INDUSTRIAL WORKERS OF THE WORLD eval Headquarters, Room 367, 164 W. Washington St., CHICAGO WILLIAM D. HAYWOOD, G. al Secretary-Treas

F. H. Little, Francis Miller, C. L. Lambert, Richard Brazier and William Wierteln

ed as second class matter March 19, 1917, at the post office at Chicago, illinois, under the act of March 2, 1879.

An onnce of sabotage is worth a ton of legislation

The organization of the workers into One Big Union is not at idea hatched from the brain of any one thinker. It is a step in the evolution of society just as necessary and as inevitable as the formation of the first social units—the gens, the phratery, the clan and the tribe. It is the outgrowth of the instinct to survive on the set the wage-worker surrounded by the hostile environment of present day industrialism. It is the answer of the collective intelligence of the only wirile portion of society—the producing class, to the social readjustments required by agbe maching Process. It is the shadow that modern industry casts upon the future.

Sabotage is a weapon of industrial warfare, it is one form o atriking; and, like any other method of striking, is primarily intended to "hit the boas in the pockethook." Sabotage is just as necessary to the wage-slave of today as were the how and arrow to his 'prehis toric forebear. In seeking to "outlaw" sabotage, the legislators of the Western states are attempting to place human necessity outside of the law. But "necessity knows no law." They can just about a casily stop asbotage with legislation as a medicine-man could stop a tornado with a tom-tom.

mmy Gompers 'pledged" the American labor movement ism-for the term of the war; but whonell pledged the Amer or movement to Sammy?

The Everett and San Francisco cases evidence an attempt of Pintocracy to go the limit in wiping Labor Unionism from the map. The "ant I. W. W. laws" indicate a desire of the part of several State governments to disarm the worker completely and turn him over, helpless, to the mercy of his enemies, the restriction of the right of the speech, free press and free assembly that h going of under the poison gas cloud of adventitions "patriotism," seeks to gag the worker, in the face of crying injustice. All of which is just as it should be—according to the parasites, who desire nothing better than that the exploitation, jailing, shooting and hanging of union men can continue indefinitely without comment or protest.

men can continue indefinitely without comment or protest.

If minon men only TALKED and DREAMED they would be latighed to scorr and no one would lear them; but let them ACT, and they are feared and execrated. Right away they are "criminals" and "outlaws. And that is why the predatory class in America hates the I. W. W. more virulently than anything else. It is because we have the clear vision to see the naked cruelty of exploitation, the alert brains to understand the modern industrial process, the good judgment to apply the tactics that tell, and the strong hands to reach out for what we want and take it—that is why they hate us. We are persecuted and lifed abbut more than others because we are feared more; more than the philosopher with his idle definitions, more than the political trickster with his suspid contracts—more than anything on earth are we hated by the parasites and their underlings. And all because they realise that we are aware of the historic mission of our class to do away with theirs, because we represent the dynamic force in mostern society—the young and vigorous element in an epoch "otten-repe for change."—the germination of the New Order in the biosot-soaked soil of the old.

WAGE WORKERS OF MEXICO EAGER FOR THE MESSAGE OF INDUSTRIAL UNIONISM

The conferences between the A. F. of L. and the representatives of the Mexican Labor Movement has resulted in a complete show-up for the antiquated, hidebound hand reactionary. "American Separation." And incidentally the stand taken by the workers of Separation. And incidentally the stand taken by the workers of meaning the standard of the standard sta

forts to "safeguard" commercial interests in the U. S. A. in case of at Atter a careful examination of the position of the A. F. of L. om many difficent angles from a working class viewpoint, the antifesto says: "All right, now"; and then goes on to compare and a prodomal admiration for the latter. An outfine of the right of orgalization, aims and tactics of the L. W. W. was given of an appeal sent out to all the workers of Latin America to break the all halor tricksters and politicians and organize on similar lines. An idea as to how the L. W. W. idea is soaking into the Mexican movement may be gleaned from the following Declaration of maciples of the Tampico Casa del Obrero Mundial: "The fondamental principle of working class organization is the CLASS PRIGGLEs and the small aim the substitution of the existing system is a system based on the socialization of the means of producting the Capitalist Class, none but wage workers to be additing the Capitalist Class, none but wage workers to be ad-

mitted to membership; and such to be admitted without regard to creed or nationality. No member can accept the nonmination for political office nor advocate political or any other action except direct action on the job. If seems the workpers of Mexico have learned their lesson after a lot of bitter experience just as did the I. W. W., and that they are awakening to the need of clear-set Industrial Unionism now promulgated and practiced by this organization.

What is equally significant is the following from the Secretary of the Casa del Obrero Mundial of Torreon, Coaffinia, Mexico, one of many letters received almost duily at the office of "El Rebelde," the official Spanish organ of the L. W. W.:

"Creeting, Externed Fellow Worker: I the grant pleasure in unifying you that in a meeting held on the 18th of the present mouth (March, 1917), we resulved to shopt the system of Organization of the Industrial Workers of the resulved to shopt the system of Organization of the Industrial Workers of the what we have the sense of the present mouth of the present mouth of the present mouth of the present mouth of the present of the present of the state of mister in the present of the present mouth of the present o

THE HIGH COST OF LIVING

The question of the "high cost of living" is being discussed everywhere. It has lately been brought to the attention of untibuling people by the food rists of New York and Philadelphia.

An investigation by Congress-will 300 feed the workers, their wives and children any more than the investigation of the unemployed problem did in the past.

Studenis of the problem give the following reason for the ever increasing cost of commodities: MONOPOLY, SMALLER CROPS, WAR and the great discoveries of gold and invention of gold mining machinery, making the purchasing power of the deliar smaller.

Wages, while they have risen slightly, have not risen as fast as the cost cold, cleiching and shelter. Granisation is the lever that will raise wages. When you go to a store to buy an article you go the price the store re-decaded or go without. The selfer fixes the price and you, the bayer,

have to pay it.

When you sell the only thing you have to sell—your labor-power—the buyer (the loss) fines the price and you have to take it or starve. Why shows you sell the price of your labor power. It can be done through OHGANIZATION.

THE NEW ROME

A thousand starve, a few are fed,
Legions of robbets rack the poor,
The rich man steals the widow's bread,
And Lasarus dies at Dives' door:
The lawyer and the priest afjinst
The claims of luxury and lust,
To seize the earth and hold the soll.
To seize the earth and hold the soll.
To sione the grain they never reap.
Under their heels the white slaves toil,
While children wall and women weep!
The gods are dead, but in their name
Humanity is sold to shame,
While (then as now) the tinsel'd priest
Shitten with robbers at the feast,
Blesses the laden blood-stained board,
Weaves garlands for the butcher's aword
And poureth freely (now as then)
The sacramental blood of men.
