### ANOTHER AUTHOR COMES INTO CAMP

Robert Hunter, Who Wrote "Poverty," Joins the Socialist Party

### HE IS STRONGLY FOR THE REVOLUTION

"Capitalism," He Says in Stirring From Europe, "Cannot Be Reformed"--- Expects Awakening of People

New York, Jan. 17 .- Robert Hunter, author of "Poverty" has joined the Socialist Party. In a letter from Europe, where he is traveling, he declares that "capitalism cannot be reformed" any more than "Tsarism can be re-

He is for the revolution that will give the producer what he produces and will work with "tooth and toe nail" for the great movement.

Here is his letter. It is the same story all unprejudiced students of industry tell:

Best Serve in the Party

"After eight years of belief in the principles of Socialism, and after ten years of active work in social reform. I have come to the conclusion that I can best serve those things which I have most at heart by joining the Socialist Party. cialist Party.
"You and other friends will under-

stand that this is only a continuation of my Socialist activity under different stances.

of my Socialist activity under different circumstances.

"Eight years ago I was on the point of joining the party, and many times since I have thought that I could no longer delay taking this step. But each time I have decided to remain for a little while longer outside the regiment, because there seemed to be more important work to be done for Socialism by me as an independent than as a member of the party; I think my course in the past has been the right one, but I am convinced that I can now best serve Socialism by becoming a member of the organization.

Finds Pleasure in Step.

"I cannot tell you how much pleasure it gives me, now that the decision your struggle against the dominance over men and things of a small and self-centered class. Finds Pleasure in Step

wer men and inings of a small and leff-centered class.

"I have always, in my writings, in pv settlement work, and in connection with reform and philanthropic underakings, endeavored to show the inquities, the monstrous brutality even,

it these things have been done ut my showing opposition to the with which in these movements I worked.

"But every day I see more clearly that so long as the capitalist class exists, poverty, wage slavery, and all the miseries which well intentioned men desire to relieve or ameliorate must continue among us. It is therefore with a feeling of intense pleasure that I a feeling of intense pleasure that I now come to place myself in direct and open opposition to the most fundamental cause of our social distresses, namely, capitalism itself.

Puture Belongs to The Party

Future Belongs to The Party

"Hereafter, therefore, I shall work with the party. It is still small, it is without great instruments of education, and it will always be poor; but nevertheless, the future belongs to it.

"These last few months in Europe have shown me that those who most hate it are forced to simulate its morals in order to be given even a hearing by the mass of men; and ever, where the keen intellects of the movemens are beginning to dominate the best thought of the Old World.

"The time is surely near when capitalism, with its oppressive political and economic institutions, must go the way of the class systems which preceded it, in order that room shall be made for the development of mankind.

"The time certainly is near in Europe; and even in America, we see some men endeavoring to blacken the character of the Socialist movement and at the same time to point out the iniquities of the capitalist system.

They all See is

They all See it

"Lawson sees its Frenzied Finance, Hughes sees its robbery of the widows und orphans, Hearst sees its political treachery, Steffens sees its political perfide, Miss Tarbell its soul of dishonor and hyporecrisy, Robert De Forèst its murderous tenements, and Felix Adler the slavery of its children; Roosevelt cam its polsonous and filthy food product; and all together they are unwitingly making men who have brains see the justice of the Socialists' indictment.

I suppose they are as innocent of that they are doing as rather Gapon oas when he led his workingmentiesds up to the palace of the Tsar.

I think the tsar capitalism will sed the appeals and eshariations of the above reformers in much the same pirit as the Russian Tsar keeded the carful petitions of his faithful children.

Capitalism Cannot Be Reformed.

hemselves sacrificed to the gree.

"It is the propaganda of events quite is much as the propaganda of words hat is bringing to the Socialist Party

"And events come fast with us, and each one helps to make it plain that the Cossacks of our "Little Father" are not hired assassins, but the modern instruments of production, the class monopoly of the means of life.

Believes Slaves Will Awake

"It is inconceivable that the mass of American citizens, whose lives are of American citizens, whose lives are now subject to the power of capitalism, should much longer remain ignorant of the necessity for the social ownersh to the instruments of production. The effort to retain complete power in the use of these instruments is the chief source of our political corruption; the effort to make them yield every conceivable profit is the chief reason for our adulterated products; the greed which tries to make them enrich the capitalist class alone is the chief cause of our widespread poverty, of our enslaved women and child laborers.

"It will not be long until our country must see that we have the choice either of making capital the slave or of permitting it to fasten upon us, even more securely, than it yet has, its chains of slavery."

### **DESPOTIC RULE FOR** KANSAS CITIES

Proposed Law Would Abolish Mayors and Aldermen, and Substitute Three "Appointed Commissioners"

A. A. AVERY.

(Special Correspondent.)

Topeka, Kar., Jan. 17.—The Kansas legislature is in session. One of the first proposifions submitted was the taking away from the people all right to representation in all first-class cities. It is proposed, and there is not the slightest doubt but that it will pass a bill to abolish the offices of mayor and councilmen and instead appoint a commission of three or five men to govern the city.

Never in ail the history of the country was there such a scheme proposed to remove full from the hands of the ruled.

ruled.

Nevertheless, the people do not seem to have been aroused to the proper pitch, and they will not, until too late, realize what the law will mean for the railroads and corporations. Any trust can enter the state, and what the commission gives them they have forever. There is no doubt but that this present legislature will go down in the history of the state as the "railroad and trust legislature."

legislature."

One of the first things the legislature did after they had gone into session was to increase the salaries of justices of the Supreme Court from \$3,000 to

of the Supreme Court from \$3,000 to \$5,000 a year.

The Republican caucus then chose Charles Curtis to represent the state in the United States Senate.

Another outrageous bill is the garnishee law. Loan agents throughout the state are interested in its passage, and when it will have become a law 'loan sharks' will have the workingman in their grasp. The law is now extremely in their favor, and after the amendments have been passed there will be nts have been passed there will be hope for anyone who gets into their

There is not a law to be passed during the session wherein the workingman gets even as much as an "even break."

The salary of the justices was raised to clevate them above popular influences.

### **WORKERS SLEEP IN BAKERY SHOPS**

At 463 South Canal street there is a Greek bakery. Fine newly painted wagons drive up to its alley entrance every morning and take our hundreds of loaves of bread. Inspection of the bakery shows that this bread that looks well and is delivered in respectably clean wagons, is made under conditions that should not be permitted by the sanitary department of the city.

### KINGSTON IS IN THROES OF DEATH

Putrifying Bodies, Famine and Insects Add Harrow to Quake Ruins

DEAD NUMBER HUNDREDS MANY OF THEM WHITES

Relief Committees At Work But Are Handicaped by Tropical Weather and Lack

[Scripps-McRae Press Association.]

Kingston (Via Holland Bay), Jan. 17. - Recking with a nauseating stench from hundreds of putrifying bodies, its awful ghastliness only partially dispelled by the cries of the searchers for the bodies of their dear ones, or the crash and roar of an oc casional collapsing building, Kingston, as seen today by the correspondent of the Scripps-McRae Press Associa tion, is a city draped with despair. Combining with the natural gloom following the disaster, to intensify the

lowing the disaster, to intensify the chaotic conditions, is the terror inspired by the fear of further earthquake shocks.

Numerous recurrences of varying intensity of the seismic shocks of Monday have served to keep the ignorant blacks in a state bordering on panic, and have greatly hampered the efforts of the rescuers.

and have greatly nampered the emorts of the rescuers.

To-pling Buildings Threaten

Toppling buildings fringe every street unswept by the flames. A stiff breeze suffices in many instances to bring these down with a crask, and the volunteer rescue parties, made up mostly of white men—are taking their lives in their hands in order to search the ruins. Their heroism has been inspired by the knowledge that scores of imprisoned wretches are buried in the debris, pinned down and unable to help themselves, suffering the tortures of hunger and thirst, while the groans of the dying and the stench of the deal rise about them.

Accurate figures on the number of dead are out of the question at this time. The correspondent of the Scripps-McRae Press Association made a thorough canvas, of the situation early today. The work of collecting the dead is scarcely more than begun.

Bury Dead in Tranches

The list will certainly be given in hundreds. That it will reach the thousand mark is at least not improbable. And the dead are by no means confined to the negro population, as was at first reported. A number of bodies

of white persons have already been recovered and there is no doubt that more hodies will be brought to light. A lack of police facilities and the indescribable confusion are hampering the work of identification.

Embalming is out of the question, and in this climate a dead body will keep but a few hours. Unless identified quickly, the bodies of the white victims will have to be consigned to unmarked graves, along with the hundreds of native victims.

So long as the terror of the negroes continues the danger from looting and

continues the danger from looting and disorders is comparatively slight. Up to the present time the only pillage has resulted from a few of the bolder negroes breaking into rum shops. These offenders have been summarily dealth with, however, and it is believed that before the courage of the blacks returns, the white authorities will have the situation in hand.

The worst has not yet been told. Much suffering is certain to result. The impossibility of describing the actual horrors of the situation, and the torturing slowness of the relief is maddening. Above all is the terrifying thought that any minute may bring on a recurrence of Monday's disaster, or worse — that Kingston may be doomed to suffer the fate of Port Royal.

St. Thomas, D. W. I., Jan. 17.—To-day's estimates place the number of dead in the earthquake disaster at between 500 and 1.000. The injured will number more than 1.000. Property loss in Kingston alone will exceed \$15,000,000.

The new estimate of dead is based on discoveries of bodies in the ruins of wrecked buildings.

Scores of persons are now believed to have perished and their bodies have been consumed by the flames. It is probable on this account the full death list will never be known.

When the sun rose on this, the third day after the great earthquake, it was to witness the most terrible scenes enacted since the pasic immediately following the shocks which brought buildings crashing on the helpless occupants. Everywhere the streets are filled with bodies of men and animals which have not been temoved. The stench from these is becoming unbearable. Yet it will be days before the evil can be eradicated.

Famine Adds to Horrors

at any price.

As in the San Francisco and Valparaiso earthquakes, rich and poor are
on a plane of equality. It is a search
for food on the part of all.

Conditions outside of Kingston are as
bad as in the city.

Practically every building within a
radius of ten miles was rendered unsafe
for habitation.

It is estimated that fully 80,000 persons within the sixty-mile radius of Kingston are homeless.

Of the dead, it is now estimated that

fully fifty are whites.

MINE HORROR Greed of Operator Causes Fire

SURVIVOR TELLS OF

Boss to be Discharged and Seven Dead Men Tell the Story

Clinton, Ind., Jan. 17 .- In a mine

Clinton, Ind., Jan. 17.—In a mine explosion seven lives were lost and three men were rescued in an unconscious condition, on Monday.

The story of the awful catastrophe is told by a survivor: "Seven more lives are lost in the ceaseless grind of the wheels of greed. In the dense gloom of the early morning, with lights dancing in a long serpentine chain, that stretched from the city to the mine, the miners filed to work. "The clank of a cage, the cry 'All's right,' the wheeze of the engine, and six men. were lowered into that dank, dark hole that was so sternly silent.

The Explosion Occurs

"Scarcely had half of the men been lowered, when those in advance had reached their place of work. At the farthest end of the pit the inute silence was broken by the fearful din of an awful explosion. Powder canswere hurled with the force of cannon balls. Trap doors were hurled from their faster us and timbers were torn out. Too well did we know the meaning of that awful shock, and that black, impenetrable snoke, boiling out of the entry. In such a time and at such an hour are heroes born.

Rescuers Enter the Hole

"And you could see that look of fierce determination that settled on those faces as they peered up that seething entry. A rescue party was formed and slowly they worked their way, through death-strewed entries.

"Seven dead bodies were recovered, and three that were overcome in the dense smoke were carried out.

"The explosion was caused by the accumulation of gas. The company, to curtail expenses, eliminated the fire boss, whose duty it was to make the rounds of the bank in the morning to see if everything is all right.

"That honorable official known as the 'mine inspector' was at the bank only a few days ago, and with kindly consideration told the men, 'everything is all right.' But then, he received his appointment from the state geologist at the recommendation of the governor, and the governor from the mine owners, so you see nothing could be expected from him.

"He is in Clinton today to make his report, and it is awaited with curiosity.

Indianapolis, Ind., Jan. 17.—A resolution reflecting on the record of State Inspector James Epperson was introduced at the convention of the United Mine Workers yesterday. Grave doubt as to his ability to administer the affairs of the office is expressed. The resolution was apropos of the recent mine disaster et Clinton, Ind. in which eight, men lost their lives.

### CLEAR ALDERMAN: CENSURE BARTZEN

Members of the Bartzen committee

are now of one mind in regard to the form the report to the city council on the "graft" charges is to take according to statements which were made by members of the committee yesterday.

The plan is that ecery ale man who was charged with grafting, stregularities, indiscretion or carelessness by the building commissioner will be given a clean slate by the report. There is some doubt as to what the committee will say in regard to the commissioner himself. It is claimed that there has been a split for several days among the memself. It is claimed that there has been a split for several days among the members on this point. Some of them wanted to censure the commissioner for making charges which they say were unfounded, while others said that the commissioner should not be censured.

Carl D. Thompson of Wisconsin Legislature Will Meet in Intellectual Wres.ling Match Two Learned Men

Milwauker, Wis, Jan. 17.—Carl H. Thompson, state organizer of the Socialist party, who was elected to the legislature in the fall campaign, will debate Socialism with two professors of Nebraska State University at Omaha. A large opera house has been secured for this occasion. He will leave for the west to-morrow.

Mr. Thompson is one of the best known Socialist organizers in the country. He is an excellent speaker as well as a deep scholar of social and political economy.

It is believed that this dehate will be of great benefit to the Socialist movement, as Mr. Thompson is a convincing speaker, and his friends expect him to hold his own against two "professors," or as many more as the platform will hold. With his back against the strong wall of Socialism, his opponents must attack from the front.

### 7-DAY WEEK FOR **NEW YORK BAKERS**

New York, Jan 17.—An effort to re-turn to seven days' work in the week is being made by the association of bread manufacturers of New York and

is being made by the association of bread manufacturers of New York and vicinity.

Hitherto the bakers had their day off on Saturday, there being no fresh bread on Sunday morning. The bread manufacturers have now decided to bake bread also on Saturday and thus have fresh bread for Sunday morning. This return to the seven discrete fresh bread for Sunday morning. This return to the seven discrete fresh bread for Sunday morning. This return to the seven discrete fresh bread for Sunday morning. This return to the seven discrete fresh bread for Sunday morning to have ever, that they will not be able to prevent the consumpation of this return, as they are not organized.

Practically all of the employes in the large bread factories have either been compelled by the bases to withdraw from the union by threats of loning their jobs or else have been induced to withdraw from the union by a raise in wages to the non-inion employes.

Now it is feared that the men will be helpless in their opposition to the reintroduction of the seven-day week.

The officials of the Bakers and Confectioners' International union are taking energetic steps to prevent the introduction of this new form of slavery. Men working seven days in the week and not having one common day of rest will not be able to attend mornings are consequently will not be able to fake part in trade union affairs and will be dragged to the last extremity of wage slavery, according to union-leaders.

BY EDWIN ARNOLD BRENHOLTZ

"Some such thoughts were in my mind when I went to the Endy mansion that might after reading the words of Mr. Crangle which placed him completely in my power. But as first, I thought only all grasping the opportunity to bring to as end the task I had set for myself; and I did not then think of any man's unfering. I fully expected that Mr. Endy would not suffer, inasmuch as I intended to give him as peaceful and quiet a departure as I have secured for myself. I felt that he might just as well as down and out then as at any time. You know, when one has to live daily with a man who thinks nothing of forcing men to strike—well knowing that forcing men to strike—well knowing that many innocent women and children will recessarily starve to death—one is bound to become reckless in regard to the life of a single individual.

of a single individual.

"Well, I expected to find Mr. Endy asleep, and in that event he would simply have continued to sleep—forever; which is probably easier and better than nature will now do for him. But he awoke, as I was leaning over the bed, and grappled with me, and then—because my work was not finished—I had to grapple with him and defend myself. He is a brave old man. He never cried out until I struck him. I am sorry for him. sorry for every moment of suffering I caused him. Mr. Craggie was the cause! I shall make Mr. Craggie pay for his suffering and my regret.

I shall make Mr. Craggie pay for his suffering and my regret.

"A few words more in explanation of that act. I will say that for ten mortal years I have been under sentence of death and daily suffering physical tortures almost mendurable, and that—because I would not sacrifice my keenness of intellect by using opiates—there have been many bours when, had the power been mine, I would willingly have depopulated this globe at a stroke in order to end my own sufferings and that of others—and would have considered that act the most mescriful one ever peract the most merciful one ever per-formed. Such was my mood that night. "When I first entered the employ of

"When I first entered the employ of Craggie I was apparently in perfect health and thought that I saw a clear road ahead to the attainment of my goal. But one day I felt twinges and sharp pams that disturbed me, and the physician I consulted looked very grave. The drugs he gave me brought only temporary relief and I was soon compelled to choose between them and the ability to go on with my work—my life work, I mean. Then I had an opportunity to consult the most eminent specialist in the world, while we were once at San Francisco, and I heard with dismay that my doom was sealed; years of suffering ahead, and an agonizing death in the end.

"I am not one to hesitate. At the next stopping place I had a true friend—and you would be surprised to know how many friends I have had any rewarded to a painless release. For this I thank him again: I have already rewarded to the start of the start of the start of the start of a painless release. For this I thank him again: I have already rewarded to the start of a painless release. For this I thank him again: I have already rewarded the start of the start

again: I have already rewarded

him again: I have already rewarded him.

"Now, on the day preceding the attack on Mr. Endy, and in fact ever since the strike began, Craggic had been using and abusing me worse than usual; the terrific speed at which we traveled increased my sufferings a hundredfold—and yet I had to wear,—if not a smiling, at least,—an unruffled countenance. You know how that gets on one's nerve. I was perfectly savage when I left the car; and when I beard what the machine had to tell me I saw my opportunity in an instant,—and neither hesitated nor feared. What I was a man to fear who has had death in concrete form ready to his hand for ten years. And this will explain my apparent recklessness. will explain my apparent recklessness and audacity. Craggie could not reach me: I had made a league with Death. The day that assured Craggie's down-fall and defeat was marked, long years ago, as the day for me and Death to

"In the carrying out of my plans I have made myself indispensable to Craggie, have aided him in every way to attain his ambition, have unobtrusively suggested fine points of play continually, have never balked no matter haw disagreeable or even dishonorable the task assigned me—and all to the end of earth of the matter fill in the property of the greater fall. And he has improved wonderfully under my tutelage—though even today he is no more capable of running things without my assistance even today he is no more capable of running things without my assistance than he is of keeping the earth in its orbit should the forces that hold it there relax. Did you ever see a worse managed business than the strike?—he took things in his own hands.

"I recognize the inconsistency of my

took things in his own hands.

"I recognize the inconsistency of my character, full well. I cause a man to be discharged and blacklisted and then, if it has been due to the carrying out of my plan, I aid him in every way possible. One holding my present opinion of discharged and blackhsted and then, if it has been due to the carrying out of my plan, I aid him in every way possible. One-holding my present opinion of mankind in general should not do so. That is me before the world refused to stand by me and redress a great wrong done to one I loved. I am no philanthropist. To me, man seems a pretty sorry animal.—and very largely a hypocrite. Craggie, for instance, has been just as directly the mirderer of thousands of soldiers who have died in wars he brought about to increase his wealth and power as the individual who plans the death of another and strikes the blow with his own hand. He has time after time stolen the total carnings of his employes by removing and consolidating his works without making any provision for them or giving them any compensation for the homes they had paid for out of their hard-earned wages, which homes they were then obliged to abandom or self for what they could get. And yet he and men like him claim to despise and detest a murderer and a shire. I tell you, he has potentially murdered me a hundred times. All he lacked was courage and opportunity. "I want you to rid your minds of the idea that money is what I am after (And yet what foolish sentimentality this is, which makes me wish to justify myself in the sight of Chandler,—to whom I feel drawn!) If you think that money was my object, you were never more wrong in your lives. I have been inking down Craggie's words' with he aid of the little machine, for a purpose; and affect the night of the attack on Mr. Endy I have been playing with him as a cat does with a mouse which it fully insuads to destroy. In that I have been proved myself for having endured his weatheast of fiften years. In order that you permission to read the copy of the lacter I am going to hand him at the last manners.

although the traveling was about the
worst thing for me, physically, that could

seeing how the sums I sent out seemed
to stimulate large gifts by others, helped
me to hold out until certain of Craggie's

moves. I claim no credit for this. I was simply prolonging his punishment. I took considerable pleasure in doing this and in using the money as I did. It seems to me to be poetic justice of the finest quality that the money,—if we call it Mr. Craggie's,—should be used to defeat him; and if we call it the workingmen's, should be used to help them to break the chains he and, other rich men have been slowly and surely forging for the purpose of reducing them. forging for the purpose of reducing them to absolute slavery to a class.

"And then it made me smile to think

"And then it made me smile to finms of the impeccable, upright and honorable Mr. Arndt acting (though unconsciously) as my agent in the distribution of stolen money—if you persist in calling it that. I have been in daily contact with a rich man too long to be squeamish about a phrase. I have no objection to a name. Only, please, be impartial: eall most of Craggie's wealth by the same title.

"Mr. Arndt will understand that while "Mr. Arndt will understand that while I know him to be as honest as a man may be under a system where the very earth or which he lives has been stolen, still I have no use for his high-flown theories. It always fills me with pity to see a man wasting his energies. Why doesn't he go in for Socialism and have a show of success, if he believes that men really wish others to be happy and prosperous? I assure you I don't beprosperous? I assure you I don't be-lieve any such thing; and if he doesn't like what I have done with the money he can get 'he strikers to return it to Craggie—or his heirs. "I am somewhat skilful in mechanics

and handy with tools. Mr. Arthur will probably have found the little secret compartment in my room, back of the compartment in my room, back of the berth. It was very easy to find time and opportunity to take out the decorative panel and fix it so it would open by pushing the spring concealed in the moulding around it. You will understand that Mr. Craggie was absent from the car many times when he was supposed to be in it. There were many consistent when he did not desire my comcasions when be did not desire my company or services. Read that letter to him and you will know what I did with

my time on such occasious.

In the compartment will be found the little collapsible pasteboard box which assumed the size of the daily package of bills, and came back to the

"The money never left the car.
"I retired to my room to count it and then fixed the beax in shape, and after hiding the money I brought the box out and set it on the table in plain sight of the president—but, always done up in the president—but, always done in the identical wrapper that had covered the bills. That is all that you will and the bills. That is all that you will and there; for the money, corruption fund and all of the other, is, as I said, dis-posed of

I had Craggie to get even with and punish. In my progress through his works, and in his office, every time I took a step upwards I pushed somebody off a rung on the ladder; and in holding the position of secretary all these years I have deprived just as able men of the position. I have always been sorry for them. I have always been sorry for them I have always been sorry for the small fry I have eaten. This is vastly more than Craggie, or any millionaire I know of, can truthfully say.

There are no persons who have any legal claims on me. Your power of attorney will, I think, be all that is necessary to enable you to carry out every one of my wishes. I hereby give to you the little machine as a remuneration for your services. Do with your services. Do with it as you

### TRUST IS UNDER THE BONNIE BRIAR BUSH

United States Consul Does a Little Muck-Raking in Scotland and Shows Efficient "Restraint of Trade"

News from Consul Rufus Flemcing, of Edinburgh, Scotland, emphasizes the fact that the trust, like a guilty conscience, is everywhere; whether you slip right or slide left, slump down or clim the wall, lo! the trust is just ahead of you.

This report shows the trust emulating the busy little fly and sticking to the

wall.

In response to an American request for information as to the chance of sc. Jing American wall-paper hangings in Scotland, the following wet blanket is thrown upon the enterprising Yankee:

"Prominent retail dealers—paper-hanging firms—in Edinburgh and elsewhere have at various times purchased, through their own agents. American and where have at various times purchased, through their own agents, American and French wall papers, despite the threats of the trust to stop the home supply if they bought too freely abroad; but the difference in size, designs, and coloring of papers and the difficulties of doing business with firms at a distance have restricted this trade.

#### The Bonnie Scotch Trust

"For some years the wall-paper in-dustry of the United Kingdom has been in the hands of a trust.
"This combination of manufacturers

regulates production, fixes prices, and practically controls the trade, wholesale and retail, throughout the country

"If a wholesale dealer wishes to make a purchase of foreign goods for a customer he must ask permission of the central authority of the trust. Now central authority of the trust. Now and then the request is granted grudg-ingly, but in nine cases out of ten it is refused. When granted, the permission covers a limited quantity of goods to be sold a prices which must not be lower than the prices of similar grades made by British firms.

"For an obvious reason the caple-le dealers can not afford to pursue an independent course in opposition to the combined manufacturers, and thus the trust has obtained, if not a complete monopoly of the trade, so strong a hold on the market that outside com-petition has not yet seriously affected

The trust has not increased the price of goods to the public, but the dealers, aside from the cut in the margin of their profit, complain that the goods of the trust are below the former standard. and their protests a ainst the delivery of inferior goods are unavailing.

The officer, who had come in a closed carriage to take the man of the house to the detention hospital, was informed that there would he some difficulty in persuading him to go.

"What's the trouble?" he disked; "He says he is the caliph of Bagdad, and he doesn't have to go anywhere unless he chooses. He says he's going to stay right here."

"I can fix that, all right," the officer said.

Entering the room, he walked up to

Remantic He (with his arm around her waist)—All this seems so familiar to me, darling—the quiet night, the whispered word, the tender look. I wonder if it is a memory of some pre-

vious existence? Practical She—No, William, it is more likely a memory of some previous sweetheart.

Mr. Hotair—My dear Miss Millionaire, you are looking quite a little better this evening.

Miss Millionaire—Thank you; but you know a woman always looks better in an artificial light.

Her Brother's Son—Say, auntic, why don't you carry a lantern all the time?

A caucus meeting of the Socialist party of the Twenty-fourth ward will be held next Monday night. It will be called to order for the purpose of se-lection of a candidate for alderman. It is to be held at 620 Diversey boulevard.

WIRE MAN IS SERIOUSLY HURT S. F. Houser, 2455 State street, the Western Union telegraph operator who was injured by a falling plank while at work at the key, is reported in a serious condition. An examination shows his skull to be tractured, causing

paralysis. The telegraph company required the operators to remain at their instruments while the dangerous work of removing temperary scaffolding of painters was in progress.

#### A CORRECTION

It was some time ago stated in this paper that the government armory at Springfield, Mass., worked employes longer hours than those working for private concerns. This seems to be a mistake. A letter received from Spring. mistake. A letter received from spring, field says that the government day is but eight hours, while private concerns work their men nine and ten hours. There is a slight difference in wages, however, in favor of the private con-cerns, but workers seem to favor the short hours of the government.

### OHIO RIVER UP: MAY BREAK RECORD

Stream Aiready Out of Its Banks and Cincinnati May Be Flooded

Cincinnati, Jan. 17.-The Ohio river

Cincinnati, Jan. 17.—The Ohio river is jumping up. Already at the flood stage, the waters are coming up at the rate of three inches per hour, and by Thursday evening there will be a sixty-foot stage in the channel here.

This is the result of the almost incessant rains here for eighteen out of the past twenty-one days. According to the weather bureau the present indications are that there is no telling how high the stream will go.

The high river reached here war 71.8 feet in the early spring of 1884, and it is believed at the weather bureau that on this present rise the river will go to within a very few feet of that record. At 7 o'clock this morning the river had reached a stage of almost 56 feet, and by night there is every indication that it will be four feet higher.

feet higher.

The continuous rains have so saturated the earth in the Ohio valley that all of the excess has been pouring into the Ohio and its tributaries as a rapid

morrow.

There has been no serious damage here yet, however, although many people living in the lowlands and on the river front have been driven from their homes. The Grand Central raiway station was abandoned last evening and trains are running into the Eighth street station.

Wealthy Mother Buys a Ship and Hires a Fighting Crew to Take Her Son to Sea For Three Years

New York, Jan. 17 .- Mrs. Brandreth, who is the mother of Ralph Brandreth, has bought and commissioned a balloon and an ocean-going yacht, hired a captain, a crew and a cook, and has ex-acted a pledge from the captain, the crew, and the cook that they will take Ralph away and keep him at sea until he is 26 years old.

Ralph is 23 years old now. That means that he will be away three years. Mrs. Brandreth wanted him kept away for six years, but the captain thought three would be tong enough to bob around on the waters of the globe.

around on the waters of the globe.

Ralph Brandreth, from the maternal point of view, is as fine a young man as ever circumnavigated the globe. His only vice is impetuosity. The last time he saw a red automobile speeding down Eighth avenue he went immediately to an automobile depot and ordered the biggest, reddest and fastest car to be had.

SCARLET PEVER EPIDEMIC

All Evanston Schools are Closed a Chicago May Be Affected Sectously

Chicago and her suburbs are threat-ened with a scourge of searly fever. For the past week the increase in con-tagious diseases has appalled the health department and an onslaught is to be

made.

Diphtheria and scarlet fewer are the two most apparent prevalent diseases, of the lives of thousands of children are imperiled unless checked at once.

In Evanston the situation has become so critical that Dr W. R. Parks, commissioner of health, has ordered all schools closed until the epidemic will have abated. This order shuts the doors of eleven institutions, including the high school, and affects 3,300 pupils and 115 teachers.

The new learners had passed up his cap for the third time.

"The seem to be rather fond of coffee, Mr. Newman," remarked the land-lady.

"Yea," he replied; "otherwise I wouldn't swallow to much hot water in order to gut a tante of it."

tee on apportionment, the Socialists re-ceived appointments on nearly all com-mittees asked for.

The political situation at Madison is peculiar. The Republicans stand for ultra-conservatism, and the Democrats, who play the parts of clowns, are re-actionary in the extreme.

The Republicans, seeing that they are losing ground, are beginning to introduce reform measures in order to take the wind away from the Socialists. As an example of their policy, the following bills will suffice:

wilcox (Rep.) in the senate intro-duced a bill authorizing cities to ac-quire, construct and own street rail-ways, gas and electric lighting plants. Senator Browne introduced a bill on railroad contributory negligence.

Steal Red Measures

These very measures were introduced two years ago by the Socialist senator, J. Rummel, and killed with lightning speed. The Republicans began this policy already in the latter half of the

But all the cuming that the old par-ties are capable of will not help them.

Word is already going around among
Democrats and Republicans alike that
the Socialists will always go one better; and this is just what Thompson,
secretary of the Socialist delegation,

He said: "We don't care, because as long as we lead them on to labor and radical reforms we reap the credit, and the reward of our work. We will get them a going to the extent that they will (vie with each other in the troduction of radical measures."
With the Republicans in such a lu-

dicrous position, the outlook for labor and Socialist legislation is favorable. Two years ago the Socialists were sucessful in passing nine bills; this year he probability is that twice as many will go on the statute book.

Socialists "No Slouches"

The first fight that will stir up the dust in the old building will come on when the Socialists propose their two bills, a radical liability act, and the right for union mer to picket and talk with non-union laborers in cases of

strikes.

And that the fight will be no kitten play may be known from the following, which are the words of Geo gr. F. Grassie, Republican assemblyman from Milwaukes:

"There is no disputing the fact that the Socialists are elever and can deliver the goods occasionally. Aside from Brother Estabrook and possibly Herman Georgi of the Tenth ward, there are none in the Milwaukee delegation who can stack up with Thompgation who can stack up with Thomp-son, while Alldridge and Brockhausen are no slouches when it comes to an argument. When old Frank Weber (Soargument. When old Frank Weber (out-cialist) is going to start spouting, there will be something doing. Frank can sling more big words and slide out of oratorical blind alleys the slickest of oratorical blind alleys the slickest of any orator I ever heard. I am looking forward with a great deal of expectancy to the first time that Weber
and Sprague of Walworth lock horns
in debate. It will be an occasion for
the gods and will add a bit to the
gaiety of nations."

Another Bouquet

The Socialist members are being looked upon altogether differently from what they were two years ago. At that time the old party politicians lined up in the halls, and when the Socialist assemblymen passed by made long faces at them, whispering and intimating to each other that they had bombs in their pockets and six-shooters in their belts.

Now finttering remarks are made about them. Mr. Warner, stayover and father of the attempted civil service legislation, said this about the Socialists:

"I have said this to my friends since

"I have said this to my friends since the last session, that there is no group of men in the legislature whose leader-ship and sincerity I would trust 20 much as that of the Socialist delega-tion."

Yellow Union Is Addressed by McDermott Although the Saffron Lads Play Into Hands of Merchants' Club

Union labor elected a congress from the fourth congressional district of this city and is now beginning to reap the harvest for electing a man because he was a "good fellow" before election and a "Democrat" always. ...

James McDermott is the man. He apparently has gained enough for the present from union labor and is now catering to scabs in the form of the "yellowists" of the fire department. He recently made a talk to the yellow which he encouraged them in their ef-forts to down the members of the Fire-

### Let Us Rise

The City Council has declared by an overwhelming vote its intention to pass the traction steal. The members who were pledged to municipal ownership have shown that they are willing to pass the franthise and that they have the votes to do it with even if Mayor Dunne should pluck up enough courage to keep his word and veto it.

The whole affair has been nicely arranged. The stage has been well set for the play.

The newspapers have succeeded in doing the thinking for a large percentage of the population of Chicago, until they have created a demand for "immediate settlement" about as intelligent and about as spontaneous as was the demand which they created a year ago for "immediate municipal ownership.

IT IS ABOUT TIME THE WORKING CLASS BEGAN TO DO ITS OWN THINKING.

Only by a spontaneous elemental uprising of the workers will the present traction steal be defeated and the road forever barred to future

THYS UPRISING CAN EXPRESS ITSELF IN TWO WAYS.

First, in the getting of sufficient signatures to insure a referendum. This is the immediate pressing thing to do, although it means but little if action stops there.

Neither is the next great step the casting of a majority against the traction steal. That will come as a matter of course unless the daily traction press succeeds in hypnotizing the people into believing that the very stars will reel in their orbits unless Morgan secures an immediate mortgage on the streets of Chicago, and that the day of perfect transportation will begin the moment that this control is secured-two ideas with about equal foundation.

But voting down a proposal to grant a franchise will in itself ac-

CHICAGO VOTERS HAVE TWICE DECLARED BY REFER-ENDUM THEIR DESIRE FOR MUNICIPAL OWNERSHIP.

That had lite or no effect on the franchise industry.

This was because they voted against private property on the little ballot and for it on the big ballot.

The traction magnates knew that so long as the voters did this they were not in earnest, or else were so ignorant that they could easily be fooled by a proper handling of the acwspapers.

THE RESULT SHOWED THAT THE FRANCHISE GRAB-BERS KNEW WHAT THEY WERE DOING, AND THAT THE VOTERS DID NOT.

That is why we say that voting for the "little ballot" alone will have slight effect on traction affairs.

Those who are really opposed to the traction steal and who wish to express that opposition in any consistent way will vote for a party that is against all forms of stealing and exploitation.

It would not scare a gang of horse thieves much to be told that a vigilance committee was to be organized composed of pickpockets.

It does not scare a gang of trust magnates to any great extent to be confronted by a political party based on private ownership.

Permit us to say this over again, since it seems to be something very difficult for many people to understand.

YOU CANNOT STOP EXPLOITATION BY FRANCHISE OWNERS BY VOTING FOR EXPLOITATION BY SMALL CAPI-

One reason for this is that every small capitalist expects some day to be a big capitalist and so he is not whole hearted in his attacks on the big fellow

He only attacks his great competitor in order to force him to give up a portion of his spoils.

Now, if that point is plain, let us go on to the next.

THE ONLY PORTION OF THE PEOPLE THAT ARE WHOLLY AND UNRESERVEDLY INTERESTED IN STOPPING ALL EXPLOITATION, WHETHER BY LARGE OR SMALL CAPITALISTS, IS THE WORKING CLASS.

The reason they are opposed to it is because they ARE ALWAYS THE ONES EXPLOITED.

Therefore they are the ones that will stop exploitation.

They will not do this by voting for a political party that stands for ownership of the things by which laborers must live, and by which they are exploited.

The Democratic and Republican parties and all other parties except the SOCIALIST PARTY does stand for this sort of ownership.

When you vote for any other party except the SOCIALIST PARTY you are voting for the PRINCIPLE upon which franchise stealing is based.

Therefore you need not be surprised when, after so voting, even it you do say you do not want franchises, if the men whom you elect do not believe what you say, or do not care. The Socialists told you these same things two years ago. We told

you then that if you really wanted municipal ownership the quickest way to get it was to roll up a big vote for the Socialist Party. If that had been done the politicians would have known that the

workers MEANT WHAT THEY WERE SAYING.

There will be an opportunity in a short time to again express your opinion on this subject.

If the workers of Chicago will really show by a great spontaneous intelligent uprising that they really are conscious of the fact that all ownership by one class of the means whereby another class must live is a means of exploitation of the non-owners then there will be a quick end to all franchises.

THE ONLY WAY IN WHICH THIS CAN BE SHOWN IS BY VOTING FOR THE SOCIALIST PARTY.

### TWO FUNERALS

Last Sunday a hearse with costly equipage and with perhaps less than a dozen mourners following, passed a dosen mourners following, passed through Pensacola. I remarked to a der that it must be the funeral ied: "Why, that is the funeral of replied: "Why, that is the United States Deputy Marshal Wharton. who has received a salary of from two three thousand dollars a year here or the past twenty years.". nere so few mourners" I asked. "Beerve friends, and the few you see ing the hearse in the three single gies are no doubt only relatives." en Elbert Hubbard's words came to Death, the kind old nurse, wil ck us to sleep, and we had better help nother while we may, we are going me way-let's go hand in hand."

stores here as salesman, was standing on the street corner yesterday and talking with my son. A half drunken police man came up and asked them who they were, and what they were doing and where they came from, etc., etc. Toen he arrested the young salesman as a "vagrant," and received his fee for such arrest. This is only a sample of the workings of the vagrancy law in most of the southern states. Now, reader, try to comprehend what kind of a working ass a working man is who would vote with any party that would tolerate for a moment such a rank injustice as this toward the real workers of the land. Has the working man today who votes for parties that subject every worker to arrest when looking for work, and who opposes socialism, any reasoning powers whatever? I give it up.

## MY CASTLE IN SPAIN

By JACK LONDON in "The House Beautiful"

Perhaps it is because of the practical life I have lived that I worship utility and have come to believe that utility and beauty should be one, and that there is no utility that need not be beautiful. What finer beauty than strength-whether it be airy steel, or massive masonry. or a delicate woman's hand? A plain black leather strap is beautiful. It is all strength and all utility, and it is beautiful. It efficiently performs work in the world, and it is good to look upon. Perhaps it is because it is useful that it is beautiful. I do not know. I sometimes wonder.

I bought a house in a hurry in the city of Oakland some time ago. I do not live in it. I sleep in it half a dozen times a year. I do not love the house. I am hurt every time I look at it. No drunken rowdy or political enemy can insult me so deeply as that house does. Let me tell you way. It is an ordinary two-story frame house. After it was built, the criminal that constructed it nailed on, at the corners, perpendicularly, some two-inch fluted planks. These planks rise the height of the house, and to a drunken man have the appearance of fluted columns. To complete the illusion in the eyes of the drunken man, the planks are topped with wooden Ionic capitals; nailed on, and in, I may say, bas-relief.

When I analyze the irritation these fluted planks cause in me, I find the reason in the fact that the first idea for building a house has been violated. These decorative planks are no part of the construction. They have no use, no work to perform. They are plastered gawds that tell lies that pobody believes. A column is made for the purpose of supporting weight; this is its use. A column when it is a utility, is beautiful. The fluted wooden columns nailed on outside my house are not utilities. They are not beautiful. They are nightmares. They not only support no weight, but they themselves are a weight that drags upon the supports of the house. Some day, when I get time, one of two things will surely happen. Either I'll go forth and murder the man who perpetrated the atrocity, or else I'll take an axe and chop off the lying, fluted planks.

A thing must be true, or it is not beautiful, any more than a painted wanton is beautiful, any more than a skyscraper is beautiful that is intrinsically and structurally light, and that has a false massiveness of pillars plastered on outside. The true sky-scraper is beautiful-and this is the reluctant admission of a man who dis ites humanityfestering cities. The true sky-scraper is beautiful, and it is beautiful in so far as it is true. In its construction it is light and airy, therefore in its appearance it must be light and airy. It dare not, if it wishes to be beautiful, lay claim to what it is not. And it should not bulk on the city-scape like Leviathan; it should rise and soar, light and airy Man is an ethical animal-or, at least,

he is more ethical than any other animal Wherefore he has certain yearnings for honesty. And in no way can these yearnings be more thoroughly satisfied than by the honesty of the house in which he lives and passes the greater part of his life.

Dishor set Materials

Last year I started to build a barn. A man who was a liar undertook to do

the stone work and concrete work for me. He could not tell the truth to my face: he could not tell the truth in his work. I was building for posterity. The concrete foundations were four feet wide and sunk three and one-half feet into the earth. The stone walls were two feet thick and nine feet high. Upon them were to rest the great beams that were to carry all the weight of hay and the forty tons of tile roof. The man who was a liar made Scautiful stone walls. I used to stand alongside of them and love them. I caressed their massive strength with my hands. I thought about them in bed, before I went to sleep. And they were lies.

### Stone Walls that Lie

Came the earthquake. Fortunately the rest of the building of the barn had been postponed. The beautiful stone walls cracked in all directions. I started to repair, and discovered the whole, enormous lie. The walls were shells. On each face were beautiful, massive stopes-on edge. The inside was hollow This hollow in some places was filled with clay and loose gravel. In other places it was filled with air and emptiness, with here and there a piece of kindling wood or dry-goods box, to aid in the making of the shell. The walls were lies. They were beautiful, but they were not useful. Construction and deco ration had been aworced. The walls were all decoration. They hadn't any construction in them. "As God lets Satan live," I let that lying man live, but -I have built new walls from the foun-

And now to my house beautiful, which I shall build some seven or ten years from now. I have a few general ideas about it. It must be honest in construction, material, and appearance. If any feature of it, despite my efforts, shall tell lies, I shall remove that feature. Utility and beauty must be indissolubly wedded. Construction and decoratio must be one. If the particular details keep true to these general ideas, all will

### A Bath-room and a Tent

I have not thought of many details But here are a few. Take the bath-room for instance. It shall be as beautiful as any room in the bonse, just as it will be as useful. The chance is, that it will be the most expensive room in the house. Upon this we are resolved—even if we are compelled to build it first, and to live in a tent till we can get more money to go on with the rest of the house In the bath-room no delights of the bath shall be lacking. Also, a large part of the expensiveness will be due to the use of material that will make it easy to keep the bath-room clean and in order. Why should a servant toil unduly that my body may be clean? Or the other hand, the lonesty of my own flesh, and the square dealing I give it are more important than all the admiration of my friends for expensive deco rative schemes and magnificent trivial-ities. More delightful to me is a body that sings than a stately and costly grand stair-case built for show. No that I like grand stair-cases less, but that I like bath-rooms more.

### The Philosophy of Spick and Span

And because of the foregoing, one chief aim in the building of my house beautiful will be a house that will require the minimum of trouble and work

to keep clean and orderly. It will be no spick and span and polished house, with an immaculateness that testifies to the tragedy of drudge. I live in California where the days are warm. I'd prefer that the servants had three hours to go swimming (or hammocking) than be compelled to spend those three hours in keeping the house spiel, and span. Therefore it devolves upon me to build a house that can be kept clean and orderly without the need of those three

But underneath the spick and span there is something more dreadful than the servitude of the servants. This dreadful thing is the philosophy of the spick and span. In Korea the national costume is white. Nobleman and coolie dress alike in white. It is hell on the women who do the washing, but there is more in it than that. The coclie cannot keep his white clothes clean. He toils and they get dirty. The dirty white of his costume is the token of his inferior-ity. The nobleman's dress is always spotless white. It means that he doesn't have to work. But it means, further, that somebody else has to work for him. His superiority is not based upon songcraft nor statecraft, upon the foot-races he has run nor the wrestlers he has overthrown. His superiority is based upon the fact that he doesn't have to work, and that others are compelled to work for him. And so the Korean drone flaunts his clean white clothes, for the same reason that the Chinese flaunts his monstrous finger-nails, and the white man and woman flaunt the spick-andspanness of their spotless houses.

for countless thousands of years my ancestors have lived and died and drawn all their breaths in the open air. It is only recently that we have begun to live in houses. The change is a hardship especially on the lungs. I've got only one pair of lungs, and I haven't the address of any repair shop. Wherefore I stick by the open air as much as possible. For this reason my house will nave large verandas, and, near to the kitchen, there will be a veranda dining-room. Also, there will be a veranda fireplace where we can breathe fresh air and be comfortable when the evenings are

I have a plan for my own be troc I sleep short hours-five and a half per night; but spend long hours in bed, reading, studying, and working I have tried sleeping in the open, but the lamp attracts all the creeping, crewling, buttof my book, into my rate and blankets, and down the back of my neck. So my bedroom shall be indoors. But it will not be of indoors. Three ides of it will be open. The fourth side will divide it from the rest of the house. The creeping, fluttering things, but not against the good fresh air and all the

It will be a usable house and a beautiful house, wherein the æsthetic guest can find comfort for his eyes as well as for his body. It will be a happy house or else I'll burn it down. It will be a house of air and sunshine and laugh-ter. These three cannot be divorced Laughter without air and sunshine comes morbid, decadent, demoniac have in one a thousand generation Laughter that is decadent is not go for these thousand general House Beautiful

### THE SOCIALIST BUILDER

I would build in the cold world's icy heart A palace of love so grand; Its facade should glow with the noblest art

That could flow from the master's hand, I would build 'neath the church's mocking spire

An altar of brotherly love, Where its priest should nourish the sacred fire That is lit from the flame above.

I would build on the ghastly battle-field A shrine to the angel of peace, Where the demon of hate his power should yield, And striving forever should cease.

I would build in the midst of the seething mart Where souls are bought and sold. A flame of love in the human heart That should banish the lust for gold.

I would build in the barren desert of greed A garden both rich and rare Where flowers should bloom, and never a weed Should find a harbor there.

On the sin-curst earth's most lofty height, I would build me a beacon high Where Freedom's watch-fire, burning bright, Should light the lowering sky.

I would build in the city's reeking slum A thousand homes so fair Where the wealth-creator should nightly come And find him a fraven there.

I would build a nation true and strong Where Justice should ever reign: Where right should triumph over wrong, And Virtue should live again.

### Harriman Harnessing the Mountains

"The Sierra Nevada Mountains must go to work," says the "Technical World." "Mr. E. H. Harriman, the little wizard' of the railroad world, has decided that they have been idle long enough. Worse than that, they have been an absolute obstruction to transportation.

"It has taken three or four panting locomotives to painfully pull a short train of loaded freight cars up the steep grade from Truckee, Cal., on the Southern Pacific, to the summit of Emigrant Pass, about 5,000 feet above sea-level. That climb up the mountain side has cut the heart out of profits and diverted considerable freight to other lines. "Herceforth mountains themselves are

to haul the freight trains to their own summits. Harriman has found out how to lift himself by his boot-straps.

"The little mountain streams, starting rom the me'ting glaciers which cap the highest peaks, are to be "cribbed, cab-ined, and confined" and forced to furnish electric power for pulling Harriman's freight trains up and over the mountain

"At the start a third rail electric system is to be put in over about eighty miles of the road. A huge power house is to be built on the California side of the pass, where a practically unlimited supply of water is always available. Once the enormous initial expense of building the power plant and equipping the road is out of the way, electric motors will take the place of steam locomotives, in the trip over the mountains, at a great saving in cost and time. It will no longer be necessary to make up short and light trains. The roaring mountain streams will furnish p. .ty of power to pull the heaviest freight trains over the mountains at a rate of speed impossible

### Program of an English Union

The Amalgamated Society of Railway Servants of Great Britain are develop ing a "national movement," and in re-sponse thereto the membership of the society is going up rapidly. Separate programs have been drafted for England, Scotland, and Ireland. That for England comprises: 1. The eight-hour day as the standard

for all men concerned in the movement of vehicles in traffic; ten hours maximum for all other classes; no man to be called upon to book on more than once for one day's work .

2. No man to be called out for duty with less than nine hours' rest.

3. For overtime each day to stand by itself, the pay for overtime to be rate and a quarter.

4. Sunday duty to be regarded as dis-tinct, to be paid for at rate and a half, and to reckon from midnight Saturday till midnight Sunday. 5. A week's wages to be guaranteed,

independent of Sunday, to all who are required to devote the whole of their time to the company's service.

6. An immediate advance of 2s. per

week to all except the eight-hour graand London employes to be paid at least Js. a week more than those outside the

London district.

7a. The abolition of the system of working with only one man in a motor

In the case of Scotland a guarantee of not less than a day's pay when called on duty is also asked; further that "all men be paid their wager weekly," and that all over 21 be paid not less than a guinea a week
