stolen from his ancestors. "The post-war years were not between \$10 and \$12 billion is obvious need. And besides this a kind to Mr. Hayes. He wandered from his reservation needed at once to build class building program always prohome in Southern Arizona and tried vainly to find a place rooms for children now in school vides funds for graft of all for himself in the white man's peacetime world."

capitalist white America which massacred the Indians, robbed them of their lands and herded them into glorified concentration camp areas called "reservations." After his funeral, Rene Gagnon, one of the two remaining survivors of that flag-raising on Iwo Jima, said of Ira Hayes:

"Let's say he had a little dream in his heart that some day the Indian would be like the white man . . . be able to walk all over the United States."

Ira Hayes himself once put it this way: "I want to be out on my own. But out in Arizona the white race looks down on the Indian as if he were a little man, and I don't stand a chance anywhere off the reservation. . .

He didn't stand a chance on the reservation either. Most of the half million full-blooded survivors of the original inhabitants of this country, the Indians, are treated worse than animals. In the Arizona reservations, the Indians average an annual income of less than \$600. In some states, it's less than \$500. Among one group of Indians-the Papagos — the life span averages 17 years. The Navajos suffer 12 to 15 times as much from tuberculosis as the rest of the population. They average less than one year of education and on some reservations there are no schools for thousands of Indian children.

But the white men who had robbed his people, who treated him as less than human and forced him back into a concentration camp in the wastelands, did right for him after he was dead. They buried him in Arlington National Cemetery near the Unknown Soldier and they will use his memory to propangandize American youth for the next war for "democracy."

The Negro Struggle By George Lavan

Snake-Oil Salesmen in the Senate

There seems to be something about human nature under capitalism that makes the average person fascinated by the boldness and slickness of the professional con man. A good percentage of the ordinary folk at carnivals who listen to the phoney patter of the snake-oil barker buy the stuff not because they think it's any good but as a reluctant tribute to the artistry of the swindler.

In old New England, where the Yankees were famous for and proud of their shanp dealings (they were the ones who sold wooden nutmegs), an outsider who outwitted them was not denounced as a cheat but was admired for his skill. The old Yankee saying was that it was "better to be shaved by a shamp razor than a dull one."

So today one can't help marvelling at the boldness and swift patter of the liberal politicians in the Senate. When it comes to brass . Senators Humphrey, Douglas, Morse et al needn't tip their hats to anyone.

They have just introduced eleven civil rights bills into Congress. These deal with FEPC, poll tax, lynching, Jim Crow in interstate travel, and other issues vital to the fight for full citizenship for the Negro people and other minorities.

These bills aren't intended to be passed, indeed they probably aren't even intended to be voted on. They are intended only to make the record. That is, to enable the sponsoring Senators to declare in public speeches that they fought for civil rights legislation. The fate of these bills and all civil rights. legislation was sealed the first day of Congress and by these very same liberal Senators. On the first day the Senate rules can be changed by a majority vote. If it isn't done then the old rules go into effect making it impossible to end a filibuster. Any proposal to end a filibuster by changing the rules can itself be filibustered to death.

For years the Leadership Conference on Civil Rights, an organization of 50 groups including NAACP, CIO, AFL, has been working to get a vote on opening day to change Senate Rule 22 (the rule permitting filibusters). Many Senators, including Humphrey, Douglas, Morse and most of the other sponsors of the latest batch of civil rights bills, have long been pledged to fight for a change in Senate Rule 22 on opening day. When this session of Congress met the vital

day passed without even a whisper about Senate Rule 22, let alone a fight on it. Why? Senators Humphrey and the others had held a conference and decided not even to bring up the subject lest it offend the Southern Democrats.

When criticized for this surrender without a battle, Humphrey made a glib explanation about the bill not having a chance and how he could have introduced such a bill and made pretty speeches that would have gone over big with the Negro and labor public, but that he was too honest to engage in such demagogy when there was no possibility of

success. Now when there is even less chance of passing civil rights legislation - indeed the bills can not even be brought to a vote since the Southern Democrats will filibuster ----

Humphrey and gang make a grandstand play with the introduction of not one, but eleven civil rights bills.

The Leadership Conference on Civil Rights, sadder but wiser after its experience with the Senate liberals, met the introduction of the existence and functioning of the eleven bills with a not exactly enthusiastic Young Socialist Club, which costatement that "the task is not the introduction of this legislation, but the getting of it to the floor of the Senate for debate and passage." This means they suspect that Humphrey and gang have just tossed the bills into the hopper and have no intention of even trying to get them out of committee pigeonholes.

A con man can't keep fleecing the same customers again and again. One of these days the Negro and working people of this country are going to retire their liberal "friends" from politics and send them back to selling snake oil and lightning rods.

VOLUME XIX In Detroit

Scores Bill DETROIT, Feb. 14. -Young Socialist Club of Wayne University last week voted unanimously to "strongly condemn and oppose" Section 685 of State Senate Bill 1011, which is designed to bar minority parties from the ballot by requiring a prohibitive number of signatures on election petitions.

A resolution adopted by the club noted that "the enactment of this measure would strike at the rights not only of existing minority parties but also at the rights of all other citizens who might wish at some future date

to form a new party.' It also explained that "the exwould have the effect, under

present regulations governing political clubs at Wayne University, of prohibiting the further

operates with the socialist parties appearing on the ballot." Thus the Young Socialists are opposed to Section ,685 on the general ground that it would restrict the rights of minority

20 of Every 65 Workers are Women 000000

THIS CHART ILLUSTRATES how America's work force is divided between men and women. Each figure represents 5.000.000 workers-20,000,000 women and 45,000,000 men. Statistics come from Labor department's Bureau of Labor Statistics, Washington, D. C.

It also explained that "the ex-clusion of the socialist parties from the Wayne County ballot would have the effect under **Against Puerto Ricans**

By Tom Denver

NEW YORK, Feb. 15 - Henry Matthews, a young tem and announced that in his Puerto Rican laborer died in the electric chair at Sing Sing campaign he would center his Thursday, Feb. 10, after last minute pleas for clemency had been denied by Democratic

the clemency hearings it was "discovered" that he had already had two such tests, one in June of 1954. and the other Jan. 17. two weeks after the court of appeals upheld conviction by a vote of four to three. This "discovery" was "legally" recorded in time to snatch Rios from the electric

chair at the last moment. The indecent haste to put these three young Puerto Ricans to death is calculated to strike fear and a "healthy respect for the law" into the minds of the Puerto Rican people. In addition it gives the cops a green light to loosen their clubs in minority communities.

A striking example of New York's police in action is the case of Sergeant Carboy and Patrolman Caffrey now facing trial on charges of "prejudicial conduct."

NUMBER 8

LOS ANGELES, Feb. 12 - The Los Angeles Local of the Socialist Workers Party is sponsoring the candidacy in the April primary election for member of the school

board of Robert Morgan, militant young student and fighter for academic freedom in the public school system.

Members and friends of the SWP aided Bob Morgan in the circulation of nominating petitions in which the necessary 500 valid signatures were obtained and filed with the election board. The board has certified the candidacy of Bob Morgan for member of the Los Angeles School Board in the April 5 primary. As it is a "non-partisan" election none of the candidates carry a party designation.

In an interview with a reporter for The Militant, Bob Morgan vigorously assailed the witchhunt atmosphere now prevailing in the Los Angeles school sysmain fire against all of its manifestations. "Teachers in the Los Angeles school system," he as-

serted, "are so terrorized and intimidated by the witch hunters, Swabeck Lecture that they dare not teach the truth about any of the social problems that afflict our society.' As part of his campaign Foretells End of against the witch hunt Morgan is demanding the immediate re-**Profits System** peal of the notorious Dilworth Act under which many Califor-

The 'Right-to-Wreck' Laws

By Roy Gale

THE CASE AGAINST "RIGHT TO WORK" LAW. By the Congress of Industrial Organization, Washington, D. C. \$2.00. 171 Pages.

The first impression I had when I started to read this book was good. But as I read further I was disappointed. As an answer to "right-to-work" laws the book has serious weaknesses. What I expected from an answer to the open-shop bosses was an explanation of how these laws affect the unions, and, then, a program of action for combatting them. The book, however, largely confines itself to telling what the laws are.

South. In effect the CIO authors try to say: "We get along well with management in those plants that have union security. It is to your advantage to deal with 'responsible' unions.'

They quote the National Industrial Conference Board, a research agency wholly supported by the employers:

"Some executives believed that . . . under a closed-shop agreement, the union could have better control over its members, enforce discipline, and thus assure compliance with all the provisions of the union contract." And, "The union would not be under the same pressure to seek constantly for new

restraints.

These "right-to-wreck" laws, as the unions correctly characterize them, are allowed under seciton 14 (b) of the Taft-Hartley Act. States are allowed to pass anti-labor legislation which is harsher on labor than the federal law. The state laws are designed to allow the bosses to infiltrate non-union and anti-union elements into the plants and to hamstring organizing drives in open-shop areas.

The text of the CIO book is cluttered with reprints of the various state laws. It would have been better for the average reader to put these laws in an appendix at the back; then in plain English explained just what the laws are and how they function.

One of the book's major failings is a neverending stream of quotations firom liberal senators, congressmen and college professe . What many of these quotes actually amount to is a plea to the anti-union bosses in the concessions from management. Once its position has been made secure it does not have to struggle to hold its membership by repeatedly demonstrating its ability to obtain new advantages."

I don't believe that the employers really like the union-shop - or any other form of union security. What they are willing to do, is recognize reality after a union has demonstrated its ability to bring the employer to terms, and use the treachery of the union bureaucrats to discipline the membership. But any "appeal to reason" to open-shop employers, preaching that union security is good for them is bound to fall on deaf ears.

Despite these obvious weaknesses the book is worthy of a place in your library. Valuable ammunition can be found in it, especially in the appendices, to fight these "right-to-wreck" laws.

It lays 250 eggs a year as compared with the 180 to 200 eggs produced by average unspeeded-up hens. Best of all, it eats less corn. The GM, Ford and Chrysler scientists are believed to be investigating the new chicken to see if any of the principles used in developing it can be applied to producing an "almost perfect auto worker."

Notes from the News

THE ENTIRE TERRITORY OF HAWAII, which has a population of over half a million, has been labelled a security risk by Congressman Pillion (R-N.Y.). He said the 1954 election in Hawaii "was a complete victory for the International Longshoremen's Union and the Communist Party," and that statehood for the territory would be inviting "two Soviet agents to take seats in the U.S. Senate."

* * *

PRESIDENT EISENHOWER shot two birds "in the fading light amid the scrub pines of Southern Georgia," according to the Feb. 11, N. Y. Times. The quail hunt took place on Secretary of the Treasury George M. Humphrey's 600-acre estate "Milestone Plantation." The Times reports that Eisenhower went out: "With a twenty-gauge double-barreled shotgun cradled in his arm, he rode atop a black and red hunting 'roadster' drawn by two white mules. Mr. Humphrey sat beside him."
