Curiously, his method is and by extending the education of the comforts of life among the working class. The method is to build up the murder-ons army and train larger numbers of the "herees" to kill the workers of other countries. Truly, France will be "great" in the eyes of the capitalists when its army is able to kill large sumbers of people! That is the capitalist idea of greatons.

And as she wove her mind by blank beneath the thick-coiled tresses of her hair.
For man had relegated to her that one task of weaving.
And while her mind lay blank, the rulers of the earth reached forth, and (clad in cloth she woye),
Built for them cities, kingdoms, empires, laws,
And ruled within them to their hearts' content.
And Wennan dramed and wove, and dreamed and wove,
Monotonously for ages dreamed and wove, apparently content.
Then took the ruless of the earth from out her hands her weaving;
Lieft the Wonan empty-handed in her home;
Gave her universal task to vast machines, to mills, to factories;
Took the dignity of social service from her hearth;
No longer in her handlwork was clad the world,

"STEALING OUR-THUNDER"

We learn from a perusal of the capitalist papers that "the kaiser is preparing to ma perusal of the capitalist papers that "the kaiser is preparing to steal the thunder of the Socialists," and our hearts are made glad. Because we know that the kaiser will not steal any of the lightning—and just as the Bull Moose in the last campaign merely succeeded in advertising the real thing by its advocacy of counterfelt Socialist in the "thunder" of the Reds.

**Plus true that there are well-meaning people who imagine that Socialism is merely government ownership of certain, or of all machinery of production but they are learning better, and the quicker the Bull Moose absorb this element, the sooner the Socialist party, freed from the incubus of their presence, can truly educate the working class to the necessity of economic and political organization to accomplish the socialism we have been been socialism. Socialism we have been been been been socialism. Socialism we have been been been been some socialism in the same of economic enameripation of the working class from the chains which now bind it. To our mind political and economic organization offer excellent means of accomplishing that engage for the same of the socialism we chain the same of the socialism of the soci

"ON BEHALF OF LAZARUS"

The splendid story of how J. Stitt Wilson, Socialist mayor of Berkeley, California, refused to attend a "brairly banquet" in that city where the rich gorged themselves on \$\frac{3}{2}-a-plate food on behalf of the poor of that city should make every elergyman in America cringe.

In Buffalo as in every other large city, we have exhibitions just like that banquet at Berkeley, but, unfortunately, we do not have the picture of the courageous public official to go with it.

Instead of the public officials showing the miserable truth to the public, we find them obsequiously making speeches to the adulation of the "organized charities" whose purpose is purely and simply to prevent the poor from getting what is domated for them.

There is not an organized charity out in America which does not specific to the substitute of the control of the control

the unfortunate.

The value of organization, as the charity-fakirs themselves will glibly explain, is "to prevent the undeserving from getting anything." By an elaborate system of checks, counter-checks, investigations, spyings and the like, all paid for out of the charity funds, they succeed in-endering to a mainman the number of people who are "helped" by charity, and in tickling the rich with the thought that the number of un-

way to be "undeserving" is to be connected with any The surest way to be "undeserving" is to be connected with any effort of the working class to better the conditions of the workers. The labor unionist who applies for help in the stress of conflict with the masters does not need to be told about the "efficiency" of the charity organizations.

The Bull Mice will have a city ticket in Buffalo, they say. Butheir platform doesn't contain any "social and industrial justice with reference to the Sweeney store.

VOCATIONAL SCHOOLS

WOCATIONAL SCHOOLS

The cunning of the capitalists who dominate our shop-keepers' social systep outed not be better demonstrated than is being demonstrated right now in Buffalo by the effort to foist upon the city a system of so-called "vocational education" in the public schools.

The "vocational education" is nothing more nor less than training cheapy wage-alves at the expense of the city. Girls are now being trained as clerks for the department stores in several of the schools, and the working class not only stands for it; but many of the simple-minded, led on by the capitalist newspapers, are even tempted to applaud. The theory is: "Tenet the girls to be good sales-girls, and they will be able to get the highest wages paid in the stores just as soon as they graduate from school."

The theory is: "Tenet he girls to be good sales-girls, and they will be able to get the highest wages paid in the stores just as soon as they graduate from school.

A few years ago as the masters can force them to be quiet with.

A few years ago the capitalists brought forward the same plea with reference to stenographers. In those days, it was common for good stenographers to get \$100 a month. So the masters todd the workers: "Train your girls in the public schools to be good stenographers and they will all get \$100 a month."

Everybody knows better now; but it worked until the masters got what they wanted.—which was nothing more nor less than to flood the "labor market" with stenographers. Then they did exactly what they always do when the "labor market" is flood.—marked down, the proceed of hood, the miss an opportunity to point out the iniquity of the vocational school scheme. So long as the means extended the care.

of labor. Don't miss an opportunity to point out the iniquity of the voca-tional school scheme. So long as the master class runs the public schools they will be used to bolster up the power and profits of the master class.

Nothing delights the masters quite so much as to see the working ass divided against itself, whether the subject be religion, tactics, ethods of organization or what not. So long as they can keep us vided against ourselves, they can hold us in bondage.

MOTHER JONES IN JAIL

Where is the workingman or workingwoman whose heart does not yearn with affection for that queen of the labor movement, dear old "Mother Jones?" We can't imagine any working person not loving her because, in spite of her four-score years, she is ever willing to lead the fight of the toilers.

Nothing could more truly emphasize the fact that women are just as fully a part of the working class struggle for emancipation as are the men, than this magnificent woman leader.

The men have their Haywoods, their Ettors, their 'Gene Debs and their Giovannittis, but the women at the same time are supplying the Mother Joness, the Elizabeth Gurley Flynns, the Carrie Allens and the Mary Marcys.

Now comes the unblushing capitalist press with the information-

Mother Jones, the Entraceth currey Frynns, the Carrier Aniens and the Mary Marcys.

Now comes the unblushing capitalist press with the information-that the masters of the mines and the lives of the miners, have thrust this aged heroine into a box-ear jail, have heaped upon her the shannes, and the indignities usually reserved for the lowest of convicts, and you.

We long age ceased to swallow the worn-out theories of "chivaler," Capitaliam has robbed women of the doubtful benefits of "chivaler," and substituted no equivalent. It never amounted to much anyway, except to establish womanhood as a thing over which men might quarrel, and gratify the blood-raving.

And while we prate of chivalry, dear old Mother Jones, heroine of a thousand working class battles, lies in her box-ear prison, the prey to a thousand indignities, abuses and insults.

A fine system indeed, for a woman to support!

VOTES FOR WOMEN

Last ...

Next to Socialism the most generally discussed subject in the United States is woman's suffrage. At the clubs, teas, parties and like entertainments given by "Society," men, as well as women, are giving it thought and speech. Churches that a few years ago for bade the mention of the name, are now—seeing its rapid approach—very favorably inclined loward it and enourage its discussion, or its minimal give bectures bearing upon the subject.

In the state of the second second in the second second in the second s

nized, are beginning to demand the ballot as a means of bettering their condition.

Opponents of Snffrage.

The only opponents appear to be a bunch of doddering old women who fear the loss of benefit prestige if some other women choose to go to the polls, a fewering the gring to the workers who have not as yet glimpsed the justice of giving to the wife, or sisters the equal chance to have a voice in settling the affairs that concern them equally as much, if not more, than men, and the crooked politicians who fear the passing of a great many of their prerogatives, if women were allowed to vote.

The Socialist party has always stood unequivecally for equal suffrage, and its platforms have always contained a plank to that effect. We regret that there are men who vote the Socialist ticket who do not believe in woman suffrage and vote against it as opportunity occurs. Some do this—we hate to say it of a Socialist-because they believe women are more conservative than men, more they believe that women are more conservative than men, more under the traditions and superstitions of the past, and consequently under the traditions and superstitions of the past, and consequently under the traditions and superstitions of the past, and consequently under the traditions and superstitions of the past, and consequently under the traditions and superstitions of the past, and consequently under the traditions and superstitions of the past, and consequently under the traditions and superstitions of the past, and consequently under the traditions and superstitions of the past, and consequently under the traditions and superstitions of the past, and consequently under the traditions and superstitions of the past, and consequently under the traditions and superstitions.

Upon this latter point we take issue. Some years ago it was true; but if you will notice how women have recently interested themselves. In the vital problems of the day, you may change your themselves. In the vital problems of the day, you may change your and are quity as prometers of the day, you may change your themselves. In the vital problems of the erushing economic conditions and are quity as prometers of the strength of the Socialist movement, and one of the papers of our opponents in commenting on the increase of the Socialist vote in California and Washington. "blamed it on the women." We Socialist women who have fought the common enemy side by side with our men courades are, just as anxious to register our protest as they are, and by every law of justice and humanity equally entitled to it. There is no argument that can be used against mona suffrage.

INDUSTRIAL DEMOCRACY

INDUSTRIAL DEMOCRACY

The North American Review, with that degree of perspicacity which might be expected of a journal which gets its information from the priests and its jokes from the almanaes, regales its readers with an article in which it gravely informs its readers that "Socialism would mean implanting upon Western eivilization the debasing and injurious effects of the caste system of the East."

Dear, O dear, just think of it!

And so, dear children, you see that it would be very wrong for you to vote the Socialist ticket or join an influstrial union, because st the begeynam which the North American Review will visit upon you if you do!

To a Socialist statements like this sound just about as ridiculous as this one: "If you have democracy; it will mean that you will get the terrible effects of tyranny. If you elect your own boss in the shop it will mean terrible privations and abuses, which you never dreamed of don't submit to the tyranny of yoppointing your boss for you. If you don't submit to the tyranny of yoppointing your boss for you. If you don't submit to the tyranny in the swing will have to submit to the tyranny of a terrible bogeyman."

All there is to Socialism is simple industrial democracy.

If it turns out in the awful way that the Review predicts we will he very much surprised.

But we will have a remedy,
We'll simply vote to have things different.

And we'll get conditions the way we want them WHEN WE CONTROL OUR JOBS.
