

# **COMMUNISM AND ITS TACTICS.**

Under Communism all shall satisfy their material needs without stint or measure from the ammon storehouse, according to their desires. Servone will be able to have what he or she lesters in food, in clothing, books, music, educaion and travel facilities. The abundant prolaction now possible, and which invention all constantly facilitate, will remove any need or rationing or limiting of consumption.

Every individual, relying on the great common production, will be secure from material want and auxiety.

There will be no class distinctions, since these arise from differences in material possessions, education, and social status.—all such distinctions will be swept away.

There will be neither rich nor poor. Money will no longer exist, and none will desire to heard commodities not in use, since a fresh apply may be obtained at will. There will be no selling, because there will be no buyers, since everyone will be able to obtain everything at will, without payment.

The possession of private property, beyond that which is in actual personal use, will disappear.

There will be neither masters nor servants; all being in a position of economic equality—no individual will be able to become the employer of another.

All children will be educated up to adult age, and all adults will be able to make free, unstated use of all educational facilities in their abundant leisure.

Stealing, forgery, burglary, and all economic times will disappear, with all the objectionable apparatus for preventing, detecting, and punishing them.

Prostitution will-become extinct; it is a commercial transaction, dependent upon the conomic need of the prostitute and the customer's power to pay.

Sexual union will no longer be based upon material conditions, but will be freely contracted on the basis of affection and mutual attraction. The birth of children will cease to be preented by reason of poverty.

Material anxiety being removed, and the race or wealth eliminated, other objects and ambibins will take the place of the personal struggle or individual material existence; since all will mench from the labour of all, honour will be kne, not to the wealthy, as at present, but to the who are skilful and zealous in the common write.

Emulation in work will take the place of <sup>mulation</sup> in wealth.

With the disappearance of the anxious struggle we existence, which saps the energy and cripples stative, a new vigour, a new independence effective, a new vigour, a new independence of develop. People will have more courage to size freedom, greater determination to possess . They will be more exacting in their demands pon life, more fastidious as to their choice of twoation. They will wish to work at what they ally, to order their lives as they desire. Work the generally enjoyed as never before in the story of mankind.

The desire for freedom will be tempered by <sup>le sense</sup> of responsibility towards the common-<sup>cal</sup>, which will provide security for all.

eal, which will provide security for all. Public opinion provides a stronger, more areal compulsion than any penal code, and public pnion will strongly disapprove idleness and ate.

To secure the abundant production necessary to Communism, and to cope with the ever-growing complexity of modern life and requirelarge-scale production and co-operative effort is necessary. The people of to-day would not be willing to go back to producing everything by hand in domestic workshops; were they to do so, they could not maintain the population in comfort and with reasonable leisure. The people of to-day would be unwilling to abandon all the productive factories, the trains, the electric generating stations, and so on. The retention of such things necessitates the working together of large numbers of people. As soon as numbers of people are working together and supplying with their products numbers of other some sort of organisation of work and of distribution becomes inevitable. The work itself cannot be carried on without organisation. In each industry, either the workers concerned in the work must form and control the organisation. or they will be under the dominion of the organisers. The various industries are interlocked in interest and utility; therefore the industrial organisations must be interlocked

### Specially Written for Communists.

When wages have disappeared, when all are upon a basis of economic equality, when the position of manager, director, organiser, etc., brings no material advantage, the desire for it will be less widespread and less keen, and the danger of oppressive action by the management will be largely nullified. Nevertheless, management imposed on unwilling subordinates will not be tolerated; where the organiser has chosen the assistants, the assistants will be free to leave, or change him; where the assistants choose the organiser, they will be free to change him. Cooperation for the common good is necessary, but freedom, not domination, is the goal.

Since co-operative work and mutual reliance on mutual aid renders some kind of organisation necessary, the best possible form of organisation must be chosen: the test of its worth is its efficiency and the scope for freedom and initiative it allows to each of its units.

The Soviet structure of committees and delegates, built up from the base of the workshop and village assembly, presents the best form of organisation yet evolved; it arises naturally when the workers are thrown upon their own resources in the matter of government.

The Soviet structure will undoubtedly be the organisational structure of Communism, at any rate, for some time to come. We live always, however, in a state of flux, and there is and happily can be, no permanence about human institutions; there is always the possibility of something higher, as yet undiscovered.

The overthrow of Capitalism precedent to the establishment of Communism will be resisted

by the possessors of wealth. Thus Capitalism will only be overthrown by revolution.

The revolution can only come when conditions are ripe for it; but opportunities may be missed : the rising may fail to take place at the opportune moment, or it may fail by mismanagement of the proletarian forces. A partial success may be achieved, and if Capitalism is not completely destroyed, it may afterwards re-establish itself, as it speedily did in Hungary, as it is gradually doing in Russia.

## A BIT OF PAST HISTORY.

The second Apocalyptic rider, the Plague, followed in the tracks of Famine. In 1893, the cholera from Persia came up the river over the low ground of the Volga and breathed with its murderous breath over the villages, apathetic and exhausted by famine.

The behaviour of the instruments of the Czarist Government towards the new enemy sounds like an anecdote, but was bitter truth.

The Governor of Baku field before the plague, into the mountains, the Governir of Saratov hid himself on a steamer when popular unrest broke out. The Governor of Astrachan sent watch-ships to bar the entrance into the Volga of all vessels coming from Persia and the Caucasus, as cholera suspects, but sent neither food nor drinking water to the quarantine prisoners.

More than 400 steamers and barges were confined in this manner, and 10,000 human beings, whole and sick together, were left to destruction by plague, hunger and thirst.

At last a ship came down stream towards Astrachan; an emissary of Providence?

The looks of the perishing turned, full of hope, to the ship of deliverance. Its freight was coffins.

Then the storm of popular wrath broke loose. Like a raging fire, the news of the detention and of the martyrdom of the quarantine prisoners spread up the Volga, and was followed by the cry of suspicion: "the authorities were purposely spreading the plague, to decimate the people."

The first victims of the cholera-revolts were the sanitary workers; men and women of the intelligentzia who, with self-devotion and heroism, had hastened up to erect hospitals in the villages, nurse the sick and take measuresf for the safety of the sound. Hospitals went up in flames; doctors and sick nurses were struck down. Then followed the customary punitive expeditions, shedding of blood, court-martials, and executions. In Saratov alone there were 20 death sentences. The magnificent region of the Volga was changed once more into Dante's Inferno.

# **REVOLUTIONARY ESSAYS**.

The word "Revolution" is upon all lips, and one feels its first vibrations. And, as always, at the approach of great commotions and great changes, all who are dissatisfied with the actual wever small may be their discontent régime—however small may be their discontent —hasten to adopt the title of revolutionaries, hitherto so dangerous, now so simple. They do not cling ho the actual régime ; they are ready to try a new one ; that suffices for them.

This affluence to the ranks of the revolution-ries of a mass of malcontents of all shades, creates the forces of revolutions and renders them nevitable. A simple conspiracy in the palace, or of Parliament, more or less supported by what is called public opinion, suffices to change the men in power, and sometimes the form of Government. But a Revolution, to effect any change whatsoever in economic order, requires the agreement of an immense number of wills. Without the agreement, more or less active, of millions, no revolution is possible. It is necessary that everywhere, in each hamlet even, there should be men to act in the destruction of the past; also that other millions remain inactive, in the hope of seeing something arise to improve their future condition

THE WORKERS' DREADNOUGHT

We invite the attention of our readers to Mr. Watson's statements regarding his alleged meetings with Russian Soviet emissaries at 1, Kingly Street. We quote from The Times :

The plaintiff, asked by Mr. Hogg to give the address of the meeting place in London of the Workers' Committee and the emissaries of the Russian administration-which he had declined to give on the previous day—now said that it was 1, Kingly Street, near Piccadilly. He said that he wished to make a formal protest that the address had been drawn from him in cross-examination. He added that many meetings were held, but that he was only present at two, and both of those took place at Kingly Street. On August 6th there was a secret meeting with Russian couriers." ## IRELAND.

The question of war, or peace, with Ireland is still in abevance

It seems that Ulster is being asked on what conditions she will accept an all-Ireland Parlia-ment, and apparently she is replying that she does not want an all-Ireland Parliament, and if she did, she would insist on getting the same representation for her small handful of people as s given to all the rest of Ireland. The Ulsterhow no inclination to accept an all-Ireland Parliament.

If they were to accept it, there is not, we hink, any guarantee that Sinn Fein would concede any of the points which the British Government declares essential.

Some people think that Sinn Fein has said : "Give us an all-Ireland Parliament and we will accept your other terms," We do not think that Sinn Fein has made any such concession; w think that Sinn Fein is fencing with the Go ernment; trying to discover how much can be secured without itself giving anything away.

The Government, of course, is holding to the things it cares for, and bargaining with the things it does not care for. The Government and, of course, especially the Unionists in and out of the Coalition—are unwilling to quarrel with Ulster, because Ulster has strong support all over the Kingdom; at the same time, the question of a separate North of Ireland Parlia-ment is not so interesting to Unionists on this side of the Channel as to those in Ireland.

But all this manœuvring on the question of an all-Ireland Parliament is as likely as not a plan riginated by Lloyd George to make an apparently large concession to Sinn Fein, in order that when Sinn Fein rejects the Government terms on what are really important issues, the Government may say: "See, these truculent Irish refuse peace, in spite of the great conces-sion which we and Ulster have made them; they are to blame, and not we, for the inevitable

Ulster is afraid that acceptance of an all-Ireland Parliament may be taken as a precedent, even though the acceptance be only a manœuvre to make it easier for the Government to blame Sinn

The statement made by Sir Laming Worthington Evans, as to the things he and his Unionist colleagues in the Coalition Government will not tolerate, shows conclusively that there has been no offer either of Independence, or complete Dominion Home Rule to Ireland.

I will not agree to any settlement of the Irish question which does not preserve the supremacy of the Crown. I will not agree to any settlement which does not keep. Ireland within the Empire. I will not agree to any settlement which does not leave the British Navy the sole guardian of the shores and the eas of Great Britain and Ireland. I will not agree to any settlement which does not make Ireland pay a fair share of the debt and of the pensions. Nor will I agree to any settlement that requires the coercion of Ulster to assent

The fiscal question he did not mention; but

War with Ireland remains much more probable than peace. Amongst the many evidences of this fact are the news that an army is being secretly organised in Belfast, and the manner in which the news has been received by the British authorities. The Irish Bulletin reports that the Royal Irish Constabulary of Belfast has instructed its officials that the Government is considering "the desirability of obtaining the services of the best elements of these organisations, and has

decided that the scheme most likely to meet, the situation would be to enrol all who volunteer and are suitable into Class 'C,' and to form them into regular military units. " The force is intended as a military one,

only to be called out in grave emergency to act in a military capacity. " They will not of necessity be utilised for

local defence, but may be drafted to any theatres of operations within the six counties." This can mean only one thing : that the British ent expects to go to war with Ireland on he side of Ulster

Meantime, in the Conference and the protracted negotiations, they are merely casting about either for a means of keeping things as they are, without war, or for a method of gulling the British people into acquiescence in war with

When the Government goes, as Austen Chamberlain said, "'to the mothers for their sons, to the wives for their husbands,," it wants to be able to make them believe that war is the only alternative.

## British Labour still on the Fence.

Official British Labour continues to play a cowardly and contemptible part. The Joint Council of the Parliamentary Committee of the Trade Union Congress and the Labour Party Executive has just issued a manifesto which

Should the present Conference fail, Labour will continue to demand for the Irish people whatever Constitution for Ireland the Irish people desire, subject only to two con-ditions — that it affords protection to minorities, and that the Constitution should prevent Ireland from becoming a military or naval menace to Great Britain-a policy which has been accepted by Irish Labour."

What do these conditions mean? Do they mean anything, or are they merely an appeal to the gallery of the thoughtless?

If they are to be taken to imply what they would in the mouth of the ordinary politician, then this is the translation of these obscure phrases; phrases which a Labour Party ought to be ashamed to use; for, of all parties, a Labour Party should obey the duty of using plain nguage which every working man and woman can understand.

#### LABOUR PARTY STATEMENT

" Protection to minorities.

## PROBABLE MEANING.

" The Constitution should prevent Ireland

from becoming a naval or military menace to Great Britain."

#### PROBABLE MEANING

Ireland to be kept within the Empire under the control of the British Army and Navy, and debarred from making independent alliances with other countries

We challenge the Joint Committee to say what means by its obscure phrases, and we urge all workers to make it their business to secure an open declaration of policy from, the Labour leaders. In our opinion, they are prepared to support the Government in the event of war, unless the war be thoroughly unpopular-in that ase they may pause. Those who want to prevent war should en-

deavour to get the Labour movement committed to the support of the Irish Republic, and should that by no means necessarily infers that any concessions have been made in that direction. Yet such concessions would a i with Sinn rean and women who actually carry on the work of this country to resist the war. Ster.

The All-Russian Trade Union Council has worked out a project for regulation of the position of the workers in private industries in accordance with which factory committees shall be instituted as sec-tions of the trade union concerned, and maintained at the expense of the employer. The workers and officials in private industries are subject in full degrees to trade union discipline; all decisions as to the protection of workers that are valid in State industries must also be strictly observed here, and special commissions to be provided in the factories are to watch over this.

miners, in fact, have nothing left to take home to their wives when they have paid the wages of the boys they employ, at the end of the week. Things are going from bad to worse, indeed! Your Union cannot do much to help you; unemployment amongst its members has depleted its funds, and perhaps a strike or two in which its members were beaten. Meanwhile, the employers are still cutting down wages. Some of you are determined to strike. We shall see a number of desperation strikes presently. The Trade Union officials say there is small chance of success. They are right.

Why?" The London 'busmen are talking of Partly because the workers do not strike together. The London 'busmen are talking of ing. Are they arranging that if they do, the tube men will strike at the same time? If do not, the strike will be lost before it begins; experience ought to have taught you striking. An that, Mr. 'Busman.

"You said: 'Pavily because they do not strike together '; is there any other reason?" Yes, Mr. Workman, it is a very big reason: it is because we are in a period of world-wide trade depression; there is a slump in buying and selling; therefore the capitalist is not in a hurry to produce goods; therefore he does not care whether he employs you or not, Mr. Workman; and if you won't work cheaply, he prefers that you should starve.

" Is there any way out of the difficulty?"

Yes, Mr. Workman.

" What is it?"

Change the system-put the workers in power.

" How?"

The workers must take control of the industries, the Government, and the forces that maintain the Government.

" How?"

Organise.

" How ?"

Get together all the workers in your shop who want to do it; let them call all the workers Get together all the workers in your shop who want to do it; fert mean an the workers in your factory, town, district, industry, who want to do it; form a series of committee for your industry, built up from the workshop basis. Let the organisations in all industries unite in one big revolutionary union. When you have the means you will be able to act. But re-member you cannot do anything with an organisation of people who do not want to do anything. Only allow those to join who have made up their minds to put the workers in control.
