# Negro Paper Forced to Quit

### **Crusading Little Rock Editor** Victim of Advertising Gang Up

This scene, taken during a demonstration Nov. 29 in the Canal Zone, looks almost like a tableau of rich, powerful America and the poverty-stricken, insurgent colonial people of the world. The unarmed youth is seeking to raise the flag of Panama on soil that belongs to his country, although it was leased under duress to the United States in "perpetuity." The armed American soldier, under orders, moves, bayonet fixed, against the colonial demonstrator. The Panamanian youth wants an end to American exploitation of his country. Despite the weakness of Panama, he feels himself to be part of a world-wide movement that is certain of eventual victory. Who knows what goes on in the mind of the American soldier as he carries out the duty assigned him in the Isthmus of Panama?

Adlai Stevenson, favored candidate of the liberals for the Democratic party presidential nomination, in effect endorsed the Kennedy-Landrum-Griffin Act in his Dec. 8 speech in New York. The current campaign against "right opportunists" in China is not aimed at pro-capitalist opponents of the regime. According to Frank Robertson, writing in the Dec. 2 Christian Science Monitor, the Dec. 1 issue of Red Flag, theoretical journal of the Communist party's central committee, "states flatly that ....

the present drive is directed mainly against misled party members. Careful reading of the Chin-

ese CP press by informed observers in many parts of the world shows that the party members in question include many who hold top party positions. This is made evident, for instance, by a recent article in the Peking People's Daily which said that the imperialists have always sought to infiltrate agents into the party to undermine it "even from within the core of party's leadership."

"Imperialist agent" is a stock Stalinist slander against political opponents, including those who oppose official CP policy from a socialist point of view. The importance of the remark by the People's Daily about hostile "infiltrators" is that it is leveled against members of the CP's top echelon, indicating that a major struggle is taking place within the party's highest leadership.

Again, the People's Daily, in discussing the "rightists" warns that "absolutely no opportunist factions can be permitted, and absolutely no views or activities aimed at splitting the party or mand.

### China's Reaction to the Tour

throughout the world to President Eisenhower's eleven-nation trip falls into two sharply opposed categories.

On the one hand, the Italian and Indian Communist parties have welcomed Eisenhower's visit and expressed the opinion that he is contributing to the relaxation of world tensions. Most of the parties in the Soviet bloc have also made favorable comments on Eisenhower's tour. This follows Khrushchev's example of crediting Eisenhower with genuinely seeking peace.

On the other hand, the powerful Chinese Communist party has denounced the President as a salesman of "false peace.'

The headline in the Dec. 4 Peking People's Daily, for example, declared: "Eisenhower acknowledges decline of U.S. influence; aim of his overseas visits is to sell sham 'peace' goods."

When Eisenhower visited Ankara, the People's Daily reminded its readers that "Turkey's war preparations are controlled and directed by the United States." And it published a razor-edged cartoon about the U.S. ballistics base in Turkey.

We believe that the Chinese CP leaders are quite correct in what they say about Eisenhower's "peace" moves, which do not represent any basic change in Wall Street's policy of preparing for a third world war.

While American diplomats pretend good will toward the Soviet Union, America's war preparations continue. The \$40billion-a-year arms budget is not being reduced. On the heels of Khrushchev's and Eisenhower's Camp David talks last September, Washington concluded a pact with Turkey to erect an intermediate-range ballistics base aimed at Soviet targets. The government still adamantly refuses to extend diplomatic recognition to the People's Republic of China.

We also believe that the Chinese CP leaders are right in speaking up about the warlike foreign policy of American big

The reaction of the Communist parties business and in not joining Khrushchev in creating treacherous illusions about Eisenhower's aims. By exposing Eisenhower's "peace" maneuvers as false, they are, in fact, performing a service in the struggle for genuine peace.

By demonstratively rejecting Khrushchev's policy of painting up Eisenhower as a partisan of peace, the Chinese Communist leaders are talking up to both the Kremlin and the White House.

They are saying to Eisenhower, in effect: "China has become a world power. It is high time to dump Chiang Kai-shek and to recognize the government put into office by the Chinese people in one of the biggest revolutions of our time. In the absence of recognition and an invitation to participate in summit conferences, we refuse to be bound by any deals, even those Khrushchev may make with you." This stand, it appears to us, is unassailable. American recognition of China is long past due.

To the Kremlin, Mao is saying in effect: "Khrushchev, we don't trust you to represent us at any summit conferences. So long as we do not have our own representatives there it looks like we're being sold down the river. We're not co-operating in any rotten 'peaceful coexistence' deal at the expense of China. You'd better put up a stiffer fight for American recognition of the Chinese People's Republic."

This, too, appears to us to be a reasonable position which every socialist should thoughtfully consider in examining the content of the alluring slogan of "peaceful coexistence" which Khrushchev and the Communist parties under his control are now pushing so assiduously.

The cry for peace is on everyone's lips today. But how can a single real step toward genuine peace be taken until China, representing one-fourth of humanity, is recognized as existing and her government brought into consultation?

Let's end the economic and diplomatic blockade of China! Let's listen to what despite witch-hunting was a dethe Chinese government is saying!

"Roll out a red carpet? Of all people, you'd think General Franco would have sense enough to choose a free-world color for the President's visit!"

independent development will, at the same time, secure the accommodation of the mutual interests of the parties.'

This declaration was made by Arkady Sobelev, head of the Soviet delegation to the United Nations on Dec. 3. Sobelev read his statement during the current UN debate on Algeria. In past debates on the question, the Soviet delegate denounced French imperialism and sided with the Algerian people in their struggle for national independence. But this year the Soviet representative not only certifies De Gaulle's patently fraudulent "self-determination" scheme as genuine, but seems alarmed that De Gaulle might overdo his magnanimity toward the Algerians and sacrifice French interests. Or do we misunderstand that part of Sobelev's statement which calls for De Gaulle not only to take into account the Algerian people's rights but to "secure the accommodation of the mutual interests of the parties" as well?

What Khrushchev means by "peaceful coexistence" stands out somewhat more glaringly in the light of his new Algerian policy. Khrushchev, like Stalin before him, is proposing a status quo deal to imperial-

On Oct. 31, the Nation published a special issue entitled "The Shame of New York" — an exposure of the city's "multibillion-dollar rackets, its executive suite deals for power on the political, the business and the underworld levels." It was written by Fred J. Cook and Gene Gleason, a crack writer-reporter team on the New York World-Telegram. Cook had been commissioned before by the Nation to write special issues, including one last year on the FBI. He invited Gleason to collaborate with him on "The Shame of New York.'

On Nov. 23, Gene Gleason "confessed," after long grilling at the District Attorney's office, that a charge of attempted bribery, which he had leveled against an unnamed city official was false. Public mention of the bribery incident was actually made by Cook and confirmed by Gleason on a Nov. 22 TV program. Gleason had told Cook about the bribery offer when it allegedly was made and Cook had told his city editor about it at the time. When Gleason admitted, after the broadcast,

Striking confirmation of the truth of Castro's charges that the U.S. government is intervening in Cuba's domestic affairs appeared in the news last week when the British Foreign Office refused to exchange 17 propeller-driven planes, sold to Batista last year, for an equal number of jets.

The State Department informed the British Embassy Oct. 16 that it objected to sale of the jets to Cuba. "It is no secret," the British were told. greater than in 1948."

Schering used to be one of those notorious German drug manufacturers that operated strictly for profits and sneered at human welfare. Then came World War II. The United States government took over Schering and in 1952 sold it to a group of Americans who could be counted on to make the healing of the sick their primary concern. The purchasers were the well-known Wall Street philanthropists Merrill. Lynch, Pierce, Fenner & Beane; Kidder, Peabody & Co. and Drexel & Co.

But now the Antitrust and Monopoly subcommittee of the Senate Judiciary Committee, headed by Estes Kefauver (D-Tenn.), is presenting facts and figures which could be construed to show that Schering and other major drug firms are engaged in illegal monopoly practices to rig prices at fantastic levels. The only real miracle about some of the drugs is the profits in them.

Here is one example that came to light: Last year Schering bought a quantity of estradial, a synthetic hormone compound, from a French drug firm. After bottling it, Schering's cost was 11.7 cents for a 60-tablet bottle. This was sold to druggists for \$8.40 - a mark-up of 7,097%. The suggested retail price was \$14 a bottle.

A second example cited was predisolone. an antiarthritic compound, which costs Schering \$1.57 per hundred tablets to produce. The price to druggists is \$17.90 per hundred — a mark-up of 1,140%. Suggested consumer price is \$29.83, a lucrative magnification of 1,900%. The subcommittee said a small New York firm turns out the same drug for \$2.70 wholesale.

Francis G. Brown, president of Schering, cut through these facts and figures to score some telling points about the inalienable rights of corporations and the social obligations of conadvance medicine, it tries to get these products and sell them at a profit" and "the consumer of today must contribute for the benefits which the future will bring, just as the Government expects the taxpayer to do."

Brown also made an illuminating economic point: "If people can't afford to pay for drugs, it's a matter of inadequate income rather than excessive prices." He suggested a welfare pro gram for "underdeveloped people."

Cutting to ribbons the argument about small outfits selling drugs at a fraction of "established" prices, Brown observed that they simply don't provide the "services" that Schering and others do. Such services include research on new drugs and employment of "detail" men to acquaint your family doctor with the new products.

Last year, for example, the drug industry invested all of \$110 million in research and marketed about 370 new drugs. The researchers who developed them showed remarkable versatility. Virtually all of the new drugs were old ones in new combinations, according to Dr. Claude Forkner, professor of clinical medicine at Cornell University. He says, for example, that there are three or four basic antihistamine drugs and 130 antihistamine products.

That's where the detail men come in. Last year. \$300 million was spent to promote the sale of prescription drugs and a battery of 20,-000 detail men were gainfully employed convincing doctors that Brand X was just the one needed to put his patients on their feet. Weekend excursions, barbecues, golf tournaments ----all on the drug companies — also were used to help impress the local medico with the miracle ingredients in Brand X.

For years the textile industry was a "sick" industry from the viewpoint of capitalist profiteers. Their remedy was threefold. They moved South to undercut unionism and recruit cheap labor power. They automated to step up productivity. They thinned out the number of capitalists.

For four days Narcotics Squad Detective Edward Egan, looking like the real thing, handed out cookies, candy and toys. "Jingle Bells" was a signal to two detectives disguised as "idling laborers" that a suspected dope pusher was in the vicinity; "Rudolph the Red Nosed Reindeer" meant an "addict" was about to run. Arrests were made. In Harlem this year, little Virginia, who once asked a newspaper if there was really a Santa, might well be told, "Yes, there is, Virginia. Santa's a cop!"

They disregarded the judge's orders.

CAVEAT EMPTOR - The Federal Trade Commission is calling a conference Dec. 21-22 to explore ways of making the public an "educated buyer" --- reversing the age-old maxim of "buyer beware" to "buyer be alert." So? In this day of the aminotriazol-contaminated cranberry, DDT'd lettuce, dextrosed "coffee," shady weights, rigged quizzes, can the "buyer be alert" - and still buy, that is? The FTC would do better to enforce a little "education" at the source, where "tricky advertising" and poisoned merchandising originate.

SMITH COLLEGE JOINS - Smith College, Northampton, Mass., has joined the schools demanding an end to the non-Communist affidavit required of students who apply for Federal loans. "TRUE" CONFESSION - After four months in a New York City jail awaiting trial for a murder he never committed, a 17-year-old has been freed. WHAT A SURPRISE! - The anti-trust suit against five big companies for price-fixing in the sale of Salk polio vaccine to federal, state and local government agencies was dismissed by Judge Phillip Forman, recently named to a Circuit Court bench by President Eisenhower, on the ground that the government's case was founded on circumstantial evidence, "conjecture and suspicion."
