Too Many Babies?

You Need Brains To Outfox the Foe

By Joseph Hansen

Fourth in a series of articles.

What can be done to stop babies from making any | by a tripartite arbitration board further inroads on mankind? Some of the best minds in consisting of one person selected the capitalist world are working around the clock on this by the union, one by the comfateful problem. Time is of the essence. If the foe manages in Illinois. If this board deto keep up his present frightening rate of birth and our death rate remains stagnant, by the year 3960 this small Red-Baiting Manual planet will have a population of 2,000,000 per square foot. All the experts agree that this would be too crowded.

A way to prevent such catastrophic piling up of humans was suggested by Stephen Enke, Professor of Eco- manual which attacks the Protenomics at Yale University. In a paper read at a meeting of stant National Council of the American Economics Association, this learned representative of capitalist thought proposed that underdevelop- ing to Rep. Walter (D-Pa.), chaired countries cut down on babies at once by giving cash man of the House Un-American bonuses to married couples who practice birth control.

This could be done, Professor Enke held, by paying ual had been withdrawn after husbands who requested sterilization and wives who did

not become pregnant for long periods of time. A seeming barrier to this angle is the poverty of the with Air Force Secretary Sharp, tion and they feel that with the underdeveloped countries. The obstacle, however, might it was the latter who agreed to not prove insuperable. Still Hitting the Bottle

By Harry Ring

"Now, it is possible to stress the question of peace in a one-sided way so that we give the impression that we support the Republican Party because it has seized the initiative under Eisenhower on the question of peace. We must avoid that impression. On the other hand, we cannot give the impression that we are a tail to the Democratic Party's kite."

This thorny dilemma was dangled before the recent national convention of the Communist party by Benjamin Davis, the organization's national secretary. His revealing formulation of the dilemma was exactly as quoted above; at least that's the way it was printed in the February issue of Political Affairs.

Related dilemmas seem to have hooked the CP leadership as they concentrate on convincing the rulers of America of how wonderful the Spirit of Camp David could be if they would iust relax.

Davis puts it this way: "We have to place the question of peace in such a way that it doesn't look as though we are saying: 'The devil with everything else.' We must avoid what took place . . . during World War II, when the Pittsburgh Courier, one of the leading Negro papers, came out with a Double-V campaign - victory abroad against fascism and victory against jim-crow at home. We mistakenly shunted that aside as wrong.'

This "mistake" was, of course, a direct expression of Stalin's efforts to convince Roosevelt and Churchill that he was a reliable partner - one who could be counted on to help scuttle socialist revoutions in Europe and Asia and put the brake on the class struggle and the fight for Negro equality in the U.S.

As members of the Stalin cult, Davis and the other party hacks followed this line slavishly. "Win the war," became their sole concern. They denounced as "treasonous" efforts of workers and the Negro people to defend their interests against big business. This policy disgraced the party in the eyes of militant unionists and civil-rights fighters.

A Bit More Deft

takes an optimistic view:

Now a member of the Khrushchev cult, Davis is out to prove that the new head man in the USSR is a fit partner for U.S. big business in preserving the world status quo, including class peace in this country. This time, however, the party leaders intend to be a bit more flexible. Their efforts will not be rigidly confined to the single issue of "peaceful coexistence" that currently clothes their pursuit of a Kremlin-Washington deal.

"We have to have an approach . . . of our Party fighting for peace and social progress in our country," Davis declares. However, lest this "flexible" approach smacks of ultra-leftism, he hastily adds: "I don't propose this necessarily as a slogan.'

Fighting for the "Spirit of Camp David" (which Eisenhower claims he never heard of) can be ticklish business. Particularly if you are determined, as is the CP leadership, on supporting Democratic party candidates who offer very little these days in the way of peace or

population were outstripping our resources. . ."

"Male sterilization — vasectomy — is a simple procedure.

Demonstrating the typical political alertness of a CP leader, Davis notes "a certain amount of disillusionment that has grown up in the labor movement and among the Negro people over the 86th Congress."

This disillusionment creates problems right boom in the past decade was history. Consumer durables and left. First Davis considers the fact that a labor leader like Louis Hollander of the New York AFL-CIO and a Negro leader like Roy Wilkins of the NAACP have been talking about the possibility of shifting over to the Republi-

"Well, this is a problem to which we have to devise some kind of an approach," Davis opines.

develop a broad electoral line designed to influence both major parties."

But that's just an "approach" to keep people like Hollander and Wilkins happy. The basic "principled" line remains unaltered. The party is going to keep on supporting the Democrats even if a lot of other people in the labor and Negro movement are getting confused on

Labor's "Victory"

The CP is going to stand right up and tell the world, says Davis, that it was 100 per cent correct for labor to have gone "all the way" in "throwing their weight" behind the Democrats in 1958 despite "the betrayal of labor and the Negro people by the last Congress."

In fact, he reveals, it was not only correct it was "a victory." The only flaw was that the "victory" wasn't "followed up."

There is still another barbed twist in the CP electoral dilemma: Davis notes that a dozen unions are actively discussing the need field, the other flowing in from for a labor party. And there are radicals, in the behavior of the world marcluding some in the CP, who favor united ket. (The long-term factors of themselves to the utmost to acsocialist opposition to the capitalist parties. How expansion over the past decade quire washing machines or TV

Well, one way is to make a verbal concerned with the immediate been able to put down the capital. cession to them by agreeing on the need for building a labor party eventually. But while offering lip service to the perspective of helping to break the workers away from the capitalist parties, Davis simultaneously declares: ". . there is just no use talking about a labor party or a third party" while labor and the Negro people are "in" the Democratic party.

This leaves the CP wide open to withering cal measure in the previous auattack from the independents and socialists, tumn. More money was left What to do about that? untouched some important sectors of the British economy.

Most spectacular is the crisis about one-quarter of the pits at present operating will have to close in the next few years. While the markets for coal shrink, production per worker is expected to rise by up to 10 per cent. Sackings have already taken place and more are to come. A new feeling of insecurity is abroad in the mining villages—the one-time heart of industrial Britain.

Hardly less critical, though not yet on the surface, is the problem of the shipbuilding industry which is being acutely affected by changes in world trade and the competition of air travel on passenger routes. Texagain is a weak link. Similar weakness can be found in a number of the older British industries.

Intertwined with this is the fact that all the boost given to consumption has not produced a powerful all-around boom in heavy industry. It is true that some industries which have been doing well are expanding capacity. But many firms are drawing in the slack and can increase production still further without embarking on new investment.

Apart from steel - where ome special considerations have applied, such as the boom in cars and the U.S. strikethe situation and prospect in the capital goods sectors is still rather stagnant. Output has increased much faster in conumption goods.

Boom Has Narrow Basis

In fact, the all-round increase in industrial production does not look very impressive (especially to those with one eye over their shoulder observing months. the rate of increase in the USSR, or even in other capitalist countries). In the third quarter of 1959 the index of markets have been expanding, industrial production stood at there has been an uninterrupted 121 on the basis of 1953 equals 100; it had been 112 in the worst quarter of the recession. duced, capacity has been more No one would claim this as a fully utilized but wage rates spectacular rate of advance.

a narrow one. Britain remains vulnerable to shocks from outside and her competitive position may be weaker in the next downturn. Where industrialists are aware of this possibility they have been making some quite frantic efforts in the last year or two to put themselves reached new high points. Mer- ness by re-equipment and gers and take-over bids have changes in organization.

> Indeed this has been a facbeen available. Mechanizavolves a pressure against established union and work-

Britain, and will continue to

It should be noted that difin the coal industry where ferent industries in Britain stand at contrasting points on the curves of growth and decline. While the prospect of a much deeper recession than that of 1958 at the end of the present boom seems likely, it is not certain because of the continued possibilities of expansion in some of the more advanced sectors of British industry.

As they are in the front line of any intensified overseas trading struggle the pressure on them to continue to make heavy investments in new plant may grow during a recession-and thus help to limit its incidence on other industries. The possibility of a sharp aggravation tiles have recovered temporarily of the difficulties in some secfrom their recession, but here tors, together with continued prosperity in others, cannot be

Tasks of Militants

The tasks of militants is clearly to advance the interests of workers in both types of situation-or, indeed, in intermediary ones—and to expose the role of the "responsible" trade-union leader, so beloved, on occasion, of the capitalist. press. And to link up the struggle between one sector and another.

In the declining or stagnant industries that means a fight against sackings in the first instance. In the prosperous and expanding industries it is to help workers secure a larger share of the product of their labor which is now being scooped up so lavishly by the employers. The latter are already aware that published profits and the general economic situation means that wage claims are going to be pushed, under pressure from the shop floor, in coming.

Some have hastened to grant or prepare concessions intended to forestall the larger ones demanded by the workers-especially an hour or two off the working week. They argue that this can easily be met out of the higher profits now being made, is a better option than a pay increase wrested by the workers in struggle and a hedging on the grant of the 40hour week. It is also a precaution against a subsequent falling off in profits to a greater extent than these.

While the present boom, with its limitations, is likely to be some time working itself out, the crisis of British capitalism. continues in new forms. It does not at all follow that a new, deep slump is in prospect and socialists would be wrong to base their prognosis and program upon such an eventuality or the near future.

But they have the heavy responsibility of welding themselves to the British working class, which despite some superficial appearances, is potentially stronger than prewar, and carrying it into battle before insecurity and prolonged unemployment do their demoralizing

The Chessman Case

The revolutionary founders of this country wrote their Declaration of Independence out of a "decent regard to the opinions of mankind." Today the rulers of the U.S. regard the opinion of mankind as infuriating "interference."

That is why such a bellow of rage went up from politicians of both major parties and from a large section of the capitalist press when the State Department and Governor Brown thought it advisable to bow to foreign opinion and grant Caryl Chessman a temporary reprieve from execution in California's gas chamber.

Especially galling to American big business is the fact that protests and demonstrations by students and workers in Uruguay or Brazil can affect the working of "justice" in this country. America's rulers emerged from World War II confident that this was the American Century; i.e., the era of their world domination. Instead, a revolution "robbed" them of China while anti-imperialist revolutions and the rapid rise of the Soviet Union forced them to indefinite postponement of their dreams of conquest.

Each protest movement abroad reminds them of this; and the protests have not been few. American intervention in the Korean civil war and the testing of nuclear weapons are but outstanding examples. Public opinion abroad has made itself felt against McCarthyism and the witch hunt, the execution of the Rosenbergs, and repeatedly against the Jim Crow "justice" meted out to Negroes in the South.

Another important source of the outburst that met the stay of execution for Chessman is the dedication to, indeed, glorification of, the death penalty. This reveals much about the psychology of America's ruling class.

Consider, for example, a Feb. 20 editorial in the Los Angeles Times entitled "Chessman Lives to Shame Us All." After vilifying the movement for clemency for Chessman as ignorant and "lynch law in reverse," the editors laud the gas chamber as the "sanitary disposal mechanism that a civilized society" uses to protect itself from "contamination." One has to go back to the newspapers of Nazi Germany to find such brutal contempt for human life and the likening of men to garbage.

The Los Angeles Times' editorial is an accurate reflection of a widespread frame of mind among our big-business rulers and "power elite." It is not only an anspoken recognition of the death penalty's political usefulness to a decaying ruling class. It ties in with their rationalizations for use of the H-bomb.

They have adjusted their thinking to mass slaughter and have even worked out their religious and moral "justifications." They are coming to feel an emotional affinity for death sentences and gas chambers.

Our labor bureaucrats have played an abominable role in the Chessman case. Their way of reflecting the reactionary views of America's rulers has been to remain silent. And this in a case involving cruel and inhuman punishment and one in which it is highly doubtful that the vic-tim was granted a fair trial.

Time was when the American labor movement stood in the vanguard of all humane endeavors — whether for social progress or justice and mercy for an individual. The bureaucrats who "lead" the labor movement today cannot be accused of such broadness of vision or universal sympathy. They have reduced American labor's moral influence to an all-time low.

The advance of science and reason long ago disposed of all arguments for executing criminals and psychologically number of situations the most disturbed people. The death penalty is a astute and the most unscrupulvestige of mankind's dark and vengeful ous political boss that the capitpast. "Before the rise of fascism in Europe," the Encyclopedia Britannica points years. out; "it seemed probable that the growing demand for the abolition of the death derive the maximum of political penalty in Europe and in South America advantage by taking decisions would force a change in the United States. With the advance of the totalitarian powers from 1938 on, the tide of reaction climax in the Cape Town speech toward drastic punishment was sweep-

We welcome the foreign protests against the execution of Caryl Chessman. We welcome and thank the students and tion by taking the only course workers in Uruguay, Brazil and all other which may possibly make Africa parts of the world who voiced, in their way, the philosophy of Tom Paine: "The world is my country; all mankind are my | hards, his own party will welbrethren.'

aid by protests the halting of injustices in cance. The opposition, who have their countries. What is foreign "interference" for the capitalists is international solidarity for the working people.

Merger of Socialists in India

The Revolutionary Workers party of India has announced that it is merging forces with the Revolutionary Communist party. The announcement appeared in the Feb. 5 issue of their official newspaper "The Militant." (By choosing this name, the Indian comrades indicated their adherence to the revolutionary-socialist tradition which we have sought to maintain through the years.)

The united organization, to be called the Revolutionary Communist party of India, has four main points in its program: (1) Support of the struggle of the masses against foreign imperialism and native capitalism. (2) "Unconditional defense of the Soviet Union, China and other workers' states against any capitalist attack." (3) Support of the struggle of the working people to end "bureaucratic privileges in the Soviet camp countries." (4) Subordination of all partial and sectional interests of the working people to "the world socialist revolution.'

In a document jointly adopted by the central committees of the two parties, the basis of the merger is stated to be the acceptance of the "fundamentals of Marxism and Leninism" and rejection of "all doctrines of class peace and revisionism."

'Capitalism as a world system is historically doomed," the document declares. "Its signs are unmistakably evident today. We are already living in an epoch of transition from capitalism to socialism. World capitalism can be finally vanquished only through the struggle and victory of the international proletariat, subject to the laws of the uneven development of capitalism."

The fate of Indian capitalism, as part of world capitalism, is held to be sealed. The Indian masses can solve their fundamental problems only through a "socialist social order and organization of a democratic workers' state based on the leadership of the working class in alliance with the rural masses and urban petty bourgeoisie."

In a series of planks, the nationalization of basic industry is advocated together with a state monopoly of foreign trade. Transitional measures are advanced such as workers' control of production and a sliding scale of wages and hours. Stress is placed on the struggle for complete equality and defense of democratic rights.

Specifying their attitude toward the ments of many Nationalist polimain opposing forces in the radical movement, they call for "Relentless struggle, ideological or political, against the proimperialist policies of the social-democrat- African continent and of the ic parties as well as against the class-col- world generally. laborationist, opportunist and revisionist policies of the Communist parties."

In a statement accompanying the joint present time a revolutionary platform, "The Militant" declares that dissituation. The joint willing to live under the condiplatform is essentially the same as the tions imposed on them by the one proposed in the first issue of "The old forms of society. This does Militant" (March 20, 1959) as a "minimum | not mean that the population

basis" for Marxist unification in India. The RCPI has already ratified the ready in some areas. But it does agreement to merge; the RWPI is holding mean that there is a possibility district conferences to consider ratification. that it will do so. It is expected that the membership will approve the proposed step. A merger conference is scheduled for April.

We hope that this unification of Marx- of capitalist society in Africa, small peasant farmers. These ist forces in India will serve to hearten and and indirectly in the rest of the inspire revolutionary socialists throughout the world. To strengthen the Marxist movement in India is to strengthen its counterpart in the centers of imperialist tems of government which are power, particularly in Britain.

The unification in India will increase the political weight of the Socialist Labor sible solution at present; League, the Marxist wing of the British throughout the world there is a Labor party. This is specially timely, for sharp contradiction between the the Socialist Labor League has been the actual structure of present-day object of a savage witch-hunt, visited upon society and the needs of world It was unable to develop fully the tendency, in part, because of their firm takes on its sharpest forms in the tendency in part, because of their firm takes on its sharpest forms in the tendency in part, because of their firm takes on its sharpest forms in the tendency in part, because of their firm takes on its sharpest forms in the tendency in part, because of their firm takes on its sharpest forms in the tendency in part, because of their firm takes on its sharpest forms in the tendency in part, because of their firm takes on its sharpest forms in the tendency in part, because of their firm takes on its sharpest forms in the tendency in part, because of their firm takes on its sharpest forms in the tendency in part, because of their firm takes on its sharpest forms in the tendency in part, because of their firm takes on its sharpest forms in the tendency in part, because of the tendency in the tendency in part, because of the tendency in th support of socialist and anti-imperialist Africa. In order to save capitalmovements in India and other colonial ism it is probably necessary to

We can think of no more auspicious first step which the new Revolutionary but now that it has been decid-Communist party of India might take than ed Macmillan and Macleod are to express the international side of its determined to go ahead in spite program by issuing a strong declaration of of the squalid band. support to the Socialist Labor League against the witch-hunting capitalist press, right-wing Labor party and trade-union bureaucrats, and assorted centrists who seek to destroy this promising tendency.

To come to the aid of the beleaguered British socialists may seem no more than an elementary expression of international solidarity. But it has a reciprocal effect. It strengthens those who take such action. That's one of the ways the world socialist revolution moves ahead.

Tempers Flare in Africa

Part of a crowd of 1,500 African women who battled armed police last summer. The women were demonstrating, sticks in hand, against an increase in the poll tax. City officials at Ixopo frowned on the protest and ordered police into action. Increasing civil strife in Africa has moved British Prime Minister Macmillan to advise "apartheid" rulers of South Africa that it would be discreet to modify their brutal exploitive system.

Mounting Revolution in Africa Spurs British Policy Changes

A Revolutionary Situation

There exists in Africa at the will break out in open revolt everywhere, as it has done al-

Central Africa or in the Union the whole precarious structure world. World imperialism is now facing the problem of its own internal reorganization: it must try to re-establish in Africa sysmore than mere terror.

Totalitarian dictatorship in deprive the white settlers of some of their privileges. This was a hard decision to make,

This is a similar decision to that which De Gaulle has taken in Algeria and the Belgians in the Congo. And it will not be long before the Portuguese come up against the same problem in Mozambique and Angola. The eyes of the world are on Africa; no one wants the responsibility of starting a second Algeria.

Imperialism has subjected the

scramble for Africa the Euro- ever, to develop the agriculture pean powers: Britain, France, and the industrial resources of millan has shown himself in a Belgium, Spain, Italy, Portugal these countries; and so far there and Germany carved out col- is no sign that capital is avail- The primary one is: "We must onies for themselves with a to- able on anything like the scale tal disregard for the national necessary. Moreover, their de- by lighting within him the fires and cultural boundaries of the African peoples. Having done so primary products makes their they proceeded to enrich themsible from their labor.

All were subjected alike to the pulverizing processes of imperialism, so that the political and economic systems of the past were completely destroyed. The imperialists maintained their power partly by military force and partly by stimulating artificial rivalries between socalled "tribes." They did so also by maintaining the peoples in a state of economic and cultural backwardness. The wealth of the country was exported; whatever rudimentary forms of education existed were in the hands of missionaries.

These were responsible for the inculcation among the African peoples of a lively sense of total worthlessness of their past. anthropologists they were able to develop the myth of the 'special" nature of African sowitchcraft, fetish worship, mag- Fourth Ave. lic, ritual murder and other forms of barbarism. The white rulers adopted these myths with enthusiasm since they corresevents in other parts of the ponded with their own prejudices.

> West Africa was unsuitable climatically for European settlement and the main form of exploitation was through the development of peasant agriculture for such crops were sold in the world markets by government boards which paid the peasant producers only a proportion of the world market price. Large urban populations grew up round the ports through which the primary products were exported. These ports attracted peasants from the interior to seek employment as unskilled workers.

In none of these territories, The outbreak of civil war in however, do wage earners make up more than 5 per cent of the of Free Trade Unions. The of South Africa would threaten total population, and in some it council noted that the boycott is is much less. The majority are commercial activities led to the development of an African middle-class made up of rich farmers, traders, lawyers, doctors, clerks, government servants and Union Congress, the Labor and intellectuals generally. This Liberal parties and many stumiddle-class has provided the dent groups. eadership for the various national movements in these territories. The slogan of "one man, one vote" was the means by which this embryonic bourgeoisie achieved power for itself. tent of the peasants and the working class and direct them against the colonial rulers. After some initial hesitation the colonial powers realized that they had no alternative but to hand over power to this nascent bourgeoisie. They handed over to them

also a legacy of malnutrition, disease, illiteracy, undeveloped communications and a population which looked forward conidently to a rapid improvement in their circumstances. So far these expectations have not from the booming economies of pany's stock. the West, stable government

pendence on the sale of their economies extremely vulnerable to fluctuations in the world narket.

The success of this experiment in West Africa has, however, encouraged the imperialists to believe that a similar solution might be found in the other areas of Africa. If it was possible to contain the African revolution within a bourgeois framework in West Africa, why should it not be possible in Central Africa, Kenya or even the Union of South Africa? (Reprinted, somewhat abridg-

ed, from the Feb. 13 Newsletter. British revolutionary - socialist publication.)

Pass FBI Test On Belly Crawl

The regents of the University of California formally apologized Feb. 20 to the FBI for daring to include a question in an examination so formulated as to indicate the true role of America's secret political

The question, in a test for college admission, read: "What are the dangers to a democracy of a national police organization, like the F.B.I., which operates secretly and is unresponsive to public criticism?"

The regents said that questions of this kind were sometimes included in exams for "shock values."

The school authorities get down on all fours before J. Edgar Hoover's secret snoopers after the American Legion, selfappointed guardian of the nation's political "purity," had sounded the alarm over placing such a thought-provoking sentence before would-be college

of tax evasion against him.

(See story page 1.)

This, they hope, will serve as a legal and propaganda excuse for denying Negro students their legal right to conduct peaceful demonstrations—in the name of preserving public

North Carolina Attorney General Malcolm Seawell advised store managers to order Negroes away from lunch counters and to have the police arrest them if they refused. This strategy was widely adopted.

Stores put up "No Trespassing" signs at their lunch counters. Forty-three Negroes were arrested for "trespassing" on the sidewalk of a Raleigh shopping center. The Georgia House of Representatives passed overwhelmingly a hastily drawn bill against persons who refuse to leave a store when so ordered by the manager.

But the Negro students' answer has really put the squeeze on stores following this "No Trespassing" tactic. They have thrown picket lines around them urging all Negro customers to stay out and to cancel charge accounts they have there.

In Raleigh, N. C., Negro students are picketing Woolworth's, McLellan's and Kress. centrating on Thalhimer's, a de- students. partment store with a large Negro clientele.

On Harper's Ferry

On December 2, 1859, John Brown was hanged by the State of Virginia for attempting an insurrection to free its slaves.

John Brown's Raid

Brown's raid on the federal arsenal at Harper's Ferry was denounced throughout the North as the act of a madman. Yet a year and a half later, the Boston Light Infantry marched through the streets singing "John Brown's Body." Over 300,000 Negro soldiers would sing it in the Civil War.

What impelled Brown to strike his blow for freedom? Arthur Jordan tells how Brown came to the conclusion that the slaveholders would never abandon their hateful system peacefully. In the Winter issue of International Socialist Review. Send 35 cents for

January's Jobless Figures - By Herman Chauka

It always pays to take a close look at the fine print - particularly in any information put out by the government.

Early this month the Department of Labor issued a press release on unemployment in January. It cheerfully noted that though total employment had hit a new peak, the seasonal decline in jobs was "normal" and the number of jobless was less than in January 1959.

Then came the follow-up in the form of an official bulletin of finely typed statistics and charts. The facts in the bulletin are not quite as cheery as the news release which had been featured in the daily press. This is particularly true for Negro workers.

The bulletin shows that unemployment rose to 4,150,000, or a seasonally adjusted rate of 5.2 per cent of the labor force. This percentage was the same as the month of December, slightly higher than last spring prior to the steel strike and significantly higher than the prerecession month of January 1957. At that time the rate of unemployment was 4.2 per cent. Despite the increase in total employment there were one half million less factory jobs last

month than in January 1957. More than half of those unemployed in January had been looking for jobs more than five weeks. Moreover, the number of long-term unemployed — those seeking work 15 weeks or more — moved up from 800,000 in December

to 900,000 in January. The bulletin reports: "The number of longterm unemployed has shown no significant downward trend since last May. . ." And there were 400,000 more long-term unemployed last

month than there were in January 1957. The figures on "nonwhite" unemploymen indicates the heavy economic price of Jim Crow. While 5 per cent of the white labor force was jobless last month, about 12 per cent of the nonwhite workers were jobless.

This was not some fluke situation last month. "The proportion of workers among the long-term unemployed was three times as great for nonwhites as for whites," says the bulletin. "In each occupation group the unemployment rate for Negroes was significantly higher than for white workers.

"Moreover, Negroes are heavily concentrat ed in occupations with the highest unemployment rates - laborers, farm laborers, and op-

The same situation applies among the substantial number of workers who are on a short week. There are now 2.2 million people who are regularly working part time (less than 35 hours) either because slack production has put their plants on a regular short week or because they simply can't find a full-time job. About 350,000 more workers fitted in the latter category last month than in January 1957.

The Department of Labor says: "Nonwhite workers who have jobs are more likely than white workers to be involuntarily on part time. In January 1960, about 10 per cent of all nonwhite workers, but only 3 per cent of white workers, had less than 35 hours of work for such reasons as slow business or inability to find full-time jobs.

Notes in the News

AN OSCAR-WINNING PERFORMANCE-Lena Horne has won wide plaudits for her talented performances as a singer and actress. But she earned herself a special award at a Hollywood night club Feb. 17 when she bounced an ash tray off the skull of a loud-mouthed business executive who ignored her demand to stop making anti-Negro remarks. Miss Horne later explained that she had lost her temper, but she declined to apologize.

BUT IT MIGHT HAVE BEEN LOADED -New York school superintendent John Theobald refused to consider a demand by the NAACP to remove Minerva Atkins, a school principal who humiliated a group of Negro children at P.S. 91 in Glendale. The children are taken there by bus from their overcrowded school district in Brooklyn over the protest of local racists. On Jan. 27, Mrs. Atkins said she had received a phone tip that the Negro children were bringing weapons to school. She had 65 Negro youngsters march into the school auditorium and submit to search. The frisking turned up one unloaded water pistol.

NO FOOLING AROUND - Murray Shelton, a New York landlord, has been arrested on charges of assault and unlawful entry. Mrs. Dioica Ortiz, one of his tenants, accused him of barging into her apartment and threatening her with a gun. The purpose of the visit was to demand that she pay more rent.

OUR ENLIGHTENED COURTS - A 12year-old boy, said to have fathered a child, is under an Indiana court order to support the child from his earnings as a bootblack.

FROM CRADLE TO GRAVE-The Georgia legislature on Feb. 18 killed a bill that would have exempted page boys - some of them four years old - from signing the state's "non-Communist" affidavit when they pick up their \$4-a-day pay checks. Those who haven't learned to sign their names can make an "X."

AN OUNCE OF JUSTICE - Albert Davis, 19, a Negro sentenced to die in Texas on a conviction of raping a white woman won a commutation of sentence Feb. 13. The governor changed his sentence to life imprisonment because a white youth who was convicted of participating in the rape had been given a life

* * * SMASHING SUCCESS - The Martin Company, which leads the manufacturing field in providing a well-paying haven for retired Defense Department brass, had another of its Titan missiles fall apart in an attempted Feb. 5 Cape Canaveral launching. A spokesman

reiterated the company's stand that the failures were really successes. He said the aborted merit. launchings provided valuable engineering data not otherwise obtainable.

MORE POWER FOR COPS? - O. W. Wilson, dean of the School of Criminology at the University of California says the police need broader powers. Speaking at an international conference on criminal law in Chicago, he proposed that cops should be allowed to hold arrested persons for twenty-four hours without bringing them before a judge (the police in most cities do this now without legal authorization). He also urged that arrests for "probable cause" be made easier and that police should be allowed to detain anyone merely on "reasonable suspicion" that he "may be seeking an opportunity to commit a crime."

* * * MUSE BEFORE NEWS ON BBC - The British Broadcasting Corporation has demonstrated a truly impressive dedication to the arts. A few moments after beginning a broadcast of the Symphony in D Minor by Cesar Franck on Feb. 19, the BBC's Home Service received official word that the Queen had given birth However, "it was decided not to interrupt the music," a spokesman said, and so listeners had to wait thirty-five minutes to hear the momen-

LIBERALISM DEFINED - Adlai Stevenson, spokesman for the liberal Democrats, told a Feb. 19 news conference in Panama that he saw "little objection" to raising the Panamanian flag alongside that of the U.S. in the Canal Zone - provided the Panamanians clearly understood that the U.S. was the real boss in the area. He also favored Panamanians having access to the Zone if they abstained from "violence and demonstrations such as occurred here last fall." At that time bayonet-wielding marines attacked Panamanians demonstrating against U.S. job discrimination in the Canal

THE SUMMATION - Sylvester Lee Garrison, 27, a Negro construction worker, was sentenced to death in Denver Feb. 5 on a murder charge. Asked if he wished to say anything before sentence was imposed, Garrison said: "There's not too much to say, not too much to say. I knew I would lose. There were 13 jurors - all white - and I was husky and dark. You [the judge] fought so hard to prove me guilty. I could say a lot but it wouldn't do no good. I can only say I'm not guilty. There's nothing else to say." Garrison has been ordered put to death in the gas chamber the week of May 9. He is appealing the conviction.
