of their eight-hour fight, and to make May 1, 1890, the day of an international demonstration for the eight-hour day.

Looking back, we see that the necessary precondition for the development of an effective struggle against inhuman working conditions and against the Smith Act and "for for the eight-hour day was the abolition of slavery. Once that was achieved, workers' solidarity in America and then on a world scale, received new impetus for the struggle against the capitalists.

With the organization of the CIO in the 1930's. membership in the labor movement was finally opened to Negro workers in industry. The experience of the workers had driven home the lesson that it was not enough to end the competition between slave labor and wage labor, it was necessary to unite black and white wage labor, if the condition of all labor was to be defended and advanced.

Today the fight in the U.S. continues in the form of struggles for fair employment practices to eliminate all differentiation between the treatment of Negro and white workers, so that they cannot be pitted against each other.

Internationally, May Day 1952 found workers all over the world struggling to free themselves from imperialist exploitation, and from capitalist oppression. In Asia, in Africa, in Europe and in South America the workers are moving forward in new waves of militancy. But in the United States, where the official labor movement has not yet taken sides in solidarity with the international working class against Wall Street's drive to dominate the world, reaction has taken the offensive, with a steady attack on the standard of living, on workers' rights and civil rights, and with a new wave of violence against minorities. A revival of workers' solidarity in militant united action and independence from capitalist politics is required to stem the tide.

THE MILITANT

Homes for Ousted NEW YORK - New York City is the landlord in many slum areas in the city which will be torn down sometime in the near or distant future to make way for housing projects.

A recent survey of one such area, the Carver site, between Park and Madison Avenue (from 99th to 106th Street) has again shown the two-faced character of the capitalist politicians running "the greatest city in the world."

Close to 3,000 families live in this over-crowded area." In the new project, to be built on the Carver site by the N. Y. City Housing Authority, there will be only 1200 apartments. This is the city's answer to the housing shortage.

#### MOST WILL STAY

Most of the people living on the Carver site will stay in the old slum buildings for many years. Less than 900 of the 3,000 families are scheduled for relocation from one-third of the area by May

1953. With the city as landlord, you might think that the old buildings would be properly maintained for as long as people had to live in

**Powder Keg at Jackson** By Patricia Stall

The powder keg of Jackson Prison exploded; the fuse was cell block 15. The explosion was expected by Michigan prison officials, the Jackson warden, the prisoners themselves. Jackson houses the largest number of convicts inside a single prison. It also houses a number of grievances that have resulted in a "mutiny" leading to \$2,500,000 worth of damages to prison equipment, the death of one prisoner and the holding of eight guards as hostages for a dramatic and tense five-day period when the prisoners held control.

Time and again the Michigan Legislature delayed and refused financial aid to ease the ovencrowding and inadequate facilities at Jackson. Psychotic prisoners who should be in mental hospitals are held together in one cell block without adequate medical care because there is no room for them in state hospitals. Guards are untrained, and encouraged to be brutal. Habitual

After the explosion, numerous explanations vere offered, ranging from official apologies that inflation is to blame to lamentations that a "stronger hand" is needed in dealing with prisoners. What the apologists conveniently overlook are the social and economic causes of crime. It is not the fault of the convict alone that he is behind prison walls; in fact, often little or none of the fault is his. Furthermore, the authorities proceed on the assumption that every inmate is a "criminal enemy of society" and that their chief problem is how to restrain and terrorize the prisoners until they are released to resume

their "criminal activities." To make a change in these inhuman practices, it is necessary to start both at the "beginning" against the Smith Act. Freedom and the "middle." The "beginning" has to do with such things as slums, poverty, unemployment — the enzynomia conditions that breed gime — and nic conditions that breed crime - and

rights.'

CONCERN OF ALL The five groups made clear that as a "philosophical revolutionary, Secretary of State Alger's letter sold so far.

criminals are crowded together with young first offenders and the seeds of crime have rich soil to grow into weeds. Prisoners are forced to stay inside for long periods without exercise in the fresh air. The powder keg was smoldering for a long time.

These were the conditions against which the prisoners in cell block 15 revolted - "not only for us in this hellhole, but for the other 6,500 guys in the prison, and all the guys in other prisons," said Earl Ward, leader of the rebellion. Ward was the man who presented the prisoners' demands, of which he said: "We've got to have a contract like they have on outside. If the governor (Williams) signs the contract, and Warden Frisbie signs it, then we'll sign it. That will settle it, just as things are settled on the outside."

The contract included 11 points, mainly relating to living conditions, medical care, brutality and discussion of grievances. The last point was: "No reprisals of any sort shall be initiated or perpetuated by personnel of the Michigan Depart ment of Corrections." But after the contract was signed and the men surrendered, it became clear that the authorities intend to make reprisals anyhow against prisoners who committed "crimes" during the five-day struggle.

the general outlook and standards fostered by the values of capitalist society, where the acquisition of wealth (no matter how) is looked on as the highest good. Remove the prod of hunger and insecurity, as socialism will do by a rational rearrangement of the economic system, and you will remove the overwhelming majority of present day crime.

The "middle" concerns the rehabilitation of the men and women who have already been convicted and imprisoned. Present "rehabilitation" programs are largely a mockery, as the prisoners complaints in both Michigan and New Jersey testified. The aim is to keep the prisoners busy, not really to help them acquire useful trades to support themselves after their release. Few criminals are "made over" in our penal institutions - far fewer than the number of young people who get their first real contact with and knowledge about crime behind bars.

The crimes committed against prisoners are more numerous and destructive than the crimes they are imprisoned for in the first place. The misuse and waste of human life in the prisons is one more example of the brutal and pernicious character of capitalist society.

# Notes from the News

THE PRESIDENT of an AFL National Farmers Union local in Reform, Ala., Hayes McRae, a 66-year old Negro, was warned by white men that he "can't live here" as long as he engaged in union and NAIACP activities. Leaving his job and family behind, McRae fled the town "in terror," the Pittsburgh Courier reports.

\* \* \* THE CAPITOL DOME in Washington is being painted by non-union painters. The AFL Painters Council says its members have done the job for the last 60 years, but the authorities accepted a bid this year from a non-union contractor. The Painters Council is barred from picketing on Capitol Hill. \* \* \*

COLUMBIA UNIVERSITY comes up with this anti-labor alibi for refusing to recognize and bargain with striking cafeteria workers belonging to the CIO Transport Workers: If the cafeteria employees are recognized, it says, then the other workers would also seek recognition, and that would mean that the university would lose its "independence" in operating the institution.

GUATEMALAN WORKERS, under newly adopted amendments to the Guatemala labor code, now receive 75% sick pay up to six months; formerly they got 50% for three months.

\* \* \* THE CHINA DAILY NEWS, published in New York, and its officials have been indicted for allegedly inducing Chinese in the U.S. to send American dollars to China. Eugene Moy, presi-

dent of the paper, denies the charge and says: "The indictment climaxes a relentless drive by the Newsweek, who ranted on April combined forces of the Kuomintang clique, the 21: "Either we make it legally China lobby and certain forces in our government possible once more for a strike to destroy the China Daily News, the only to be broken, or we yield com-Chinese-language newspaper in the United pletely to constantly mounting MOOD OF RANKS States which has consistently supported peaceful union demands." solution to outstanding problems in the Far East." . The American people must realize that there is involved in this case a most serious threat

to the freedom of the press." Moy also charged for over a year "physical violence and other forms of terror" have been used against the paper's subscribers, advertisers and newsdealers.

THE REVOLUTIONARY WORKERS PARTY of Canada, section of the Fourth International, has announced its dissolution. A statement by its National Committee said: "In the past seven years revolutionary socialists organized as an independent force in the RWP have done pioneer and yeoman service for the cause of Marxism in this country. In the unions, in the shops, wherever they were, the party's forces have played a vital role in giving clarity to the anti-war aspirations of the people, in fighting for a socialist policy against the treachery of Stalinism and the trap of reformist concilation with capitalism." It promised to "continue the struggle to which we are dedicated, not with less but with everincreasing vigor through whatever forms it takes." The RWP ran a number of campaigns for Mayor of Toronto - once getting over 23,000 votes - and supported the Cooperative Compression of the Canadian working class.

This healthy determination to have it out is certainly the mood of the ranks, but whether or not it is shared in the top leadership of the union remains to be seen. Murray has refused to commit himself as to whether the work-
