ture Eight Towns and No Settlement Yet, as They Can't Swallow the Symbol of Unionism.

It became evident yesterday that a settlement of the taxicab strike now hinges upon the question of the fight of the strikers to display the union

The striking chauffeurs claim that municipal employes, such as street cleaners and park employes, are alowed to wear the button of their trade organization, and there is no reason why private concerns like the taxicab companies involved in the strike should not grant their employes

the same privilege.

A committee of eight from the striking chauffeurs, headed by President M. C. Perkins, of the union, met and Pacing and Pacing all trains to operate allowing allowing all trains to operate allowing allowin

apector Schmittherger to use their clubs freely on strikers and to prefer charges not of disorderly conduct on those of the strikers or sympathizers whom they arrest, but of felony.

Perkins declared that the cases of visience in connection with the taxi strike, which have been given so much space in the capitalist papers, have, just as on previous occasions, been committed not by strikers but sympathizers and passersby.

The differences between the express drivers and the express companies which caused so much speculation were settled early yesterday morains, when the expressmen, urged by Organizer William H. Ashten, accepted the proposition offered them by the express companies.

the proposition offered them by the express companies.

The agreements signed stipulate an increase in wages of from 5 to 5 percent and an eleven hour workday. But this magnificent settlement did not extend to the employes of the Adams Express Company. They got even less. That the employes of the Adams company accepted the offer of the company was due to the persuasion of Ashton, who for four and a half hours argued with the men to accept the proposal of the company for the present, agd later he would try to get the Adams company to grant their men the same conditions which the other express companies granted their drivers and helpers.

SAYS SECRET SERVICE STIRS UP STRIKES

DRINIDAD, Cole Disc. 1 The ext. New Book Tells How Garmany Supports Spies in France.

LONDON, Dec. 1 .- Germany spend \$3,900,000 annually on the secret services staff it maintains in France, according to a book called "The German Spy Sys-tem in Europe," by Paul Lanoir, which

has just been translated into English.

Lanoir says the spies are recruited from all classes and generally serve a probationary period in Germany before they are sent abroad. Herr Stieber founded the system, Lanoir asserts, before the France-Pressian and averaging all averages. franco-Frussian war, traveling all over the country getting reports from his 1,800 agents without being suspected, and with his two chief lieutenants accom-panied General Von Moltke when the first trainload of German invaders occupied France in 1870.

preme Court decided today that street railway companies are not included in the act of last year extending the employers' liability act by making railroads liable for accident to their employes, caused by the negligence of fellow workmen having charge of any signal switch, locomotive or train.

Since the passage of the act, which changed the rule of liability in so far as railroads are concerned, a number of suits have also been brought against street railway companies. The decision cusposes of the latter in favor of the trolley companies. The case in which the opinion was handed down was instituted by James Conover against the Publis Service railway company. The court sustained a demurrer filed by the company. Germans have been replaced by an equal a part of the Dallas ice and fuel plant and other property. The loss will spen to less suspicion. UTICA TAILORS WON'T SCAB ON CHICACO

Garment Workers' Struggle Is Given Support in Upstate City.

(Special Correspondence.) UTICA, N. Y., Dec. 1 .- The great Chi-

cago strike of the garment workers has its reflection in this city. Saturday it be came known among members of the Tailor Coat Makers' Protective Association that they were getting worf krom out of otwn to do. Investigation soon proved their suspicion to be well founded. Three shops that usually do work for local manufacturers were found to be doing work for Chicago firms, and it was not very long before a strike was declared against Max Lyons, Ike Donovski and Simon Donovski. Solidarity among workers. Not only did the members of the Tailor

Coatmakers Protective Association walk out, but most of the others as well. One girl being called upon to do work on the garments from Chicago, projested, saying she did not care to work on scab goods. she did not care to work on scab goods, and when told by the boss, that it was none of her business she quietly gathered up her tools and left the shop. In our Utica morning paper an article appeared telling out pent up citizens that gangwere creating disturbances in the neighborhood of the three shops mentioned and the state of it was necessary to have police protec-tion there to quell possible rots. SONGBIRD TAKEN

Recent cable dispatches from London, which had first reported and then denied that Ethel Leneve, the former companio of Dr. Crippen, had taken passage for this country on the White Star liner Majestic to fill a vaudeville engagement, gave occa-sion for a rigorous search of the vessel by immigration officers when the Majestic

reached quarantine yesterday.

No one was found on board who answered the Scotland Yard description of Miss Leneve very closely. There seemed no reason to believe that she was Ethel Leneve. She was taller, more slim and darker than the typist in the Crippen case.

Miss McNaughton said she was a sister of Tom McNaughton the Lendon

ter of Tom McNaughton, the London vaudeville manager, and that she was coming here to fill an engagement at a music hall. She made unsatisfactory statements, however, about the engage to catch the Majestic at Queenstown which seemed an odd thing for a second cabin passenger to do. She carried as baggage a suit case and a trunk.

GOVERNORS DISCUSSING WORKINGMEN'S RISKS

LOUISVILLE, Ky., Dec. 1 .- The conference of governors this aftertoon resolved itself into a "field day conference" for various subjects, the executives being permitted to bring up any subject they desired. The morning session adjourned at o'clock for luncheon, after a lengthy discussion of the "employers' liabiland workmen's compensation acts," and an address by Governor John Franklin Fort, of New Jersey.

on "Direct Primaries."

At the opening of the session this morning the discussion of the compensation acts, which came up for the first time on Wednesday afternoon, was resumed. Governor Hadley, of Missouri; Governor Norris, of Montana; Governor Marshall, of In diana, who prisided; Governor Mann. of Virginia: Governor Noel, of Mis sissippi; Governor Deneen, of Illinois, and Governor Brown, of Georgia, were among those who took part in the

Governor Hadley introduced a reso lution, which was adopted, providing that each governor should report to vestigations by commissions of their own state into the liability and compensation acts. Contributory negligence, comparative negligence, com mon law rules and the doctrine of option were the points which came before the conference during the discussion. It was the opinion of mos of the governors that a law providing for the payment of a certain amount of money to a workman injured or to the family of a workman killed was the best solution of the problem.

The payment of a certain sum for the loss of an arm, a certain sum for the loss of an eye and for loss of a leg would do away with litigation and would result in the workman securing more money for an injury han is usually secured now through litigation.

Following the discussion of the liability act, a discussion on conservation was resumed. Governor Deneen, of Illinois, was one of the principal speakers on this subject. It is probable that the governors will try to conclude the conference with the session this afternoon. Many of them have to leave Louisville for their homes on account of state business.

SOFIA, Bulgaria, Dec. 1 .- "The Mace donian situation is rapidly becoming in-tolerable," according to T. Nikoloff, the traveler, who has just crossed the frontier into Bulgaria after a tour of investiga-tion of conditions in the adjoining Turk-

CHURCHILL IN DISGRACE AT ENGLISH COURT

LONDON, Dec. 1 .- King George is reported on the court authority to have cut Home Secretary Winston Churchill off the list of his acquaint--officially as well as socially. If there is business to pass between them it must be through an intermediary The king is understood to have told Premier Asquith he would never see Secretary Churchill again. As a mater of legal right, Asquith might have forced George to revoke this order, but that would have created a mighty scandal, and the king would certainly have had the sympathy of his sub lects in demanding that he pick his wn acquaintances.

The quarrel between his majesty

and Churchill is said to have arisen from the former's habit of reading over personally every state paper submitted to him to sign. Inasmuch as the home secretary must have a vast this entailed a great loss of time. THE OSBORNE CASE THOUGHT REVERSED

LONDON, Nov. 30.—Justice Warrington gave a ruling in the chancery court
today which has an important bearing on
the recent Osborne judgment, which declared that it was illegal for trades
unions to employ their funds in paying
members of parliament.

The ruling of the judge was, in fact,
that the union was technically an illegal
society, inasmuch as its rules contemplated doing what was contrary to public policy, namely, restraining a member's freedom in regard to employment.
The appeal for an injunction was refused.

fused.

It is argued in some quarters that this is practically a reversal of the Osborne-judgment, as, according to today's decision, a member of a union who refuses to assent to a levy for the support of a member of parliament can be expelled and will have no recurse at law. Thus, it is calmed, the legislation which the Laborita members of parliament demand for the revessal of the Osborne judgment is unnecessary.

Talk about another strike of expressmen was general about the offices of the express companies yes-terday. Just what was the object of this talk is hard to tell. It was said that the companies talk about a strike so as to have the chance to make the threat to their employes that they are not "unprepared" and they "will run their wagons, strike or no strike." The companies figure that such talk might put a dampe on the demands of the men for high

Another story, which floated about during the day, was to the effect that 500 strikebreakers are being held in readiness at 153 Hudson street. express companies were quick to claim any connection with the strikebreakers, wherever they are, and said that they are probably being held by some strikebreaking agency "on speculation, in anticipation of a possible strike of expressmen."

NEW KIND OF VIOLAN.

ROSELLE PARK, N. J., Nov. \$6.—
A violin that can be played with keys as a piago is played has been invented by James L. Warner. It is somewhat like an upright pisno. The violin effect is produced by a series of flexible rubber bows, one for each string, operated by a band which is set in motion by a treadle. As each key is present it brings the requisite bow in contact with the string and produces sound until released.

TO CUT WAGES OF THE STEEL WORKERS

The Iron Age, generally considered one of the authoritative organs of the steel trade, said yesterday in speakmillions of men, women and child ing of business conditions, "that the readjustment now going on will exend further and in a way that will effect labor, is a growing conviction."

At the meeting of representatives of the steel companies held yesterday afternoon, the same opinion regarding the "readjustment that will extend further and in a way that will affect labor." (a polite term for cut-ting wages) seemed to prevail. One of the men in the conference said that the fact that the mills were running but 50 per cent of capacity told, of course, a story of much idle la-bor. He hoped that the business reaction would not go so far as to ne-cessitate reductions in wages and said that the conferees had very little to say regarding wages and that no re duction is contemplated by any of

The men who were not taken back after the strike, because of participating in acts of violence, are also string to stir up fresher. The companies do not want another strike. It is the last thing they would like to see and they are living up absolutely to the letter and spirit of the agreement, but they never, under any consideration.

The United States Steel Corporation, it was learned, contemplates no early reduction in wages, and if cuts are made in the near future, they will be made by the independents just as independent companies led off last year. It was the concensus tast despite reductions in number of employee, the labor employed is "contented and efficient."

You who are contesting for that \$100 MONARCH TYPEWRITER know, of course, that it is all for the benefit YOUR paper-the paper of the working class-THE

It is not carried on just to give somebody a typewriter or some sort of a reward, but to help place THE CALL on a firmer basis.

That is the real reason that we began this contest. We

do not hide that fact—we make no attempt to do so.
THE CALL NEEDS HELP. Therefore we decided that a contest would do much good to make THE CALL reach a wider public. So far we have no cause for complaint. YOU HAVE ALL DONE GOOD WORK. You have given the circulation of your paper, THE CALL, a good boost. 'We are glad to be able to say that to you.

All we care to add is that WE HOPE YOU WILL NOT STOR We want and expect you to continue your good work in gathering subscriptions for this paper

Subscriptions are the things we need more than anything else. They are the most useful things we can use. Advice and praise are good in their way, but sub cards are more effective. If you want a better paper you won't get it by knocking. That only makes work harder. THE BEST WAY IS TO BOOST THE CIRCULATION.

Circulation is the thing that counts. CIRCULATION IS THE THING THAT PAYS THE PIPER.

We are getting out a good paper. All say that. But we are not satisfied. WE WANT A BIGGER PAPER. WE WANT A PENNY PAPER. WE WANT A BETTER PAPER. Those are some of the things we want. And we also know that THE ONLY WAY WE CAN POSSIBLE OF THINGS IS TO HAVE OUR MALLING. GET THOSE THINGS IS TO HAVE OUR MAILING LIST INCREASED.

MILWAUKEE DANCE MEETS WITH FAVOR

MILWAUKEE, Dec. 1 .-- Milwausee's public dance plan is attracting favorable comment in different cities, and in all probability before long other cities will be following suit. Mayor Keller, of St. Paul, publicly expressed his approval of Milwaukee's municipal dances, and told the people of St. Paul why people should have a place of meeting on social equality:

"I think that it holds great possibilities for a better understanding sia is the latest acquisition of terbetween all classes, and if it works out as well as its beginning promises. it will be an influence for great good, said Mayor Keller, speaking of Saturday's dance. "In a country such as this, whatever makes for a freet mingling of rich and poor is a public gally bound to serve ten years of benefaction. The rich man finds that the poor man has brains, and the quire the right to throw up their poor man fieds that the rich man is a human being and has sympathy and kindliness.

"I also like the idea of the dance itself. We do not give enough time teachers' seminary. to play. The golden age of the world Mecklenburg teachers being execrably was an age of joy, when people took bad, eleven peons of the hornbook time to dance and to sing and to men that class hatred must

Startling allegations about the prevalence of the sweating system in the linen trade at Belfast and the north of Ireland generally are made by Dr. H. V. Baillie, superintendent officer of health for Belfast, in a special report which he has just presented to the corporation. Dr. Baillie, after congratulating the city authorities on the improved health of the city, as shown there is still a lot of room for improvement and proceeds to show how by the excessive work they are comrelled to perform for miserable pay. found a most practical addition to Few Americans who buy with delight chiefs and other linen goods which are exported from Belfast in such enormous quantities realise that the low prices at which they are sold are due to the fact that the very lives of the workers are expended on them. Dr. Baillie tells of one case, in which a woman, the sole breadwinner of her family, was embroidering small dots on cushion covers. Each cover contained 308 dots, and for making this number the woman was paid 2 cents which made her daily pay for about fourteen hours of work 12 cents About the same amount is daily earned by the girls in the shirtmaking trades. They work on shirts costing \$2.50 each in the United States. For the indiscretion he committed in publishing these facts Dr. Baillie is savagely taken to task by the linen manufacturers of Belfast, who threaten with a suit for libel.

The following resolutions were unanimously adopted at the People's Forum meeting in Hart's Hall on Sun-day, November 27:

Whereas Fred D. Warren. editor of the Appeal to Reason has been sentenced to six months imprisonment at hard labor and to pay a fine of \$1,500 for demon-strating that there was one law for the capitalist and another for the workers, as proven in the legalizing of the kidnapping of Moyer, Haywood and Pettibone and the judicial condemnation of Warren's offer of a reward for the kidnapping of ex-Governor Tay-lor from Indiana and his deliver-ance to the authorities of the state of Kentucky, in which state he was under indictment for the Governor Goebel;

SAVING MONEY

Brandeis aroused the interest of railroad men by saythe roads of this country are run in a wasteful manner, the liberty loving men all over Europe had to suffer relentless persecution. Structive high treason, were found guilty. We have seen the so-called Chicago so directly at the source of "saving" Mr. Brandeis To increase the fat dividends and the fat sary only to make the workingmen do more many men as possible and distribute their thers. It is a very comprehensive, alluracted on cheerfully by those who now

uch employers may balk at listening to sugtions along other lines, they are always anxious and ready to en to any suggestion whereby they can reduce the number of

re work that is done by the men the better it is for the over. The more men that can be thrown out with no diminuproduct the better for the employer.

So this gorgeous plan of Mr. Brandeis means nothing more less than the scaling down of the labor force. The men who are ow producing the profits will produce bigger profits. Of course, re might be something saved in the way of human life if the reads took proper care of the men who are now producing the ofits Mr. Brandeis thinks inadequate. But that would necessitate lessening of dividends, and dividends are sacred. Mr. Brandeis out to save money, not save lives. He does not mention whether not, under his plan of making fewer men do the work now see by a larger number, or through making the present force work harder, he would increase the danger. The last reports wed that railroading is becoming more and more dangerous. A larger number of men are killed, a larger number are injured.

If a smaller number of men have to do the work or if the presforce has to work harder, will the men in the industry have opportunity to look out for their own safety?

That question does not enter into the consideration. Let the men look out for themselves, if they can. Mr. Brandeis is looking out for profits. His remarks about saving a million dollars a day caused intense excitement among the stockholders and officials of the roads. The recent report concerning accidents hardly caused a ripple. Probably it produced nothing but a yawn, for it really is an old story.

But to save money—there is always something exciting about

THAT CORRUPTION FUND

Those who are investigating the fund furnished by the Jockey Those who are investigating the fund furnished by the Jockey Club have been surprised at the fact that the fund seems to amount to half a million. They should not be, as not a dollar of it was honestly earned. All those interested in the Jockey Club are aristotrats, men who live on the earnings of others. They do not have to earn a dollar before they risk it. If they lose they simply have to agree down their working records a little header and the simply have to agree down their working records at the fund seems to amount the amounts concerning the deeds of the women who had learned that mentaged to the women who had learned that mentaged to the success. So, by many devious the interested in infancy, leads him in adolescence, ministers to him in factor in all his activities, the interested me. But it was fear-fully hard work, for this Man of Activities, was the mentaged to the mother of the race, who success him the interested to the mother of the race, who success him the interest to him in factor in all his activities, the most others of his kind. The product of the women who had learned that mether the success. So, by many devious to turn the question upon the question that interested me. But it was fear-fully hard work, for this Man of Activities, and the product of the women who had learned that mether activities and dodges. I managed to turn the question upon the question that interested me. But it was fear-fully hard work, for this Man of Activities, and the product of the women who had learned that mether activities and dodges. I managed to turn the question upon the question that interested me. But it was fear-fully hard work, for this Man of Activities, and the product of the women who had learned that methed the success. So, by many devices the managed to turn the question upon the question that interested me. But it was fear-fully hard work, for this Man of Activities, and the product of the work for the work what they have lost.

Now during the last three years there has been a period of arsesion. Real workers have found it hard to make both ends set. But to the gamblers of the upper class, to those who live on the labor of others, there has been very little difference. It was possible to raise half a million dollars for a gambling fund and make no noise about it. If a tenth of that sum had been raised for a school, or one of the safe charities, there would have been a tremendous outcry of encouragement or wonder that so much money could be raised.

The reason is simple. During this period of depression capital is been prosperous. It has been getting fat returns from all directors, and no matter what labor suffered, capital did not suffer.

Another significant point is the way the capitalists who have been called before the investigating committee treated the majesty of the United States as embodied in one of its courts. Mr. Belmont treated it with open derision and was angered that they should have dared to call him. Whatever the working class might be,

have dared to call him. Whatever the working class might be, he, at least, was not prostrate before the courts. He stood right up and told them that they had no jurisdiction over his actions. He was at liberty to do as he pleased.

The others who might have told about the matter of this half million bribe fund were safely in Europe. No workingmen go to Europe when disease or process servers threaten. But this geographical immunity is also one of the prerogatives of the capitalist class. The members can conveniently be somewhere that the pro-

So this inquiry as a whole resolves itself into a very simple fair. Members of the capitalist class do not have to testify if my do not wish to.
