METHODS OF EVANGELISM

"The Supremt Court follows the election returns."—Mr. Dooley.

"It is now universally conceded that a state cannot prescribe qualifications for members of Congress, or establish disabilities. The whole subject is beyond the sphere of its powers. UHEARING IN I. C. GRAPT COSED ARGUMENTS MONDAY

After almost eight weeks of testimon; the preliminary hearing in the graft cases against Frank B. Harriman, John M. Taylor and Charles L. Ewing, former officials of the Illinois Central railroad, came to a close yesterday after noon. Arguments on motions by the attorneys for the accused railroad mer will begin Monday afternoon before Judge Bruggemeyer and will probably

last two days. Erie C. Cowgill, assistant to President Harahan, who was o the witness stand when the case opened Aug. 19, was the last witness to testify. Mr.

Cowgill brough; in the name of Ira G. Rawn, former vice president of the Illinois Central and later president of the Monon, who was killed by a bullet from his own revolver at his summer home in Winnetka July 20. He said that when Mr. Harahan first heard of the graft, which was rumored, he asked Rawn to make an investigation. There were no results, said Cowgill. Cowgill further testified that he had been un-able to find numerous papers and letters relative to the car repairs in the files where they should have been.

CRIPPEN'S PLEA MAKES A

Frankness of Man Accused of Wife Murder Astounds All.

(United Press Cable.) London, Oct. 21.—After he had under gone a severe cross-examination at the hands of King's Counsel R. D. Muir, Dr. H. H. Crippen left the witness stand today with apparent confidence that he has convinced the jury of his inno-

Despite the circumstantial evidence adduced against him by the crown, it is unquestionably true that Crippen made a favorable impression. Speciators who have attended every session of the court declare their belief that it will be impossible to convict the American doctor dontist on the charge of murdering Belle

dentist on the charge of murdering Belle Elmore, his wife.

Crippen concluded his statement to the jury yesterday and resumed the stand at today's session for cross-examination by the king's counsel. He was perfectly cool and self-possessed when he walked to the stand and displayed he emotion as Muir grilled him regarding his story of his wife's flight. Crippen adhered to every point in the sensational story told yesterday and showed ready wit in folling Muir's attempts to trap him. Muir tried to force

tempts to trap him. Muir tried to force from Crippen an admission that no one but himself could have buried the re-mains of a human being in the cellar of hais Hilldrop Crescent home. It has not been denied that pieces of human flesh were found and the crown has endeavored to show that these were from the body of Mrs. Crippen, and that no one but Crippen could have placed them where they were found by Inspector produced under labor conditions existing Chica are offered in San Francisco.

Crippen's apparent frankness made a hit with the spectators and apparently with the jurors. "My wife and I were often away

from home on visits to other parts of England or on the continent," he said, England or on the continent," he said,
"and it would have been possible for some one else to have placed the flesh where it was found. I must admit, ing anthracite, 2,000 tons; lump, 920 though," he said, "that this seems very improbable. Toversy,
"You know our position. We are Socialists. We do not blame you for standing upon your legal rights. You own the sheps. You have built up your business. You employ labor just as cheaply as you can. You make just a much money as you can. Why shoul you not do so under the present orde of things? The strikers on the other hand are trying to get all they can for their labor? THEY ARE RIGHT IN THEIR CONTENTION.

Capital's Stand

"Capitalists are organized to get the highest possible prices for their good and to buy labor and material as cheap y as possible. Why should not the workers, by organizing endeavor to ge ligher prices for the only "thing" they ave to sell, which is themselves. D you blame them for trying to get all they can for it? You are well organ-ized. You pay large salaries for the maingers, superintendents and foreme who help you to conduct the business You have the laws on your side. Th authorities send you, at the public ex pense, armed men to protect your pri-rate property, and the employes who either through ignorance or fear, have not joined the strikers and the unions You are rich, they are poor. The con-test is an unequal one. You are strong your employes are weak, and our sym-pathles are with the worker. More than that, we believe that by standng by the workers, by beiping the organize unions, by enabling them to get better pay and shorter hours that hey advance toward Socialism. "However, we desire to be fair t

you, and if you can show that the conditions and wages in your shops are us good as in union shops, and that you employes have no just cause for com-plaint, we shall gladly inform the pub-ic of the fact.

"Under Socialism these even better ones would be directed and operated by the same people who direct and operate them now. The only dif-ference would be that the full product of labor would go to the people who actually do the work, be this brain work or hand work

"Kindly favor us with a reply to this which in connection to this letter w may publish tomorrow

My friend, listen to common sense a minute. You will need a suit of clothes sure, and perhaps an overcoat this fall. You don't want to pay an extra price on account of any maker's label. What you want is the best for your money and as little talk as possible. I will make it short. I will sell you a suit or an evercoat at from \$25.00 down to \$10.00. I will not advertise any maker's label. If you buy of me you must get good clothes, because I claim to be a good merchant. I ask you to come and look at the thousands of suits and overcoats I have to show you. After you have looked at them I would be only to glad to have you go to the millionaire stores where they charge for the maker's label, you then will come back to Tom. I know for stylish clothes, well-made clothes, I can save you often \$5.00 to \$10.00 on a suit or overcoat. Young man, I can take care of you sil right with young men's clothes, to the older man I say I can make you look younger. You can have a gray-haired salesman to wait on you, as there is no age limit in have a gray-haired salesman to wait on you, as there is no age limit in my store, or you can have a young fellow wait on you. Preparations are being made to accommodate more than a million people during the course of the meet.

Perhaps the feature of the meeting will be the keen rivalry between the men using Wright aeroplanes and a combination of all the other flyers.

Up to the present time all the world's records, for speed, long distance flying and altitude are held by foreign-make machines. The Wrights have entered into none of these competitions. But now that the Wrights face their competitors, it is for blood—each side determined to show that it has the best machine.

days, most of them paying monthly. Because the Hess & Hopkins Company, of Rockford, Illinois, compels its employes to sign an agreement not to join any labor organization, delegates from the United Brotherhood of Leath-er and Horse Goods Workers asked that influence be bought to bear on them through Sears, Roebuck, & Co., who pur-chase nearly the entire product of the plant plant.

The resolution was refered to the incoming executive board who, with representatives of the union affected, will visit Sears, Roebuck & Co., and take proper action in the matter.

Inter Ocean Matter

At the same time representatives of the two largest organizations affiliated with the state federation were cheered when they lauded what they termed. "the only newspaper in Chicago that is really fair to organized labor—the Chi-cago Daily Socialist."

The committee on resolutions brought in a report asking that the executive board be asked to use their influence to bring about an amicable settlement between the pressmen and the Inter

Cheers and applause met the remarks of Straube. John H. Wniker then asked er the floor

Rock Island, III., Oct. 21.—Anna Willard, who is leading the waitresses' union of Chicago in their fight against Mahlers' restaurant, and who was enjoined by Judge Tuthill against picketing, told the delegates to the State Federation of Labor convention how Chicago's Beauty Squad' of police treated the striking waitresses.

When she had completed her speech, Mrs. Haymond Robins reminded the delegation that Judge Tuthill was the same judge who granted an injunction to prevent the enforcement of the tenhour law in the state. She was cheered Rock Island, Ill., Oct. 21 .- Anna Wil-

Elizabeth Maloney summarized the work which had been accomplished during the past year in the interest of the working women. She was followed by Miss Marion Meshca, business agent of the Straw and Felt Hat Makers' union, which, through her efforts, has been increased from a memberative of 75 to creased from a membership of 75 to ver 700.

The convention heartily concurred in a resolution presented by H. G. Conway, international president of the Retail Clerks' International nuion. The reso-lution called for the extension of the present ten-hour law for women in the state, so as to include mercantile estab-lishments, small parks and several other

industries.

In speaking for the resolution Mrs.
Robins quoted figures showing that in
the nation there are over 7,000,000 women workers and that nearly 3,000,000 of

The murder of two striking eigarmakers, Castange Ficarroli and Angello Ahleno, on one of the principal streets of the city of Tampa, the metropolis of western Florida, by business men and other members of the so-called respectable, law-abiding class, has thrown the searchlight on the workers' side in the great war of the classes on the most important "havana cigar" making center in the United States.

fire destroyed over half of that city, including many of the cigar factories. As a result, a majority of the 2,590 cigar makers were thrown out of employment. When a Key West land owner became overly greedy, Ybor, an employer of 300 cigar makers, refused to rebuild on the first cigar factory in the Tampa district, employing in the beginning nearly today comprises three sections—Tampa, West Tampa and Ybor City. Prior to 1868 some domestic cigars were made in a number of cities of the United States, but the havana cigar industry began in that year. The Cuban revolution brought many political refugees to Key West, Florida—situated ninety-one miles from Havana—tand, as a result, the manufacture of the "havana cigar" was started in Key West. In 1886, however, a disastrous workers on strike—ten per cent of a

In the be-ginning the manufacturers were loosely tonganized, but their system of organ-ization has become finer and finer. The

demands on the cigar makers have interested and increased, until today the care-free worker of former days is worse than a slave. The present state of than a slave. The first organized strike occurred in average from 6 a. m. to 5:30 p. m. and the latter part of 1898. In 1901, during a lengthy strike, the union fands were held up by an attachment placed on the deposit in the hank. Both the manufacturers and the city business men are vitally interested in the international law and its lack of employers elief did not come in as abundantly as was expected.

Therefore "economic kitchens" were established in the various wards, where the strikers and their families could get nourishment.

However, the "Citizens' committee" was organized at this time. With the straining soup on the floors.

After this deportation the struggle continued, other leaders taking the place of those spirited away, but finally the men broke ranks and went back to work, deciding to organize more theroughly. Since then there have been several strikes, usually against the unsanitary conditions, but sometimes because the employers forced them.

The cigar industry is one of the few where hand labor has not been displaced by machinery and in many a factory the cigar makers employ a man to read from various sources while they are engaged at their work. This custom of readers was first established in Havana, Cuba, about forty years ago. In the United States it was first introduced at Key West. It was then adopted in certain New York shops and a short while after in Tampa. The bost economic and historical works are read to the workers, as well as works of fiction.

publications are frequently read. In 1903 Frank Milian, at that time mayor

of West Tampa, was reader in the Bus-tillo and Diaz cigar factory in West Tampa. The factory manager refused to allow Milian to enter the shop be-cause certain articles which the man-

cause certain articles which the manager claimed were opposed to the interests of the employers were read. The men went on strike. During the strike Mayor Millan was kidpapped, flogged and sent to Key West. It is said that "his worship" Donald B. McKay, the present mayor of Tampa, did the flogging. The international union interested itself in the Millan case and had Millan return to Tampa. The men resumed work, for Millan was allowed to read whatever he wished to read with

rend whatever he wished to read with-out interference from the factory man-

ager.
The manufacturers, real estate men

The manufacturers, real estate men and merchants of Tampa are well organized and "an injury to one is an injury to all." The cigar factories are almost equally divided between Ybor City and West Tampa, one on either side and adjacent to Tampa—where the principal banks, newspapers and places of basiness are situated.

The cigar industry is the GREAT industry of this district, and this eigar center has all the essential elements of a "boom" town. The "boomers" are always on the lookout for new factories. Real estate men and merchants offer inducements to prospective factory builders. Real estate men and merchants have put two-thirds of the investment into other factories. Real estate men and merchants are interested in the boarding houses and hovels.

The Preferred Houses

The Preferred Houses

The Preferred Houses

Many of the factories have "preferred boarding houses," in which foremen or managers are interested. A man seeking work must frequently go to a boarding house of this type for a job, and he may even be compelled to have his family board there. There is one particular boarding house in Ybor City with over three hundred boarders and the proprietor or manager will get a man a job in any one of a lengthy list of factories. Several West Tampa foremen prefer Yhor City men, and sertain Ybor City foremen prefer West Tampa men. Why, it is easy to understand, A foremen of this type is interested in a boarding house and a cigar maker from a distance must take at least one meal a day in this restaurant. For a cigar maker to drink is a virtua; for the bartender will get men jobs because foremen and managers are interested in the saloon. The cigar makers live in shacks situated in undrained, mosquito-breeding areas where the rents increase as the weeds grow thicker, until today rents are more than double the rents of ten years ago. As one cigar maker said: "In summer we are as loaves of bread in an oven, and in winter as fish en ice."

GLORIOUS PROGRESS

Some two thousand years ago, C. J. Caesar, P. Crassus and G. Pompey ran a town of some fame by the name of Rome, Rome County, Rome, Italy. Their system was simple. It consisted of "Corn and Circuses." "Give the people corn and the circus and they will vote right," was the slogan of the three bosses aforesaid, for, remember that Rome was a republic then and the people actually voted.

The circuses were more elabo rate than any held now by the Ring-ling Bros., but the people, although perfectly willing to be bossed, insisted on getting the corn. CORN MEANT FOOD, FOOD MEANT LIFE. THE CIRCUS WAS ONLY AMUSEMENT.

It's all different now, thanks to

All the people insist on is the Do they insist on getting corn?

No; that would be too sordid!

J. P. Morgan, J. D. Rockefeller and the Guggenhelm family know what is GOOD FOR THE PEO-

And as the people are satisfied with the circus, WHY GIVE THEM CORN?

So, year after year, the Great Political Circus is held. Though in the days of C. J. Cae-

sar, P. Crassus and G. Pompey the circus consisted of fights of men with lions and tigers, of men with men, of lion with tiger, of lion with crocodile and other REAL THRILL ERS, THE PEOPLE STILL IN-SISTED ON CORN.

Today when the CIRCUS CON-SISTS OF A SHAM BATTLE BETWEEN A DONKEY AND AN BETWEEN A DONKEY AND AN ELEPHANT, and CORN, MEAN-ING FOOD, is costing the people more and MORE, THE PEOPLE ASK ONLY FOR THE CIRCUS AND THAT IS ALL THEY GET. IF THEY ASKED FOR CORN AND NOT THE CIRCUS, THAT WOULD BE SOCIALISM, "THAT

EVIL THING WHICH IS CALLED CLASS CONSCIOUSNESS," A S TEDDY ROOSEVELT CALLS IT.

If ever the people get to the point where they PREFER CORN TO THE CIRCUS, THEY CAN GO TO THE BALLOT BOX AND VOTE TO OWN THE GRANARIES AND THAT'S THE SUREST WAY TO GET THE CORN.

ARE YOU WISE? DON'T VOTE FOR THE CIRCUS

Empty Lunch "Packets" Show Miners Lived Many Days.

Longmont, Colo., Oct. 17 -(By Mail.) That a number of the victims of the Starkville mine disaster, who were working in the extreme entries of the mines lived for several days after the explosion, Saturday night, Oct. 9, and eventually perished from asphyxiation is now believed by the company which s spent a week exploring the mine and recovering the dead from the wreckage. This theory was strengthched this afternoon by the recovery of thirteen more bodies in the remote en-

An examination of the dinner patls which these men carried into the mine upon going to work on the night shift and which were not usually opened till morning, showed them to be empty indicating that the miners had doubtless survived for some time and had eaten the last scrap of food which their uckets" held, hoping that they might keep alive long enough to be taken out by the rescue party.

Remained Alive

Tonight a statement was made to the press by an official of the company to the effect that there was little question but that the group of miners in the extreme entries remained alive in their mountain tomb for a day or two and finally were overcome and died from the fumes and gases while they were penned in on ah sides by heaps, of debris, knocked down by the ex-

of debris, knocked down by the ex-plosion. Thus another sacrifice to cap-italist greed was made.

This adds a new and a grewsome chapter to the greet disaster, as up to this time it had been the theory, judg-ing from the condition existing in the mines and the appearance and condi-tion of the bodies when found, that fiftion of the bodies when found, that fif-ty-five miners were killed instantly by the force of the explosion or the after damps that swept down upon them af-ter the explosion.

Crawled Toward Safety

The empty dinner buckets would es-tablish the fact that the thirteen found this afternoon had survived for some time. The position of the bodies found indicates also that they had crawled on hands and knees as far as they could hoping to find an exit or some place where they could find a current of fresh air which would enable them to live un-

til the recue crews could reach them.
With the recovery of these thirteen additional bodies the total number of additional bodies the total number of victims has now grown to forty-three, leaving at least twelve, more to be found. It is thought that some ten of these are in the remote entry and two bodies—Frank Greet and Fred Seppipe, who were on the motor car—are some-where in the main slope near the mouth of the tunnel.

Explosions are common and will continue while human life is cheaper than protection. What had the coal company invested in the wage staves that sacrificed their lives on the altar of greed. There are hundreds anxiously waiting at DLES are growing, too! mine to start working, so they may the places vacated by the miners se lives were snuffed out at Stark-

COMING?

You are going to join in with us for that Anniversary celebration. Of course, you are. You must! The event would

not amount to anything without YOU!
You are one of those, one who have been interested in the Daily and have helped it and worked for it with all the energy that was in you.

paper is the result of YOUR efforts, and so, when we are celebrating its birthday, we are having a jubilee over the things that YOU have done and accomplished!

That is why you should be there. If you stay away that

means that it is going to be a fizzle.

But you will be there. You will join in the rejoicing.

Now, then, how are you going to celebrate? What are you going to do in honor of the occasion?

You can make your own selection, but it's time for you to be on your way. Will it be four subs for the fourth?

One hustler said that any hustler ought to be able to get four subs for that birthday. Is he right? Perhaps four subs is going too steep for some of you, but is there any reason why each and all of you can not get at

least ONE new reader for that event? First, you must decide to get it-and then-get it! You must and you are going to make this one of the big-gest things that ever happened.

But it isn't going to be a big blowout, if there is nothing big to blow about. So blow 'em in.

Local Linton, Indiana, has just decided to take advantage of the Chicago Daily Socialist Lyceum Course offer by a un mimous vote.

Twenty cash subscriptions were taken at the meeting, and the comrades are starting to work with enthusiasm.

This is a town of less than seven thousand inhabitants. But the members of the Local have the right spirit, and that is what counts. They have faith in their own ability to achieve. They made a success of the Appeal-Warren meeting and are confident that they can carry this through also.
This Local will make good. Keep your eyes on Linton.

Every reader of the Daily Socialist in Linton, Ind., and nearby towns, should at once begin to help hustle the 500 subs to secure the C. D. S. Lyceum Course for Linton. Every sub receives free a one-dollar lecture course ticket, so that it will be easy to nab them. Get in touch with the committee: E. R. Johnson, James Craig and H. A. Mad-

If you want the Chicago Daily Socialist Lyceum Course for your city this winter, your application must be mailed by November 1. Address L. E. Katterfeld, Manager Socialist Lyceum Bureau, 180 Washington Street, Chicago, Ill.

Men Who "Covered" N. Y. Legislature Say They Did Not Graft.

Albany, N. Y., Oct. 21.-Louis Seibeld, who, as Albany correspondent of the New York World, was accused in Elder's testimony of having been one of the men that Gardner told him was paid \$3,000 of the "alush fund." was the first witness briors the graft probers yester.

"If Mr. Gardner told Elder that I was paid \$3,000 or three thousand cents, he is an unmitigated har," said Scibold. "I have never had any relations with Mr. Gardner and had only a casual acquaintance with him."

The World, Selbold said, had enthusiastically advocated the passage of the anti-race track bills, and he identified certain stories he had written telling of the stories current in Albany that a bribe fund had been raised to defeat the legisl ion.

Selbold refused to reveal the source of his information.

The witness could not recall who it was told him that the political state

was told him that the political state organizations each received \$250,000 from the race track interests and that \$250,000 additional went to certain of the membership of the senate.

Patrick C. Relihan, Albany correspondent of the New York Press, and George Janvrin, of the Brooklyn Citizen, also characterized Elder's story that Gardner had beford them as unthat Gardner had bribed them as un-

true.

Joseph L. McEntee, Albany correspondent for the New York Sun, denied that he had ever received \$3,000 of the "slush fund" as Elder said Gardner had told him.

CONGRESS AND CHILD LABOR

Politicians Play With Making Laws While the Nation Waits.

"It is unconst" utional," came the cry from all corners of the senate chamber when Senator Beveridge, of Indiana proposed a national child labor law.

Is It Constitutional?

"Let us first ask the committee on judiciary whether such a law would be constitutional," suggested Senator Spooner, of Wisconsin.
"Yes, let's first find out whether we

can constitutionally pass a law abolishing child labor." So the senate asked that august committee for an opinion. This was on December 17, 1906.

The committee or judiciary is still pondering over this legal problem. In the meantime the United States Senate patiently waits. And two million chil-dren are offered yearly on the altar of

tween the committee and the senate this civilized custom will continue undisturbed for many years.

But politicians have to hand something to the dear public every little while. So congress passed a law against the employment of children in the Distance of the control of the trict of Columbia, where there is prac-tically no industry. But even this law was "cooked" to the capitalists taste.

Nelson and Piles

On May 9, 1908, the house unanimous-ly passed a law prohibiting the em-ployment of children below the age of fourteen in the District of Columbia. Then this measure went to the senate with Senators Nelson and Piles on the reception committee.

Nelson offered an amendment to lower

Nelson offered an amendment to lower the age to twelve. He falled. Nelson then introduced an amendment permitting the employment of children between the ages of twelve and fourteen in "mercantile establishments, stores and business offices."

This is the principal industry of the District of Columbia. The amendment was adopted by a vote of thirty-two to thirty, with thirty dodging. Eleven Democrats voted for child labor.

Children of Poor

Then Piles introduced an amendment permitting the employment of children between the ages of twelve and fourteen at any occupation in case they have "poor and dependent parents." Children of rich and independent parents don't work. It was passed by a vote of thirty-seven to nineteen, with thirty-six dodging. Again eliven Democrats voted for child labor.

This is the attitude of congress toward child labor!—Appeal to Reason.

A Medical Trust

The National League for Medical Freedom is doing excellent work in many directions. By circulating a digest of news items and editorial comment relating to the National Ficalth Department it is while causing the people to think and to inform themselves on matters pertaining to health and well being.

THE CHIEF CAUSE OF ILL HEALTH IS POVERTY

AND THE BROOD OF SECONDARY COURSES WHICH SPRINGS FROM IT.

The wretched habitations of the poor, be they in the foul tenements of the large cities or in the hovels and tents which fringe them, are breeding places of disease.

The unwholesome food, often rotten, which the poor are com-pelled to eat; the underfeeding of children, weakening their constitutions and the continued strain of fear causes more illness, acute and chronic, than all other causes combined.

Fresi air and sunshine, with plenty to eat, comfortable clothes to wear and sanitary and beautiful homes to live in will prevent more sickness than all the doctors of all the schools put together.

Give man a chance to live a natural life-stop driving him with the stinging whip of fear or the club of want.

Happiness is the elixir of life and at THE BASIS OF HAPPINESS IS PHYSICAL WELL BEING.

It is within the power of the people of the United States to abolish poverty. There is enough land to feed all, enough fuel to warm all, enough material to house all and enough labor power to This cannot be done by individual efforts. The poor cannot es-

cape poverty individually. They must act together politically. They must take possession of the law-making power of the nation, of the states and of the municipalities, and abolish the laws which bar them from -pioying themselves.

Francis B. Livesey, who is vigorously opposing the Federal Health Bureau, says this measure, "to say the least is Socialistic and class legislation," which shows that Mr. Livesey does not understand Socialism.

Socialism destroys classes and makes class legislation impossible by emancipating man from wage slavery, by giving each human being the opportunity to supply his material needs without let or hindrance from another. Only through economic independence can come independence from medical superstition and tyranny.

We are opposed to class legislation. We are opposed to in-asing the power of the federal government. We are opposed to giving officials the right to invade human bodies, but we are in favor of FOSTERING INVESTIGATION AND PROGRESS BY LIB-ERATING THE HUMAN MIND AND BODY FROM DEAD-ENING AND DEBASING ECONOMIC CONDITIONS.

Strikes are War; War Is Hell

For days there has been rioting on the streets of Chicago. Men and women have been brutally clubbed by policemen and detectives hired by Hart, Schaffner & Marx. A few policemen have had their uniforms town by unarmed strikers who fought in self-defense.

The capitalistic press, class-conscious and true to their interests

are minimizing the extent of the strike and are attempting to create public sentiment against the strikers and against the Garment Workers' Union.

From their stories one would suppose that the police were brave officers of peace, firmly and calmly quieting the turbulent strikers and protecting property from their attacks, when, as a matter of fact, the police and the thugs hired by the scab firm, have savagely attacked peaceable strikers, who were parading or attempting to parade, and have done everything within the power of BRUTAL MEN to crush the efforts of the employes to secure a consideration of their demands by walking out and attempting to get their fellow

workmen to walk out. The Daily Socialist deplores violence. It stands for law and order. But demands fair play for the workers. It insists that the law which authorizes and protects organizations and combinations of capitalists shall also authorize and protect organizations of work-Every corporation is a law-created combination of capitalists, against whose enormous capital and social prestige and political power the individual worker is helpless and a mob of workmen

Organized capital demands organized labor. The corporation

is the father of the labor union. The devil must be fought by fire.

By cause has its effect. The strike is the effect of capitalism, and until capitalism is displaced by the co-operation of all workers for the production of wealth and its equitable distribution, the struggle between labor and capital, between the poor and the rich, will continue. All men are entitled to equal opportunity. Capitalism denies equal opportunity. Socialism provides it for every man,

worse than helpless.

Capitalism has about reached the end of the limit. Its days are numbered. Like a dying year, it must soon pass into history and give place to a grander, more humane system of government, one in which woman shall stand forth in her real strength, where the opportunity for development and expansion will be open to her, and where she will do her share of the useful work with a just compensation for the same; and when woman takes that position the human race will mount upward and soar higher than ever dreamed of at this stage of the game.—Progressive Woman.

"Socialism. by destroying the incentive to live, cheat and steal any by putting a premium upon good work and honest service, will change human nature—for the better. The faculties which are needed to sustain life prevail—change the organisation of society so that honesty is the best policy—and all men will become honest in a very few generations." The difference between the Laberal and Conservative parties and the Socialist party, so far as wage-workers are concerned, is the difference between the Trades and Laber Congress of Canada and the Canadian Manufacturers' Association. The two old the party half of the capitalist party half of the capitalist capitalist.

The first step to be taken is to have a federation."

In Europe, especially in Germany, the workers are
well organized both politically and economically. But the
employers are organized, too.

Consul General T. St. John Gaffney, at Dresden, gives
special mention to the employers' organizations in his last
report, issued by the Department of Compense and

report, issued by the Department of Commerce and Labor in this country:

"The progress made by the organizations of employers in Germany has attracted the attention of the imperial statistical bureau, and has led to the publication of details as to these associations," says the report.

"The preparation of these statistics caused some diffi-

tions which control labor conditions and combat exorbi-tant claims of the workers.

"For this reason all agricultural societies and trusts

were excepted from the figures.

"There are in Germany 84 imperial associations, 474 state and 2,055 local, total 2,613, being an increase of 21

"It is thus seen that the powerful combinations of labor which can exercise such pressure on the employers has led in its turn to combinations of capital."

This report gives the business or capitalist view of the situation. It shows how the employers are organizing against the workers.

The results are seen in the strikes and lockouts that are being declared at regular intervals both by capital and labor in England and Europe, as well as in the United States.

Hoodwinking the Workers

Fourteen years ago the Democratic insurgents, headed by the "great commoner," William Jennings Bryan, succeeded in enlisting a large following, both from the ranks of urban as well as rural labor.

Analogous to the reform movement, popularly known Analogous to the reform movement, popularly known as Bryanism, the present insurgency in the Republican camp, gingered to with Roosevelt's new nationalism, is, likewise, destined to have a far-reaching effect upon political affairs in the United States in the near future. In so far as the workers are concerned, Rooseveltian insurgency may prove for them even more disastrous than Bryanism, and they should be warned against it.

It is saner than Bryanism, in that the insurgents clearly recognize inevitable industrial concentration, and they do not advocate indefensible doctrines of the Nebraskan, namely, the reversing of the wheels of progress, and the return to the Jeffersonian stage-coach and Indian cance.

In this respect the insurgents are modern, progressive men. They realize that capitalism is a necessary stage in the industrial evolution of society, and instead of attempting to thwart and obstruct the growth of monop-

olies, as Bryan wants to do, they advocate strict control and regulation of corporations by the federal government. They, the insurgenta, have been forced to raise a protest against corporate greed; against the open, shameless domination by the trusts over both the old parties; against their corrupt influence over both the old parties; against their corrupt influence over Congress and debauching of state legislatures; against their pernicious sway over courts of law; pollution of the ballot box; wholesale bribery of public servants, and against their culpably ignoring the needs of the great masses of the people.

It is this battle cry against "special interests" that the insurgents have so clamorously sent forth, calling upon the dear common people to "Nil record the minutes."

upon the dear common people to rally round the sullied standard of Morganized Roosevelt, and vote for the same brand of prosperity that the toiling dupes have enjoyed during the Big Stick's seven years' incumbency of the

esidential office.

That this sham reform, middle-class, Rooseveltian overnent will find numerous adherents is, unfortunately,

movement will find numerous adherents is, unfortunately, a certainty.

The same acrimonious feeling against predatory wealth that has characterized old Bryanism will again be fanned into still fiercer flames by the more practical leaders of Republican insurgency, who by stealing a few vote-haiting planks from the Socialist platform, will wave them in the face of unintelligent citizens, with the result that, after a few Democratic years, the Grafting Old Party will regain its former, oppressive rule over the destinies of this nation.

Republican insurgency, under Roosevelt means for the

Republican insurgency, under Roosevelt, means for the workers no more than what Democratic insurgency under Bryan did, namely, reform of the big exploiters for the sole benefit of the little suckers, the middla-class men. It will leave intact the capitalist system, a system that thrives upon slavery and crime. It will not alter the irreconciliable attitude of labor

toward capital. It voices the hopes and aspirations of a dying class, whose interests are as antagonistic to those of the workers as are the interests of the rich male-factors.

THE PLACE OF HONOR

It is, as Roosevelt has often publicly declared, a conservative movement. Forsooth, it is. It will conserve the right of capitalists to continue to plunder the helpless

The workers should beware of Roosevelt and his The workers should beware of Roosevelt and his insurgents. The victories of these middle-class champions will not redound to the benefit of the producers, and unless the latter bethink carefully what they are about, they will soon find themselves fighting the political battles of the vanishing class, as of yore.

The toilers will, of course, get a few sops thrown out to them, but the rapacious Morgans, Roosevelt's proteges, will see to it that these gifts are handed back to them via the channel of increased prices on food-stuffs, higher rents, etc.

The wage slaves of this country have been hoodwinked long enough not to see that they have been at all times defending the interests of every other but their own

It is, therefore, high time that they arouse themselves from their eternal lethargy, and begin to battle for their own hose, families and themselves.

It is high time for them to become at least as class-

conscious as their enemies, the Republicans and Demo-

But to effectively enforce their rights, the toilers must fight through the instrumentality and by means of must fight through the instrumentality and by means of a political organization of their own, such as the Social-ist party. It is in the rank and file of this, the workers', ist party. It is in the rank and the of this, the workers', party, that they will find faithful allies, who are striving te abolish private ownership of socially necessary property, and to substitute therefor co-operation, public ownership and management of those industries affecting every

ip and management of those industries affecting every ember of the community. Socialism aims to abolish all forms of exploitation of se human being by his fellow man. It will guarantee every individual the full value of his toil, and assure

one human being by his fellow man. It will guarantee to every individual the full value of his toil, and assure to all willing workers an opportunity to labor.

Let the middle-class men fight their own battles. If they succeed at the impossible task of checking the irresistible encroachments of the trusts, well and good. Such a victory, if possible, will give that class a new lease of life to fiece the producers.

But there is no earthly reason why the toilers should arm their exploiters with a knout with which the latter will lash them at every turn.

Self-interest, common sense, and the sacred duty they owe to their families and loved ones, dictate that the workingmen should band themselves together in an independent, uncompromising, genuine, tried and true political party of their own class, and by united effort, at the hallot box, force their enemies, whether these be reactionary Republican Democrats, or insurgent Democratio Republicans, to grant concessions to the wage workers, which are sure to follow close upon the heels of political victories scored by the well-organized, well-disciplined Socialist party.

To make conventions liberal, well-disciplined Socialist party.

To make oppositions liberal, you must fight them. This has been demonstrated in every progressive country of Europe, where important reforms have been wrested from the powers that be, not by siding with, but by warring against, all capitalist parties,—these implacable enemies of human progress.

I have been reading Comrade Gustafson's article under the above title. It is surprising how some claimants to scientific Socialism flare up and kick when a condition liable to exist under the industrial democracy is alluded to that will make it impossible for some persons to live upon the backs of some other persons, or in other words, exterminate the persaite.

If any "able-bedied people within odes is for my personal benefit. Therefore I insist on paying my share of the necessary expense. That is the very least I can do.

There are thousands of men and women the industrial democracy is alluded to the movement that do vastly more for me than I can ever pay in the comport and their liberty, unselfably, for my personal benefit. Therefor I insist on paying my share of the necessary expense. That is the very least I can do.

LET US CO-OPERATE

Why not get together as the workers of other countries have? Are not the benefits to be derived from co-operation worthy?

No one will dispute the fact that of the two methods, of struggling for an existence, be it through co-operation or private capital, that the satisfaction of being a unit of the former is far in excess of being a slave to the laster.

Teasonable age limits' are permitted possession of food, clothing and shell-bear and other products of labor, conductive to human comfort and happiness, without 'doing useful work,' we would be retaining the essential elements of capitalism, viz., class legislation, conferring 'vested rights' upon a privalent of being a unit of the former is far in excess of being a slave to the laster.

He is also sheeked at your 'rescale.

of being a unit of the former is far in excess of being a slave to the letter.

We now have the political expression of the working class, the Socialist party. What we now want, is to get possession of enough brains and capital to start in producing commodities for our use as well as for others.

If the workers ever intend to become economically free, they must strike the blow, not only once a year, but every day.

We make motions and resolutions, petitions and protests, condemn the capitalists and their system and methods, along with the militia, spies, sneaks and detectives, and all without avail. Can we call this the only envertical course.

Furthermore, your proposed of exchange made non-negotiable only exchange made non-negotiable is the only exchange that safeguards the people from all possibility of exploitation.

No wealth in existence has any value other than the labor absorbed in its production. Any other value is false and is placed upon it for mercenary

purposes.

This statement may be somewhat radical and may appear to your critic as "revolting and utterly false," but he

must show me.

The gold or silver standard medium of exchange is the arbitrary product of capitalism, in fact its life blood. Democracy would contaminate the entibody and transform it into a tyrannical monster, not unlike our present

Any medium of exchange copied after the money system of capitalism would ever be a convenient medium for juggling values and prices, concaling its skinning processes from the cogniz-ance of the workers who create the

wealth it pretends to represent.

No, it is impossible to mix capitalism with Socialism. Whenever you try the experiment you bump up against the scien-tific phase of Socialism and become hopelessly entangled in a mesh of men-tal absurdity.

Every vestige of capitalism must be similarly defore we can have the in-dustrial democracy.

WHY I PAY DUES
The Socialist party, in order to spread its teachings and to gain adherents and political power, must print propaganda matter and send out speakers, and do many other things that require money.

Everything that the Socialist party does is for my personal benefit."

A very brilliant young writer, William Hard, has published a little book called "Injured in the Course of Duty."

It is made up of a series of articles which this talented journalist wrote some time ago for Everybody's Magazine.

It treats very brilliantly the absolutely legal manner by which the victims of accidents are done out of their due.

He gives some very striking examples to illustrate the working out of certain legal doctrines.

For instance, the Decider of the Polymer Polymer Courted the Po

He gives some very striking examples to illustrate the working out of cartain legal doctrines.

For instance, the Doctrine of the Fellow Servant is one of the legalities that prevents a man who has lost a leg from getting pay for the leg.

"There was once a man named Coffey," says William Hard, "who worked for the United States Steel Corporation in South Chicago.

"And there was also a man named Swick who worked for that same corporation in that same place.

"Swick worked only during the day. Coffey worked only during the night. When Coffey came on, Swick went home.

"One day Swick plugged up an open-hearth furnace carelessly and imperfectly. Coffey did not know about this. He could not prevent it. He was asleep. Swick did his careless, imperfect work and went home.

"That same night, Dec. 29, 1899, in consequence of what Swick had done, there was an outburst of several tons of white-hot metal. Coffey was terribly burned, and his hearing was permanently impaired.

"Now, Swick was just eighteen years old. He had held his job for just one week. He and Coffey had spoken to each other just once.

"When, after four years, Coffey's case reached the Illinois Supreme Court, the judges decided that Coffey and Swick were fellow servants and that, therefore, Coffey had no legal claim for compensation for his accident.

"These men," said the court, 'the safety of each of whom depended so much upon the care and diligence of the other, had ample opportunity to exercise upon each other an influence promotive of care and prudence in the matter of performing their work."

"Coffey ought to have foreseen," says Hard, "that Swick was going to plug up a furnace carelessly and he ought to have told him not to.

"Dixon's train boomed through the yards, and the telegraph operator in his little office, of which Dixon may have possibly seen the outside walls, was fast asieep.

"Dixon, throwing coal into the grate of his engine, was not thinking of telegraph operators and was not meditating on the Doctrine of Fellow Servant. Otherwise he would have left his cab at each station and woke up every Northern Pacific employe who happened to be asleep.

"Dixon did not do this. He shoveled coal. And the telegraph operator as Bonita, Mont., continued to be asleep.

"Pecause of his being asleep, extra freight train No, 163 and extra freight train No, 163 and extra freight train No, 163 ent, head-on. Dixon had nothing at all to do with the accident. Except in one respect. He was killed.

"Four and one-half years later, on May 16, 1904, Dixon's case reached the United States Engreme Court. The judges of that court decided that he had no legally valid claim against the Northern Pacific.

"He and the telegraph operator at Bonita were fellow servants. Dixon was killed by reason of a fault committed by a fellow servant, and, therefore, Dixon's family had forfeited their right to compensation."

Well, that's the law—it's the Doctrine of Fellow Servant. And if you never located of that doctrine, go up against it once.
