TITO

soon shrank from the consequences of following a revolutionary policy, fearing that it would bring down on their heads the wrath of U.S. imperialism as well as the Kremlin.

They had no real confidence in the course of linking their own fight to the world-wide struggle for socialism. They settled for the perspectives of building a "unique" brand of "socialism" within the limited confines of economically backward Yugoslavia-thus reshaping the reactionary Stalinist concept of building "socialism in one country" to their own purposes.

They reneged on their pledge to the working class not to trade political principles for economic aid from the U.S. government and lined up on the side of the UN when that body endorsed Truman's counter-revolutionary "police action" in Korea.

The Titoists now hope to take advantage of the relation of inernational tensions to obtain economic aid from both sides. For it they undertake further petrayals of Marxist principles.

They hope by skillful maneuvering to develop their economy along the lines of nationalized property, to guarantee comforts and privileges for the ruling bureaucratic layers, and at the same time to avoid economic forced marches which would strain the relationship of the regime with both workers and peasants to the breaking point. In return for an end to the Cominform blockade on Yugolavia, and a recognition of it

Alsop claims that the "log jam" U.S. Secretary of State John Foster Dulles and George K. n relations between China and C. Yeh, foreign minister in dictator Chiang Kai-shek's cabinet on Formosa, shake hands in Washington last December after signing a "mutual security" treaty. The pact formally binds the U.S. to defend Chiang on the island where he was driven by the Chinese people and symbolizes Wall Street's long-range aim of smashing the new government put into office by the hand.

Washington, N. J.

tion in the Cominform bloc. The Titoists have demanded a substitute organization for the Cominform, in which they would be accorded equality.

The stand flows from refusal of the Titoists to see the Yugoslav economy integrated into that of the Soviet bloc. The 1948 break came because of the resistance of the Yugoslav government to a merger which would have proceeded on dictatorial terms set by the Kremlin. This would have led to the oppression

we, the workers, are to be taxed, of the Yugoslav working people for the benefit of the privilegehungry Soviet bureaucracy.

The Yugoslav CP leaders would have been transformed into mere flunkeys for the Stalin regime and purged if not suffiployees? And to help pay the ciently compliant.

SHOWED INDEPENDENCE

The Titoists were able to resist because, unlike the leaders of Communist parties in the rest of Eastern Europe, they had a genuine mass following among workers and peasants. This had been consolidated during the course of the war waged against both Nazi occupiers and Yugoslav capitalist and landlord quislings. Furthermore, during the war, the Yugoslav CP developed traits of independence

towards the Kremlin, by disregarding Stalin's orders to wage a purely "patriotic" instead of hardly likely." a class war. After the 1948 break with the

independent status as a workers' state the Titoists are painting up the "new Soviet leaders" as men genuinely concerned with liberalizing the monstrous Stalinist dictatorship and building socialism.

Thus, Tito has proclaimed that Khrushchev and Bulganin are ready to accept different socialist countries on a basis of equality and have abandoned Stalin's attitude towards the satellite states as a result of their experience with Yugoslavia.

ROLE FOR TITO

These pronouncements are designed to help the Kremlin dictators cope with deep mass unrest in the Soviet Union and Eastern Europe growing out of their bureaucratic rule.

At the same time, the Titoists are careful not to cut all ties with U.S. imperialism, which, for its part does not want to see Yugoslavia absorbed in a military agreement with the Kremlin.

To keep alive his relations in that direction, Tito has praised the "peaceful intentions" of the U.S. government and declared for its benefit that "Karl Marx could not have foreseen the state of capitalism in the United States today" and that "a collapse of capitalism there was

## Wilson Does It Again

Charles E. Wilson, U.S. Defense Secretary, has won a reputation for candidness. On occasion he says what he and his fellow members of the U.S. ruling class really think, even when the others don't believe that these thoughts should be voiced in public.

Now Wilson tells the country that Geneva or no Geneva, the Eisenhower administration will continue to prepare for war. Asked at a news conference on Aug. 9, whether the new Soviet "verbal cordiality" might justify some relaxation of the arms budget, Wilson replied "I wouldn't think so.'

He didn't believe that planning of U.S. armed forces should be based on shortterm factors such as "apparent changes in propaganda" or "wishful thinking at home.

"The United States must maintain a reasonable posture of defense or military strength for the long pull," he said and added that the arms budgets would reflect long-term trends in the world.

Now these remarks do not accord at all with the sweet music about peace contained in Eisenhower's and even Dulles' recent declamations. But that's Wilson for you. He speaks right out where others won't. Or almost so. For, of course, not even Wilson is going to be candid enough to say: "We, the men of Big Business, are still hell-bent for World War III. We are stymied for the time being because the Soviet bloc has matched our strength.

"But our military preparations are designed to put us ahead once again. And then we'll roll. In the meantime our peace propaganda will mask our war preparations. They might even win for us a reputation for seeking peace, which we the nationalist movement grew, will turn to good advantage in lining up Sultan Mohammed Ben Youssel support for our side."

have surpassed himself for bluntness. He Istiqlal (Independence) Party. also would have told the whole truth. For Big Business is driven on the road to war traditions of Moroccan indepenby an insatiable greed for profits. It seeks dence for 1,000 years before the ever to expand. Its aim is to subdue the French imperialists took over. entire world and reorganize it to provide markets and fields of investment.

These aims determine the "long pull" to World War III for which Charles Wilson, U.S. Big Business "Defense" Secretary, is preparing.

Though Wilson was not as candid as he could have been, what he said about being Ben Youssef's role in the Morocguided by the long pull and not being can struggle reminds one of the swayed by "changes in propaganda" is instructive for the working people.

They, too, must not succumb to wishful thinking about possibilities of lasting peace under capitalism. They, too, must adopt a policy based on the long term trends.

That means to persevere in the class struggle for socialism, which alone can bring genuine peace to the world.

The Petition of the 73

We welcome the action taken this week by the 73 educators, clergymen and writers who petitioned Eisenhower to call off further Smith Act trials.

This action coupled with the resistance in the entertainment industry to the witch hunt, the nation-wide indignation at the Navy's action in the Landy case, and other developments, are signs that a little of the elementary courage that is supposed to be our American heritage is returning.

We must note, however, that the letter makes no reference to the continued punishment of Smith Act victims who have already served prison sentences. While the 73 rightly deplore indictments, under the Smith Act "membership clause," of leaders of the Communist Party who have already served one prison sentence, their letter fails to mention the civil rights arbitrarily denied men and women who have been convicted and served time under this thought-control law. To this day the first victims of the Smith Act, the leaders of the Socialist Workers Party who were convicted in 1941, cannot vote, cannot hold office nor enjoy a number of other basic rights. From a legal point of view these socialist fighters and leaders have been made permanent pariahs.

Smith Act is pleaded in part by reference to the "easing of tensions in other fields."

Are we to believe then that basic civil ation. They staged a fake revolt liberties hinge on the current line of the of the Moroccan people, installed State Department? It would have greatly strengthened the petition to the President, in our opinion, had the 73 included the demand that civil rights be restored to all victims of the Smith Act.

An even more serious flaw in the petition is the fact that the case against the

U.S. capitalism, doped up with armament spending, is walking on clouds. The stock market is booming, profits are skyhigh, there is full employment for everybody except the unemployed, and there aren't enough of them to cause the Big Business government any real worry. If you read the papers you may believe you

never had it so good. But the corollary of the picture presented by the Big Business press is that things are so good they can't improve. How can you improve on perfection? Therefore, at the best, things can only continue as they are or go down. For working people a downturn means one thing above all unemployment, too many workers and too few jobs.

Therefore a wise step for the labor movement in today's boom would be to prepare for the inevitable downturn (we don't want to use the more frightening term, depression). The best preparation would be getting the 30-hour week at 40hours pay. That would mean 25% more jobs in a period of joblessness.

Nor would it be mere protection against future unemployment. It would be a real substantial gain for workers in the present period of booming production. Ten hours a week more for workers to get away from the speedup, the tension, the foremen and supervisors, would be a trade-union gain comparable to the winning of the 8-hour day in the past.

It would mean more time for leisure, fun, culture. It would give the working mother more time to do her second job -

## Time to Prepare

shopping, housecleaning, bringing up the children. There can be no argument about it, the 30-hour week is desirable now and necessary for the future — when the bloom fades off capitalist prosperity.

But there is another important factor which makes 30-for-40 not only desirable now but of immediate bread-and-butter urgency. That is automation - the introduction of a whole new series of machines and mechanical-electronic systems that causes mass layoffs of workers in the midst of full production.

For example, in the telephone industry last year almost 20,000 switchboard operators lost their jobs to automation. This was no putting down in service; on the contrary, while the 20,000 operators were being kicked out, the number of telephones doors of every house. Once a in this country increased by two million. door was smashed, in went the the top brass capitulated to Sen-The telephone industry today is 83% mechanized. ## The Negro Struggle

## New Threats of Violence

Ominous new threats of lynch violence against Negroes in the Deep South are being voiced by the enemies of school desegregation and the right of Negroes to register in elections. Again the mobmurderers are being deliberately incited by the actions and inflammatory agitation of high state officials.

The Aug. 6 Pittsburgh Courier reports that Dr. A. H. McCov, President of the Mississippi NAACP, has received death threats on both his home and office telephones. Dr. McCoy was warned to get out of town and told, "If you stay, you will be shot."

When he asked for police protection, he was told that the cop on the beat would "keep an eye on your house."

On May 7, the Rev. George W. Lee, of Belzoni, Miss., the first Negro in his county to register to vote, was blasted to death by a shotgun mob. A local coroner's jury decided the death was "accidental." But at a memorial meeting for Rev. Lee, Dr. McCoy declared that everyone in town, including the sheriff knew who the killers were.

At the same time that Dr. McCoy received the death threats Roy Wilkins, Executive Secretary of the NAACP, said that unsigned death threats had been received through the mail by a Lowndes County, Miss., school teacher and his wife. The couple are two of the three Negroes registered to vote in that county.

All of these threats came at the same time that Gov. Griffin of Georgia was announcing that he had named 25 special "secret deputies" to be scattered over the state to aid the fight to maintain Jim Crow schools. His Attorney General announced that Mississippi had named a thousand such deputies for the same purpose. Meanwhile the Georgia governor addressed the Alabama state legislature, calling for joint efforts of the two states to "avoid the disaster" of desegregation.

The Alabama legislature demonstrated its willingness to cooperate by adopting a bill which deliberately defies the U.S. Supreme Court decision banning Jim Crow schools. The bill gives city and county Union, Local 292, CIO - the school boards unprecedented police power youngest organizer in the New in deciding which school pupils will attend. The widely touted "liberal" governor of Alabama, "Big Jim" Folsom, hypocritically refused to sign the bill but permitted it to become law by the simple act of also refusing to veto it.

The NAACP has demanded of Attorney General Brownell that the Justice Department take prompt action in Mississippi to "avert violence and to protect Negro citi- elected to the executive board, zens in their right to vote."

On the basis of the past do-nothing record of the Justice Department, we sincerely hope that NAACP is taking additional measures to protect the lives of their valiant Southern representatives.

By Sam Ballan Calvin De Crescenzo was not even 31 years old when he died. but at that early age he had given more than one third of his life to the cause of revolutionary socialism and militant trade union-

From a Striker's Wife

(The following letter to the Portland, Ore., Labor Press was reprinted in the August issue of the International Molders' and Foundry Workers' Journal from which we have taken it. - Ed.)

During the long, hard struggle of the Fir-Tex strike, which is still going on here at St. Helens, a bystander was heard to say: "What is America coming to, with women and children on the picket line?"

It seems to me that it is about time that women and children become concerned with the jobs of their husbands and fathers — especially when you desire to have your children grow up with the belief that right is right. They should understand that they should never take something that doesn't belong to them - EVEN A JOB!

I want my children to know what it is like to stand on the picket line and see people going through the line, and to know what a "scab" is. When they grow up and work they will remember what we've tried to teach them: That money is not the most important thing in the world; that love for one's fellowman, honesty and backbone

honesty and integrity. But I for one would rather go hungry than to take the bread from a child's hand — and that is just what the scabs are doing in this strike. How could anyone believe that 400 men the union, in the face of the witch-

of the union could be so wrong, and a few hunt and the continuous redbosses so right?

I am very proud of the way the men have conducted themselves on the picket line — no obscene language, unless you call the word "scab" obscene. Have you the local and officers of the inever looked that word up in the diction- ternational to illegally remove ary? It means "a crust on a sore" and it Calvin and several other officers also means "one who takes the place of a of the union from the executive striker; a strikebreaker."

One person claims he heard obscene language on the picket line. It's hard to understand how he heard it when he drives the first evidences of the witch through the picket line at high speed with hunt in the unions. rolled-up windows.

Unionism gives millions of workers a sense of dignity, independence, achievement, a measure of security, and hope for a better life. Unionism has been the principal instrument of the working man in some surrendered completely to A Farmer's View protecting himself against exploiters.

the Paper Workers Union. He many members of the New York CIO Council as an intransigent fighter on class-struggle issues.

are far more important.

After all, had it not been for men like these, who are willing to fight for principle, wages would definitely not be what they are today, and working conditions would certainly be rough.

I would much rather my husband deny us the "worldly things" than to have him go against the principles he believes in. We come from a part of the country where unions are few and far between, but, believe me. I have made it a point to buy union, to patronize union stores and to teach my children to do the same.

The almighty dollar has always induced some people to go against principle,
