A WEEK-END round-up over the Egyptian crisis shows that South African opinion re-mains sharply divided. Progresmains sharply divided. Three times a week, on Mondays, Wednesdays and Fridays these unemployed workers queue outside the Unemployment offices to sign up and draw their benefits. Van-drivers, leather, furniture and clothing workers, teachers and clerks line the pavement of the Magistrate's Court in Johannesburg. Sometimes it takes from 3 to 6 weeks for the first payment to start—always the weekly drawings are but a fraction of the worker's previous carnings. Complaints by the trade union movement at the delay in payments, at the long distances many workers must travel three times weekly to sign on, always go unheeded. The Labour Department is deaf to any suggestions that will lead to an improvement in the administration of the Unemployment Insurance Act.

In a letter to the Mavor of Cape

"It is our belief that the implementation of the Group Areas Act

SWART'S NEW THREAT

T is not without significance that the Minister of Justice, Mr. C. R. Swart, has chosen this moment to forecast that "when the findings of the inquiry on Communist activity in the Union were released there would be startling revelations." The findings of the inquiry would be released shortly, he said speaking at Welkom last Friday.

What is this Commission of which Swart speaks? It is not a judicial commission, not an open, public commission, but an inquiry conducted behind closed doors by members of the Special Branch. Nobody can have any confidence in any "startling' report which this "commission" may produce.

At the same time, it would be dangerous to disregard the possibility that at any time Swart may strike again. He is more or less under an obligation to do so. During the last session of Parliament, to justify his terror raids of September, 1955, he announced that 200 people were about to be arrested on charges

of treason, sedition and what have you.

Not a soul has yet appeared in court on a charge of treason, or any other charge arising out of the raids, although over a year has passed since the raids took place. It is not beyond the bounds of possibility that Swart may consider no time so favourable as the present to redeem his pledge to Parliament. In the anti-Soviet, anti-Communist, anti-people hysteria whipped up by the daily press, he might hope to get away with it.

Progressives must be alert to the danger of a new wave of Swart raids and arrests. For although he almost invariably talks nonsense, Swart has been consistent in the viciousness with which he has always attacked the leaders of the progressive movement.

Way back in 1950 Swart tried to make South African spines chill with his scare stories about people who were ready to poison wells and blow up power stations. Outcome of those stories was the Suppression of Communism Act—even though no wells were ever poisoned or power stations blown up, and no details were ever furnished to confirm Mr. Swart's ridiculous allegations.

Later, Mr. Swart came out with the story that Communists ran schools for fire-bugs and that was the reason why there were so many mountain fires in the Western Cape during the summer—and at the same time he pushed through Parliament an amend-

—and at the same time he pushed through rathament an amendment tightening up the Suppression of Communism Act.

In other words, Swart doesn't spread all these stories for nothing. Though he has so far, throughout his career as Minister, not substantiated a single one of his fairy stories, he has nevertheless introduced legislation gravely crippling our freedoms, depriving trade unionists and others of their livelihood and enabling the Nationalist Government to launch a ferocious and sustained attack on the opponents of its apartheid policy.

We must not allow this process to continue any further. Swart's commission's report may be followed by further measures by the Government to smash the South African opposition. No doubt the Government is preparing a long string of restrictive laws for the next session of Parliament.

We, the people, must tell Swart we have had enough of his nonsense. The people want bread, not passes; the people want houses, not Section 10; the people want the Freedom Charter, not the Suppression of Communism Act.

Above all, the people refuse to be intimidated by Swart's wolf calls. They will fight harder than ever against any new attempts to take away their freedoms under cover of a campaign

Egypt's Resistance

First there was the unexpected strength of the Egyptian resistance, despite the odds against them. The jingo press had assured the world confidently that it would not take much more than a bark from

that it would not take interest in the British buildog to scatter Egyptian troops in panie. They were in for a surprise.

"A tougher battle than we thought," admitted the News Chronicle as the British battled in Port Said. And British brigade headquarters announced that the Marines were "finding things a bit sticky." As the French have learned in Indo-China and Algeria, a people fighting for its freedom is not easily crushed

people ingiting for its freedom is not easily closied. Secondly there was the unexpectedly strong popular opposition in Britain. Relying on a docile Labour Party—after all, it had stomached the Malayan war without difficulty—the Tories did not dream that their action would arouse the immense anger and opposition which it did, even in the ranks of right-

must have reckoned with—was the unanimous sup-port of the Afro-Asian nations for Egypt and their determination not to permit the imperialists to suc-ceed in their war of aggression.

Soviet Intervenes

And fourth, there was the Soviet Union's direct

n bringing the war to an end western press have placed the greatest importance on this

it as the decisive one.

"What has made the Prime
Minister change his mind? That Russia's warnings have some connection with the change seems highly probable," said the Manchester Guardian last week.

And the Paris correspondent of the London Times reported (Nov. 7):

"It was reliably learned here that the suddenne of the Allied decision was also due largely to the belief that Russia might intervene decisively to-morrow. This was the subject of urgent telephone calls today between Sir Anthony Eden and M Mollet. M Mollet is also believed to have been under strong pressure from the U.S. government to come to terms with the United Nations while there was still time with the United Nations w before the Russians acted."

A French government minister said, according to the News Chronicle:

"No one will believe that we did not give in to Russian threats—certainly no one in the Middle

Their Worry

This created an urgent worry for the French and British leaders—that by gaining the credit for ending the war in the Middle East, the Soviet Union would further enhance her prestige in Asia and Africa.

The Times openly expressed this fear.

"The cease-fire, in the opinion of some informed people, will have a dire effect upon French fortunes in North Africa . . . with the added disadvantage of allowing the Russians to pose as the saviours of Egypt and of the Moslem and Bandung Powers as

"The Russians would now have a chance to proclaim their intervention yesterday as a great victory for peace and a defeat for aggressors."

Hungary Issue

For this reason it was a matter of great urgency for the western powers to exploit to the utmost the Hungarian issue in order to switch the overwhelming pub-

"The sympathy expressed in so many quarters throughout France with the Hungarians is undoubtedly sincere, but it cannot be overlooked that it is in many cases taking a form which tends to thrust the discussion of the rights and wrongs of Anglo-French action in Egypt into the background."

False Analogy

The analogy between Hungary and Egypt is false: them permits. The Anglo-French aggression was directed against the Egyptian government; the Soviet assistance on the invitation of the Hungarian government.

• The Anglo-French forces invaded Egypt. The Soviet forces were stationed in Hungary with the recognised responsibility of protecting Hungary's independence and preventing her return to fascism.

Britain and France had no shred of legal right to invade; the Soviet armed forces were legally in Hungary in terms of the Warsaw pact.

● Most important of all—the issue in Egypt is between imperialism and national liberation; the issue in Hungary is between socialism and reaction as is made clear on our foreign news page.

ARAB COUNTRIES' PEACE APPEAL

MANKIND must be saved the catostrophe of a third world war developing from the Middle East crisis. The only way out is the unconditional withdrawal of all foreign, invading troops beyond the Egyptian borders.

This is the text of an urgent appeal broadcast to the peace movement throughout the world, through the World Peace Council, by the peace movements of Syria, Lebanon, Jordan, Iraq and

The South African Peace Council has released the text of this appeal in this country.

The appeal says: After the adoption by the Security Council of the six-point solution to the Suez crisis and while Egypt was preparing to take part in negotiations on October 29 in Geneva, the Israeli army treacherously attacked Egypt's borders, with the instigation and Collaboration of the British and French Government of the British and Fre

demanded an immediate cessation of hostilities, the condemnation of the plotting of the aggressors, and the unconditional withdrawal of all forces of aggression beyond Egypt's borders. The appeal adds that the World Peace Council has the historic obligation to take rapid decisions to prevent the transformation of the Middle East crisis into a world war, "which we Arab peace supporters have done so much to prevent along with the World Peace Council. Our people look to your decision on which depends our confidence, and the confidence of the world in Council."

The Two Philosophers

ONCE there were two philosophers who answered an advertisement in the newspaper and got themselves jobs as lighthous keepers on a lonely island way out in the middle of the Pacific Ocean.

They were the only human beings on the island and there was only one little house for them to live in. After they had been put ashore with all of their luggage, and the steamer had sailed away, they picked up their suit cases and started walking toward the house.

Although they were both philo-sophers, they had entirely different philosophies. Said one of them as philosophies, Said one or them as they walked along: "This is a lonely, god-forsaken looking place, but with my philosophy I am sure that I will be able to fit myself into it. I can accommodate myself to anything in time. It is merely a matter of adjusting one's mind to

"It's all very well for you to go on raving about your Utopian ideas," said the conservative philosopher, "But just try to put them into practice. Suppose the tree falls on you? Suppose you get splinters in your fingers? Suppose you miss the nail with the ham-mer and hit your thumb? You radicals never stop to consider those things."

THE SMOKE AS_the smoke cleared in

Hungary last week, it became easier to see the true pattern of the tragic events in that country.

What the daily press has done its utmost to conceal—the fact that the Hungarian revolt under-went a complete change of character from its starting-point as a workers' protest at the slowness of the pace of government reform, into a completely counter-revolutionary mob frenzy led and ex-ploited by the worst enemies of progress — has now emerged clearly.

Anti-Semitism

Writing to the New York Post from Budapest on November 2, Seymour Freidin, a correspondent hostile to the Soviet Union, com-

mented:
"A disturbing feature has ap-"A disturbing feature has appeared here to mar the heroic revolution . . . Anti-Semitic speeches were uttered Wednesday night in some districts of Budapest, punctuated by inflammatory cries of 'Down with the Jews.' I learned yesterday that the surgical staffs in at least two hospitals which were all without rest firmumbant worked without rest firmumbant. n at least two hospitals which worked without rest throughout the fighting has been forced to leave because as Jews they had been subjected to anti-Semitic de-nunciation."

And photographs from Hungary published in some western papers show that the counter-revolutionaries committed atrocities of the sort associated with fascist and nazi terror. The American Nationazi terror. The American Natio-nal Guardian showed a picture of a man, described as a political policeman, hanging by his heels after having been beaten to death, his back a bloody pulp. Time magazine almost gloated over its photographs of "lynched Stalin-ists."

Riding The Tiger

Imre Nagy, who had come into power as the revolt began, de-cided, in the metaphor of one cided, in the metaphor of one correspondent, to ride the tiger by holding on to its tail. With vacil-lating indecision he tried on earla after another. When Soviet troops first went into action at the re-quest of the Hungarian govern-ment Nagy—at the very least— tacitly associated himself with that request, when, as head of gov-ernment, he announced that it had been made, without giving any inbeen made, without giving any indication at all that he opposed it.

Only subsequently did Nagy deny that he had called for Soviet

aid and ascribe responsibility to his fellow cabinet members Gero

nis reliow caoner memoers Gero and Hegedus.
Nagy's views changed swiftly with each new demand. But nei-ther his concessions nor his pleas brought an end to the rampaging mobs, evidence enough that the

mobs, evidence enough that the counter-revolution was no longer concerned with the original demands made by the workers at the time the trouble began, the control of the c the revolutionaries that they may man all their demands and asking them why they were fighting on.

Soviet Action

The Soviet Union acceded to Nagy's request that its troops should leave and Soviet soldiers at once began to pull out of Buda-

pest.

But just as every other concession to the right had served merely to increase the appetite of the extremists, the Soviet withdrawal too brought no end to the grawal too prought no end to the chaos. Soviet tanks were attacked as they withdrew. Inside Budapest mobs began to loot, and to hunt down Communist party officials

The same day Joseph Cardinal Mindszenty returned from jail to Budapest, after his release by counter-revolutionaries. The West confidently predicted that the Car-dinal would head the new govern-

In Budapest Mindszenty made no move to check the terror that raged in the country.

WHO IS MINDSZENTY?, THE MAN UPON WHOM THE HOPES OF THE WESTERN GOVERNMENTS RESTED?

GOVERNMENTS RESTED!

Mindscenty was convicted in February 1948 of treason, currency speculation and other crimes on the basis of his own confession. And Mindscenty's whole history and character show that there was mistake about this trial.

Mindscenty's politics had always been those of the extreme right, and in Hungary that is VERY fartifyld. In short, the Catholic Cardinal was (and almost certainly is As early as 1919 Mindscenty went on record with a press statement: "The press is in the hands of the Jews. And during the Second World War, of course, Mindszenty was an active anti-Soviet propagandist while Hungarian troops marched side by side with the Nazi in-

vaders.

This is the man the western powers would like to see as head of government in Hungary.

As the Soviet troops pulled out of Hungary the forces behind Mindszenty broke loose in all the horror of unrestrained counter-revolutions with the second counter-revolution with the secon lutionary violence.

The Soviet troops turned back.

Togliatti's Statement

And to those who condemn this action as "aggression," Palmiro Togliatti, Italian Communist Party leader put this question: "What else COULD the Soviet Union

The Soviet Union left Hungary The Soviet Union left Hungary in the hove that its withdrawal would assist the Hungarians in solving their problems, said Togliatti, but instead the USSR "found itself faced with anarchy and White Terror; with a government which changed its composition than the time is the development. three times in two days, each time moving further toward reaction, and which refused to take action against the armed terrorists and, on the contrary, incited them with unbelievable declarations made by the Prime Minister himself.

unbelievable declarations made by the Prime Minister himself.

"Meanwhile there was the influx of armed bands, obviously facist, from abroad, and the formation with the old symbols, with the old black banner, with 'blg chiefs' already aspiring onely to the position of dictator that was now waiting for them."

Togliatti quotes eye-winess accounts from the Italian press of the fascist terror, including that that the rows of Communist workers hung up by their feel from lamp-posts in the maistreets of Budapest were a horrifying spectacle, but one which he found pleasing."

White Terror

White lettor

There should not be protests at the fact that the Soviet Union returned under these conditions, says Togliatti. In fact protests would have been more to the point if the Soviet Union had not intervened, "and with all its strength this time, in order to bar the way to the White Terror and nip faction in the boud, in the way to the White Terror and nip faction in the boud, in the shall united all peoples in defence of civilisation.

da of our adversaries, may waver and take the wrong road. They will realise their mistake later. "If Hungary had been placed at the mercy of a Government of open reaction, the frontier incidents, the provocation, all that preparatory work for an armed conflict, which we know so well, would have started.

"And precisely at such a moand precisely at such a mo-ment ought we to condemn the Soviet Union, ask it to give a free hand in Hungary to the White Terror and to the warmongers, condemn it if it does not listen to us?" said Togliatti.

Marshal Tito also declared that the Soviet intervention at this stage had been necessary to prevent chaos. "It was clear that a massacre and civil war would massacre and civil war would break out in Hungary in which socialism might have been buried and in which a third world war might have broken out." he said. Describing the counter-revolu-tionary terror, Tito said that peo-ple wearing light-brown shoes

But Tito criticised the Hungarian government for calling in Soviet troops at the outset of the disturbances. He felt that this was one of the factors which enabled the reactionary elements to gain control of the revolution. The call for Soviet troops, said Tito "in-furiated the people and so it came to a position where the Commu-nists found themselves, against their will, with the reactionary elements" and the right-wing be gan to dominate the uprising.

Janos Kadar, head of Hungar new government, was hailed by the Western press as an "indepen dent" Communist when he was first appointed by Nagy to the cabinet. Since then there has been a drastic change in the press atti-tude. Kadar is no longer "inde-pendent" but a "Kremlin pup-

There is no doubt that the Kadar government faces immense difficulties in the immediate future. But clear above everything else is this—that a government of the Mindszentys, the anti-semites, the fascists and lynchers would bring no happiness and no inde-pendence to Hungary. Her future must lie in friendship and co-qpe-ration, as an independent partner, with the Soviet Union and the camp of socialis

INDONESIA'S PRESIDENT OCTOBER REVOLUTION

2nd of two articles by Dr. Sukarno

Imperialism in Asia is two-faced: political and economic. According to the laws of dialec-tics, it breeds resistance and a struggle of the peoples for natiostruggle of the peoples for natio-nal independence and social jus-tice. Political imperialism deprived the Asian peoples of indepen-dence, and thereby called forth their resistance and their struggle for independence.

Called Forth Resistance

Economic imperialism bred injustice and poverty, and thereby called forth resistance and a struggle of the peoples for a just and prosperous society. Political imperialism deprived the Asian peoples of national independence, and thereby evoked resistance and a struggle for a just and prosperous society. Economic imperialism,, which is based on the capiism,, which is based on the capi-talist system, engendered poverty and privation in the colonial countries of Asia, and thereby called forth resistance and an anti-imperialist, anti-capitalist struggle, a struggle for the ideals of social justice. As a result, Asian nationalism is stamped with reatures of social justice, or so-features of social justice, or socialism.

It is to all this that Asian nationalism owes its fundamental features. It is not the West-Euro-pean, chauvinistic type of nationa-lism, whose aim is self-elevation over other nations. Asian nationalism came into being as a result of oppression on the part of political and economic imperialism.

It is, essentially, a sacred force, whose adherents strive for the independence of their country, the independence of a definite nation natependence or a definite nation as a definite group of people bound by a common destiny and set within the world common-wealth of nations. Nor is this all. Asian nationalism is infused with love for all humanity; it imparts to every nation the consciousness that it is a part of humanity. "My nationalism means humanism," one Asian nationalist leader has aptly said.

Russian Revolution

Apart from the peculiar histori-cal development of each nation, the struggle of the Asian peoples for national independence and for a just and prosperous society is

also influenced by the struggle waged by other nations. During the struggle for the overthrow of the struggle for the overthrow of Western colonial power, a revo-lution broke out in the eastern part of Europe—the Russian Re-volution of October 1917. This by what John Reed called the "ten days that shook the world," had as its ideal the building of a society founded on social justice and it led to the establishment the great Soviet Union.

Russian people demonstrated to the Asian peoples who were strugthe Asian peoples who were strug-gling against colonial oppression that in the midst of the cruel rule of feudalism, in this case the tsarist autocracy, the working class could overthrow this strong power and build the new society of which they dreamed.

Asians Amazed

This supreme historical development outside the Asian continent amazed the Asian peoples who launched a struggle for national

auunched a struggle from an analadependence and strugther determined and a strugther determined and with the utmost persistence. After the victory of the October Revolution in Russia, the struggle of the Asian peoples from national independence and against oppression flared up with new force, it was now better organised, and its aim clear and irreconclable: independence, and immediately.

Independence is a bridge, indis-pensable for the crossing to the shore of happiness. Independent, shore of happiness. Independent, we may labour in freedom, without interference from other nations, we may build a society corresponding to our ideals, that is, a just and flourishing society in which all may enjoy the fundamental human rights.

Inspired

Thus, inspired by the October Revolution in Russia, the Asian peoples set to work with even peoples set to work with even greater energy to build up their national forces so as to be able, at the fitting moment, to launch the attack on colonial rule. That

moment came at the end of World War II, when the power of the imperialists had been severely undermined. After World War II, independent states arose in Asia. Their birth was the reward for both political struggle and armed struggle.

Asia is now in the stage of developing its own national economy. After the national revolutions in their countries, the Asian peoples have begun, on the wreckage of colonial power and the ruins of material values, to build a new society capable of ensuring their happiness. In building this society, they pool their experi-

Very valuable to them, too, is Very valuable to them, too, is the experience of the Soviet Union, which destroyed the old feudal-agrarian society and built a society based on a high level of the Soviet Union's experience in construction is valuable and may be borrowed as an example. After thorough analysis and adjustions of each characteristic conditions of each Ashan country, conditions which Asian country, conditions which result from its national character and historical development, the construction experience of the Soviet Union may undoubtedly be usefully applied in the Asian countries.

Struggle Continues

Asia is continuing her struggle, for her ideals of both political and economic independence have not yet been fully realised. Very encouraging, in this connection, is the sympathy and attention with which the Soviet people regard this still unfinished struggle of the Asian peoples.

the Asian peoples.

All the peoples of the world aspire to happiness. But to achieve this aim they must work strenu-ously and persistently. They want ously and persistently. They want peace, because war would destroy the fruits of their labour, which came so hardly. More, wa which sation. All the peoples of the world must therefore work togenerate the more than the people of the world must therefore work togenerate the people of friendship. That sumosphere of friendship. That sumosphere of the mutual distrusts, for, essentially, all becole are alike. mutual distrusts, for, essentially, all people are alike.

Then let us march forward; let

us work together to strengthen in-ternational friendship and cordial comradeship in order to build a peaceful, just and prosperous so-clety for all the nations of the world.

FAREWELL KEITH

IT is indeed a great pleasure to join the thousands of cricket fans who bid farewell to the great Keith Miller, who last week an-nounced his retirement from cricket. The 36-year-old Keith was vice-captain of Australia during the tour of England and India this

year.
The cricket world considers
Keith Miller the greatest allrounder in this noble game. Not
only was he an aggressive batsman but he was the type that
made many a good bowler appear less dangerous. As a bowler he was fast and tricky. And he was a brilliant fieldsman. Perhaps his

a brilliant fieldsman, Perhaps his greatest asset was his stamina. Yes, Miller was a complete cricketer. A great personality.
Miller has been in first-class cricket for nearly 20 years. In his first match for Victoria he scored a century. His debut in test cricket was against New Zealand in 1945. 46. He represented Australia in all the five "victory" tests in 1945 against England. Miller and Lind-wall are regarded as one of the most devastating opening attacks
