Ninth in a series of articles.

population and food; we have listened to arguments from

the Malthusians and their opponents; but we have not

yet considered whether the growth of population, like

other phenomena open to examination, is determined by

objective laws, and if so what the laws are. Ascertainment

in their orbits effectively disposed of centuries-old argu-

ments on the preference of believing they follow perfect

circles. Karl Marx made a similar contribution to science

a moment on this point. Marx held that human societies,

like everything else in the universe, evolve. They develop

toric order. This order is determined in the final analysis

by the development of the means of production — tech-

own special laws of population, "historically valid within

society living under the primitive communism of stone-age

of laws from those governing the highly industrialized

capitalism of our day in the same area. To determine these

laws is, consequently, a matter of competent investigation

production, we have a firm basis for prediction. We can

tell by and large what the future holds for the society

under consideration. And we can tell what will NOT

occur in a qualitatively different society where qualita-

tively different laws are in operation. For example, we can

safely predict periodic unemployment of great masses of

workers under capitalism. We can with equal sureness

curately the particular laws that hold for each society.

Marx took the capitalist society which we live in as the

of these laws would enable mankind to speed the time when

it might transcend the limitations of capitalism. In fact,

he was of the conviction that such knowledge is indispen-

sable to win the abundance and freedom that will go with

an international socialist order built on the achievements

The scientific approach, therefore, is to determine ac-

foresee jobs for all in the socialist society of the future.

(Continued on Page 2)

In the richest country in the world, some thirteen million/citizens scrape along somehow on old-age, survivor and disability insurance benefits. The most an elderly couple can receive is \$180 a month. Few get this maximum. Senator McNamara says ten million aged people live on less than \$1,000 a year, and the average old-age benefit is \$75 a month.

The eerie logic of politics in an election year brought hope last week to people of advanced years. News reports said the Forand Bill, bottled up in the reactionary Ways and Means Committee of the House of Representatives, might be called up for a vote.

The Forand Bill, introduced by Democratic Congressman Aime J. Forand of Rhode Island, would provide those on Social Security with surgical services and with sixty days' hospitalization a year, plus nursing-home care to bring the total up to 120 days.

The bill has been fought tooth and nail by the American Medical Association and by private insurance companies. To provide minimum health care for people who have worked all their lives would cost the government money. Politicians prefer to spend money on intercontinental missiles. This practically strikes out the bill. Yet so amazingly has support mounted for it in an election year, that the little men facing an inevitable rendezvous with their constituents next November scarcely dared to ignore it. It looked therefore as if it would come up for a vote.

The AFL-CIO had swung into a vigorous campaign for its passage, with rallies throughout the country and with labor newspapers frontpaging it. Golden Age clubs everywhere have circulated petitions and sent delegations until the New York Times reported that the bill is drawing more mail than any other issue before Congress, with the amount doubling in

### **Overwhelming Problems**

activity.

Dr. Basil C. MacLean, former president of the national Blue Cross Association, gave it unqualified endorsement. "A lifetime's experience," he wrote, "has led me at last to conclude that the costs of care of the aged cannot be met, unaided, by the mechanism of insurance . . . The aged simply cannot afford to buy . . . the scope of care that is required, nor do the stern competitive realities permit any carrier . . . to provide benefits which are adequate at a price which is feasible for any but a small proportion of the aged."

Passage of the Forand Bill would, of course, still leave the United States with overwhelming problems of life and death to be solved: a dangerous scarcity of hospitals, of doctors, of nurses; hostility of wealthy hospital boards and

(Continued from Page 1)

the future society in the writings of Marx and Engels and

of the contradictory patterns and forces impelling — or

Marx accomplished his principal work in "Capital."

This mighty book is still to receive the recognition which

Trotsky, for one, predicted it would ultimately get from

the American workers. The fact that it deals with eco-

nomics, a seemingly dry subject, is not currently in its

favor. However, in our age, when adherents of the do-it-

yourself school think nothing of getting into the high-

voltage sections of their TV sets to clear up the hash on

the screen, we can expect that in a period of economic

and social crisis they will not hesitate to dip into this com-

plex book to get a clearer picture of the society they live in.

what generally goes for economics. It deals with man; but

man in the travail of the capitalist system; man as shaped

by the deepening contradiction between capital and labor.

If we consider the book from this point of view, we can

truthfully call the entire work a scientific treatise on

population - what happened to the feudal population as

capitalism arose, how and why it changed in the first

stages of the new economic system, the alterations that

occurred in Marx's time, and those that were clearly fore-

ly with the specific laws of population under capitalism,

campaign to check the population of India by helping

poverty-stricken males to get themselves sterilized. The

organic composition of capital is not something fixed; it

changes. It is really the shift in value of constant and

variable capital as this shift correlates with the changing

technical composition of capital, which has two aspects,

means of production and living labor power. "Hold on!"

technical composition of capital - you can see it in the

When a plant is automated, a change occurs in the

"The General Law of Capitalist Accumulation."

you say. All right, let's put it in Detroit.

"Capital" really deals with something much bigger than

hospital administrators to unionization of their exploited workers; a hodgepodge medical research dependent in major areas on rich contributors' whims and sporadic fund drives.

So interlocking and gigantic are these problems that only socialized medicine can cope with them. But last week real popular indignation at the situation focused on the Forand gain some of the benefits of the Bill until even the Vice-President of the United States was moved

The word was that Vice-President Nixon, facing the California primaries with nothing in his party's record on welfare issues to lighten his path, was pressing the Republicans to take the issue away from the Democrats and do the line against the workers is something about medical care for the elderly.

#### White House Conference

week. After some Republican talk of a subsidized plan of voluntary health insurance, baiting technique in the United President Eisenhower (who has been getting States. free medical care from the United States ever since he entered West Point) stood firm against any action at a White House Conference which Nixon did not attend. (He had gone to movies, pulpit and educational Florida.) Eisenhower's stand was said to make the Forand Bill a dead duck for this session. clamor about "red conspirators" Nevertheless Congressman Forand, contending perhaps with a tacit understanding of both capitalist parties that neither would embarrass the other by facing this issue, is continuing the workers. The "reds" worm fight. He said he would file a Discharge Petition in the House and try to get the 219 sig- labor disputes, which could be of such action to remove the natures necessary to get the Bill out of committee and onto the floor.

A severe surprise blow to the hopes of older people hoarding their few dollars for the time they might have to meet the costs of radium therapy and bedridden weeks, came from George Meany, AFL-CIO president. Meany piously announced that the sacrifice of votes for the Forand Bill in exchange for votes for the civil-rights bill was "a price we are prepared to pay."

Whether people in the old-age rights movement were prepared to pay that price was doubtful. Meany's proposal seemed as impossible as it was unnecessary - a lazy toplevel deal to write off human suffering and human potential alike.

Fortunately there are hardier souls than George Meany. At a meeting called last week in New York by the Central Labor Council on a bitter and blustery March day, retired trade unionists overflowed a hall seating 5,000, overflowed a second ballroom on another floor, overflowed onto a snowy street below to hear speeches relayed by loudspeakers, to boo Eisenhower, to pledge a continued fight.

"Overpopulation

-first story of a movement here

vious articles, the witch-hunt group in the Labor party and in the trade unions) stem from the

Industrial workers in England are engaged in a daily fight to much-ballyhooed boom and to the pauperizing effects of the next recession.

The primary technique of the bosses in their attempt to hold red-baiting. They are experts in this, having used it many times on an international scale. But the flurry of hope died quickly last doubtedly studied the highpowered application of the red-

It works like this. The employers mobilize the full power of their press, radio, television, institutions to produce a great but presumably feeble-minded their way into "legitimate" skillfully hot things up.

Now this campaign, strangely enough, is calculated to panic the union officials first of all. The bosses know that these bureaucrats crave nothing so much as respectability and that they are as fearful of militancy in the union ranks as the employers are.

Just as Pavlov's dogs began to salivate when the proper bell rang, so the labor bureaucrats agitators" whenever the din as an underground propaganda about the red menace gets loud group.

Here is an example. In the fall of 1958, the British capitalist press was filled with scare stories about a new and diabolical "red network" operating in the factories and unions throughout England.

The News Chronicle published a sensational "expose" by

# Forand Bill Highlights British Bosses Stoke Witch-Hunt Bonfires By Murry Weiss As we have indicated in previous articles, the witch-hunt bound of a paper called board of a

#### They Support Strikes

The Newsletter editors, we are told, espouse the creed of Trotskyism, "a revolutionary offshoot of Communism which opposes the present party leaders for their failure to wage the 'class war' with true Marxist

Again, "The main policy of this editorial board has been support of all strikes."

The editors are quoted as saying they hope to build a strong movement and are prewho have been "stirring up pared to "do everything in trouble" among well-meaning [their] power, including taking Newsletter, "The Club" and the industrial action to halt the scourge of unemployment." And they "openly advocate the use easily settled if they didn't present Tory Government and replace it with a Labor Govpolicies' — in other words to policies of revolutionary Marx-

> These "new revolutionaries" who "openly advocate" are then inked to "secret groups" who perate through a sinister outfit called "The Club" which 'cannot officially disclose its by the so-called

"The Club" is then linked, along with the Newsletter, to the bus strike and other strike struggles of the period. The attitude of the Labor party leaders towards the group is described as "mixed."

But the News Chronicle warns that "if unemployment continues to rise, if relations between the Government and the trade unions continue to worsen, the new revolutionaries will cash in. And if they do gain substantial control over rank-and-file workers they will hold the key to tremendous power in Bri-

### Behan Expelled

The theme was picked up by the rabidly anti-union employers' organization, the Economic League in its October 1958 Bul-

"Over a year ago we warned party members and other exganize agitation inside Britain's their activities has been carried 'nine men in Britain, most of them comparatively unknown. are today dreaming of taking growth of power of the new revolutionaries was such that

In this same period daily the authority of the union.'

Gerry Healy, national secretary of the Socialist Labor League, revolutionary-socialist group within the British Labor party and the trade unions.

other industrial disputes with continuous references to the "new revolutionaries."

A headline in the Daily Sketch Oct. 16, 1958 reads. "THE SILENT ENEMY!" Here the columnist "Candidus" gets down to business: "What's beernment 'pledged to Socialist hind the latest wave of wildcat strikes?" he asks. Candidus thinks the Communists are pulling a clever trick.

"Communism no longer dares flaunt its activities in the open. Increasingly Communist-type disruption is being propagated Trotskyist identity since most of its mem- movement. . . . The Trotskyists bers belong to the Labor party have gathered about them a begin to froth against the "red and within which they work number of dissident — but still fanatical - ex-Communists" who appeal "to the 'militant' rank-and-file members of the trade union movement. Superficially, these new-style agitators represent the extreme Left-wing of the Labor party." Candidus isn't fooled. "Their

policies," he shrewdly comments, "aren't likely to find any opposition among the Comnunists and other enemies of Britain.'

But the main point of this article is a direct challenge to the labor officials: "WHERE ARE THE VOICES OF THE TRUE LABOR LEADERS? WHICH OF THE BIG MEN WILL HAVE THE GUTS TO SPEAK OUT AGAINST THIS CYNICAL ABUSE OF COL-LECTIVE BARGAINING POW-'militants' — are hastening a that the profound shifts in show-down of their own . . . . midst. But only the unions can root it out. DO THEY DARE TO? OR MUST THE WHOLE

### Union Officials Respond

The editorial writers also got the pitch and sang out for disciplinary action by the union officials against militants involved in the so-called "lightning" strikes. At this point the aghast at." union bureaucrats began to respond

issue warns the labor bureaucrats that the unofficial strike movement is one they cannot afford to duck. "If they do the on the national campaign condays of their power and influence are numbered.'

#### Expulsions

On Oct. 28, the Daily Telegraph reports that twenty-six workers face "disciplinary charges carrying the penalty of explusion from the union" in the building strike situation.

On Oct. 30, the Daily Telegraph reports, "Stern action was taken yesterday by the Amalgamated Union of Building Trades Workers against members involved in the Shell Petroleum building site dispute and certain Trotskvist June.

London district committee. It also threatened some rankand-file members with ex-

pulsion. On Oct. 30 the Daily Mail reports "Mr. Brian Behan, 31year-old brother of 'Quare Feltributing, selling, or taking into low' Brendan Behan, the Irish playwright, was expelled from paganda sheets and publicity his trade union last night." The article says that the charges pulsion from membership in the which led to the expulsion arose from Mr. Behan's activities at the Shell building site on South Bank and from his position as an editorial board member of the Newsletter, a

new Trotskyite weekly paper.' The article ends with the approving comment, "The Transport and General Workers' Union have started a 'get tough' policy at the site. Last night they ordered members to stop picketing and to go to work."

The strike-breaking pattern in the building trades is but one example of how the redbaiting technique works. Similar examples can be drawn from other industries. In fact, the red-baiting, union-busting techa British movie, "The Angry Silence," which glorifies scabbing and vilifies Trotskyist 'trouble-making" in industry.

I will report on this movie in forthcoming article and also ducted by school authorities, the press and top Labor party leaders against one seventeenyear old student who had attended a few meetings of the Socialist Labor League.

move to add some more shares of that stock to one's

It turns out that Marx's concepts are not so dry after It is for this reason that you will find no blueprints of all. But let's not get too far ahead of him. In the first stages of capitalism, the number of workers

other scientific socialists. Instead you find concentration increases as capital grows, but at a somewhat slower rate on the "criticism" of the society we live in; that is, study than capital in view of the early opportunities the new system enjoys. The workers manage to maintain relatively retarding — the evolution of capitalism toward a higher good conditions. Nevertheless, the end result of their labor form of society. This, of course, is not an academic exer- is always to increase capital, upon which they become more letin: cise. It yields the points of departure for socialist political and more dependent. "Accumulation of capital is, therefore, increase of the proletariat," says Marx. This is the first readers that ex-Communist

main law of population as capitalism develops. Marx cites some striking statements by the early tremists were preparing to orclassical economists, demonstrating how thoroughly they important industries. Since appreciated the advantages of a big population of poor then the potential for mischief people the better to give a privileged few ease and wealth. of these people has increased For example, Bernard de Mandeville declared in 1728, considerably. An inquiry into "From what has been said, it is manifest, that, in a free nation, where slaves are not allowed of, the surest wealth out by Mr. Roy Nash of the News Chronicle. In an article consists in a multitude of laborious poor; for besides, that in which he reported his findthey are the never-failing nursery of fleets and armies, ings he expressed the view that without them there could be no enjoyment, and no product of any country could be valuable.'

As capital accumulates (Marx goes into this in some command of the lives of mildetail), the effect of the change in the organic composition lions of working men and womof capital becomes more and more powerful. Say a capital en.' He also stated that the at one time was 50% constant and 50% variable. Later it changes into 80% constant and 20% variable. Let's look at they 'could lead Britain into it in dollars. Say the original capital was \$6 million. It in- industrial strife more bitter of Building Trades Workers for again on the plight of the opcreases to \$18 million. Variable capital, originally \$3 mil- than anything that has gone belion goes up to \$3.6 million. That's an increase, all right, but fore. note the difference in the two ratios. The payroll went up items appeared in the press re-20%, but to register that modest increase, the total capital porting strike activities and Times continues, "had before it of the present "revolution of seeable. But let's settle for the chapter dealing most direct- had to triple in size!

Since Malthus gave us a lot of practice in handling ratios, we should not mind a lesson from Marx now on a Marx begins with the organic composition of capital, ratio which every worker threatened by automation should a concept that may seem somewhat remote from the current | find of special interest:

> "With the advance of accumulation, therefore, the proportion of constant to variable capital changes. If it was originally say 1:1, it now becomes successively 2:1, 3:1, 4:1, 5:1, 7:1, etc., so that, as the capital increases, instead of 1/2 of its total value, only 1/3, 1/4, 1/5, 1/6, 1/8, etc., is transformed into labor-power, and, on the other hand 2/3, 3/4, 4/5, 5/6, 7/8 into means of production. Since the demand for labor is determined not by the amount of capital as a whole, but by its variable constituent alone, that demand falls progressively with the increase of total capital . . ."

As we can see, this must modify the operation of the primary law about the proletariat increasing as capital is accumulated. What is the modification? The "greater greater repulsion," that is, greater recruitment of workers is accompanied by greater unemployment.

"The laboring population therefore produces, along with the accumulation of capital produced by it, the means by which itself is made relatively superfluous, is turned into a relative surplus population; and it does this to an always increasing extent. This is a law of population peculiar to the capitalist mode of production . . .'

Already we begin to see the real source of that "over-And the workers with families to take care of, who population" which gave the Rev. Malthus his chronic

### Poor Substitute for a Test Ban

The plan President Eisenhower and British Prime Minister Macmillan agreed, March 29, to offer the Soviet Union for continuing the moratorium on nuclear testing is a poor substitute for what the great majority of the people all over the world really want - namely, a decision to ban A-bomb and H-bomb explosions forever as a first step toward banishing the threat of war.

The Eisenhower-Macmillan proposal would continue the moratorium for only one more year — if the Soviet Union agrees to help devise "effective detection" measures during that time. Presumably, if at the end of the year, Washington is not satisfied that a really "fool-proof" inspection system has been devised, it may refuse to renew the moratorium.

It is now generally conceded that no A-blast of any significant size can take place above ground anywhere in the world without being detected thousands of miles away. But the Atomic Energy Commission, the agency most vigorously opposed to a test suspension, claims that an underground explosion of a force less than 20 kilotons — the size of the bomb dropped on Hiroshima — cannot be readily identified beyond a relatively short distance.

I. F. Stone, who has nailed every argument for continued A-testing advanced over the years by the AEC, has demolished the Commission's latest contention, too.

"It is true," says the March 28 issue of I. F. Stone's Weekly, "that one cannot be certain of detecting the smallest shots and that it may be more difficult to distinguish them from earthquakes. But they can and often are detected at great distances. An authoritative article in the Journal of Geophysical Research last October on the so-called Hardtack series of underground tests reports that they were recorded in this country by temporary seismograph stations up to distances of nearly 2,400 miles 'and records from all over the world were available from regular seismograph stations.'

"The transcript of the technical conference at Geneva last winter shows that the Air Force seismologist Carl Romney brought in records on the Hardtack series from more than 90 stations, including Sweden and Japan. The largest of these shot, Blanca, was 19 kilotons, but the sec-

ond largest, Logan, was only five kilotons, and the third in size, Talmapais, was only 72 tons (i.e. .072 kiloton).

"The transcript of the Geneva technical discussions shows that seismic records of both the 19 kilotons and the 5 kiloton shots were obtained in the Soviet Union at the Tiksi station in the epicentral distance of 6,890 kilometers (about 4,300 miles away) and that the 19 kiloton shot was registered as far away as the Soviet seismic station in Antarctica at the epicentral distance of 16,250 kilometers or more than 10,000 miles.

"The grid system to be established in accordance with the decisions reached at the 1958 Geneva conference would place control posts across the Soviet Union at still undetermined but much smaller distances than these . . . . Any attempt to violate the moratorium on shots below 20 kilotons would be risky."

The Soviet government, which took the lead in proposing the elimination of all nuclear tests has repeatedly indicated its readiness to work out an adequate monitoring system.

Recently, the Soviet delegate at the Geneva nuclear-disarmament conference offered to sign a treaty that would ban all above-ground explosions and impose a voluntarily enforced five-year moratorium on underground shots. Meanwhile Soviet, British and U.S. scientists would try to perfect "detection" to the degree of refinement desired by Washington.

The trouble is, however, that the U.S. government is not really looking for better methods of "inspection" but for a pretext to resume tests. As Neal Stanford revealed in the Feb. 8 Christian Science Monitor, the Defense Department and the Atomic Energy Commission feel "a pressing need to do some new testing on the accumulation of projects and improvements made on the drafting boards during the present moratorium." President Eisenhower, Stanford reported, was said to be in agreement with the AEC and Defense Department.

The Eisenhower-Macmillan proposal is thus no more than a token concession to the strong anti-testing sentiment of the people of this country and of the rest of the world. It does not mark the end of the U.S. government's drive to resume nuclear

The Witch-Hunt in Britain A wide section of the British Labor some alleged "Stalinist methods" of Gerry

Healy, the SLL secretary. Now, the witch-hunt in Britain is not the exclusive concern of British socialists, and a movement towards perit is also of great importance to revolution- sands of workers and their famary socialists throughout the world. So far we have not seen a trace of such solidarity in any publication government. Temporary suspension of arrests for "pass" violation by the racist atrocities. If any accepted substantial technical influenced by Pablo.

Killer Cops

Last June, racist police in Durban, South Africa swung clubs as they sought to disperse demonstrations of African women. In past two weeks, the police have been seeking to preserve "apartheid" by shooting into crowds. Strikes and further demonstrations have been the Africans' reply. On March 27, the South African government granted a significant concession on the hated pass laws. At the same time it enacted further repressive measures.

# Why the African Freedom Fight Focused on the "Pass System"

By Frances James

people in the Union of South nificant victory in their struggle

The demonstrations which forced the government to suspend the "passes" were initiated and organized by the Pan-African Congress to protest the requirement that all Africans carry identification books containing the holders' picture, tax-payment record and employment record. The "pass" had to be approved and stamped each month whether the holder changed jobs or not.

The system was instituted by the white-settler (colon) government in an attempt to control the African labor force.

It was used, for instance, to screen militant workers from mines, farms and factories and ban them from urban centers. The pro-"apartheid" government hoped by this means to prevent all tradeunion, political or social organization of the African

#### Organize Boycott

Last year, Pan-African leaders in many countries threw their weight behind the organization of a boycott of South African goods to protest the Jnion's "apartheid" policy. Other African countries are the manufactures (paper, tires, plastics, bicycles, clothing, canned fruits, etc.). The boycott has also been endorsed by labor organizations throughout most of he world.

This boycott does not stem from mere sympathy of the African nationalists for their others in the southern part of the continent. A victory over the racists in South Africa is crucial for the cause of Pan-Africanism.

For the Union of South Africa the Sahara. The aim of the with the arch-racists in the Verwoerd to try to extend the Rhodesias and in Kenya and "pass" system to women last thus reinforce the fight against

### 500 Pickets Force Woolworth Store To Close in Harlem

Fifteen New York Woolworth stores were picketed Saturday, March 26, in support of the Southern sit-in movement. Nearly 500 youths from the various lines converged in the late afternoon on

Street forcing the store to close. This mass picketing began after the conclusion of a street

Agrees to Hear rally nearby sponsored by the Committee to Defend Martin Luther King. The speakers were Jackie Robinson, former baseball star; Buell Gallagher, City College president; A. the Sleeping Car Porters (AFL-CIO); and three Southern student leaders of the sit-in campaign.

The demonstrators responded enthusiastically to the call by the Southern students for continuing the Northern supporting movement.

However there was little response and some boos for A. Philip Randolph when he devoted the bulk of his speech to red-baiting attack on the newspaper, the Young Socialist, and the New York Youth Committee for Integration.

Randolph held up the current ssue of the Young Socialist with its banner headline: BOY-COTT WOOLWORTH'S and said, "We disassociate ourselves from this newspaper." Referring to the New York Youth Committee for Integration, Randolph said he would prefer no picket demonstrations at all if they were to be sponsored by this student organization.

The New York Youth Committee for Integration has organized four successful picket lines of students in front of the store. In a leaflet distributed to the rally it announced that it intended to continue to "build bigger and better picket lines.'

A sizable group of students, representing a dozen campuses and high schools joined the committee after the attack by

Young Socialist Statement Martha Curti, editor of the Young Socialist, said today: "I feel that A. Philip Ran-

dolph has done a terrible disservice to the present fight by ntroducing the divisive redbaiting tactic just as the movement is really getting started.
"Red-baiting has always

been a favorite weapon of the reactionaries because no one benefits from it but them. It is necessary to be frank about this. The speech of A. Philip Randolph served no one but the Southern racists.

### the Harlem Woolworth at Seventh Avenue and 125th Supreme Court Wilkinson Case

NUNBER 14

MARCH 28 — The Supreme Court today agreed to review Philip Randolph, president of Frank Wilkinson's "contempt of Congress" conviction.

In a statement issued today, Wilkinson said: "On behalf of the many Am-

ericans who have placed their faith in the First Amendment when called before the Un-American Committee and other inquisitorial committees of the government, I am deeply grateful for this decision of the U.S. Supreme Court to grant a hearing in my case.

"In cooperation with the thousands upon thousands of other citizens who have become convinced of the inherent evils of the Un-American Activities Committee, I shall carry on the fight in the courts to protect the constitutional rights of individuals attacked by the committee and in the Congress to abolish the Un-American Activities Committee altogether." Wilkinson, secretary of the

Los Angeles Citizens Committee to Preserve American Freedoms. was cited for "contempt" following a 1958 hearing of the House Un-American Activities Committee in Atlanta, at which he invoked his right under the First Amendment not to answer questions pertaining to his political beliefs.

The American Civil Liberties Union supported his bid for a review of his conviction by the high court.

### **Court Rejects Uphaus Appeal**

The New Hampshire Supreme Court refused March 31 to free Dr. Willard Uphaus, the 69-yearold pacifist now serving a year in prison for refusing to become

Dr. Uphaus was originally sentenced to stay in prison until such time as he purged himself of "contempt" by turning over to the state attorney general the guest list of the World Fellowship Center of which he is director. Strong national protest persuaded the presiding judge in the case to change the sentence to one year. Dr. Uphaus had made clear he would never

#### losis rate among them is high. from under-employed areas to New Jersey, Although agriculture rates as the third most New York and Pennsylvania."

THE INFLUENTIALS — Last month the Department of Agriculture sent out a press release containing its proposal for a minor reduction in the rates paid by the government for storage of surplus grain. The warehousers asked that their statement opposing the suggested cut be included in the release but department press officers declined to do so. A little pressure was put on the higher-ups. Result? The Department of Agriculture not only mimeographed the warehouser's statement but mailed it out along with its own release. The companies have been racking up profit margins as high as 167 per cent on the \$1 billion a year shelled out for storage.

A LETTER FROM KHRUSHCHEV - The junior high school year book of P. S. 142 in New York will include a contribution by Soviet Premier Khrushchev. The students invited heads of state and other public figures in many countries to comment on the theme "Reverence for Life." Khrushchev was the only one to reply personally. He expressed the hope that the "whole rising generation of America" would "learn what war is like only from history books." The request for his views was made by Miss Gail Bartley, a 14-year-old Negro student who closed her letter to the Soviet Premier, "Yours in world friendship."

COST OF LIVING AGAIN HITS RECORD HIGH - Living costs bounced back to a record peak in February after a slight decline in December and January, according to the Labor Department's Consumer Price Index. A two-tenths of one per cent rise brought prices to 125.6 per cent of the official 1947-49 average. Predicting continued cost increases, a federal spokesman said, "Things are likely to get a little worse before they get better, I'm afraid."

HEY, UNCLE, HOW ABOUT HELPING US? - Gee, it's great how Uncle Sam takes care of us little old taxpayers. We are speaking of course, of little old taxpayers like the New York Central Railroad. The Internal Revenue Service said that the poverty-stricken railroad had overpaid its past taxes by more than \$85.5 million and as a result the railroad got refunds, credits and interest payments totaling more than \$86 million. Don't jump to conclusions and blame the Republicans entirely for this one though. The refund was approved in 1958 by the Democratic-controlled Joint (Congressional) Committee on Internal Revenue Taxation which has to approve all refunds of more than \$100,000. (Reprinted from the March 15 United Mine Workers Journal.)

GROUCHO'S GRIPE — Comedian Groucho Marx says: "The so-called 'sick' comedians like Lenny Bruce, Mort Sahl, Shelley Berman, Milt Kamin — and men like Oscar Levant — are the only ones who are healthy. They're sick all right — of what's going on in the world." TV could help, he added in a news interview. "Turn one channel over to something like Town Hall where anyone could go on and say anything he wants." "People are afraid to speak out these days," he continued, "but I'm not afraid. If I

get fired and they throw me out, I'll put a feather in my cap, buy some short leather pants and go to Switzerland and play tennis with

 Discrimination against Negroes in federally financed private housing projects has been banned by the New Jersey Supreme Court.
