MARY JANE by Dorothy Sterling. New York: Doubleday, 1959. 214 pages.

"Hi, says the blackbird to the crow. What makes the white folks hate us so?"

Mary Jane and her grandfather sing that song in the new book by Dorothy Sterling for juveniles. The question is asked throughout the book. Unfortunately it is never answered. All through Mary Jane's days as a Negro student at the newly integrated junior high school in the South — through the spitting and shoving and insults — the reader is given the feeling that somehow prejudice just got there unplanned, without malice or forethought.

This is one of the things that keeps Mary Jane from being a near-perfect book. But it is a very fine book, just the same, for Dorothy Sterling has taken her novel right from the newspaper headlines.

She has translated the story of integration into a tender and exciting piece of juvenile fiction. Her heroine Mary Jane is a very real and imperfect little girl. She is frightened by the hissing and shouting mobs that wait for her outside the school each day, but she doesn't tell her parents because she enjoys the flattery of being considered "brave."

The book takes us all through Mary Jane's first year at Wilson Junior High. During the early days Mary Jane and another Negro student Fred Jackson, fight back against racism. The most prejudiced children chant:

Two, four, six, eight, We ain't gonna integrate.

And Fred teaches Mary Jane to chant back with him:

Eight, six, four, two, Ten to one we bet you do.

But to be constantly ignored or mistreated; to have the red-headed boy shoot a pistol full of water at her and tell her that it's acid; to cope with Darline who stirs up trouble under the guidance of her mother and of the "Mother's League"; to listen to the Social Studies teacher, Miss Collins, talk condescendingly about "Your People"; to eat alone and study alone —

all these have their effects on the Negro girl. Finally her only defense is hate, and she walks through the unfriendly school announcing — in French — "I hate my

Economic Trends and Socialist Prospects

By Murry Weiss

The economic movement of capitalism through its characteristic cycles of boom and bust has always been of vital concern to Marxists, since this movement determines major shifts and turns in the course of the class struggle.

From the standpoint of revoutionary strategy and tactics, Marxists since the time of Marx and Engels have sought to discern the interrelationships bements and their political consequences: between a change in the economic cycle and a turn course of events for the next period.

After Marx and Engels, probthan Leon Trotsky. Unfortunately his ideas on the subject are scattered throughout his many works and have never been colcycles to political movements has never been translated into article to indicate some of Trotsky's leading thoughts and to give a few of the more readily

Perhaps Trotsky's most basic be found in a letter that was guard to avoid establishing an English in the May 1941 issue sult of the whole process conof Fourth International (now sidered in its entirety." under the title, "The Curve of IMPACT OF BLACK FRIDAY Capitalist Development.

BREAK IN EPOCHS

In the letter Trotsky shows how the transition between epochs of energetic capitalist development and epochs of greatest convulsions in the regress of the Comintern we had to stress this point — in the struggle against the purely meist disintegration now in progress. If periodic replacements f 'normal' booms by 'normal' pheres of social life, then a to one of decline, or vice versa, engenders the greatest historical disturbances, and it is not about the first major upset in Castro's cabinet. Evidently Castro hopes to promote the growth of a Cuban capitalist class through the agrarian reform program. This is indicated by the encouragement the law gives to richer peasants. However, his regime is now caught up in a contradiction. While the State Department tries to make a big show of how it is not opposed to land expropriation, its recent note proves that it isn't sympathetic to the development of a Cuban capitalist class, either. In fact, the State Department's sole interest in Cuba is to preserve the status quo which means domination of the island by U.S. big business firms as

The High Court Backtracks

Supreme Court decisions bearing such names as Barenblatt and Uphaus are not remote judgments about abstract principles of jurisprudence, as they may seem at first sight.

They reflect shifts in political currents and deeper movements in the class struggle. When they are reactionary decisions like those of June 8, they affect the guarantees of liberty that our revolutionary forbears thought they had established permanently in America. And they also involve living victims who face being torn from their families and locked up in steel cages because of their political beliefs.

Lloyd Barenblatt, for example, is a university teacher, a specialist in psychology. For daring to defend his own right under the First Amendment, and thereby those of the whole American people, from the Inquisition that is called the House Un-American Activities Committee, the Supreme Court has sentenced him to

Dr. Willard Uphaus is an elderly religious leader who has long propagated pacifist ideals, defense of civil liberties and opposition to racial prejudice and religious intolerance. In defense of his own Constitutional rights and those of all Americans he refused to permit the witchhunting New Hampshire Attorney General to rummage through the files of his pacifist organization.

In ruling against him, the high court may possibly have sentenced Dr. Uphaus to life imprisonment, since the contempt sentence meted out to him is renewable so long as he persists in refusing to bow to the demands of New Hampshire's of-

At least a score of cases already in litigation, to say nothing of those that will arise in the future, will be adversely affected by the Barenblatt and Uphaus decisions.

Again, more than "cases" are involved. Men and women in the forefront of the struggle for freedom and justice in America will now go to prison if the witch-hunters and the Court majority have their way.

An example, well-known to Militant readers, is that of Carl Braden, framed up under a Kentucky state sedition law because he had aided a Negro family to purchase a home outside the Jim Crow ghettoes of Louisville.

This nationally famous case took a favorable turn when the Supreme Court's Nelson decision knocked out the Kentucky sedition law under which Braden had been railroaded. Now in the Uphaus decision the Supreme Court has revalidated that vicious law.

Braden is likewise affected by the Barenblatt decision. He became the target of the Congressional witch-hunters for his integration activities in the South and was cited for contempt for defying their attempts to smear-investigate pro-integration organizations and individuals. Thus he and others like him are in direct danger of imprisonment.

The effect of the decisions is to outlaw the Communist Party and to harass those holding views on civil liberties, peace, social and economic change and racial equality which go beyond the of- on a low key. ficially permitted rules. Government inquisitorial bodies like the House Un-American Committee have been given a mandate to go ahead. Anti-Labor and white-supremacist legislatures have been given a green light to pass state "sedition"

How could the Supreme Court make such reactionary decisions?

Many people are still rubbing their eyes. They not only believed that the high court was the most liberal of government institutions, but they genuinely thought that the Democratic sweep in the 1958 elections would automatically reinforce the supposed liberalism of the court. So what caused this august body to suddenly switch into the camp of the witch-hunters?

Not so long ago reactionary decisions like those of June 8 would have been regarded as quite normal for the nine old men elevated to the bench by the White House. But in 1954 when the Supreme Court made its famous decision favoring integration of the schools in the South and then followed it up with decisions that tended to curb the witch-hunters, the judges suddenly acquired haloes in the eyes of many people who should have known better.

The fact is that the Supreme Court is one of the instruments of capitalist rule. The judges, generally products of the political machines who have been elevated into the role of statesmen of the judiciary system, are highly conscious of their special function in helping to rule the country in the interests of capitalism.

Thus, when the Negro people rolled up enormous pressure for integration and this became supplemented by pressures from the colonial world abroad, the court was utilized to make the 1954 concession. Then two years later, big business policy makers decided to use the high court again to ease the witch-hunt that had run into growing popular indignation over its

But the reforms promulgated by the Supreme Court both in the field of civil rights and of civil liberties encouraged movements that aimed beyond the concessions made by the ruling class. They could lead to scrapping Jim Crow and the sion of these aspirations com-Burchett's account of the Conwitch-hunt altogether. It then became bined with the command that gress in the June 15 National necessary for the Court to backtrack so writers stick to "socialist real-Guardian, this is what Khrushas to preserve the essential structure of useful to the bureaucratic dichave passed. Who is reading racial segregation and the trappings of a tatorship. police state elaborated in the period when the witch-hunt was at its height. Hence, the series of adverse decisions in the last six months affecting both civil rights and civil liberties.

Again, the 1957-58 recession gave fresh impulsion to the tendency in the working class toward independent political action. This was how our capitalist rulers read the defeat of the so-called "right-to-work" laws, the increased weight of the tradeunion bureaucracy in its coalition with down on Soviet writers, who have said before and say now the Democratic machine, and the temper had also shown manifestations that Dudintsev has never been of the electorate in giving a nationwide of political rebelliousness, and our enemy and has never been sweep to the Democratic Party, The latest Supreme Court decisions are designed to for special attack a novel, Not but also other writers," Krushdampen this trend by encouraging the By Bread Alone, by Vladimir chev continued, witch-hunters.

Does the series of reactionary decisions culminating in the June 8 blows signify the revival at present of Mc-Carthyism or some other form of intensive critical of privilege - seeking, among writers "of quite a sharp witch-hunting?

We do not believe so. It is true that the social forces and conflicts which brought about McCarthyism still exist below the surface of capitalist society and another crisis can bring it forth again. Are Soviet Economists But this is not the season for it.

What the Court has really done is continue in its traditional role as a political instrument to help dampen the class struggle. The new element is the validation of a permanent witch-hunt, although

The trade unions and the mass organizations of the Negro people should the new school of mathematical counting in general. Equipped originally been slated by the draw the appropriate political lessons. Voting for the Democrats in 1958 proved as self-defeating as voting for the Republi-

To secure America's traditional democratic rights and Constitutional liberties, to win full equality, the working class and its allies among the minorities had better break from the two-party twins and take the road to independent political Soviet economy leading to more

Of Little Pills and Weather

People who like to call a spade a spade lost a round last week when the Weather Bureau painted out the name of its "Discomfort Index" and agreed to call it "Temperature-Humidity."

The weather forecasters were proud of their "Discomfort Index." It enabled people to tell when they were uncomfortable, which is a comfort in discomforting

Capitalists dependent on the tourist trade thought otherwise. People might listen to that "Discomfort Index," feel unhappy about traveling, and then what would happen to profits?

The Bureau found itself in a storm that combined blasts of hot air, claps of thunder and lightning bolts. They hadn't foreseen that kind of weather and they found the discomfort index unbearable. However, the fighters on the spade-

is-a-spade front should not give up hope. Last week they won an encouraging, if hard-fought, victory on a different sector of the battlefield.

In 1956 the Federal Trade Commission, after 149 hearing sessions, ordered the word "Liver" struck from the advertising of "Carter's Little Liver Pills."

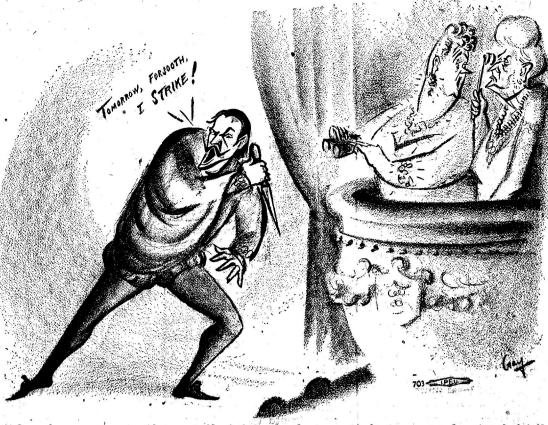

The pills, said the FTC, aren't made of liver and they don't affect your liver. All they do is speed up what your lower suited on a national level to intestine does.

Carter Products, Inc., appealed the planned from the top. In pracdecision against their magic word. On tical terms, this means the the economy. While millions of workers were unemployed last year, American Telephone and Telegraph, the country's biggest nonopoly, increased its net orofits from \$13 to \$14.31 a more than \$1 billion.

The American Way of Life

Practical Demonstration in Laos

Old European colonial hands have charged that American officials in the colonial world are often bumbling ools who don't know what they are doing. This claim has now been well refuted by a no less appreciated, by the ma-

our foreign aid program in the tiny Southeast Asian kingdom of Laos. The Congressional findings,

made public June 15, demonstrate that our men in Laos have given the natives a splendid demonstration of the American The first thing that the mem-

bers of the International Co-operation Agency in Laos demonstrated is that American officials are cooperative and easily approachable. And American firms doing work there have shown they appreciate the cooperation they get from the government

For example, the Congressional investigators found that the Universal Construction Co., a U.S. concern operating in Laos, made a gift of \$13,000 to the public works officer of the aid nission there. Our man in Laos lidn't take that kind of money for nothing. According to the Congressmen, he earned it by helping Universal "secure lucrative contracts and overlooking deficiencies in their perform

Another ICA official even proved helpful to a non-American firm — and at reduced rates too. For a piddling \$500 he is said to have helped the Hong Kong Transportation Co. nail down a ferry barge contract. The company was so moved by this display of good-neighborliness that it later put our man on its regular payroll.

The stereotype of inflexible American military men was also its virtual monopoly of U.S. aid dispelled in Laos. The Congressional committee reports that a retired brigadier general em- formance." ployed by another construction firm in Laos also made his services available to the aid mission in selecting construction sites.

other weren't even understood, Way.

terialist-minded natives — and, for that matter, by a few outcast Americans either. The Congressional report says the first director of the aid mission sold his ten-year-old Cadillac to a Universal official for about \$750 more than he originally paid for it. And the construction man didn't even need the car. Finally it was cut up in pieces and dropped down a well because it had "stood rusting in front of Universal's main office where it was the subject of scornful amusement by Laotians and Americans alike.'

But don't get the idea that this give-away program was limited to Americans. The United States government pumped so much cash into the hands of the local government that prices doubled in a ten-year period. And to help promote jobs in the tiny country, the State Department insisted on subsidizing a Laotian army of 25,000 even though the Defense Department insisted it was more than twice as big as really was needed.

However, it must be confessed, the picture wasn't completely perfect. One of those bumbling fools that the foreigners like to joke about turned up in Laos. He was a government auditor and thought he could poke his nose into how the foreign aid money was being spent. Our men made short shrift of this fellow. According to the Congressional report he was "railroaded" out of Laos because he was "close to discovering the truth about Universal, its bribes, construction projects in Laos and its woefully inadequate per-

N. Y. Hospital Union Blocks Injunction

NEW YORK, June 17 - With an important anti-injunction victory under their belts, 3,000 striking hospital workers have finally compelled the Greater New York Hospital Association to begin negotiating on their demand for union recognition.

The breakthrough came after State Supreme Court Justice Henry Epstein ruled June 12 that the strike was "a bona fide labor dispute" and denied the application of five struck hospitals for a permanent inunction. He found "an echo of the nineteenth century" in the hospitals' refusal to recognize the striking union, Local 1199

of the Retail Drug Employes. The workers, who had been getting wages of \$32 and \$38 a week, walked out of six voluntary hospitals May 8. The strike was extended to a seventh hospital June 5. Hospital spokesmen originally insisted they would not budge in their opposition to any form of union recognition.

But after their court setback. the hospitals began considering a settlement formula put forward by Mayor Wagner's special mediation panel. The formula includes unofficial union recognition and a very flimsy griev- While he opposes the death penance procedure. Court Chooses Shakespeare

NUMBER 25

NEW YORK, June 17 -New Yorkers battling for free Shakespeare performances in Central Park won a victory in the Appellate Division of the State Supreme Court here today. Heated controversy over the right of the city's residents to free cultural entertainment resulted from Park Commissioner Robert Moses' April decree that the Shakespeare Festival charge admission or be banned from the park. Moses answered expressions of public indignation by a red-baiting attack upon Festival producer Joseph

Reversing an earlier Supreme Court ruling, the Appellate Court unanimously declared that Moses "violated the public's park rights" and his order was "arbitrary and capricious."

but also by fear that too rigid an opposition would lead to increasing demands for government-supported centralized health care.

Previous to the AMA convention, Dr. Norton S. Brown, President of the New York County Medical Society, said, "There is an over-all drift in society today which will mean greater and our educational, research and conviction that organized medimodern industry over the old cine will not be able to hold

Some sections of the AMA, however, are still attempting to hold back the tide. The powercontinues to oppose group plans and so does the Colorado Society which has refused membership to doctors enrolled in the Mine Workers' panel.

But these are essentially rearguard actions in a losing fight. By admitting that group medical care is as good as that furnished by the old-style family physician, "free-enterprising" doctors have yielded their main line of defense; the premium put on the special doctor-patient relationship supposedly obtainable only under individual, private medical practice. With this admission their main argument against socialized medicine collapses.

When the principle of group medical care is accepted, the way is opened to building a real nationwide medical insurance plan that would embrace not just a few millions but every man, woman and child in the U.S. Along with several other countries, England has such a plan — the government-sponsor-Party in 1945. It has been so sucnot dared to abolish it.

TROOPER KILLS COAL STRIKER - A Kentucky state trooper shot and killed Bobby **Jenkins**, Jr., a striking miner in the Hazard coal fields June 5. Authorities said the trooper's victim was among a group of snipers that had fired at a truck running coal out of a scaboperated mine. The United Mine Workers have been on strike in the surface mines and coal ramps in the area since March 9 when the

operators refused to sign a new contract.

Jenkins' death was the third of the strike. OHIO DEPUTIES INDICTED - Acting under federal civil rights statutes, the Justice Department has won the indictment of nine present and former deputies in the Montgomery, Ohio, sheriff's office on charges of mistreating persons in their custody. The indictment charges the use of physical brutality to obtain confessions and "for the purpose of administering summary punishment." Other charges include unlawful arrests and detentions.

CON GAME EDISON - Last month the Consolidated Edison Company of New York purchased the city's subway power plants at a fraction of their value to sell power back to the subways at regular commercial rates. Now the state Public Service Commission has acted to make sure the modest outlay involved will not be a strain on the giant utility monopoly. Without a public hearing, the commission voted June 11 to permit Con Edison to hike its minimum monthly rate from \$1.00 to \$1.25. The increase will bring in an estimated \$700,000 a month which should pay for the power plants in about ten years.

MILK RADIOACTIVITY INCREASES -The level of radioactivity in milk increased in the month of March in all but two of ten sampling stations, the Public Health Service reported June 12. Highest reading for the month was in St. Louis. The cancer-breeding irradiation of milk is due to nuclear tests. The government said that despite the latest increase, the level is still within so-called "permissible"

ELECTION LAW REFORM FAVORED -The great majority of those interviewed by the Gallup Poll favor improvement of election laws so that more people can vote. According to findings released June 14, a proposal to provide absentee ballots for sick persons was favored by 87% of those polled. Absentee ballots for business travelers was favored by 79%. A proposal for a uniform six-month residence requirement in all states was favored by 72%. An American Heritage Foundation Report found that 40 million people did not vote in the 1956 Presidential elections even though they were of voting age. The foundation estimates that well over half didn't vote because they were disqualified or seriously discouraged by strin-

The Rand Development Corporation of Cleveland has signed an agreement with the Soviet government that may lead to the manufacture in this country of Soviet medical instruments far in advance of those used here. The most important of these is a stapling in-

strument which eliminates time-consuming hand sewing of stitches. With this device, a stomach removal which normally take two and a half hours can be done in 40 minutes. A Rand spokesman said that the instrument had enabled Soviet surgeons to restore a leg lost by a man run over by a street car and an arm lost by a woman in a machine accident. A U. S. physician who has seen the new devices said, "We would be foolish" not to use them. He said they could contribute much "in reducing the time of operations, reducing mortality and

simplifying surgical procedures."
