**Letters Put Pressure On Gen. Eisenhower** To End War Speedily

#### By Joseph Keller

A majority of Americans have been opposed to the U.S. intervention in Korea and believe it was wrong ever to have sent U.S. armed forces there. U.S. troops are being kept in Korea now against the will of the American people. These facts - repeatedly stated by The Militant are again confirmed by the latest Gallup Poll findings on the popular sentiment against the Korean war.

"For almost two years Amer-

### **"BREAKING THROUGH** THE SOUND BARRIER"

#### By Joseph Hansen

I don't care for a bucket seat, particularly in a jet plane tearing straight down to earth at around 850 miles an hour. But if you like sensations such as that I can highly recommend the new British film "Breaking Through the Sound Barrier."

Personally, I enjoyed the less strenuous scenes such as the jet ride across France, over the Alps and Greece to Cairo. I was astonished at the power and speed of jet planes; and admired the photography - rocks at the end of an airstrip tumbling along the ground under the force of a jet exhaust, a wheat field whipped by a plane skimming past like a projectile, vapor trails eight miles or so head with a conservative craft up in the sky, stone faces of the Acropolis gazing at what outlook, who would not interfere man has achieved in the air. Sounds like a documentary, with them. Green fitted the I'll admit, but I prefer to mention these things instead of the love interest although even that is better done than what's been coming out of Hollywood since the witch-hunters lit their faggots in the Los Angeles suburb.

What puts this picture in the four-star bracket, however, is something else again. It is the theme - the power of an idea. The story worked out on the screen by Terence Rattigan, the script writer, and David Lean, the producerdirector, is the story of what power an idea can have. This is the core that holds everything together, giving the film extraordinary vitality and grip.

The artists did it despite severe handicaps. They could have taken a great progressive idea like socialism and shown its capacty to dominate the human mind, to call forth the greatest sacrifices, to inspire the imagination but Green never veered from the and make the will something of steel. That material would have been easier to handle - but then the film would have by Gompers. been banned.

Consciously or not — most likely not — they took instead the idea of overcoming a difficult obstacle in nature industrial unionism, did he show to technological progress, the barrier encountered by planes reaching the speed of sound where the laws that hold at lower speeds change qualitatively.

Since a progressive political figure is excluded by the current witch-hunting atmosphere, they could have taken as the man imbued with the idea, an inventor, an engineer at a few episodes of his career. or a scientist. But such people are typically poor or at least For example, in 1929 the AFL not wealthy. How overcome the difficulty of getting his theories tested? The picture might have to be renamed "Breaking Through the Money Barrier," and the self- identified with this organizing anointed censors that plague us nowadays might have drive and its failure. found it objectionable, even "subversive."

The artists chose a capitalist as the protagonist. He has the means to carry out an idea, even one that seems hare-brained. And this is an additional safeguard against the witch-hunters who might get a queasy feeling about a picture dealing with such a dangerous topic as thought hifts and lived in ramshackle license plates for strike autos and point Green tried to ruin the to which his (as well as the other and the elemental force it can have. unions

The capitalist as the man powered by a progressive idea is out of place in our day and age and I had to smile at the whimsy of an oligarch with the character of a revolutionary like this owner of an airplane factory whose main incentive is not profit-making.

However, I can overlook stretching things like that, because the basic theme is honest and dead right. People do devote their minds and lives and total energy to great they fired them, evicted them, strike. Next day when the union sit-downers. It was through no be passed on William Green.

# William Green Long Symbolized Horse-and-Buggy Craft Unionism

### By George Lavan

The late William Green, for 28 years president of the American Federation of Labor, symbolized the narrowness, incompetence and senility of the encrusted AFL eadershin.

Sam Gompers, founder of the AFL and formulator of its "business union" philosophy, died in 1924. He had been an autocrat: and the presidents of the AFL international unions didn't want another. They wanted a figurespecifications.

He controlled no powerful union. Most AFL workers had never even heard of him. An office holder since the age of 27, he had risen in the bureaucracy through the death of AFL Council members above him.

President Green never disappointed the men who made him. Their unions scabbed on and raided one another and he never interfered. And he never interfered with the racketeering and corruption that flourished in some internationals. The AFL stagnated and declined in membership near-sighted course of "pure and simile" craft unionism laid down

Only against socialists and other radicals, or advocates of his teeth. And this was as the AFL bureaucrats and the corporations wished

fault of Green that they had to abandon this idea and recognize the CIO.

Similarly during the CIO's campaign to organize the steel industry, Green sought to make a deal with the Steel trust whereby their company unions would be given AFL charters.

These examples give a representative picture of Green's role on the U.S. labor scene. One example should suffice to show his role in international labor affairs.

HELPS MACHADO From 1925 to 1933 Wall Street

ruled Cuba through a bloody dictator - Machado. Labor unions and assemblages were outlawed. Opponents were murdered, kidnapped, kept for years in tiny cells below sea level in harbon forts, tortured and their bodies thrown to the sharks. The underground Cuban labor movement appealed to U.S. labor for help.

Chester Wright, editor of the and a secretary of the Pan-American Federation of Labor, made public a list of 147 assassinations committeed by the Machado regime. There was talk on the waterfront of refusing to handle Cuban sugar.

Dictator Machado hastened to Washington where he had rivate conference with Green. Green issued a statement pleasng to Machado, and editor Wright was fired from both his obs.

### A Thousand Years or More

If you've ever been at an Army separation center, you know that the last five days are harder to sweat out than the preceding five months. When you add to that the well-known Army penchant for getting anything connected with the welfare of the troops all snarled up, you get a situation such as now appears to exist at Camp Kilmer, New Jersey. Brave young men who faced the roaring cannon in Korea without breaking ranks (may they find a better cause in which to be brave next time) have been reduced to a state of mutinous discontent by Army SNAFU in a matter of weeks.

3,200 soldiers, being processed for discharge at Army "hurry-up-and-wait" pace, are reported by the N. Y. World-Telegram as "on the verge of open rebellion." Promised discharge by Christmas, many face the prospect of another cheerless Army Yuletide, and they don't like it. What's more, in the best American tradition, they don't care who knows that they don't like it.

Compulsory daily formations, it is reported, bring AFL International Labor News out only a few hundred of the thousands awaiting discharge. Detail notices and orders posted on the center's bulletin boards are burned right down to the thumbtacks if the men don't like what they say. AWOLs are on the increase, and one officer described the situation as "actually mutinous." Men refuse to stay put for bunkside inspections.

A few days ago, daily leave passes were cancelled, on the ground that the men refused to turn them in but continued to use them. Upon receiving news of the cancellation, scores of angry men, it is reported, marched on the Orderly Building, formed a "cordon" around it, and "kicked the walls for 15 minutes while officers sat at their desks inside."

According to a World-Telegram reporter, the commanding general of the post toured the area with newsmen to show them that all is peaceful. However, he refused to enter a barracks in order to see whether the men would come to attention. When challenged to make this experiment, he turned on his heel and walked off.

General Craig, post commander, has indicated that the Army will try to speed things up a little at Kilmer. But most Army brass doesn't seem to realize the feeling of haste that enlisted men (and many officers) have about getting out of his ODs. For Pentagon benefit we call attention to the following old Army ditty which represents a discussion between a soldier and his officer:

> "How long have you been in the Army?" "A thousand years or more. I joined at half-past three, sir, And now it's a quarter to four."

This lad was ready for his separation papers fifteen owners and their ilk. He described back without anything if the rights of AFL men employed by great labor organization, that he minutes after getting into uniform. Imagine how he would the benefits they would receive company would take them. The GM. Strengthened by Green's achieved nothing for which future feel after 21 months, most of it spent in Korea in a war from recognizing the AFL. They company wouldn't, so the AFL action the auto barons again con- generations will look back with that is not a war, battling opponents that are not enemies,

# Indo-Chinese Freedom Fight in New Stage

### Whom Do We Blame for Soup Lines?

Widespread reports show that fear of a new depression is one of the biggest concerns in the minds of workers as a result of the Republican victory. "See you in the soupline, boys," is a favorite factory comment.

It is natural for workers to identify depression with Republicanism. The great depression of 1929, still within the adult memory of most Americans, struck during a Republican administration. In addition, since workers identify the Republican Party as the capitalist party, or the most capitalist party, the present depression talk shows how workers connect depression with big capital.

Nevertheless, there is no truth in this idea that Republicanism is the factor that will produce depression. We do not say this in order to exonerate the Republican Party, but to place responsibility where it really belongs. The capitalist system produces depressions, not because of "foolish errors" or "short-sighted policies," but because of tendencies that cannot be overcome within the limits of the system.

If we survey the history of capitalist nations over the past century, we find that not a single one of them has been able to avert the periodic descent into the trough of crisis. This has been going on for well over a hundred years. Everything has been tried, from the extreme of liberalism, reform and government spending

to the other extreme of pure "individualism," and nothing has substantially altered the picture.

This would appear to indicate that capi- French-manned U.S. planes, the talism is the cause, and that depressions revolutionary armies of the Viet can't be removed from the economic scene French forces at several points without fundamental alterations in this and swept them out of a large economic structure. This scientific view section of northeast Indo-China. gets further support from the remarkable record of Soviet industry, which is of boasting of their course non-capitalist, during the 1929-40 against the Viet Minh and exdepression. Whatever else may be said in pressing the belief that they the many quarrels that arise over the might be within sight of the economy and government of the USSR, the Soviet economic structure was virtually untouched by the depression. In fact, War."

Germany was cut in half from 1929 to 1933, in the Soviet Union industrial proof the great depression.

in a capitalist America. If there is no war, will be an irony of history if that depression should happen to strike once more during a Republican regime. Workers may then say: "You see, the minute we vote ing, the Indo-China war is almost these boys back in, we get trouble." Of on the scale of Korea. ### **Our Increase in Price**

One of the members of the Militant Army, those devoted supporters of The Militant who work day in and day out to widen the circulation of America's leading socialist weekly, reports that she was agreeably surprised at the first reaction to our increase in price from a nickel to a dime.

At a project where she has a paper route, readers found no difficulty, she said, in understanding why rising printing costs forced us to increase the price. In fact some of them already knew that without big advertisers to back us we were doing well to get a paper out at all. Hard hit themselves by inflation, they nevertheless decided, with but one exception, to help rout by taking a subscription.

### with the witch-hunters riding high and hysteria and fear widespread, the entire radical press has a difficult time.

Putting out a paper like The Militant in a country where capitalism is as rich and powerful as it is here is really a heroic undertaking. Under current conditions,

### A Suggestion to Diego Rivera

the Nov. 23, N. Y. Times.

Diego Rivera, it appears, has not yet been re-admitted to the ranks of the Mexican Communist Party. He is pressing for action on his long-standing application. To emphasize his worthiness, he is doing what seems to be required of artists in the Stalinist fold. He is crawling in the slime.

At one time Diego Rivera was recognized as one of the outstanding artists of Mexico. His murals, filled with social content, were world famous. He headed a school of revolutionary artists who were inspired by the November 1917 revolution in Russia. His personal experiences in the Soviet Union led him to break with Stalinism.

In the United States he painted famous murals in Detroit, San Francisco and New York. A mural he did for Rockefeller Center during the depression aroused such animosity from the Rockefeller interests because of its socialism — versus — capitalism theme that they ordered it dug from the walls.

When Leon Trotsky, the co-founder of the Soviet Union, was in danger of deportation to Russia from his exile in Norway and had no place to turn, Diego Rivera helped gain him asylum in Mexico under the democratic Cardenas regime.

In 1939 Rivera broke politically from Trotsky and moved far to the right. With the murder of Trotsky, Rivera asserted that his own life was in danger from Stalin's assassin gangs. Then he began moving in the direction of Stalinism.

In the past few years he has associated himself with the Mexican artist David Alfaro Siqueiros, the Stalinist who led a machine-gun assault on Leon and Natalia Trotsky, an assault that was unsuccessful in killing the revolutionary couple but in which an American guard of Trotsky, Robert Sheldon Harte, was brutally murdered. Recently Rivera painted a mural with

tremendous perspectives for socialism in America.

We ask our readers to stick tough - as the job it sets out to do. There you would in a difficult, prolonged struggle for union conditions against ruthless open-shop interests. Do everything you can to help us out by contributing financially; and, above all, try to widen our circle of tary servitude, and the fear of it is unsettled. . . anything may readers and friends.

counsel, illegal search and seizure, flattering portraits of Stalin and Mao Tsetung. Even this sycophancy has not proved enough to restore him to the good graces

### **Two Kinds of Prisons**

#### By Harry Ring

There are two important institutions in the Cumberland mountains of Tennessee. One is Oak Ridge, principal home of the atomic bomb. A short distance away stands another institution, far less known, but equally symbolic of the barbaric brutality of capitalist society. That's Brushy Mountain Prison.

At Brushy Mountain Prison, according to Oliver Pilat, of the N.Y. Post, slavery still exists. Men do forced labor in a coalmine. When they fall behind in their quota they are lashed. Prisoners sleep four to a crowded cell, in double-decker cots, without mattresses or blankets.

Frozen Head Mine, where the men dig the coal, produces over 120,000 tons a year, at a profit of \$200,000 for the state. The men receive 25 cents for every ton produced over the quota - up to a maximum of \$5 a week. At the end of the month, if they don't make the quota, they are taken to the "whipping rock." To make sure the strap will do its work, the whipping boss rolls it in the moist sand of the floor with his feet. Then operations begin.

The Hole (solitary confinement cells) at Brushy Mountain consists of cages, four feet square. The sole sources of light and air are pinpoints in the vault-like steel doors. Food is the traditional bread and water. Warden Freytag told Pilat, "When a man comes out of there he's half stircrazy, gaunt in the face, eyes sunk in his

head, and broke in his body and maybe his mind."

Brushy Mountain isn't the worst prison in America. Penal authorities say it isn't Briggs Workers nearly as bad as those in Louisiana and Mississippi. But it does typify the worst Battle Against features of American prisons. To find the features of American prisons. To find the best features of prison life, let's go to California.

The Institution for Men, at Chino, Calif., is the best prison in the country says David Dressler, ex-New York State Parole Director. According to him, a visitor feels he is entering a college campus. There are no walls. There is a profusion of flowers, grass and arbors for visiting with prisoners.

The discpline is virtually self-discipline. Cell doors are never locked. The guards are off workers who have seniority. trained in judo, but unarmed. The men Company policy was to hire new go to meals unescorted. The sole form of punishment is deprivation of privileges. siasm for fighting to get back wo-

staffed by licensed teachers. The courses offer official credits recognized by schools throughout the state.

There is no racial discrimination at Chino. Whites, Negroes, Mexicans and Chinese eat, sleep, work and play together. There has never been a serious incident because of this.

There has never been a riot at Chino. Chino demonstrates that the inhuman brutality, the official corruption, the attempt to grind men into dirt, are the root causes of the riots which have been occurring recently in so many prisons.

By E. Logan DETROIT - CIO auto workers at the Briggs-Connor plant are engaged in a running battle with management over discrimination

**Debate on World Crisis By Warren Porter** 

It is hard to believe that the flavor of an exciting public meeting can be put on the printed page. Yet that is what you will find in the September-October issue of the magazine Fourth International, which oppeared on the newsstands last week.

The lead article is a debate between George Clarke, editor of the magazine, and three professors from New York University. This debate, which took place at the university, before a large student audience at the beginning of the election campaign, was on Marxism and the World Crisis. The debate was recorded and this article is the recording in print.

Naturally, Clarke was for Marxism and perhaps just as naturally, considering the campus witch hunt, Professors Anton Friedrich, Walter Wertheim and Elsworth Raymond were against Marxism. In addition to Clarke's lucid explanation of the world situation and the remarks of the professors there are the questions asked from the audience.

The printed page comes alive with the

analysis of the class struggle now going on in the young Indonesian Republic will gave employment applications to give the reader the background to better all. wit and laughter and conflict of a sharp debate. And the reader will share the audience's disappointment when the moderator points to the lateness of the hour and declares that the meeting is over.

An article of special topical interest in the current Fourth International is "Social Conflict in Indonesia" by Tjokro. This makes the state of the French Communist Party comprehensible but shows what it portends for the future.

Other fine articles include "Capitalism and Democracy" by Harry Frankel, a critical examination of the latest trends in Compared to 1948 cal examination of the latest trends in capitalist political theory, and "The Military Coup in Egypt" by S. Munir.

### Notes from the News

THE TRENTON TWO, Collis English and Ralph Cooper, have won a new trial. The New Jersey Supreme Court, in ordering a retrial, unanimously reversed the life sentences given the two Negro men in a compromise verdict which acquitted four of the framed-up Trenton 6. The judges, however, did not rule out the so-called confessions which were sweated out of the defendants by police in five days of continuous grilling, intimidation and application of drugs.

19-YEAR OLDS to be drafted soon, is the report in the N. Y. Times. This is not expected to happen before the end of January.

\* \* \*

POLITICAL ZOMBIE, Martin Dies of Texas, was brought back to public life by the success of the witch hunt. After political death, following his chairmanship of the House Un - American activities committee in the 1930s, Dies is back in Congress. He declares that he has a personal list of 100,000 "subversives," and will carry on an independent witch hunt if he is not granted a seat on the Un-American Committee. Dies promises to introduce legislation to enlarge the scope of the witch hunt "to include Socialists and all those who don't believe in our form of Government."

GERMAN FARMERS in village of Buettelborn have told U.S. Occupation authorities they will fight with "scythes and threshing flails" against U.S. Army attempts to requisition land there for an ammunition dump. A town meeting voted that they did not want "anything as dangerous as an ammunition depot" near their peaceful village.

\* \* \*

IMPERIALIST SOLUTION for the poverty of Puerto Rico, U.S. possession torn from Spain in Spanish-American War, was offered by Bishop Homer A. Tomlinson, general overseer of the Church of God. He advocates that one-third of the island's 2,200,000 people move to other Latin American countries rather than migrating to the U.S., as many are doing, in search of work.

UNION SOLIDARITY was a major factor in the victory of the six-week Rice-Stix strike at plants in St. Louis and Farmingdale, Missouri and Water Valley, Mississippi. The strikers are members of the CIO Amalgamated Clothing Workers Union. In Water Valley the Mississippi National Guard was used in an unsuccessf. attempt to break the strike. Over 700 AFL teamsters and warehousemen in St. Louis refused to cross picket lines around the Rice-Stix ware-

house. Warehouse bosses called up teamsters, buttonholed them on the street, arguing: "This is not your strike, you will not get anything out of it. Do you think the workers in Farmingdale or Mississippi would do as much for you?" The teamsters' steadfast reply was, "we aren't scabs." Details of the settlement will not be made public until the strikers have voted on them.

\* \* \*

THE NAACP won a significant case in a federal district court in Virginia against segregation on interstate buses. The judge ruled that even though the bus was traveling from one Jim Crow state to another, segregation laws imposed "an undue burden on interstate commerce."

ROMAN EMPEROR MORE LIBERAL than the U.S. witch hunters is the conclusion of a student of the classics in a letter to the N.Y. Herald Tribune. The writer, in discussing the loyalty" purges, quotes a letter written by the pagan Emperor Trajan 1,800 years ago to Pliny, who was a governor of a distant Roman colony. about the persecution of the "subversive" Christians. Though Trajan was all for the punishment of Christians, he told Pliny not to violate Roman liberties. "Information without the ac cuser's name subscribed must not be admitted in evidence against any one, as it is introducing a very dangerous precedent, and by no means agreeable to the spirit of the age," the Emperor warned. U.S. Loyalty Boards and federal district attorneys use precisely this kind of "evidence," but then nobody ever claimd they were as advanced as Trajan.

I. F. STONE, columnist for the now-defunct N. Y. Daily Compass and author of "The Hidden History of the Korean War," has announced that on Jan. 17 he will launch a news-letter. It will be called I. F. Stone's Weekly, and will cost \$5 for a year's subscription The address is: I. F. Stone's Weekly, Room 14A, 20 E. 35th St., N. Y. 16, N. Y.

**REYNOLDS** ALUMINUM CO. is protesting the local tax assessor's valuation of its Portland, Oregon, plant at \$7.3 million as too high. The plant has a replacement value today of \$50-60 million. It was built with taxpayers' money by the government at a cost of \$19 million and then sold to
