### THE COMING CONFLICT

PROGRESS NO LONGER POSSIBLE ALONG COMPETITIVE LINES.

Every Man and Woman Who Believes in Freedom Should Join the Ranks of Those Working for a Higher Civilization.

That weli-known and earnest worker in the cause of humanity, Imogene C. Fales, sends us the following article. The necessity for educating people up to the point of perceiving the lnevitable tendencies of the present system is one which Social Democrats should practice and act upon. It is well brought out by Comrade Fales:—

The philosophy or science of the evolutionary social crisis that is agitating the civilized world and centering its forces in the United States should be generally understood.

It can be demonstrated that the prevailing competitive monopolistic order known as "the struggle for existence," is in its death throes, and that a new and immeasurably higher social order, and one that is diametrically opposed to the present one, is in the first stages of development.

It is greatly to be deplored that those the relation that sociology bears to the ethics of Christianity. The reason of this ignorance of matters that are vital to the welfare of the race is not difficult to find. Immersed in theological disquisitions, and with little regard to the practical expression of the vital principles of religion, living on traditional knowledge, but dead to the knowledge of the present. Seeing God in parchments, but not in the unfolding powers of the human soul, the church has stood, and still stands, with its face towards the part incapable of seeing the advancing spirit of life and truth as it expresses itself in the mighty march of human events.

Hence when the whole civilized world, but more especially the United States, have reached a crisis; when delines prevailing, when the old order of selfshness, struggle and conflict—the velopment is no longer possible order that allies men to the animal creation-has gone as far as it can go, and nas virtually come to an end, when new forces indicative of the higher qualities of humanity are coming into play, and new methods and conditions of life are demanded; when the social system urged by the all compelling powers of advancing civilization is, through strain and stress and diffi-culty, preparing to adjust itself to the Golden Rule of Love, and make the interests of men identical, then the church, the educator of the people, plants itself on the side of the enemies of progress, reinforces the baser elements of humanity, that ever tend to drag the race downward, and lends its strength to buttress the wrong, and prevents the dawning of an era of peace, good will and fraternity. Im-movable itself in the midst of progress. it tries to prevent the progress that is

The social system is an organism made up of constantly changing human Embodying the advancing thoughts of humanity, it has moved from its infantile state of ignorance and savagery to one of increasing knowledge and enlightenment. It has undergone modification after modification, throwing off coarser and cruder forms of slavery, militarism, and despotic institutions—whatever, in fact, that impairs the progress of hu-manity—until now it stands on the verge of an entire and radical change that will sweep away every form of oppression and raise the level of the

Co-operation is about to take the place of competition.

This change in the social system practically analogous to those that have taken place in the natural world. The same slow evolutionary processes that have characterized inanimate and animate life upon the globe in the production of higher types from lower ones are now being expressed in the realm of human activities.

Thousands, perchance millions, years have been consumed in bringing the race up to this crucial epoch-when out of old conditions a new order will The past has done its work now the blossoming period of humanity

has come. Competition in giving birth to monopoly has signed its own death war-rant and prepared the way for the change from the old order to the new. The child will destroy its parent, and will in its turn be destroyed. Back of the whole movement we discern a war of principles. Monopóly, the culmination of all that is evil in organized society, is arousing the higher and antagonistic elements of human nature. Those elements are uncongenial, because they are the expressions of the mons which dwell within, its failure is infinite truth and justice that the ages

link between the old competitive order stalk about our hurrying footsteps and a new co-operative civilization. It will be absorbed and its energies trans- be our ever present thought, as we cast

muted into other channels. The combined action of the people multitude, now ground beneath expressed politically is the Titan force wheels of commerce and caprice.

that will annihilate this modern monster of destruction that threatens to carry the race back to barbarism.

What I desire to carry home to the minds of men is that this change from a competitive to a co-operative civilization MUST COME. It is rooted in LAW. It is the outcome of all the interlinked activities of the past, and it is the fruitage of the present.

All the vitality, all the momentum of the ages is pressing this new movement forward to the birth; all the sophistry and all the anodynes of those who would smooth things over and keep them as they are will prove to be ineffectual.

The hour has come, and the change will be made.

The reconstructive measures for a new and higher social order must first become part of the general education of the people before they can be successfully expressed politically. This great work the Social Democracy of America is engaged in; it is forming branches throughout the country, and sending out able teachers, who are ed-ucating the people in the basic principles of sociology.

The appeal is made to every man and woman who believes in freedom. truth and justice to join the ranks of those who are engaged in the Herculean task of effecting a change from a lower to a higher civilization—a who guide and shape public opinion, culean task of effecting a change from namely, the clergy, have so little knowledge of sociological laws and change that will finally result in the questions, and still less knowledge of enfranchisement and elevation of the

### A Holiday Incident.

Union Tailors of Buffalo Give Debs Christmas Present. Complete Sult of Clothes Turned Out in Six Hours and Forty Minutes.

The employes of Mehltretter Bros. leading merchant tailors of Buffalo, N. Y., are all union workingmen. The establishment, which is one of the largest between New York and Chicago, has been unionized in every department, and is the first of its kind in Buffalo to er an address in the interest of the Social Democracy. Upon his arrival he was waited on by John Conschafter in the name of the employers of Mehltretter Bros., and invited to visit their esreceived by a committee representing the Union of Journeymen Tailors, and informed that it was their desire that he wear a suit of clothes and overcoal of their own making as a testimonial of their appreciation of his services to trades unionism and to the cause of labor generally. His measure was then taken, and the committee assured him that the suit would be ready before he left the city. Then all hands pitched in to break the record. In exactly six wades the realms of thought and too hours and forty minutes after the measure was taken the suit and overcoat were finished, and presented to Comrade Debs in a very neat address by Wallace B. Bowers, chairman of the committee representing the employes. The clothes were a perfect fit, and the recipient was delighted. Aside from the usefulness and value of the Christmas present, the incident is cause for congratulation in that it is most gratifying to note the appreciation of workingmen of the services of one who has tried to make their lot a happier one. Comrade Debs is justly proud of the at tachment of the Union tailors of Buffalo, of which such substantial proof was given by the kindness of the employes of Mehltretter Bros.' great es-

### The Labor Problem.

in The Civilization that Renders Man Savage is Not to be Desired or Encouraged. By H. S., Geneva Lake.

The labor problem is the great and overpowering one. It lies at the base of all righteousness. How the needs of body and mind shall be secured for all by all, is the enigma we are set to solv-

How well we shall perform our task

remains to be seen. There are some things which are very apparent, to even the casual observer; one is: many desire much which is neither wholesome nor necessary; to minister to their desires some one is put to service, that labor acting injuriously upon his or her whole nature. Quite often the person enslaves himself as well as another, and, while we advance towards the new social order, and shout for Social Democracy, it appears to me that it is essential that those among us who are of philosophic turn should set ourselves against the revamping of an old system, in which demoralizing desires harness our powers to continuously devitalizing states. From the plains of the nether world is-sue plaints of such pathos, utplaints tered by the defeated and degraded as should arrest our thought, and compel us to readjust our labor-hase. The 'civilization" which renders man savage is neither to be desired nor encouraged; and if we who set ourselves to the task involved in the formation of a new state do not eliminate the deonly a question of time. Arrogance, have been evolving.

undue pride, self-glory, lust, unbridled monopoly stands as the connecting, appetite, and a hundred other shadows, a backward glance upon the groaning

### PERUVIAN SOCIALISM

ITS STRENGTH LAY IN ITS CO-OPERATIVE METHODS.

Shelden Ingalls Replies to the Critics and Presents Some Interesting Conclusions Concerning Ancient Peru.

The critics of Socialism will say with Prescott that the Peruvian institutions were inimical to the progress of the individual. "As he was born so he was to die. He could not add a rood to not run at all. Socialism, controlled his own possessions nor advance himself one hair's breadth in the social come nearer realizing the former conditions. scale." But under what despotism has this not been true in almost equal measure? It was the despotism of Peru and not its socialism that prevented the highest real development of the individual-and real development does not consist either in an accumulation of riches or in being elevated above our brethren.

Co-operation is one of the most helpful and necessary of all the conditions for true growth. What man of science, or example, has not profited far more by the wisdom of others than by is own? He begins his labors, as it were, where theirs have ended and so shares in what the wise men of all the ages have bequeathed to the world.

Despotism has always in greater or

ess degree not only denied to the individual the right to participate in this wealth of the ages, but has stood between him and the God-given bounties of nature, and in the degree in which this has been done growth and development have been arrested and the real man has become a dwarf.

It is despotism and not co-operative ndustry or socialism that is the great enemy of mankind.

But many good men believe that socialism and despotism are inseparable. For this, however, there is no greater hoist the union colors. A few days ago
Comrade Debs reached Buffalo to delivand despotism are inseparable.

If we do not object to government because of the force incident thereto, we can not consistently object to socialism on the ground of force unless we can show that the force in the latter would exceed that in the former. But so far is this from the truth that, because of the reduction of poverty. vice and crime under socialism, the force required would be greatly reduced and would be confined to much narrower limits than at present.

To-day tyranny touches man at evoften assumes to dictate how man shall worship the Infinite One. Under socialism the force required would be almost wholly confined to industrythe supplying of our physical wants while in the higher realms of mind and spirit man would soon be free.

Tyranny could not then be employed

to acquire wealth, and without wealth at his disposal the would-be tyrant would find it almost impossible to acquire power or to retain it if once posessed. So that by securing to each and all an equality of possessions we can no longer profit by it tyranny will disappear.

But without co-operative industries an absolute despotism now seems inewere taught both by precept and exonstrating their ability to control our industries, and by so doing control the government. If the control of the government is to be vested in those who terment to rise in the world! But, the diseased body politic. They are afraid its cure would remain for enterprising ment to rise in the world! But, the diseased body politic. They are afraid its cure would throw them out of a job. So they are opposed to radiative world remain for enterprising ment to rise in the world! But, the diseased body politic. They are afraid its cure would throw them out of a job. So they are opposed to radiative would remain for enterprising ment to rise in the world! But, the diseased body politic. They are afraid its cure would remain for enterprising ment to rise in the world! But, the diseased body politic. They are afraid its cure would remain for enterprising ment to rise in the world! vitable, whatever the form of governcontrol the industries then it must follow that if we would preserve a "gov- millions in trumpet tones to recognize a time these laws were enforced, and Socialism. It has never been attacked. ernment of the people, by the people and for the people" our industries must be of the people, by the people and for the people-in other words, all of the people instead of a part of the peoplemust control them.

So long as there must be govern ment in some form it were a thousand times preferable that it should pro ceed from the will of all rather than from that of a few, and this without reference to the wisdom of the few or the ignorance of the many. For if the will of all controls, then as all develop the government itself will respond and express in outward form that development. But if one or a few control, as all develop, owing to greed of gain or thirst for power, the government will not be permitted to take on a higher or better form and in this it will resemble the wooden shoe which refuses to grow as the foot expands.

The revolutions of the past have, in most instances, been merely the efforts of growing humanity to burst the shoe only to be succeeded by another how ever, perhaps a little larger but no less

unyielding than the former one. There are abundant reasons for say ing that the evils of despotism in Peru were mitigated in large measure by the co-operative system of findustry, and since all authorities substantially agree with a writer in the Encyclopedia Britannica to the effect that the growth of their civilization and institutions began about five centuries prior to the conquest, it is manifest that there had been a very substantial and even sur prising general growth of all the peo-

no individual was able to very greatly out-run his companions.

It will not be easy for our critics to point out any other instance in history where a people have emerged from barbarism and made so great progress in a like period of time.

It is manifest that in a race in which all are free to run untrammeled the contestants will not be so far separated at the close as they would be were a part free, a part compelled to carry a weight of ten pounds, a part twenty, a part fifty, a part a hundred, and a part so loaded down that they could dition than could be hoped for under any other system. The conditions last named are realized under our present system, except that no one now is wholly free. No one can do his best who to win a prize must pass over his brother's prostrate form.

In Peru neither of these conditions obtained. There all were weighted alike their burden was despotism. But that their growth was nearer a natural and healthy growth than is elsewhere recorded is demonstrated beyond cavil by the fact that they were free from vice; there was little ininfallible symptoms of disease in the body politic.

But say our critics, "Socialism may have been a very fine thing in Peru, but times and conditions have changed. ed. Socialism is opposed to the genius of our modern institutions." Yes, conditions have indeed changed. Those they had no machinery; in these days man mastered an entire trade and himself produced an entire article. Now production in many lines is carried on in great factories, owned by a few rich pass through many hands and no one of the fields and the care of the flocks workman learns more than his own and herds were left principally to part. As machinery increases in efficiency the demand for manual labor rapidly decreases. The result is that there are millions of men to-day who are literally without an occupationthe machine has taken their places.

Three or four centuries ago no one man or combination of men could monopolize an entire industry as can be done now. But steam and electricity have "annihilated space" and what John Stuart Mill only a few short years ago declared to be an impossibility is already an accomplished fact. former days no one in the western hemisphere, at least, stood between any man and the soil. If no one would em-ploy him he could go to Mother Earth for sustenance. But now the avenues of production have been monopolized by a comparatively few and to these the toiling millions must sue for the privilege of earning their daily bread and failing to find favor must eat the bread of charity or starve. Yes, con-

ditions have changed indeed! Even in those days of isolated individual production co-operation was far superior to competitive production, as remove the incentive for tyranny in the history of Peru abundantly testi-the realm of thought and when man superior-it has become a supreme

### **BUSINESS METHODS**

ARE SIMPLY IMPROVEMENTS ON OLD FORMS OF PLUNDER.

Transfer of Equivalents is the Only Plan by Which Exchange Can be Carried On Successfully and Justly.

"Business is business" is an expression we often hear now-a-days from men of affairs by way of apology for modern methods generally or for insisting on the fulfillment of the harsh or cruel terms of some contract. Yes, 'business is business," and its principal business, as now conducted, is to get money or wealth without the trouble of either producing it or rendering an equivalent service therefor.

This method of obtaining wealth is not especially novel, on the contrary it has been in use from the romotest ages of antiquity, but it has not al-ways been dignified by being called "business." In former ages they were simple-minded enough to call the process by its true name-robbery!

There was a time in the evolution of man when robbery was regarded as ther. sanity and no poverty, and crime was quite the proper thing and was con-almost unknown," for these things are sidered in every way as legitimate as market, loaning money at interest or cipal judge that you are a hobo or a that age, as in every succeeding one, the "prominent and respectable citi-"Woman martyrs of Ma the "prominent and respectable citizens" have regarded it as derogatory to their dignity to live by their own labor. "The world eved them edited in the control of the cont

conditions have indeed changed. Those were the days of hand production. Their tools were few and simple, and inasmuch as those who the "Mammon worship," don't those produced the wealth were so thought—"martyrs" disturb its conscience any? less as to fail to voluntarily offer it to was his ability to defend it. If that believe it, run up against the Standard failed his title failed. The result was every man was a warrior and was

lowing the deer, the bear or the wild boar, or in other favorite pastime, but ambitious neighbors, who were con-tent when unmolested to till the fields and support themselves by their own labor. But these prosaic people were always sure of an occasional call from the members of the aristocracy, which, strangely enough, generally occurred after the crops had been harvested or the flocks and herds fattened for slaughter. If they did not always give their visitors a "warm reception," it was because they were not always appraised in advance of their coming.

Sometimes the visitors got only that struck their fancy, even though it chanced to be a comely maiden.

But at length there arose a class of produce it, and they advocated the or-The brotherhood of man and our ob- ganization of a co-operative society or our present system would work even in The brotherhood of man and our obligation of a co-operative society of ligation to bear one another's burdens have always been facts in nature and were taught both by precept and experiment to effect. How preposterous! What incentive would remain for enterprise living furnishing quark nostrums for the discount had a problem.

compelled to watch and care for their purpose, and enabled them to live from the toil of others. For thousands of years this form of robbery was in vogue and was considered as eminently respectable, and not until our own day has the civilized world so far rec ognized the innate injustice of it as to abolish it by law.

But do all men now render an equivmeans. Never was there so much levying of tribute, never so much spoliaslavery so nearly universal, as now, but it is carried on under the more suphoneous title of "business."

The motto of the business world seems to be "get wealth-honestly if you can-but get it." There is hardly a branch of business that has not become rotten to the core. Falsehood and misrepresentation are its almost inseparable companions. Adulterations of foods and medicines are all but universal, and highway robbery has by the modern trust or monopoly been reduced to a fine art. What is the difference in principle whether you are waylaid and a dollar is taken from you by force or whether through the mon- people (the government) to buy them opoly on coal you are compelled to every few years in excessive tolls and pay one dollar per ton more than the still have no claim to them?—Appeal to real value of the service rendered? If Reason.

one is robbery the other is, and one

is no more immoral than the other. What is needed today is to quicken and clarify the moral perceptions of the people and enable them to penetrate all shams and detect injustice whatever its disguise.

It is not the manner of taking that constitutes the moral iniquity of robbery; it is the fact of the taking without the rendition of equivalent service. It is wholly immaterial how that taking occurs, whether it be barter or trade or in the name of rent, interest or profit, or whether the law would call it lar-ceny. Stripped of all sophistry and all disguises all alike are robbery. In the eye of eternal justice every coin is dishonest coin that does not represent an equal service.

### Musings of a Mossback.

Don't distrust a man just because he wears a broadcloth coat. In these piping times of peace and prosperity, it is just as apt to shield an honest heart as it is to cover a full stomach.

And now we have a bread trust. It wouldn't be so bad, but the bread trust is controlled by the meat trust, and it will be rather slim living without ei-

impression that they have any political influence in the nation the recent appointment of Judge Paxson to the terests by means of "independent political action."

Paxson is one of the most inveterhas more significance than appears on

As is well known, there is now sleepcould be properly reported from com-

This bill will, no doubt, be taken up and passed by the present congress. Under its terms the chairman of the Interstate Commerce Commission has middle-class, goo-goo reformers who passage, while the railway labor organizations, whose members are vitally affected by the terms of the bill, are in no position to protest against its passage, as they have already indorsed it. Thus do the poor dupes of workingmen continue to gather the legitimate fruits of "independent political action.' . . .

For naive arguments against measures calculated to reduce the power of capitalism, that eminently capitalistic sheet, the Chicago Tribune, stands in

a class by itself. In a recent editorial captioned "The Streets Belong to the People," the Tribune argues against the folly of municipal ownership of street railways from a rather novel standpoint. It says: "If the city of Chicago were to own and operate the local street car lines and charge the same rate of fare as the present owners do, the city would not get more than a small fraction of the profits these owners get. The operating expenses would swell enormously. Wages would be advanced and more men employed."

This is the very argument that gives strength to the working class demand for municipal ownership, and the admission of its truth by a capitalist journal is rather significant. The Cribune's position in this instance is all the more significant from the fact that in the same connection it admits that "the streets belong to the people," and the fact that the people are robbed by the corporate manipulators of public franchises under the present system is greatly deplored. The Tribune demands a change, and the only argument it brings against municipal ownership is that the people would not get the benefit of taking possession of their own, because "wages would be dvanced and more men employed."

As an alternative to this dire calamity of more wages and more employ-ment for workingmen, the Tribune suggests that "if the corporations which want to get the use of the persubject themselves to the reasonable control of the authorities, those corporations will make money if their affairs are managed with ordinary business ability, and the city will get a large revenue. Then the people will be satisfied and will not be in a state of constant irritation over monopolies that are making millions out of the

unpaid-for use of the people's streets." The Tribune is fighting against the inevitable. Its remedy is chimerical. The corporations will neither "pay a fair price" for the use of the streets nor submit to "reasonable control." The streets belong to the people, and the people will be satisfied with nothing less than the ownership and operation of the railways which use the streets, even though, or rather, because this involves the very thing the Tribune dreads, namely, "wages would be advanced and more men employed."

The beauties of competition are just now being illustrated by Armour, who is using it to break down a boycott placed upon him by the trade unionists of Marion, Ind. The boycott was the result of the trouble between Armour and the workingmen of Kansas City, and was enforced so effectually as to seriously interfere with the business of Armour's distributing plant at This was, of course, a victory for-the trade unionists; the boycott accomplished its purpose, and Armour acknowledged the injury to his business by petitioning the trades' council of Marion to remove the ban. The petition was not favorably considered, after which Armour

ahead. This is but another proof of the fact that strikes and boycotts can no longer aid workingmen in their struggle for humane conditions of existence. There wide powers of discretion as to the was a time when these weapons were administration of the law; in fact. of some use, but the march of induswas a time when these weapons were whether the law shall be effective or try has deprived them of all potency, non-effective virtually depends on him. and today our great captains of indus-With their own man as chairman of try have absolutely no fear of either the commission the railroads have strike or boycott. Boycotts will be nothing to fear from the passage of tolerated as long as they do no harm the bill, but may rather gain considerable favor for themselves among the aimed, but just as soon as they become effective they will be crushed, either are deploring "the conflict between by competing them out of existence or capital and labor," by insisting on its by invoking the law against them. There is absolutely no hope for workingmen except by making use of the weapons of socialism.

> ments against socialism when there is all stimulus to production is a very common one, and it is one that carries considerable weight, yet it is refuted continually by the daily experiences and familiar tendencies of industry. It is a well authenticated fact that at the present time the distribution of a very small share of the profits arising from associated labor acts as a tremendous stimulus to each individual producer, and the most stable and successful businesses of the present day are conducted on the profitsharing basis; indeed, many optimistic capitalists, kind of heart, but not posted as to the tendencies of the profit system, are inclined to regard profit-sharing as the complete solution of the industrial problem which is so greatly perplexing the world.

It has been proved that firms which set aside a portion of their profits for division among their employes find the plan a very profitable one for themselves. The men take a greater interest in their work and strive eagerly to increase the common product. knowing that each individual will be the gainer as the common product is larger. They take better care of machinery; they guard against waste in production; they save fuel, light, oil. material, and in all possible ways seek to lessen the cost of production, because each saving means a gain to them.

It has been proved by the experi-ments of Leclaire and Godin that inventiveness also is stimulated by a methods of production, and to make improvements in their machinery so as to increase the efficiency of their labor.

Now, these facts are beyond dispute and if the distribution of a small share of the profits of industry above ordin ary wages will produce such results how can it be argued that the distribution of all the profits of industry will produce the opposite results? Can it be argued that men will be industrious, careful and inventive when they get but a fraction of the result of their associated labor, but will immediately plunge into sloth, recklessness and stagnation when they get the whole of it? The argument is preposterous in its absurdity.

A writer in a recent number of the Arena, in attempting to prove the fallacy of Socialism, makes this characteristic observation: "The state, as representing the people, becomes the sole and universal owner of labor and its products; but don't you see you, as an individual, become relatively the servant of everybody else but yourself? . . . the state becomes the taskmaster and you become a slave. Human nature revolts against such a drastic form of altruism." laments that Socialism would abolish the interdependence Peter would cease to depend on John for his breadstuffs, and John would cease to depend on Thomas for his clothing, etc. Well, what of it?

Who in the world's history do we revere the most? Is it not those who have consecrated their best efforts to the service of their fellow men? than human souls are a commodity; proceeds to raise the boycott in his Where, indeed, do we find a more labor is life."—Rev. George D. Herron. own way—he is competing it out of beautiful type of this than in Her-

of the above undoubtedly accepts as final authority on all sociological subjects? Hasn't he been the willing slave of his fellowmen in his efforts to construct a philosophy for their guidance? As a matter of fact it is impossible for any sympathetic and sane man to avoid being the servant of others, unless he be cast on a desert island. And more and more is this up almost entirely of the Bachelder intrue as we grow to realize our relaventions. Howe, Singer and others tion to society. Every day we realize a growing accountability to society and the necessity for improving social co-ditions. Truly, altruism makes slaves of us, but it is a very noble and humane form of slavery. The man vent people from patronizing the cheap who succors the weak and defenseless may be a servant of the weak, but he does not feel less liberty from that fact. Thus in the coming socialistic years of his life had been wasted as state of society, so far as we are able had been also several thousand dollars boycott are not going to stand quietly to guess at its organization, there would be a broadened sense of account ability on the part of the individual. of the Singer people in disguise for a He would feel that he owed it to so-few thousand dollars and was thus ciety to be noble and high minded. realizing that to be otherwise would be his natural altruistic nature to domi nate his conduct. Man is a social animal, but our present system of commercial piracy and vampirism distorts that natural bent and makes of life a never ceasing war between individuals. With the implements of production common property, so that each worker would have the full return of his la bor, the productive work of the world would be so systematized that we would have plenty of time to develop our better natures-our true individuality. Laziness would not displace thrift, man never works harder than when at some self appointed task, as the Socialist of today has good reason to know. If from atavism some men-ber of society chose to loaf, his doing so would be of injury only to himself in a sense, for he would be loafing at the expense of no one but himself and he would be unable to eat unless he performed enough labor to provide It is singular that there is so much himself with food. We work today in credence given to the common argu- order to get food and shelter and it would be the same under Socialism. so much evidence in the experience of far as incentive went. All these hints at everyday life to refute them. For instance, the argument that socialism one. Paternalism might have been poswould destroy incentive and remove sible in the ignorant past. We are a reading people today, and people who have knowledge cannot long submit to oppression. As to the interdependence of indi-

bert Spencer himself, whom the writer

viduals, where is the advantage of bread and clothes made under private auspices over the same things made under public auspices, all other things being equal? We know that a good deal of the bread turned out of private bakeries today is not fit for food, and the greater part of the clothing is made by sweaters. Publicly baked bread would be clean and wholesome and of proper materials. Publicly made clothing would be of honest materials and free from the germs of diseased sweaters' tenement dens. The claim so often heard that und in

Socialism inventive genius would decline, is the worst sort of nonsense The supposition is that inventors are spurred on to their work by the idea of personal advancement. Such is not the case, with the possible exception of petty contrivances made by men in establishments. As a matter of fact the genuine inventor centers his whole mind on the work, in hand and has no brain tissue left to burn on the commercial altar. This may account for the fact that an inventor is rarely a good business man. His mind is centered on something else. If a list of the notable inventors of the modern world could be had with full particulars as to their business affairs the result would surely show that they were almost without exception unshare in the common product. The workers in these businesses are ever it has come to be a by-word that inwhich want to get the use of the per-ple's streets will pay a fair price and may have increased the sum of human knowledge or the wealth of society It seems as if the inventive faculty destroys all business caution and makes the inventor singularly trusting in others and even childlike.

> Years ago a farmer in Michigan named Samuel Faries constructed a gun on an entirely new principle. He got a lawyer to get his patent for him and in the meantime a neighboring farmer named Colt called on him and he showed his model and guilelessly explained its whole working principle The patent office burned down, fruit ess efforts were made to get the much delayed patent and shortly afterward Colt revolver, built on the principle of the Faries firearm made its appearance, well protected by patent papers. Take another case, John Bachelder was a prosperous member of an important firm in New York city. He was a shrewd and successful bus ness man. One day he saw the mode of Howe's sewing machine on exhibi tion in a show window. The thing was crude and really worthless excep as a curiosity. The cloth had to b laboriously placed on a hoop and the machine sewed round the hoop. It sewed, it was true, but the work it performed was utterly worthless from a commercial standpoint. Mr. Bachelder became fired with an ambition to make a sewing machine that would do valuable work and bring relief to the people who sewed by hand. He became so engrossed in his inventing that he lost the business faculty and withdrew from the firm. Fitting up little machine shop he gave himself wholly to the work in hand. When-

told everybody he knew. A man very curious as to the progress of the work. Others also began to frequent the shop, taking about the same in-interest in it that a fox would in the establishment of a chicken coop. A man named Grover came disguised and shortly afterward the Grover & Baker machine was put on the market, made visited the shop. Bachelder finally patented his most notable inventions that made up his machine, the horizontal table, continuous feed and vertical straight needle, but ways were found to prove that his patent did not fully cover these points. He had sunk the money realized when he sold out his interest in the importing firm, five he had borrowed. Being in a hole he finally sold out his rights to an agent able to pay back what he had borrowed. Once out of the inventive mood and thrown on his own resources, Mr. Bachelder's business powers came back to him and in subsequent years he made two separate fortunes as a manufacturer of woolen and cotton goods. finally losing the greater part of his fortune in a panic that swept the Pacific coast. In Mr. Bachelder's case it is very clearly shown that the inventive spirit does not really spring from hope of financial reward, much as from a desire to accomplish something.

It is admitted by the English press that the United States is, and will re-main, the cheapest steel producing country in the world. In view of this fact does a tariff on steel "protect American industry," or merely assist Mr. Carnegie and his friends in plundering the people and acquiring title to the earth? Our American voters are on the whole an intelligent lot of fools! What would you think of the business men of the country if they were to voluntarily assist some noted burglar in cracking their own safes? The robbery of the trusts will cease when their victims stop assisting them in their acts of plunder.

### Proportional Representation No. 15.

We continue our criticism of the method of election known as the "multiple vote," as usually employed in the election of committees, etc. We refer throughout to the specific case of an election of a committee of five.

TAKING CHANCES.

A grave objection to the multiple vote is that it mixes and muddles things, and brings in a large element of chance. It is sometimes like throw-ing dice. There is no telling which side will come to the top. Many curious combinations of the five-fold vote take place. Monopolization of all the representatives by a mere majority of the voters may result from the inherent cussedness of the method itself, and not from a deliberate or organized attempt on the part of the majority.

Then, instead of your being represented in a clear and definite way by one distinct delegate on the committee, you have, so to speak, only a one-fifth interest in five different delegates, men necessarily of diverse views and opinion on some subjects that you are interested in. Which idea of representation is most in accord with common

Some persons have the idea that a man's voting power is lessened by giving him only one vote instead of five. This is a fallacy. When everybody else has five votes as well as you, your additional votes are swamped and neutralized by the additional votes of the other fellows; so that you get all the disadvantages of the multiple vote without any increase of your voting

MAJORITY AND MINORITY. It is sometimes said: "Oh, the majority must govern." But to apply that Their hands he calls as in his bag they remark to an election is to suffer from confusion of thought. Representation is one thing; government and legisla-tion is another. First, get a fair representation of the voters in your com mittee, then let a majority of the representatives decide when it comes to a decision, Yes or No, on any measure And there is much to be done in any governing or executive body besides the mere Yes and No vote. An intelligent minority of representatives has great weight and influence; its can be heard; it can fully and fairly present the views of the voters whom it represents; and it can watch the maand keep them straight if need be. These things are the clear rights of the minority, and they are denied by the use of the multiple vote.

THE GOLDEN RULE. Take another illustration. Six or seven voters out of the thirty are particular desirous to have a certain man -say Mr. Smith-on that committee The other twenty-three or twenty-four voters are indifferent or hostile to Smith, or prefer somebody else. six or seven men are one-fifth of the committee, and therefore they are entitled by right to one-fifth of the representation; that is, one committeeman out of the five. Under the multiple vote they are deprived of that right that is, they are disfranchised—de-prived of their voting power. Under proportional representation any candidates having six votes would be elect

If you disfranchise one-fifth of the voters in a meeting of thirty men, how can you reasonably complain of the disfranchisement of the Socialists who wholly to the work in hand. When-ever he overcame a knotty point he district of thirty thousand? There is

no difference in principle between the named Baker began to drop/in and was two actions. If it is right to disfranchise the six men in the meeting, it is also right to disfranchise the six thousand in the larger election. case it is a tyrannous usurpation by the majority. Perhaps it never struck you in that way?

THE UNIT OF REPRESENTATION. It may be asked, Why have not onesixth of the voters a right to independent representation, as well as onefifth? Because only five members are being elected, and the right of such representation is limited by the number of members. If six members were being elected, then one-sixth of the voters would have the right to independently elect one member. would then be what is called "the Unit of Representation."

The case we are taking is an election in which the unit of representation is one-fifth of the electors. Although in this case a smaller number cannot elect their own particular man, yet the proportional representation single vote gives them considerable latitude of choice.

The trust is doing more to spread the gospel of Socialism than all other teachers of the present day. By demonstrating on a large scale in actual business affairs, the infinite superiority of co-operative methods over competition, this most efficient teacher has performed a lasting service to mankind.

Liberty and civilization are only fragments of rights wrung from the strong hands of wealth and book learning; almost all the great truths relating to society were not the result of scholarly meditation, but have been first heard in the solemn protests of martyred patriotism and the loud cries of crushed and struggling labor .-- Wendell Phillips.

### THE OTHER SIDE.

It may be easy for those with wealth to sing of the pleasures of life, For wealth means pleasure and com-fort and ease and others to carry you through;

But, given a life with mouths to feed and the means to be wrung from a strife. With every man's hand against you, and

the weight to be carried beside
Of the parasites hanging above you,
and the best that you could do.
To endlessly labor—for what?—for the leave to labor on, till you died,
Would you feel that such a life would
be a meed of endless delight?
But there is a pleasure and this it is,
to labor on for the right.

The world is raving, "keep still," to us; it has ever raved the same; But thought is free and the ways to be cleared, so we're going to work it

cleared, so we're going to work at through, oever a coward and faint-heart is, let him cow to the world and—shame! whoever has manhood, a warm heart and strength, whose nature is all true blue, ne on, we will go where the way is rough and try what good we can do.

We will go our way cheerly, boys, and laugh at the world's cold spite; . For there is a pleasure and this it is, to labor on for the right. Man never began on the path of progress

to stop when he got thus far.
We have but started; we're going ahead
in spite of the piping voice
Of each poor, old croaker, who wheezes
and whines, to whom every straw is

and whines, to whom every straw is a bar,
That he cannot get over. Away with such. We will seize the banner, boys.

And go on mounting the hill of Hope, where a voice is crying, "Rejoice, The morn is breaking, the world is waking." Cheerily send the cry
The world around to the farthest bound, till it pierces the farthest sky.
Onward, on! Never let up, while a tyrant is left in sight:
For there is a pleasure and this it is, to labor on for the right.

J. A. EDGERTON.

### FROM OUR CONTRIBUTORS

Bible Teaching Up to Date. By J. Alfred Kingborn-Jones "Surely in vain the net is spread in the sight of any bird."

With this proverb of Solomon before us, we can not but admit that we are inferior in sagacity and intelligence to the feathered tribe, for the net is spread with brazen boldness in our full sight, before every election, and we, Labor, are caught in the meshes and the plucking goes on; the power that spreads the net and manipulates the strings is the money monopoly, and the vast majority of reformers do not realize the fact that there is only one way to escape from these foul fowl-

To prove this statement, take cur latest reform magazine, the New Time, for November, with articles "Representative Government a Failure," "Street Railways," "Direct Legislation," "Ethical Aspect of the Labor Problem. The reason our government is not representative and that we do not own the street railways, or enjoy direct leg islation, is because it is against the interests of the money power that we should, and they see to it that we shall not so long as they hold the reins, and further, they will not hand over the guiding lines to the people except by actual compulsion. Rev. J. Stitt Wilson's sermon, "Ethical Aspect of the Labor Problem," is, like all the other articles without a single practical suggestion of means by which to escape from our "mutual antagonism, selfish-ness and distrust of man with his fellow," as he rightly describes our present mode of existence. He says "the problem is how to employ all constantly, pay all what they earn, etc." This is how to allow us to employ ourselves | Christ. for ourselves. How can a man be paid all he earns? All a man produces is his. There should be no wages; wages means underpay for services rendered, and this means that the result of the wage-earners' work is divided between the man who works and the man who pays. Latest statistics show the proportion to be nine dollars to the payer and one dollar to the paid!! or nine to the robber and one to his victim. One thing only makes such conditions possible, the dishonest medium of exchange which has been devised for this specific purpose.

The reverend says: "I ask any honest observer to look about him today and see the weak bearing the burdens of the strong. The very tendency and aim of our mammonism is to get to a position where others must bear our This is nothing short of gross hypocrisy from a man of that class whose living is drawn from the labor of others, for there are very few exceptions today who,like Paul,worked with his own hands, boasting that he was not chargeable to any man. No parson is competent to advocate reform, or worthy of attention if he does, unless he first takes his own weight off

Wilson goes on: "Impatiently we pray and weep and think and Labor (?) for the kingdom of social justice to come upon the earth." It may be added, and still throw the weight of their living to swell the social injustice, and further, they would pack up and rush across the continent to pray and weep and think and fog the question for another lot of sheep if they can be fleeced out of \$4,000 instead of a paltry \$2,000, the yield of the flock they leave with affected sorrow, but according to the "call of God" (mam-

This remarkable sermon (New Time editor's opinion) is nothing but interrogatories, a few statements which are carry it into effect; it is truly a "re markable sermon," like most paid cler-ic sermons void of practical common sense-the one sentence, "I ask any honest observer to look about him today and seek the weak bearing the burdens of the strong (parsons); the very tendency and aim of our (well put, our) mammonism is to get to a position (parson or priest) where others must bear our burdens," is so iemarkable that any honest observer could not read it without a very hearty burst of ironical laughter!!!

The whole teaching of the New Testament is concentrated' in "God is love," and to follow the interrogatory style, "Is not love created? Is not love developed by encouragement Will not love grow if it has natural conditions? If love is created, if it develops and grows naturally from within, is not a matter of memory, it can not be taught, can it? If so, is not everyone who is taking pay for teach ing love, obtaining money under false pretenses? Love of the all good is stifled by the love of mammon. Mammon is, to all intents and purposes, the result of an unjust currency, which ailows and encourages the holder of any quantity of money not required for immediate use, to force others to labor for the owner of this money, so the first step toward any social reform must be to provide a medium of exchange that can not force anyone to toil for another. The Labor Exchange check will accomplish this, and will insure perfect freedom and the realization of personal property, and at the same of the country. What say the people? imagine we will do and not on any de-

the doctrine inculcated by the carpenter's Son, and this can be adopted at once. It is in use in almost every state, and then in vain will the false 'shepherds, political or ecclesiastical' (see Wilson's sermon) spread the net of ballots or churches in the sight of any of the scientific labor exchanges.

The Social Democracy colonies will illustrate the true "ethical aspect of the Labor problem."

### Christ a Socialist.

By J. S. Powers, M. D.

In reply to the article of Comrade Joseph Whitehorn of New York, which seems to have been written in a friendly spirit of inquiry, and not of criticism. I would say we believe Christ was a Socialist because His life and teachings can have no other logical conclu-

His life was spent in the cause of humanity. To rescue the perishing and relieve the suffering, whether of body or mind, was His meat and drink.

His teaching, to in all things as ye would that men should do unto you do ye even so unto them, could not apply to any other state or condition in this

life than Socialism. The apostles, His chosen followers to spread His system in earth, commenced at once to form Socialistic communities, in which the law was established "that he that would not work should not eat." These communities were instructed to care more for the good of others (their brethren) than for their individual selves. History informs us that this Socialistic form of holding all things in common existed in all Christian communities until forbidden by the decree of Constantine the Great, is not the problem by any means. It abolished it some five centuries after

Now to the law laid down by our comrade and his assertion regarding not advocate anything in regard the conditions of society in the days symbols, emblems or mottoes which of Christ I am compelled to radically will not be strictly non-sectarian, nondiffer: First, as to his law that So- political and free from all bias cialism can only have a material foundation when capitalism is the parent ment of Peru, a succinct history of ment. which has been given in the pages of In t the Social Democrat. Could capitalism tion a complaint which I fre-ever have had anything to do in the production of that happy government? are favorably disposed towards Sothe Social Democrat. Could capitalism tion Again, we notice the Shakers, the Mor-mons, etc., Socialisms established from aloof and outside. These people say: religious views independent of econom-

ic surroundings. In fact, if we except Peru, of whose etiological factors we can know nothing, religion has been the vital force of all practical Socialism, and my dear with either of the old parties under any comrade, if you will think a moment, and all circumstances it would give you will discover that many noble men confidence and backbone to the move are active in this movement not because of capitalism, for its baneful influences are not reaching them at present, but because Christ's loving spirit for humanity is prompting them to lay their all on the altar of Socialism that others may be benefitted.

Now I will notice the assertion made that no such conditions existed in the days of Christ as now. Let the pages of history decide. Turn to 1st Caesar, chapter 2, paragraph 6, and read this language: "The farms were bought up by the Roman capitalists and the small holdings were merged into vast estates. Besides this, the public lands were leased by the senate on easy terms to persons of political influence, who by lapse of time came to regard these lands as their own by right of occupation.'

of land into great estates, worked by will be in line with ideas of universal ing that the collector does his work slaves, was to crowd free labor into the brotherhood, and not caluculated to The secretary of the commission will patent to everyone, a string of texts, There they found every trade and occopoperation once named, and "co-op-cupation filled with slaves, whose labor only increased the wealth of the capinovement through fear of fusion with sign were charged with the duty of estimates the control of the capinovement through fear of fusion with sign were charged with the duty of estimates the comparative colony and the comparative colony are comparative colony. paragraph. Many similar quotations point have been sufficiently explicit and tablishing a co-operative colony and might be given, but these are enough to forcible not to be misunderstood. There show that capitalism existed in the days of Christ.

#### Washington. By G. A. Hubbell.

In a previous letter I spoke about the importance, as it appeared to me. of placing a plank in the political platform of the Social Democracy that is in no other political platform, viz.: The abolition of all taxation save that upon land values. This destroys the selling value of vast areas of land, and from land in private hands that has value it takes ground rent; a revenue with which upon this free land the Social Democracy can build its pro

ductive enterprises. As Washington, the great demonstrated upon the field of action his fitness to be the first president of our nation, so Washington, the great state of natural resources, has proved by its actions in the last few years its fitness and willingness to become the first co-operative commonwealth of our nation, and of the world. The people of that state recently came to the conclusion that the common habit of unnecessarily fining and attempting people because they produced something was all a mistake. So the legislature, two years ago, passed a law exempting from taxation \$300 worth of the personal effects of the industrious poor. This was the first step of a grand march. This proved so well that

time an exemption of \$500 was made of the improvements made by the users of land. This so scared special privilege, and especially gamblers in vacant land, that an appeal was made to, as a rule, the devil's last resort, the supreme court. The supreme court held the law to be unconstitutional. The people were shrewd enough not to depend up on the supreme court. They passed law at the same legislature submitting to the people an amendment to the constitution, to be voted upon in November, 1898. This amendment, if carried, will allow local option in matters of taxation. Then, if one county sees fit to gradually eliminate one vicious tax after another from her domain, all other counties in self defense must follow suit until every county in the state has rendered unto its citizens a simpler and a juster form of government. So must follow every state in the Union.

Great fear is already upon those of Washington who wax fat by the mo nopolization and non-use of land, the common storehouse of us all. Land is now, on this account, comparatively cheap there.

Social Democracy men will not have gained residence soon enough to vote upon the amendment. They can console themselves with much else to do.

The single tax men of Washington, who are coming our way, are calling upon their brethren of all the United States for help. The Brotherhood of the Co-operative Commonwealth has taken its stand for freedom in the state of Washington and is calling upon its brothers of all the United States for help.

So why not call out with a ring that can be heard from Washington to Washington: Attention! Social Democracy! Onward to the state of Washington, and there let us all stand up together, brothers all, and fight it out with the common enemy, if it takes more than "all summer!"

### Symbols and Fusion.

Mr. Editor:-I trust that those true and earnest comrades who sincerely seek the betterment of humanity will predjudice.

If anything is adopted it should be or producer. I must think this erro- purely significant of man's universal neous from the fact that Socialism has brotherhood, without any religion, nabeen in operation where capitalism tionality or country. This, it seems to could not have been the "producer." I me, is very essential, in order to draw will first mention the ancient govern- all kinds of people towards our move-

> In this connection allow me to men "I am afraid Debs will fuse with one or the other of the old parties. If Debs would forbid fusing," etc.

Now, if Mr. Debs would declare himment so far as these doubters are concerned. Fusion with either of the old parties has an unsavory smell, and is the death knell of any party or movement which tries it. It is worse than If there is ever an attempt made to fuse, or any evidence that the leaders of the movement are engaged in any trading scheme with either of the old parties, that moment confidence is destroyed in the minds of the intelligent rank and file, and all prospect to unite the reform element is gone. E. P. HASSINGER.

Brodhead, Wis.

[With regard to the question of a symbol for the Social Democracy, it is foundations for a new system a vast one which will properly come before amount of routine work is absolutely the National Council for solution at the convention next June. There is no deal towards assisting us by doing doubt but something of this sort will their share and helping in the Again: "The effect of this absorbing be adopted at the proper time, and it branches, in arousing interest and seewill be no fusion. On every possible occasion Comrade Debs has taken the opportunity to express himself in opposition to any fusion or compromise. In his letter published in the Social Democrat of Oct. 21st, he said: for the complete overthrow of capitalism, the abolition of the wage system, and the collective ownership of all the means of production and distribution; and the Social Democracy of America as a national and international political and economic organization, will fight along that line without a shade of fusion or compromise, either as to principles or candidates (excepting in case of an honorable alliance with another Socialist organization), until victory is achieved and the Co-operative Commonwealth is established." This language is sufficiently plain and those who are afraid of Debs advocating fusion with the old parties may possess their souls in peace. It should be understood that the Social Democracy is much broader than Comrade Debs, and even if he desired fusion-which he does not-it is very doubtful if he could accomplish it.—Ed.]

The exports from the United States during the last fiscal year were the greatest of any year in the history of the country, as was also the excess of exports over imports. Thus, accarding to the protective tariff theory, at the succeeding legislature the ex-emption was increased to \$500 worth of prosperous one in the entire history

#### The Time For Action.

Before another sixty days are over it is expected that the colonization anteed a livelihood. To do this it is commission will have their band of sence sary to establish as many and lected pioneers on their way rejoicing, hewing down trees, making lumber, so that the skeleton framework of a building houses, sowing fields, making roads and performing all the manifold immediately. duties required in breaking ground for the new commonwealth.

If you who read this have not yet enrolled yourself or are not doing something in the way of contributing funds or in other ways, you had better get about it.

There is a very expressive phrase now extant, which describes how peo-ple climb into the band wagon as it passes by and if you are too slow you may not be able to do even that.

People nowadays talk about the heroes of the abolition movement and erect statues to them. The heroes of the abolition movement to abolish wage slavery are now with us and perhaps if you hurry up and get a move on your children may go around proud mill and a good printing outfit so that in the fact that their father had a all the standard and classical English statue erected to him for heroism.

Stranger things that this happen When the aristocratic mob pulled Garrison through the streets of Boston who thought then that his statue would be adorning the aristocratic part of for as well as their physical hunger. Boston in less than thirty years and his son would be addressing public meetings as a somebody, principally because he is the son of his father.

be something more than a clod you will have to do something. Words are nice things but the man who performs will give \$100 each when the full num is of more account than he who does ber of donors has been reached. nothing.

Money not only talks but it makes people perform. If you cannot do anything yourself, send in your money. It ment a success. will do something or provide with eatables the man who can do something and is willing to do something and will needed to make our colony a success. do something.

#### Success is Certain. Our comrades want to know every-

thing that is going on. That is perfectly natural and yet we

can only say "wait a little."

Events are occurring of great importance which will be made known to our membership as soon as it is prac-

Bear in mind that the members of the colonization commission have not been asleep but have been hard at work. Much has been done and much accomplished and even yet more remains to be done.

In this great work of building the

one will be established. The slanders of open or concealed

enemies will not prevent it, neither will the apathy of those who think they know better than the founders of this organization what is best to be done.

The constitution of the Social Democracy of America calls for the estab lishment of a co-operative common wealth through colonization and the constitution will be lived up to. Those who do not care to live up to the constitution will have to stand out of the road when the forces in favor of the colonization commence to move.

These forces are immense, grand, and have the whole organization behind the whole force of the entire organiza tion is to be concentrated on making the colonization movement a success Success will be ours. Comrades closup ranks and march forward with con fidence to the ultimate and certain vic-

### Competition and Books. Many good Socialists would like to

see the colonization ideas of the Social Democracy prevail but they say that they cannot for the reason that the competitive system will not permit

Their criticism is based on the pre sumption that the colonies of the So cial Democracy are to compete with the outside capitalistic system.

That is the 'ouble with most of the critics of the Social Democracy. Their criticism is usually based on what they clared policy enunciated by Comrade for the Social Democracy.

be carried on for use and not for profit.

As rapidly as possible it is our purpersons in America who will contribute pose to establish various industries and that amount but there are ten times produce the various articles needed for the benefit of our various members and for markets where the products will be sold for money by means of which the various products can be bought.

We are not establishing a system by neans of which we can make profits. Our purpose is to establish a system by means of which men can be guarvaried industries as quickly as possible new society can be put into operation

Agriculture is the primal occupa tion as it provides the wherewithal to provide food. When food is assured in large quantities then it is possible to start many different industries. Shelter is one of the things needed almost as quickly as food and then comes clothing of various kinds.

The writer asked an old member of the Topolobampo colony what he opposed to the Social Democracy. found the most lack of in that colony and the answer came quickly:

"Books. We got enough to eat and enough clothing but what I missed more than anything was books."

Herein is a lesson for our colonists. When our colony gets started one thing needed more than another is a paper works whose copyrights have run out may be duplicated. A public library should be one of the first things established so that the intellectual hunger of the colonists may be provided

### One In a Thousand.

Every branch should take up the idea You also can be a hero or a clod. expressed in the words "One in a Thou-Which will you be? If you intend to sand."

This is an effort to secure 1,000 persons in this broad land of America who

labor and all the varieties of labor

What we need at the present time is machinery the available labor.

and capital combined. In other words he had to have so much money else he a colony and made a prerequisite for membership.

This is not scientific. A man may colony a success and be perfectly willlabor so much needed by the colony and yet be without a cent. A money price of admission to the colony preents the colony getting the kind of labor it needs.

The only really scientific plan is to separate the two functions and not in-sist that the laborer shall be capitalist

That is the reason why it has been suggested that 1,000 persons contribute \$100 each, making a fund of \$100,000. If each branch would take hold of the idea, as it should, we can soon raise the number.

If from now on the collector in each Debs or any others competent to speak branch will send in the names of perfor the Social Democracy. It is just as well for the outside world to contribute that amount, the secreto bear in mind that the Social Dem- tary of the commission will correspond ocracy is not to engage in competition with the persons named and endeavor to secure their pledge of that amount.

We propose to cut away from the competitive system and establish a cooperative system where production will and unitedly we can soon get the 1,000 that number if we can only reach them.

It is for us now to do our whole duty not to produce as cheaply as possible and the doubting Thomases will quick ly fall in line and help us to reach still others. To work!

### An Interview With Bellamy.

It was my good fortune while in Denver to have two long interviews with Edward Bellamy.

It was with pleasure I noted his eve was clear, and although somewhat emaciated, he was in much better physical condition that the newspaper accounts had led me to expect.

He was very much pleased to see me, as it was years since we had met, and many of our mutual friends were dead and gone.

He was very anxious to hear about the Social Democracy and its plans, and he made use of a very significant expression when one takes into account the published statements that he was

"I consider," he said, deliberately, "that the Social Democracy is the hope of America's future."

The next day Col. Hinton and myself had a long chat with him, and he expressed the ideas of American Socialism in a most charming and graceful manner. He expressed in singular-ly apt phrases his conviction that while man was to a large extent influenced by his environments, yet man himself determined and fashioned those environments; that economic revolution was proceeding rapidly, and yet it was the unfolding and evolving mind of man that preceded and caused the economic evolution.

He expressed the liveliest hope that the Social Democracy would succeed, and while he knew but little of our plans, he also expressed hearty wishes for the success of the colonization de-C. F. W. partment.

#### Which Is the Next Branch. I think now without doubt our local

It means that 1,000 persons pledge branch here will be able to furnish one themselves to contribute \$100 each or of the \$100 pledges, or if not our move- branch, a number of the members associated together and presume it matters We have at the present time all the bor and all the varieties of labor sources. Is the number of \$100 pledges sufficiently encouraging to assure success in the spring even though you the money to move and to furnish with should not secure the financial aid you were expecting some time ago? If my In days gone by a person deserving questions are too pertinent do not anto join a colony had to possess labor swer them. I ask such only because of my deep concern.

After the \$100,000 or some large could not join the colony. He had to amount is secured, cannot several thoube a capitalist and laborer too and a sand members be enrolled in the colonmoney price was put on admission to ization department who are able and can be depended upon to pay a monthly dues of say 50 cents or \$1 to serve as a permanent base of supplies for the have just the skill needed to make a first year or two? I am of the opinion that such a plan might succeed espeing to furnish the skilled and trained cially when once demonstrated to such members that by the operation of such a plan success is assured beyond any doubt.
