Dispatches from Minneapolis yester-day stated that the Chicago, Mil-waukee and St. Paul railroad had laid off 1,000 shopmen at that point. Or-ders had been issued, it was added, that expenses be reduced all along

This news attracted unusual interest for the reason that only last week Albert J. Earling, president of the St. Paul, was quoted as saying that Western merchants were cancelling orders. Marvin Hughitt, president of the Northwestern, and other prominent railrand, men, were subsequently quoted as saying that they had been unable to see any signs of trade re-

L'Intransigeant says that in view of the fact that Paulhan holds the altitude record, and Farman the duration record, it is in poor grace for Judge Hand to refer to the "aviation history" made by the Wrights in their years of experimentation.

The Press attributes commercial influ ences to Judge Hand, and makes a play on the verb "voler," which means either to fly or to steal.

## C. F. U. TO FIGHT THE SCHOOL SYSTEM

At a meeting of the Central Fed eraled Union, at Bohemian Hall, East 73d street, last night, a committee of five was chosen to co-operate with the purpose of taking up measures to bring about a proper change in the present school system, which, according to a number of delegates, who

spoke on the question, is detrimental to the interests of labor.

The various delegates who spoke on the question declared themselves in favor of what is called a vocational that the present system is harmful to their best interests.

The purpose of this movement is to enforce a law, making it unlaw-ful for any worker to labor more than six days a week. A mass meeting will be held on March 13, at Madison Square Concert Hall.

Facts were laid before the senator showing that President Diar maintained a double say symstem in this country, one branch consisting of secret service men from the city of Mexico and another branch working under the direction of the Furions Detective Agency with headquarters at St. Louis, Mo. The question is now raised as to
who has offered this \$18,600 reward for the capture of the editor of Punto Rojo. It is certainly not the United States government, for Guerrerro's of fense, if any, is purely political, and if it can be shown that Diez is using the United States Secret Service der which to cloak the pursuit of his political enemies in this country it will go hard with Chief Wilkie.

#### THE ALBANY INVESTIGATION.

The longer the Albany investigation continues, the more names are being involved in the noisome and apparently endless tale of official corruption.

Originally the reign of bribery was represented as having ended th the year 1902 or 1903.

Now it has been shown to have reached down to 1907.

And if the investigation continues into the year 1920, corruption and bribery will still be with us, for they are the offspring of capitalism—of legitimate business.

At first it was only Conger, the bribe-giver, and Allds, the bribe-

Now it is Assemblyman Jean Burnett and Speaker Nixon, both d, and Dunn, formerly state chairman of the Republican party nd Platt's right hand man.

The entire Republican state organization is involved, and Tamany rushes to the rescue. Senator Grady, the Tammanyite, is ling every effort to put a brake upon the inquiry, the end of which no one can foresee.

The politicians of both parties are in a flutter. And the investigation has only fairly begun.

The people have, of course, always known that our present govment is utterly corrupt, root and branch, and through every fiber. They have known that their interests are regularly being sold to the corporation making the highest bid.

But it is one thing to know in a general way, to be morally certain. And it is another thing to have the concrete proofs, to know the names and the dates and the sums of money that changed hands. Some of these proofs are now coming to light. But how little

of the whole hideous truth do they represent. The Evening Post of this city, which may honestly claim the fit for having forced this investigation upon a reluctant and re-

ting Senate, states editorially that the convulsions of surprise and citement exhibited by senators at the mention of new names, are a sham and a pretense. "All the correspondents and the whole press of the state knew

it." says the Post. Why then these convulsions of surprise and excitent? "Not because ignorance was diserted, but because new rears were roused. One name out, the other must come."

"The whole press of the state knew it." Why has this press kept silent until now? Why has it not published the information? Is there a league between the press on the one hand, and the bribegivers and bribe-takers on the other hand? Do the correspondents nish the information which the press refuses to publish? Or do these correspondents suppress their knowledge in order to remain on good terms with the sources that furnish them with informa-

One thing is clear. The Augean stables of political corruption will not be swept clean by the capitalist parties. Theory and experience alike combine to show that these parties are as rotten at the soil in which they flourish—the conflicts of the big business interests for their respective shares of the booty stolen from the American people.

Our political and social life can be purified only by the entrance into it of new and higher ideals.

The Socialist movement is the only one that has raised aloft the banner of new and high ideals.

And yet, the Evening Post, with all its respectability and detation of political corruption, is a sworn foe of the Socialist move

For the Evening Post detests only the symptoms, not the dispolitical corruption, not the festering sore of capitalist exploittion from which it springs.

Two days ago there took place a little scene in the senate of the ited States that serves to illumine the scenes now being enacted the senate chamber in Albany.

A subsidiary of the Standard Oil Company needed an extension of its pipe line through public lands in Arkansas.

Senator Davis, of Arkansas, opposed the granting of the extenn. He fulminated against the other senators. He denounced one of them, Senator Owen, of Oklahoma, as a hireling of the Standard Oil Company. But the other senators only laughed at him, and ously granted the application for the pipe line extension. enator Davis alone voting in the negative.

This is a time for action on the part of Socialists. The inces int massacres of workingmen at their work, and the repeated dens of the courts aiming at the reduction of American labor to efdom are questions that cannot be ignored. They must be met th a positive, clear-cut program. This may take some time for its elaboration. But whatever the plan of action ultimately decided pon, one thing is clear. The facts themselves must be given the ridest possible publicity. It is the duty of the incoming national ittee of the Socialist party to see to it that these ts are carefully gathered and analyzed and presented in an auoritative as well as readable form to the working masses.

The English political situation just now presents all sorts of bewildering possibilities. The Liberals and Conservatives are equally strong in Parliament. The Liberals and Laborites combined can be defeated whenever the Irish cast their eighty votes with the Con-servatives. The Liberals would prefer to let the lords alone. The Laborites and the Irish Nationalists insist on the annulment of the ords' veto power. Another general election, now or in the imme-iate future, seems unavoidable. And since this election will result m a rupture between Liberals on the one hand, and Laborites and salists on the other, the Labor party will be sure to assume a ere assertive and independent attitude than ever before.

I recently received a letter from a Comrade in Spokane who said he had just addressed 2,000 workers in one great meeting, most of whom were American

Some one arose in the audience to say that the workers had no votes. My friend then asked how many of those as-

My friend writes me this as evidence that Socialists must organize the work ers industrially and not politically.

The workers have no votes, he says, then why should we commit the folly of g to organize them politically? any Compades seem at the present ent to be of a similar view and perhaps it is worth while to consider this

bean the workers of most of the Euro-pean countries had no votes. Recently I told the story of Finland where the workers organized a political movement with more members than our American party among workers who had no votes.

The Socialists of all Europe preached for years the necessity of political action to workers who had no votes.

Consider Austria, Russia, Finland, Belgium. If the fact that the workers have no votes condemns the political movement then long ago the leaders of international Socialism must have quit isheartened and discouraged.

But the fact is, the workers of America do have votes, but they have no known how to use them. As a result they have become discouraged with the ballot and to some extent have disfran-

chised themselves.

I once attended a Socialist local in a Southern state where a majority of the men had no votes. They did not care enough for the ballot to pay their poll ay their poll political fight. Yet they, it is to be pres thoughtful, intelligent member

The fact is that both the industrial organization and the political organization of labor must be built up among those workers who have a fairly secure position in the industrial system.
