SOCIALIST VOTE IS **BECOMING GIGANTIC**

Further Returns Show Astonishing Gains in Every State Heard From, Increase Being Rearly Double, and Sometimes Treble.

JUMPS FOUND CREATEST

California May Prove To Be the Banner State, With Connecticut Close Up, Pennsylvania Following and 'New York Coming Well Forward.

The Socialist vote is assuming colossal proportions.

Every new dispatch makes the total grow larger and larger. In the election just past the party had tickets in thirty-nine states, and from nearly every one of these come reports that the vote is nearly doubled.

is nearly doubled.

In California the vote is quite double the total in the previous times.

The Socialist ticket under Mr. Hunelection for governor.

In Connecticut it is more than doubled.

In Pennsylvania it will be nearly doubled.

New reports from counties in the upper part of this state are showing the total up till it may yet be shown that the vote for Charles Edward Russell will pass the original estimate and hope Hunter attributes the increased vote that the control of the counties are showing the total up till it may yet be shown that the vote for Hunter attributes the increased vote and a few speakers."

The greatest gains so far reported are in the Atlantic and Pacific states, with California probably leading in percentage of increase, Connecticut next, New York following, Pennsylvania on her trail, Maryland showing up well, and Massachusetts and New Jersey coming along with healthy increases.

In no state has a loss been reported or even a standstill showing Returns from the Middle states are still somewhat meager Missouri, however, reports an increase, judging by latest returns, of practically 100 per cent. Minnesota has done well, the Socialist candidate harely missing the mayorship of Minnesodis. Illinois, increase is estimated at anywhere from 25 to 50 per cent. From what is learned, Indiana has done extremely well.

In Ohio the size of the Socialist vote was a shock to the capitalist state.

talist politicians, who as usual had kept their noses so deeply buried in the trough, they were entirely unaware of what was going on

around them.

In Oklahoma, though nothing definite has yet come in, the total is certain to be large, and the same way in Kansas.

results so far are amazing. Socialists having won in several localities.

Victor L. Berger will be the only Socialist representative, but
National Secretary Barnes reports thirty-three Socialist legislators
elected in several different states, and Socialist victories in about
forty different cities, towns and counties.

Barnes estimates that the counts of patients are a run in Hartford as I did in Bridgeport, but in the former city my vote was very low. We find that wherever our organization was weak our vote did not increase. That, it seems to me, shows that it is the organization, not the man, which counts.

Our total vote throughout the counts.

Barnes estimates that the total Socialist vote for the country will be in the neighborhood of 720,000, but if succeeding returns continue to maintain the tenor of present reports, a total of 850,000 Socialist votes for the entire country will not be wide of the mark.

W COMPENSATION ACT WORKS OUT

British Worker's Life Valued a Three Years' Wages-Costs Local Owners 4-5 of Cent Per Ton.

By TH. ROTHSTEIN.

(Special Correspondence.) LONDON, Nev. 1 .-- It is well known your New York State workcompensation act, which became effective on September 1, has been modeled upon the similar Engh act of 1966, which itself was a continuation and expansion of the imilar acts of 1897 and 1900.

As is usual in such cases, the pass of your act was preceded by a reat fight on the part of the master lass, and complaints were loud that he new burden imposed upon "inwould crush all enterprise and absorb all profits. As a matter of net, it was stated at the time that the immediate result of the lay would be an increase of insurance rates casualty companies by about 100 per

I do not know whether this turned out to be the case. At any rate, it will be interesting for your working class readers to know how the same law works in its native country, in England. It must be admitted that as bourgeois reform laws generally go, and English workmen's compen-sation act of 1906 is a rather creditable achievement, being almost universal application and providing for a more or less simplified procedure, both in ordinary and litigation It has, of course, plenty of defects and pitfalls, and it does not err on the side of generosity. Nine the less, it is per se a good measure and may well serve as a model to other countries.

How It Worked in 1909.

I have before me now the repor in the working of the act for the year 1909. It comprises only seven groups of industries included in that act, the maining groups being dealt under the former acts. These seven groups are mines, quarries, railways factories, harbors and docks, constructional work, and shipping. contain 117,391 employers, with an average of some 6,500,000 workers. and the compensations paid out in the course of the year were as follows:

Fatal cases	0,341
Average payment	£154
Non-fatal cases	332,612
Average payment	£5 6,
Total compensation	274.238

The latter figure looks respectable and the master class would be naturally inclined to make much capital out of it. Imagine having to pay out 12,750,000, and this, in addition to the

various rates and taxes which the same class has to pay for the other "comforts" of the working class: the schooling of its children, the support of its aged, the maintenance of its sick and destitute, the financing of its libraries, and so forth.

Intolerable, to be sure. But consider the details. What does this sum amount to in relation to the number of workers occupied in the above industries? It only amounts to 6s, 10d. per head per annum, or less than 6d per month, less than 2d, per week. Is that really so intolerable?

How Miners Are "Benefited."

Take the worst case, the mines. No ess than 1988,865 was paid out in compensation in the course of the compensation in the course of the pear, or f1 1d. per head. According 15 FANCY LEATHER to the census of production, recently taken, the net output of the mines in Great Britain amounts to £106,364.006 per annum. This is the selling value to the coal owners, which, of course is considerably lower than its eco nomic and, indeed, its market value as created by the workmen. It represents but a part of the surplus value extracted by the coal owners from the miners, the other part finding its way into the pockets of aff the interme diaries between the coal owners and

the consuming public. But even neglecting this other par and considering only the gain and losses of the coal owners, we find that the above net output, according to the returns of the census, amounts to £129 per person employed, man, woman and child included. This means that the coal owners have to pay away in the form of compensation less than 1 per cent of their profits—a prodigious burden, indeed. The compilers of the report themselves point out that this burden" only works out at four fifths of a penny per ton of coal raised.

The Factory Workers' End of It.

Similarly with the other items. Un der the head of factories the average amount of compensation works out at 53. 5d. per head, and specially in the robbing the house of Mrs. Julia Sherection mills it works out at 1s. 10 \(\frac{1}{2}\)d. man at 126 Brown place. In the flat per person employed. But according the census of production the net output of cotton factories in Great Britain is £46,941,000 per annum, or £82 per person employed. This again surplus value extracted from the workers in that industry, as the value of the output is much higher s the average annual earnings of the vorkers employed amounts to but £48. the rate of exploitation is about 70 per cent. At any rate the amount paid away by the employers in the form of compensation amounts to less

than 1 per cent of the employers gain.
On the whole the amounts paid out n compensation for the various in were as follows:

dustries were as	IUIIUME.			
	Total	Per	Pe	rson
	Amount.	En	aplo	yed.
Mines	£988,865	£1	08	14
Quarries	40,660		98	24
Railways	154,486		88	44
Factories	784.095		38	5d
Docks	109.056		168	84
Constructional.	68.783		158	114
Shipping	128,293		10s	84

£2,274,238 Life Worth Three Years' Wages.

Turning to the rate at which compensation was paid out, we must bear in mind that it is determined by the act on the basis of the average earn-ings of the workers in accidents for a certain period. The rate working out at £154 in case of death will not strike are ignored entirely on account of the period which must elapse before a claim can ve entered for compensa-

As things are, it is only the graves accidents which keep the worker away from work for a considerable time that entitle him to compensation, so that entitle him to compensation, so that the above quoted figure covers chiefly serious injuries, including those disabiling workers for life. Why in such cases the compensation should not equal that ensuing upon death is a mystery only intelligible to the capitalist mind.

Here, too, is a grievance which it is a measure to remedy. For the rest

Here, too, is a grievance which it is necessary to remedy. For the rest, the return shows that the number of accidents of the graver sort during one year exceeds 236,000, thus conjuring up a picture bloodier than the bloodiest battlefield. It is evident that the Moloch of industrialism exacts from the working class an even greater blood tribute than the War Moloch.

ELECTION IN 1911

LONDON, Nov. 10 .- What is known as the veto conference on the consti-tutional issue terminated today with-out any result, after the twenty-first meeting of the conference. Premier Asquith authorized the following state-

'The conference has ended without arriving at an agreement. It is the opinion of all the members that the conditions under which the proceedings were held preclude disclosures in egard to the course of the negotia tions of the clauses leading to their termination."

It is now regarded as inevitable that general election will be held in 1911. a general election will be held in 1911, which will be coronation year, which all the parties have sought to avoid. The government, on the reassembling of parliament in February, will undoubtedly bring forward their measures for parliamentary reform, crippling the lords' veto, and this on its reflection by the upper house will force. rejection by the upper house will force a general election, probably in March or early in April.

Peter Masslow, one of the foremos writers on agrarian questions, has been sentenced to lifelong exile in Siberia The charge against Masslow is that he is a member of the Socialist party.

The trial of the scientist was a farce rom start to finish. It was held be aind closed doors in the Moscow Cour of Appeals. The verdict of exile would never have been reached if the trial had been conducted in open court where the outside world could have had access to the facts in the case and given them publicity.

Masslow has written a great dea about the land question in Russia, sug-gesting remedies for alleviating the suffering of the peasantry, which were in direct contradiction to the ideas about the rights of property of the government and ruling classes.

The Workers Get the Least.

The English land control is still of feudalism, he said, and at least three people have to live off the farm—the parasite landlord—Lord This and Duke Somebody, the tenant farmer and the farm laborer. As usual, the one who does the work for all gets the least. The hand of feudalism and the church is very heavy on the English farm laborer and tenant as well, and any mani-festation on their part of a liberal or progressive leaning would mean ruin

nd the workhouse for them.

That is why all the efforts of the I. L. P. are concentrated on the urban and industrial sections. Likewise Ire land has proved a fruitless field for I. L. P. propaganda, on account of the domination of the clergy and the

bishops.

Mr. Porritt repudiated the claims of the Tories that there is an alliance between the Labor party and the Lib There is absolutely no under standing between them and none to be looked for, and the Labor parts opposes the Liberals wherever they have any chance of winning, captur ing three seats from them in by-elec-tions since the last parliament was

By THERESA MALKIEL,

At the monthly meeting of the Woman's Trade Union League, held at the league headquarters November 1, after the regular business was over Miss Younger, of California, told her Eastern sisters about the bravery, per sistence and heroism of the Western trade union women.

She Jescribed very eloquently how in the face of almost insurmountable difficulties several thousand laundry workers defled the men in their trade and went out on strike, subsequently winning a victory for themselve, and their skeptical brother workers.

She brought forth hearty laughter and exclamations of appreciation by telling how the waitresses went out a strike in one of the largest restaurants Unable to come to terms with their employer, they sent forth a num-ber of pickets, who exercised their lungs by shouting, "Unfair house; unfair house!"

Women Show Resourcefulness.

They were afrested and forbidden to continue their exercise. The next evening a number of women were selling matches in front of the same place, and each purchaser was in-formed that the restaurant in ques-tion was unfair. As soon as the irm found it out they secured an injun-tion against the waitresses' union, forbidding them to carry on the rade. But the following evening matches were being sold by a group of men. and the firm took out a second injunction—this time against the walters' union. They were followed by the cooks, as match sellers, and when for Socialism is just beginning. It has so of the registration in this section we are now going to best mematic distribution of literation the district. We will see to it workers in their trade. At the usual hour, in front of the scab restaurant, appeared a good-sized donkey carrying a large sign, which bore the inscription. "Unfair House."

Jackass Baffles Judge.

In post haste the enraged employers ook the donkey to court and placed it before the grave judge, who solemply declared that he could not very well issue an injunction against a donkey. And thus did the donkey march out victorious in the struggle resuming its former place and dum accusation of the equally stubbor

Nor are the Western trade union women an exception of the rule. Lis-tening to the reports of the various committees, it was clear that the New York Woman's Trade Union League is almost as resourceful as the witty Californians. When the league found that the Italian girls were the stum-bling block in the famous shirtwaist strike, the cloak makers' strike and other industries under the supervision of the league, it exerted its utmost power in the attempt to get them within the union folds. And when all the efforts made proved practically futile, the league decided that the trouble lies somewhere else and turned its attention to the patiently suffering, atubborn creatures-the st perstitious, ignorant families of the

Italians Being Won Over.

In committees of two or thre, with an Italian interpreter at their side, the members of the league, under the direction of the Italian Organizer Corato, are invading the squalid Italian quarters. Patiently and persist-ently they explain to them what dangers their children face when compelled to work for starvation wages what protection the union and the league offers to its members, how much it elevates their mortality. And thus day by day, step by step, the league is gradually weaning the Ital-an mothers and fathers from the old stered prejudice that it is not wom-

On the great East Side among On the great East Side among the shirtwaist makers, for whom the league did such superhuman work; among the human hair goods workers who, thanks to the efforts of the league, were lifted from a life of misery and starvation; among the misery and starvation; among the white goods makers who still drudge on for a miserable pittance, their eyes turned expectantly to the league; among the milliners, who also owe their existence to the league; among the hat trimmers whom this body of brave women upheld during the entire period of their long struggle; among the cloak finishers, the fur-riers, for whom the league continues to work untiringly, and the cordage workers who, during their bitter struggle, found the league the only true friend they ever had, as well as among the corest workers, the author-ity of the Woman's Trade Union League is supreme. At the first threat of appealing to the league against them the employer and the despoticaly inclined labor leader become as

In the necktle strike now on in the city the organizers of the league have succeeded in breaking down the prejudice of the American boyn girl against the trade union organization. Nor do the league organizers hesitate from penetrating behind the magic circle of the Fifth avenue establishments, where thousands of skilled workers are employed.

Having indorsed the demand for a union label the league went to work and pushed that demand with the energy and persistency possible only among enthusiastic women. Some of the big dry goods houses in this city were brought to bay at last and compelled by the league's activity to carry a union made line of goods. Thus it happened that when Gimble Brothers put the finishing touches to their new store they took care to place big signs assuring their customers that they carried only union made goods. The league is at work now to verify these americans.

What Berger

As was to be expected, Comrade Victor L. Berger was elected to the United States Congress. He is the first Socialist to reach that important body.

From now on the workers are assured that they will have a champion to fight in their cause when measures are brought up for consideration. Labor is now certain of one representa-

What was the reason for Berger's election? Was it Nothing of the sort! It was work. But let Berger speak for himself:

"The United States of America now gets into line with all other civilized nations of the world, and the working class of Milwaukee has the immortal honor of starting a new chapter in American history. THE REASON FOR THIS IS OBVIOUS. THE WORKING CLASS OF MILWAUKEE HAS BEEN EDUCATED BY A LITERATURE PROPA-GANDA FOR MANY YEARS."

There you have it in a nutshell. THE SOCIALISTS CARRIED MILWAUKEE BECAUSE THE WORKERS WERE EDUCATED WITH LITERATURE.

That's what did it. LITERATURE! LITERATURE! LITERATURE!

We of the East, fortunately, have learned this important lesson. We have learned that the only way we can reach the workers is through THE WRITTEN WORD. That is the most effective medium. Literature does more than any-

We of the East are lucky inasmuch as we have a good Socialist daily newspaper. The Daily Call is a paper that pays a daily visit to its readers. The non-Socialist who subscribes for it is sure to become one of the army of Emancipation—is sure to join the Socialist Party of the World.

If we of the East hope to do what Milwaukee did we must build up The Call. We must get a great number of subscrip-Of that there is no doubt.

Why not get busy now? This is the best time-just after the political campaign. This is the best time to get ready for the campaign of 1912—Now, Now, Now.

By getting Republican and Democratic workingmen to read The Call NOW you are sure that they will be ready to help spread the message of Socialism before the next Socialist party campaign begins.

How about you, Comrade? Are you going to give us a We hope you will. We expect you to get us at least one new reader before the week is passed.

EARTHLY FACTS ARE ANNOYING.

FRIDAY, NO VEMBER 11.

Rev. Ralph J. Walker, of St. Simeon's Episcopal Church, the Bronx, introduced, at the diocesan convention held in Synod Hall, a resolution favoring the striking express men. According to re-"a look of extreme annoyance crossed the face of Bishop The Call.] Greer," who was presiding, and many of the clergymen started to howl Mr. Walker down. Probably he had in mind, when he introduced the resolution, some vain and futile idea of expressing sympathy with the abused, wronged and struggling workingmen.

But such a desire was out of place. The clergymen assembled were attending to the regulation of affairs in the next world, and they were quite confident that Mr. Morgan, who owns many of the express companies and who is also a member of the church, is perfectly competent to take care of affairs in this world.

No wonder, therefore, that Bishop Greer was annoyed. What if men work sixteen hours a day? What if they are engaged in an occupation that wrecks the body? What if they may be thrown on the street at a moment's notice? What if their pay is not sufficient to meet the barest demands of life? Are those things which a great church organization should face? Wrongs long continued may the gravest attacks that have for years ago. So it is, liberty being in danger, that this large assembly has come together to consider one of the gravest attacks that have for years ago. drive men to desperation. Well, after they are desperate and commit the crime of getting by force the living society denies them the privilege of getting by work, that is, after they have "sinned," the church will attend to them. After they are broken or thrown the street with no chance to make a living, the church will attend to them. After they are broken or thrown on the street with no chance to make a living, the church will turn from its habitual work of considering affairs in the next world, and will investigate their case as objects of charity. Besides, there is that useful scriptural evasion of rendering unto Caesar the things that are Caesar's. Today capitalism is Caesar, and workingmen who strike are not rendering unto Caesar that which is Caesar's. So naturally Bishop Greer and many of his fellows were exceedingly annoyed and crushed out real discussion on such an earthly thing as an express strike in which men are struggling for more material bread and for such decent treatment as may be wrung from the master class in capitalism.

It was right to reprove the daring disturber. For he no doubt also delayed discussion of the important question, Why do men

WOMAN'S TRADE UNION LEAGUE.

Tonight at Grand Central Palace there will be given a grand ball and entertainment by the Woman's Trade Union League, and it will be one of the most enjoyable events of the early winter sea-Furthermore, the organization for which the ball is run is one of the most important we have. Woman is no longer an exception or an accident in industry. She is a fact, multiplied over and over again in practically every trade. On the increased number of women who take up the work of strengthening the unions depends largely the effectiveness of unionism as a whole.

So there are many reasons why you should go to Grand Central Palace tonight. You will have a splendid time, and you will assist a splendid cause; you will be helping the formation of unions of women and you will be strengthening unions of men.

OUR CHANCE IN MEXICO.

Merely because we burned a man at the stake various discted and dangerous elements in the city of Mexico tore down Old Glory, dragged it in the mud and spat upon it. For this there is no punishment too severe. While punishing them we might as well get something, either a little more of Mexico's territory, or an indemnity, or a mining or ranching concession, or some privilege or something like that. There is no good in patriotic indignation unless it can be made to pay.

So far, governmental relations and the relations between the capitalist class of Mexico and the capitalist class of the United States have been fairly harmonious. The Mexican government has conceded enormous privileges to American capitalists. The un-patriotic and disaffected Mexican people view this act with even ore suspicion than they view the same grants of Mexican capitalists. But Diaz and his government have them well in check. So their protests have been futile. But when base, disloyal passion was aroused simply because we burned a Mexican at the stake, it ecomes evident that we shall have to punish the Mexican people. It also becomes evident that we should take something away from We, always, means the capitalist class.

WE LOVE A HERO.

Mr. Roosevelt now knows what it is to be both "the idol of the people" and a scapegoat. He is blamed for the Republican day's work the change was made and slump. His talking for the Republican candidates is blamed for the defeat of those candidates. Both Democrats and Republicans, with slump. His talking for the Republican candidates is distinct the defeat of those candidates. Both Democrats and Republicans, with sanimity and glee, are jumping on him and kicking him. For we arly love a hero, and idol, for we know that later on we can kick e and stone the other.

In that respect we are like every other people. Believing that e man can lead us out of the difficulties that beset us, we hail him and worship him until we find that he has the power of one man, and no more. Then we abuse him, in somewhat the same spirit that the savage burns or destroys the idol that failed him in battle.

But in blaming Roosevelt there is no necessity for crediting him with too much. The New York World, for instance, fatuously and feelishly asserts that Roosevelt is responsible for the Socialist ad-The Socialists, conscious of the years of hard work, knowing that thousands on thousands of Comrades have worked tirely year after year, can laugh at such a statement. The Socialist advance is the result of Socialist work, work by the Socialist orisation, and no credit for it is due to Roosevelt's blundering. His abuse did advertise the Socialist party, but to make the adver tising successful the Socialist organization had to do further work. Such a statement as that made by the World can cause only a laugh of derision among the Socialists, for they are conscious of the unremitting, steady, hard work the party members have been doing and the efforts they have made for the cause the World and the other papers pretended to despise and sought vainly to ignore.

THE WORKERS REMEMBER.

Today is the anniversary of one of the foulest judicial crimes committed, the murder of the men who were sacrificed to respectable mob violence because of the trouble in the Haymarket spectable mob violence because of the trouble in the Haymarket, Chicago. Twenty-three years have passed since the murder took place, but the courts of capitalism, despite their rulings, and the papers of capitalism, despite their slanders, have not been able to bury the memory of it. Those who were sacrificed to the bloodlust are not dead. They are a living force, and their potence grows greater from year to year with the increase of the strength of Socialism. This is a day to be remembered, and one that will long be remembered, for the frame of mind, the desire that led to the militaler that took place twenty-three years ago today, are still der that took place twenty-three years ago today, are still the ruling class, and they would re-enact the drama if they d. But they cannot. Their power is slipping away from them y tried it with Moyer, Haywood and Pettibone, and failed. For

"When liberty is in danger, Fanculi guarantee of its mertorious cause Hall has the right, it is her duty, to strike the keynote for these United States."

These were the words of Wendeli been made upon the life of one of the foremost trade unions in our country. Cigar Makers' International Union of America. The assailants are the Tampa, Association of by all the powers of city and state; a prejudiced press; a bitter public sen-timent and the citizens' committee armed with Winchesters, who by an utter disregard of the rights of workmen guaranteed by law to all men, are trying to drive cigar workers into submission to the tyranny of unscruulous employers.

Let us briefly consider the condition of affairs in the cigar industry of Tampa, Fla.

whose population numbers about 39,000, is almost a one-trade city—the cigar industry furnishing about 65 per cent of the commercial ncomes and employing about 9,000

A committee of five prominent manufacturers was appointed by the Cigar Manufacturers Association to make a factory to fac-tory visit; and recommend the changes as agreed upon. This com-mittee devoted the entire week to the work, meeting with the heartiest co-operation of the factories and their employes. Too much cannot be said n commendation of the manner in which the situation has been handled

Then next move was to induce tobacco workers of Cuba to come to Tampa by what is known as the "cigar makers rate." From Cuba to Tampa the fare is \$5, while the return fare is \$12. The union officials appealed to the law. Whereupon the immigration officials ompelled the cigur makers who were of the allen contract labor law to re turn to Cuba. A citizens committee, led by W. I Stovall, editor of the Tampa Mornin Tribune, and Colonel Hugh C. Mac-farlane, the so-called "father of West Tampa," was organized. This commit tee during the progress of a meeting marched into the cigar makers' union headquarters, broke up the assembly drove the men on to the street, closed the hall and nailed a placard on the door which read: "This place is closed for all time."

In the name of law and order, thes self-constituted guardians of the city instituted charges of conspiracy which the situation has been handled by the officers of the Manufacturers' Association, and the committee representing the cigar makers, and both sides are to be congratulated upon the clear business-like adjustment."

From all appearances union affairs were progressing agreeably in the cigar trade of Tampa. The unon men were by peaceful persuasion inducing their fellow craftsmen to Join the union, only a small percentage of whom were still unorganized. But no bigger than a man's hand a cloud was seen upon the horizon. Some of the Tampa cigar manufacturers began to fear the increasing power of the manufacturers began to fear the increasing power of the manufacturers began to fear the increasing power of the manufacturers and the officials of the joint advisory board of the cigar makers' unions. Socialism has grown since that tragedy in Chicago. And, while the working class remembers, it is well also to remember a brave man who stood against the public opinion of his day, Governor Altgeld, who pardoned the imprisoned workingmen who were not hanged, and who wrote an opinion showing the whole contemptible conspiracy of which they, as well as their dead brothers, were the victime.

Many good citizens of Tampa hav peen aroused to a condition of frenzy passion has taken the place of rea-on. Misled by the editors, the citzens' committee, the mayor and the Cigar Manufacturers' Association, the only see one side of the issue involved, that of the employers.

Absolute liberty for a thorough

inion of the manufacturers is taken for granted, but no such liberty for the tollers. It now seems as if nothing but a complete submission on the art of the cigar makers will appease heir anger.

The editor of the Tampa Morning Tribune, he who swore out the con-spiracy charges against the trade union officials, in his editorial rantings coes so far as to say that "the agitators don't care a rap for their so-called 'union principles,' but are acting in pursuance of a deliberate plan to bring ruin and disaster upon thu In a double column editorial streets of Tampa and wherever they find a cigar maker who is out of work, shall be arrested. More vicious still, on finding a cigar maker's wife or children in needy circumstances they shall be taken to the station house, charges of being without visible means of support lodged against them and the cigar maker himself be sent

to jail under the vagrancy laws.

Perkins, president of the C. M. I. U. of A.

Let us inform the citizens of Tampa that there is no position in the cigar makers' unions of the whole United States or across the border to Canada that pays \$6,000 a year or even onepresident of the cigar makers' union and there is as yet not the alightest cvidence that Jose De La Campa desirous of becoming a nominee the position. Moreover, that our present able incumbent receives insignificant sum of \$1,500 a year for

his services. Changing its tune, the employers trade paper, Tobacco. says: "That the present trouble in Tampa must be laid to the greed of the officers of the International Union." "The officers of the Cigar Makers' Internations Union looked more and more longing ly for the \$1,000 a week and more that might be collected if the Tamp: cigar makers could only be brought by moral suasion seemed hopeless however, and then the plot

formed to precipitate a big strike.

President George W. Perkins answers this ignorant and prejudicial charge in this month's issue of the ligar Makers' Journal, to quote:

"Tobacco, a hostile trade pape published in New York, published long screed in which it rehashes the old canard that the officers of the In-ternational Union started the Tampa 'scrap' in order to organize the work ers there so that their weekly dues could be sent to Chicago and handled by the hereinbefore mentioned inter-According to the stuff handed out by this dopester a golden stream of all the way from \$100,000 to \$250,000 was to flow into the hands of the international officers

"As a matter of fact every one possessed with an ounce of brains knows that the dues of the members are collected by local officers and held in the funds of the local unions and that not a dollar of it goes to the interna-tional office except for the actual running expenses of the internationa.

"No institution on earth 4s run cheaper than the international union. These facts are well known to every-body, yes, including Tobacco."

Many persons in Tampa have in-tentionally or unintentionally lost sight of the fact that it was because the cigar makers had by "moral suasion," succeeded in organizing all but about 10 per cent of the tobacco workers of Tampa that some of the cigar manufacturers began the attack upon the union members. They dis-charged union employes as Saturday followed Saturday. When the union protested, the Cigar Manufacturers ciation locked out the entire making force of the city, about 9,000

A study of the constitution, the by-laws and the history of the cigar makers' union is proof positive that both the interests of the manufacturers and the men employed are bes aced the cigar trade of Florida, by the C. M. I. U. of A.

the C. M. I. U. of A.
Moreover, what is fair for one set
of men is fair for another. The cigar
manufacturers have a thorough organization in Tampa. Not a word of
protest has been uttered against its
high-handed action. On the contrary,
it is given every encouragement per high-handed action. On the contrary, it is given every encouragement possible. In a manifesto, which it is sued about ten days ago, the cigar makers are told that in the event of dissatisfaction arrising in their factories their employes may "explain their complaints to the preprietor or his representative; and if these complaints are not properly attended to, to have the right of appealing to the Manufacturers' Association." This manifesto is signed by "The Clear Havana Cigar Manufacturers' Association."

Though the point at issue here spire, combine and confederate to is the right of organization. If liberty is not endangered by a of the manufacturers, why is libert endangered by a union of the work The case for the union stronger yet. It is nothing more than fair play for the citizens of Tampa to hold in mind that an association of manufacturers is primarily for the protection of property interests. And the trade unions have nothing to say against the protection of property inagainst the protection terests, but we insist that the asso ciation of workingmen being prima take first rank in the regard of goo

shall rise again, just as sure will the cigar makers in their organized capacity oppose the despotism of the Tampe igar Manufacturers' Association Our purpose of protest is to recall to the attention of the good citizens of

Tampa the main issue involved in the present unfortunate condition of affairs. Namely: The right of work men to negotiate collectively for th sale of their labor power, and for the adjustment of conditions of employ-ment. We desire to insist upon the fact that trade unions do not encourare lawlessness; aside from its injus tice and immorality, we know it to be useless. We know by experience that whenever during a strike violence has been manifest, it has invariably in the cause of the tollers. And the enemies of organized labor know this only too well. Often an outrage has been encouraged to defeat the

trade unions.
We are ready to submit, from the evidence taken from the files of his cials of the trade unions of Tampa but to the editor of the Tampa Morn ing Tribune should be laid the disorder of the city.

The editors, the mayor of Tampa, Col. Hugh C. McFarlane, the Cigar Manufacturers' Association and the citizens who have lined up with them mistake the meaning of LIBERTY when in its name they try to prevent the organization of the cigar factorie of their city. We call to the attention of the chivalric citizens of Florida the closing words of Webster, which healed the wounds of this great nation. They are written beneath this great painting above this platform here in Fancuil Hall. The motto
