# British Women British Women Stormily Protest THE MILITANT Atom Bomb Tests Vol. XIX - No. 14

British women are raising a storm against further atomic bomb tests because of the genetic hazards to future generations. An extraordinary demonstration of women occurred in the House of Com-.

mons on March 22 when the Hbomb test peril was debated.

The debate followed warnings by leading scientists that if bomb effects of the increased radiation inherited physical structures and

functions. Not only procreation of mondeterioration of the human

in hereditary disease, a decline in physical ability," according to science commentator Waldemar Kaempffert in the March 27 N.Y. Times.

SCENES IN COMMONS

"Scenes reminiscent of Britain's historic suffragette movement before the 1914 war."

"TREMENDOUS FEELING"

Dr. Edith Summerskill, a minister in the former Attlee cabinet strosities is feared, but "a general and now chairman of the Labor Party, demanded that the natural stock . . . a loss of vigor, a scientists of Britain, the United reduction in health, an increase States, the Soviet Union and France be called together immediately to issue a world-wide warning of the effect of nuclear radiation on the health of present and future generations. This was voted down after intense debate

by a 290 to 250 vote.

The Monitor reveals that observers in Westminster felt the have just been witnessed in West- Churchill regime "put up a weak minster," writes London corre- performance and failed to recogpondent Peter Lyne, in the March nize the tremendous feeling ... 27 Christian Science Monitor. He stirred up by the hydrogen bomb reports that "dread of the danger question and especially the extent to human life from H-Bomb ex- to which women are becoming periments," as well as fear of united and resolute for some new atomic war, has "spurred the action to counter the nuclear women as they have not been threat." Lyne adds: "The packed spurred since they fought for public galleries in the Commons their right to vote in the years were deeply impressed by the case Dr. Summerskill presented."

This polite way of telling the

By George Breitman **CLEVELAND**, March 29 - The United Auto Workers, CIO, is ready to strike. if necessary, to win some variant of President Walter Reuther's guaranteed annual wage or guaranteed employment plan in 1955. This was the meaning of today's vote, at the union's 15th constitutional convention here, to set up a \$25,000,000 strike fund through a dues increase.

Despite attempts of the capitalist press to inflate the strength of delegates who were opposed to a dues increase, there was never any doubt in the conventionthat it would be adopted by a decisive majority. Less than 10 per cent of the 3,100 delegates most of them people who generally support the Reuther leadership - voted against the Reutherproposed increase in the consultative hand vote taken today.

Dues increases have never been popular or easily put over in the UAW in the mast. But the great and the certainty of new layoffs majority voted for it this time this spring or summer remain. because they think the union may Also remaining is a strong prebe forced to strike this year and judice among UAW members therefore will have need of a against married women workers, strike fund, or because they feel as anyone familiar with trends that the auto corporations would in the main auto centers can interpret a rejection of the dues testify. ### Who Owns America?

It was nearing the golden spring of 1953 for American capitalism. Production was at an all-time high; unemployment at an all-time low. Best of all, profits were almost double the lush take in World War II. The Jan. 5, 1953, issue of Life magazine looked on the U.S. economy and found it exceeding good. It said so in an entire issue devoted to: "The American and His Economy."

Not that this country had abolished poverty. "We certainly haven't," said Life. But we were on the way to universal wellbeing. Was this perhaps due to the war economy - the Korean War? Life magazine simply ignored that foolish question. U.S. prosperity was the product of "one of the great social revolutions in history,' Life quoted an eminent economist. And it concluded: "The American system that has produced this extraordinary change is something new. It certainly isn't capitalism in the old-fashioned sense. And even more certainly it isn't socialism."

Life's indefinable "dynamic new economic system which has safely by-passed socialism" was based, of course, on private ownership of the means of production and distribution and was operated for private profit. But the secret of its boundless promise lay in the "democratic" ownership of the big corporations which "have so many owners that none can be a power by reason of his ownership." In short, we were becoming a nation of capitalists.

The scene now shifts to the slightly less golden spring of 1955. Unemployment has tripled. Production has continued below the previous peak for almost two years straight. And worst of all, profits have not been able to remain at quite the stratospheric heights of two years ago. A Senate committee is investigating the possibility that unusual stock price rises may be due to dangerous speculation.

The March 21, 1955, Life magazine now finds that something has happened to "one of the great social revolutions of history."

Dorothy Schiff, publisher of the liberal New York Post, is not the ordinary publisher whose main interest is raking in the profits. She writes a column of her own and she is idealistic about liberal politics. On March 27 her column contained a blistering attack on Senator Hubert Humphrey (D-Minn.), dubbing him "Hustling Humphrey."

She relates how she first heard Hum-

All Americans are not becoming capitalists and owners of industry through the widespread ownership of common stocks. In fact. Life finds that what this country needs is "more people to own a stake in ever, that the movement against industry." Basing itself on testimony before the Senate stock market hearings, Life discloses:

Signed articles by contrib

"Entered as second class matter March 7, 1944 at the Post Office at New York, N.Y., under the act of March 3, 1879."

Monday, April 4, 1955

"In the greatest capitalist nation in the world, where common stockholders own the industries that provide the livelihood for us all, 77% of the adult U.S. population do not even know what common stock is." (Original emphasis.)

But that's not all. There are so few people willing or able to become "partners in industry" that Life cautions the Senators about scaring off potential new purchasers of stock. These Senators "will serve the country poorly indeed if they seek to all."

It's a mighty slow-working "social revolution" that has extended the ownership of industry to just  $4\frac{1}{2}\%$  of the people. If that's how far corporate ownership has spread in the almost two centuries of U.S. capitalism, we can confidently expect full 'economic democracy" under "free enterprise" in just a few thousand years. And that's if we can find a way to distribute 1952, the biggest shareholders — those owning at least \$10,000 worth or more hold two-thirds or more of the total value and Mexican minorities are presof all common stocks.

In case you don't want to wait a few milleniums for economic democracy, you can get it in your lifetime by a real social Since then a growing number. revolution. Just fight for socialism which have settled in St. Paul where ends private ownership in the means of they find work mainly in the production and distribution. Then society as a whole will take over and operate the economy co-operatively and for the benefit of all, and you won't have to risk a dime on stock speculation.

### "Hustling Humphrey"

filibuster legislation. And last week Hubert pulled another fast one. He tried to butter up liberalism's arch enemy, William Randolph Hearst, Jr."

phrey some years ago at an Americans for Democratic Action convention. Although he was enunciating the standard liberal line of the period — with which she agreed — she sensed that he was a demagogue.

"Last August," she writes, "I was horrified to learn that our friend the 'liberal demagogue,' whose term was about to expire, had seized upon the passions aroused by McCarthyism and appeared to be attempting to turn them to his own political advantage. This formerly ardent civil libertarian had introduced an amendment to the Communist Control Act which seemed to outdo McCarthy at his worst."

This is but the beginning of "Hustling Humphrey's" sell-outs in the publisher's notebook. "When he was re-elected to the Senate last fall, I thought he would no longer feel it was necessary to out-Mc-Carthy McCarthy. How wrong I was! At the beginning of the new session, the demagogic twins, Humphrey and Morse, led in the decision not to fight for anti-

Labor and the Farm Bloc

We have always contended that if labor built its own party, it would receive the backing of the majority of the population. In addition to support from the organized workers, a Labor Party could count on powerful allies, and the combination would guarantee a clear-cut victory.

Who are these allies? The Negro minority, for one, is solidly in labor's camp. The official Negro organizations consider the unions their firmest supporters in the fight to end Jim Crow.

Now important farm 'spokesmen are elated because the AFL and CIO have officially endorsed their key demand for rigid farm price supports set at 90% of parity.

The bi-partisan majority of the House of Representatives Agriculture Committee has just issued a ten-page pamphlet quoting CIO and AFL leaders in favor of rigid price supports. This pamphlet is being mailed to 30,000 farm organization leaders throughout the country.

Labor leaders assured the farm-bloc Congressmen that workers don't blame farmers for high food prices. The price to farmers could go up without resulting in higher food prices for consumers, they said.

Net farm income dropped 10% in 1954 over the previous year, and this prompted

## The Negro Struggle By John Thayer

#### Southern Liberals — A Disappearing Species?

The point reached by the Negro struggle today — the demand for integrated schools North and South, given legal endorsement by the Supreme Court decision, has jeopardized the very existence of a political grouping that commanded a fair amount of attention formerly. This was the political grouping known as "Southern liberals."

Today the very ground seems to have been cut out from beneath them. Their stock in trade has become obsolete. Discouraged, most of them have even stopped trying to peddle their wares. Unless they can find some new variation or unless the Supreme Court's still-to-come decision on implementing school segregation gives them a new lease on life they may just fade away.

Who were the Southern liberals? Some of their more prominent figures were Ellis Arnall, Lister Hill, Jonathan Daniels, . Hodding Carter, Virginius Dabney and many others whose names were familiar to Northern readers of the liberal press.

What was their position and line? They were all men of standing in the South -mostly as politicians and journalists. Their line was that the "excesses" of Jim Crow should be done away with. They deplored lynchings, the cruder forms of Jim Crow and the glaring inequality of the "separate but equal" facilities in schools, hospitals, etc. for the Negro people.

They stood 100% for "separate but equal" segregation but "liberally" urged token reforms so that the South culd defend itself against the charge that all public facilities for Negroes were abysmally inequal to those for the "master race."

Their "pro-Negro" position never jeopardized their standing in the South. Indeed in most cases their careers as public Lundeberg's figures were based on it. For they were very valuable to Southern Jim Crow and the rulers of the South realized this and More Work protected them from any Ku Klux elements who might not understand what it was all about.

These Southern liberals were invaluable ambassadors to and placators of Northern opinion. They were "living proof" that not all Southern leaders were rabid on the race question. They seemed to give promise that, left to itself, the South would solve the disgraceful and barbarous treatment of the Negro people without Northern interference.

While no Negro, labor or liberal gathering in the North would for a moment tolerate the presence of a Bilbo or Talmadge, these Southern liberals could appear and explain the Negro "problem" and urge that the South be left to solve it in its own way (and in its own sweet time). order to evade union pay stand-

on the doctrine of "separate but equal." Now that has been thrown out the window. Today Negro people will not settle for anything less than integration, nor will labor. Not one of these Southern liberals signed a crew on the Tonsina has dared come out for integration. That which included every person or is the great dividing line in Southern politics. A decade ago Judge J. Waties Waring had enough courage to do so and was immediately excommunicated from white Southern politics and life.

The disappearance of this brand of Southern liberalism will clear the air. No which was set up a year ago as one will mourn the passing of these a joint AFL-CIO body. hypocrites except their fellow hypocrites, North and South.

# At Less Pay

**VOLUME XIX** 

#### By Roy Gale

SAN FRANCISCO, March 23 -Harry Lundeberg, Secretary of the Sailors Union of the Pacific (AFL), has reversed the traditional stand of labor for shorter hours and more pay. In the name of fighting runaway ships, operating under foreign flags, he signed a crew for the S.S. Tonsina with seven less men in the crew — at drastically reduced overtime. Watch standers are required to work 56 hours at sea. The runaway ship problem is a serious one. American ship operators register in Panama ir But everything they said was premised ards and conditions. But Lundeberg's answer to the runaway threat was greeted with bitter hostility by other maritime unions and rank and file seamen In the first place Lundeberg the ship-from Master down to wipers. This brought a sharp clash with other AFL seafarers' unions. #### Just a lonely spot on the desert. The streamlined train hadn't stopped in four years. Only four or five buildings to accommodate a few hopeless, grubbing desert ranchers. That's the setting for a lynching that slowly comes to light in the MGM

movie, "Bad Day at Black Rock." The hero of the movie, played by Spencer Tracy, comes to Black Rock in search of a Japanese-American farmer and finds he had been lynched there the day after Pearl Harbor. The townspeople had kept their guilty secret throughout the war years.

"Thank heavens there aren't many towns in America like Black Rock," says the hero as he unbares the ugly facts of the racist lynching.

Black Rock — a tiny, isolated exception? What about the federal government of the

By Myra Tanner

'Bad Day at Black Rock'

antennae on the homes of fishermen - all long-familiar sights — now made out to be sinister evidence of "Japanese treachery."

A super-patriotic group in the Fish Cannery Workers Union, whipped up by the berg's," the CIO statement (D-Mo), chairman, and Harold newspaper hysteria, introduced a motion into the union meeting to expel forthwith their Japanese-American union brothers threat to the hard-won standards and sisters. The good name of the union of American seamen." was fortunately saved by a small majority of the workers who withstood the avalanche of lynch propaganda.

But the problem was soon taken out of likely since the Lundeberg conthe union's hands by the federal govern- tract slashes conditions so comhomes and herded into concentration camps. The first big Pacific victory for itorial support to Lundeberg's nett in that role.

United States? Wasn't it acting like a lynch mob when it condemned thousands of Japanese-American citizens and their families to concentration camps during the Second World War? When it pronounced men, women and children "guilty" without a trial, a jury or any other "due process" just because of their national descent?

And what about California, the big golden state controlled by the big golden Bank of America with its vigilante tradition and the so-called "Farmers' Association?" Is Hollywood reluctant to lift the glamorous mask off the face of its own home state?

Too many of us know the real story. We lived that history. All the newspapers of Los Angeles, the third largest city in the United States, must share the blame as well as the miserable citizens of "Black Rock." In almost every issue of the daily press, we were treated to hysterical, lynchinciting lies following the tragedy of Pearl Harbor.

The newspapers carried pictures of gun displays in hardware stores on Terminal Island where many Japanese-Americans worked in the fish canneries, and radio

### Notes from the News Board, according to charges made by John W.

"SECURITY" TESTS FOR PSYCHIATRISTS? Labor's Daily reports that in Washington, D. C., serious consideration is being given to a plan to require FBI clearance for psychiatrists before they can treat government employes or former employes in "sensitive" positions. This development follows the disclosure at the recent convention of the American Ontho-psychiatric Association that the loyalty program is driving many government employes to nervous breakdowns. One Washington physician queried on the merits of screening psychiatrists said: "The administration would do better to mind its own business. Pretty soon the psychiatrists will have to see psychiatrists.' \* \* \*

CIO PACKINGHOUSE WORKERS CONVEN-TION of locals in Iowa, Nebraska and Colorado (membership 25,000), passed a resolution condemning "the action by the State of Kentucky in taking reprisal action against Carl Braden for his activity on the behalf of better relations among peoples." Braden helped a Negro buy a home outside the overcrowded Negro districts of Louisville. Then he and six others were framed up and indicted under the state sedition law. First to be tried, Braden was sentenced to 15 years imprisonment.
