The True Story of the CIO

It is with pride that the Militant publishes "20 Years of the CIO" by Art Preis. As those who have read the installments that have already appeared realize, it is an extraordinarily serious and scholarly work.

It isn't merely a work of research, however. Art Preis, himself, played an important and honorable role in the great class battles of the Midwest from which the CIO emerged. From those picket lines he came to the Militant, where, as labor editor, he closely followed and reported the development of the union movement. For over a decade he covered the conventions of important CIO unions for this paper.

The series is not only timely because of the approaching end of the CIO when it merges with the AFL, but because of the present period and the coming period. Many valuable lessons can be learned from the CIO's history that will stand workers in good stead today and in the days ahead.

But these lessons aren't to be had for the asking. In the brief period since the beginning of World War II all sorts of official and unofficial myths, legends, misconceptions, half-truths and outright lies have grown up about the CIO, what social conditions it grew out of, its birth, how it won its great victories, and how it began to harden in the mold.

A young socialist or trade union militant would have an almost impossible task to dig out for himself the true facts of the history of the CIO, its relations with

But that does not mean it will not be ies of deals and secret arrange- height. generation, including those who fought on overall world balance of power the picket lines of the Thirties and sat deal. down in the auto plants. Indeed their memories and judgments have been considerably blurred in the intervening years bureaucracy as well as the boss press interlude in the open struggle ary expedient for U.S. imperialabout what the early CIO was and how it came about.

The first installments in the series deal with the gestation period of the CIO that bitter period when the CIO was developing in the social womb of the great depression. The current installment covers the acute labor pains of the NRA strikes. Without a knowledge of these, the birth of the CIO would be incomprehensible.

Even more important are the social and political conclusions to be learned for to- the cold war and then compelled and broke with all Leninist traday from these past historic events. They | the capitalist powers to seek | ditions. all have a current urgency, for the same agreements. It conceals the class problems in new form still confront American Labor. And they will continue to confront American Labor until the working class learns the basic lesson that all real gains made are made only by its independent action, and nothing is gained by class collaboration, i.e. labor support of "good," or "friendly," or "liberal" capital

ists and their politicians.

Labor Solidarity in South

The headlines and front-page pictures about the coming merger of the Congress of Industrial Organizations and the American Federation of Labor feature the meetings and statements of the top union leaders. However, an important news story that goes unnoticed is the anticipation of unity by local AFL and CIO organizations all over the country. With tremendous enthusiasm hundreds of local unions and central labor bodies have gone ahead without waiting for formal unity at the top — with mergers of local bodies and with joint activities. The ranks of labor and local union officials are ahead of the top leadership as far as labor unity is concerned.

This has been most spectacularly shown in the Southern strikes. Throughout the South there has been cooperation of AFL, CIO and independent unionists in support of the CIO telephone strike and the recent tions from unions with bitter rivalries demonstrated together.

AFL non-operating railroaders strike. Indeed, rank-and-file enthusiasm swept unions with long records of feuds, conflicting jurisdictions and raiding into unified support of the strikes.

Such spirit may well bring the independent operating rail unions into the merged AFL-CIO. That would be good for all labor and might well lead to an end of the jigsaw puzzle, craft unionism, that plagues and divides the railroad workers.

physical and moral support has gone to pickets in the South from all sections of organized labor. AFL Central Labor Unions are assessing their members for funds for CIO strikes. In the great Labor Solidarity parade in New Orleans delega-

As the Militant has reported, financial, Recently, a small bleat has been added

to the large chorus for "peaceful coexistence." It comes from the group of ex-Trotskyists who publish the magazine American Socialist. This group prides itself on having no program; but every page of its magazine echoes the program of a "sophisticated" brand of Stalinism.

"The popular demand for a new practical settlement between the two major power blocs," they say, "has thus become an unpostponable must. A new modus vivendi will not solve all outstanding problems of the human race. . . It will simply provide the basic framework of activity in which peoples and classes will carve out their destinies, and without which there will be no future of any kind."

Curiously, these same people were saying, only yesterday, that all talk of a deal between the Soviet Union and American imperialism was out of the question. They accused us of blindness to the world reality because we predicted that imperialism, confronted by an unfavorable world situation, would postpone its all-out war plans against the Soviet bloc and attempt to gain time and better opportunity by making a "practical settlement" with the Kremlin.

We explained to these experts on world reality that such deals would prove no more effective in achieving peace than the agreements of Teheran, Yalta and Potsdam. In these deals the Stalinists would give their services in derailing and betraying the revolutions of the colonial people and working class wherever they had influence. And the imperialists would get

The Negro Struggle By Jean Blake

Union Organizing in the South

Since more than half of the Negro workers in the United States are in the South, where they constitute more than one quarter of the total labor force, the right to organize into unions in the South is rapidly moving to the top of the agenda of problems of the Negro struggle for equality.

Most of the daily papers in the North don't give us much information about Southern union developments until they reach the proportions of the railroad and telephone workers' strikes, but the Wall Street Journal of May 9 and 10, in two articles on labor and the South, gives a very frank account of the situation by staff reporter Stephen K. Galpin.

This is what he concluded from "scores of conversations with union, employer and public officials in a half-dozen Southern states":

"The Southern work force remains, as it has for years, less than 15% unionized." But, there are a number of new factors in the situation - new aid is expected from the AFL-CIO merger due in December; unions are merging their staffs for joint organizing campaigns; Northern companies opening new plants in the South are proving easier to organize.

"Some companies" Galpin points out, "have national labor contracts that automatically extend key benefits to new plant workers once the union is certified as bargaining agent. This is a big boon to organizers, since all they need to do is point to the benefits and tell the workers: 'Vote union and you'll get 'em all'."

But there's another side to the picture. "Employers and their community allies are retaliating," Galpin reports. "Factory towns such as Carrolton, Ga., Baxley, Ga., and Hohenwald, Tenn., have lately passed or started enforcing laws to curb or keep out union organizers." The "solicitor laws" require licensing of union organizers and provide stiff penalties for violations.

"Carrolton charges union organizers a \$1,000 license fee and \$100 a day for the privilege of soliciting members and says violators can be assigned to 60 days of road gang work.

"In Baxley, Ga., . . . the license costs \$2,000 and the penalty is a \$300 fine or 30 days in jail. Hohenwald, Tenn., passed one of these laws in February. The penalty for violation there is a \$50 fine for each offense, and each person whose union membership is solicited constitutes a separate offense."

Another device used by the employers is the formation of "Citizens Forums or Citizens Committees to lead the fight against union organization. These are made up of a community's leading citizens and are free from the restraints that the Taft-Hartley Law clamps on employers' speech and action."

This technique was used by the employers in Smithfield, Va., who set up a 'Citizens Committee' to attack the CIO as a purveyor of 'hate and dissension'." They also instigated a phoney "independent union."

Galpin cited an example of the successful use of all of these techniques by the employers in Smithfield, Va., against the CIO's attempt to organize the two local packing companies, P. D. Gwaltney & Co. and Smithfield Packing Co. Because 80% of the plants' workers are Negro, another feature was added — the use of a couple of Uncle Toms to organize the company union.

Wall Street Journal gloatingly reported the Labor Board election was lost - 23 to 243 at P. D. Gwaltney & Co., and 176 to 289 for the company union at Smithfield Packing Co.

The Journal should have added: There are now 199 workers in Smithfield who were not intimidated by the Citizens Committee or taken in by the Uncle Toms. These are the people who will win full equality for Negroes in the South.

the cops used a rubber hose on him, public opinion, fairly well wised up about cops' methods and cops' mentality, will view police denials skeptically.

But recent years have brought sinister developments in police methods that are little talked of, little understood and hardly believed. What the Nazi Gestapo borrowed in great admiration from Stalin's GPU now has found its place in the arsenal of the more "advanced" police departments, like that of New York City.

The reader should note here that in the police profession a code operates not unlike that operating in the very top summits of pure science where the practitioners recognize no narrow borders of nation or politics. Whenever two cops get together it makes little difference that their unforms, their tongues and their immediate lovalties differ. They are sure to compare notes and exchange experiences and mutual congratulations on professional advances and successes.

So it is that "psychological brutality" as it is called by the U.S. Court of Appeals has become part of New York's police department practice.

This court last week lifted the curtain

LITERARY WAITER WINS case before New

twenty-seven hours with but a brief in- tion fired four more trim workers terval for rest in a cell so badly equipped as to make sleep virtually impossible for a man harried by the questioning. During this long period the police in effect

kidnapped him; they kept him incommunicado, refusing to allow his lawyer, his family and his friends to consult with him. . .'

During the long questioning two women and a man were brought in to face the prisoner. He was not told that they were detectives. Each falsely pretended to identify him as the person who was sitting at the wheel of an auto during a shooting.

Three days after the court's decision the New York Police Department announced a change in rules for citizens complaining of police brutality. Instead of having to make the complaint at the station house where it occurred the citizen could make it at any station house or police office. The reason, according to a police official, was that citizens told of rumored around New York that the move was urged on the department by its public relations expert.
